Annual and weekly publishing schedules for selected statistics of the Deutsche Bundesbank can be downloaded from the above-mentioned internet address. The relevant data is published on the internet.

Reproduction permitted only if source is stated.

This Annex provides an English translation of the headings and explanatory notes to the data for 2004 contained in the German original, which is the sole authoritative text.

The German Supplement *Zahlungsbilanzstatistik* is published at monthly intervals by the Deutsche Bundesbank, Frankfurt am Main, by virtue of section 18 of the Bundesbank Act. It is available to interested parties free of charge.

Further statistical data, supplementing the *Monthly Report*, are to be found in the following supplements.

| | |
|--|-----------|
| <i>Banking statistics</i> | monthly |
| <i>Capital market statistics</i> | monthly |
| <i>Seasonally adjusted business statistics</i> | monthly |
| <i>Exchange rate statistics</i> | quarterly |

Updated figures of selected statistics are available on the internet. For a small fee to cover costs, a file which is updated monthly and contains approximately 40,000 time series published by the Bundesbank can also be obtained on magnetic tape cassette or ZIP disk from the Division Statistical Data Processing, Mathematical Methods.

Notes

Territory

The domestic market comprises the economic territory of the Federal Republic of Germany. All other countries, including those participating in European monetary union, are foreign markets.

From July 1990 the balance of payments statistics also include the external transactions of the former GDR. The former GDR is covered by the external stock statistics as follows: in the case of the external positions of banks, from June 1990; in the case of the external positions of enterprises, from July 1990; and in the case of Germany's external asset and liability position, from December 1990.

NB

In the tables, all the figures for the reporting period up to the end of 1998 are shown in Deutsche Mark, and those for the reporting period from the beginning of 1999 in euro.

The latest figures must in all cases be regarded as provisional. Subsequent corrections appearing in the following issue are therefore not specially marked.

Abbreviations and symbols

| | |
|-----|--|
| p | provisional |
| r | revised |
| s | estimated |
| ... | Data available at a later date |
| . | Data unknown, not to be published or not meaningful |
| 0 | Less than 0.5 but more than nil |
| - | nil |
| / | no data because the numerical value is not sufficiently reliable |

Discrepancies in the totals are due to rounding.

Revision

Since January 2001 travel statistics for the balance of payments have been based on a new household sample. It became necessary to change to a new method of data collection because the quality of the data previously used had declined significantly as a result of the introduction of the euro banknotes and coins on 1 January 2002 or because the data sources themselves ceased to exist. The changeover also made it necessary to revise travel data for earlier periods. Further details are given in the methodological notes on page 31.

I Balance of payments

1 Major balance of payments items

Current account, capital transfers and financial account (where statistically recorded)

Current account 1

Zeit = Period

1 Foreign trade and services are recorded on the basis of exports (fob)/imports (cif), ie including the freight and insurance costs of imports. For figures based on exports (fob)/imports (fob), see Table 2. – 2 Special trade according to the official foreign trade statistics (source: Federal Statistical Office). – 3 Figures from the start of 1993 subject to considerable

uncertainty owing to changes in the method of data collection for foreign trade. – 4 Excluding the freight and insurance costs included in the cif import figure. – 5 A new definition of direct investment has applied since 1996. (For details see Table 9 (c).) – 6 Long-term: original maturity of more than one year or unlimited. Short-term: maturity of one year or less. – 7 Increase: –. From 1999, new definition of foreign reserves.

2 Current account, by group of countries and country *

| | | | | | | | | in Asia and Oceania |

* Up to 2000, the main sources of the reports on foreign travel payments were credit institutions and travel companies. Such payments are partly broken down by currency, rather than by country visited, and do not fully reflect travellers' payments in Deutsche Mark banknotes; moreover, they include payments not counted as travel payments, eg currency carried by foreign workers returning to their home countries. With the aid of information from the travel and transport statistics and from additional surveys, the payments recorded are approximately attributed to the countries of origin and destination and are supplemented by the missing payments in Deutsche Mark banknotes while money flows not counted as foreign travel are eliminated. Even so, for a number of countries the results are only approximations. From 2001, expenditure is based on house-

hold samples. Owing to the increase in sampling error in the case of country results, quarterly and annual figures are available only for major destination countries and country aggregates. – **a** Countries attributed to individual groups of countries on the basis of the latest position. Exception: euro-area member states classified on the basis of the current position. – **1** Figures subject to considerable uncertainty. – **2** Member states up to end-2000 excluding Greece and from January 2001, including Greece. – **3** Including French Guiana, Guadeloupe, Martinique, Mayotte, Réunion and St Pierre and Miquelon. – **4** Greece joined the euro area on 1 January 2001. – **5** Including Canary Islands, Ceuta and Melilla. – **6** Including Cyprus.

4 Service transactions with non-residents

(c) Travel, by group of countries and country (provisional quarterly figures) *

€ million

| Group of countries/country ^a | 2001 | 2002 | 2003 s | | | | | |

Zeit = Period

* Transfers in connection with the EU budget, which are summarised here, mainly comprise current transfers. The refunds of collection costs constitute receipts from services in the balance of payments; payments from the Regional Fund and the Guidance Fund of the EAGGF are included under capital transfers. – **1** Excluding special monetary compensation for exports to the United Kingdom and Italy. The monetary compensatory amounts for these countries' imports from other EU member states are paid out via the exporting country and not, as is normally the case, by the importing country. – **2** Including sugar levies. – **3** Additional EU receipts for the residual financing of the EU budget; they are calcu-

lated on the basis of the German share in the total GNP of the EU. – **4** Primarily producer co-responsibility and super levies for milk, milk products and cereals. – **5** The differences between the payments by the EU to the Federal Government (col 8) and the payments by the Federal Government to domestic beneficiaries (cols 9 to 11) are mainly due to temporal shifts in the execution of payments. – **6** Refund of collection costs at 10% between 1988 and 2000; 25% from 2001 customs duties and levies in the context of the agricultural policy; back payments are included in August 2002. Since 1988 the member countries have retained this sum when transferring capital resources to the EU. – **7** Including direct payments by the EU to final beneficiaries.

Zeit = Period

* Direct investments are financial operations with German and foreign enterprises in which the investor directly holds 10% or more of the shares or voting rights (up to end-1989 25% or more, from 1990 to end-1998 more than 20%); including branches and permanent establishments. Up to end-1995, direct investments comprise capital shares, including reserves, profits and losses carried forward, and long-term loans. Direct investments also include all investments in real property. From 1996, short-term direct lending and trade credits have also been included. Moreover, the definition of direct investment is changed by the

fact that direct investors' borrowing from their subsidiaries is recorded as repayments of funds provided by direct investors. The definition according to the balance of payments is broader than that of the *Vermögensanlagen zur Schaffung dauerhafter Wirtschaftsverbindungen* published biannually by the German Economics Ministry. – 1 Changes in profits and losses carried forward and in revenue reserves. Estimated on the basis of the stocks of direct investment; contrary to the practice in earlier publications, they are assigned to the year of their emergence. – 2 Mainly real property.

Stand am Ende des Berichtszeitraums = End of reporting period
Forderungen und Verbindlichkeiten insgesamt = Assets and liabilities, total
Fremdwährung = Foreign currency

Footnotes (a)

* Results of the reports on the monthly external position of banks. The reports of "Banks in Germany" comprise the reports of all bank offices established in Germany (excluding the Deutsche Bundesbank), ie for German banks with a foreign branch office network, only partial reports with data on their branch offices in Germany are included; conversely, reports of legally dependent branches of foreign banks in Germany are

taken into account. From December 2002, the previous exemption limit (€10 million) ceased to apply. The results of the external position reports of the foreign branches and foreign subsidiaries are shown separately; the concept "non-residents", as used there, also includes the country of domicile of the foreign branches or foreign subsidiaries (see Tables II.2 (a) to (d), Tables II.3 (a) to (d) and Table II.4). Distinction by maturities: short-term = payable on demand and with an agreed maturity or period of notice of one year or less; long-term = with an agreed maturity or period of notice of more than one year. Statistical increases and decreases are not eliminated; assets and liabilities in foreign currencies are converted at the euro reference rates on the reporting date. – **1** Including banknotes and coins in foreign currencies. – **2** Excluding foreign-owned bearer bonds outstanding.

Stand am Ende des Berichtszeitraums = End of reporting period
Aktiva = Assets

Footnotes (a) and (b)

* From 1949, the asset and liability position is shown as a general survey; from 1984, by currency (Deutsche Mark or euro/foreign currency) and by group of countries (classification of countries as in the year in question). As a rule, valuations are based on market prices; the positions denominated in foreign currencies therefore take due account of foreign exchange rates, and the securities positions also take account of stock market prices. Up to end-1998, the external position of the Bundesbank is consistent with the valuations shown on the annual balance sheet (Table II, 6); from 1999, the foreign reserves are valued at market prices (Table II, 7). The figures for equity capital and loans in the context of direct investment are based mainly on the balance sheet for investment objects. –

Passiva = Liabilities
Saldo = Balance

1 Shares of 10% or more in the capital of foreign or German enterprises (from 1999). – **2** Book credits, borrowers' note loans, bank balances, assets acquired by way of assignment, etc. – **3** From end- 1997, separate presentation of direct investment credit, due account being taken of lending of foreign subsidiaries to their German parent companies or of lending of German subsidiaries to their foreign parent companies (reverse investment). – **4** Liabilities: including bond issues by the Federal Post Office and, up to 1993, bond issues by the former Federal Railways, which are included in the Federal Government's indebtedness from 1994. – **5** Liabilities: borrowers' note loans. – **6** Without separate computation of direct investment credit. – **7** Opening balance sheet in euro as at 1 January 1999.

Explanatory notes

Balance of payments*

Contents of the balance of payments

The German balance of payments is a systematic presentation of all economic transactions between residents and non-residents in a given period. The breakdown of the balance of payments reflects the economic character of the individual transactions.

Important sections are

- 1 Current account
- 2 Capital transfers
- 3 Financial account
- 4 Change in the Bundesbank's foreign reserves

The current account shows all movements of goods and services to and from non-residents as well as factor income and current transfer payments. In contrast to the current transfers, capital transfers comprise those unrequited transfers which do not directly affect the income or expenditure of the countries concerned (eg debt remission). The balance on financial account and the change in the foreign reserves of the Bundesbank encompass all transactions which change international financial positions (eg credit balances, securities and participating interests).

The sub-sectors of the balance of payments are inter-related. If the current account and capital transfers are taken together, a surplus is associated with a net increase in the assets or a net decrease in the liabilities; a deficit leads, conversely, to a net increase in liabilities or a net decrease in assets vis-à-vis non-residents. The breakdown of the balance on financial account and of the change in the foreign reserves of the Bundesbank indicates which of Germany's external assets and liabilities have increased or decreased.

The balance on financial account and the change in the Bundesbank's foreign reserves, taken together, are, by definition, equal to the balance on current account plus the balance on capital transfers. In practice, however, there is no such correspondence, because transactions

* An account of the methodological changes in the balance of payments concept which were introduced after December 1994 was published in Deutsche Bundesbank, Changes in the methodology of the balance of payments, *Monthly Report*, March 1995, p 33-43.

cannot always be correctly ascribed to the respective periods and because there are gaps in the statistical coverage of all sub-sectors (other than the foreign reserves and other assets and liabilities of the Bundesbank). All discrepancies are reflected in the "Balance of unclassifiable transactions".

From July 1990 the German balance of payments also includes the transactions of the former GDR with non-residents.

Sources and legal bases

The Bundesbank is required to draw up the balance of payments. The primary sources and legal bases of the data are as follows.

1 Merchandise transactions

Special trade as in the foreign trade statistics of the Federal Statistical Office, supplemented by, among other things, warehouse transactions. The legal bases of the foreign trade statistics are Council Regulation (EEC) No 3330/91 on the statistics relating to the trading of goods between Member States, Council Regulation (EC) No 1172/95 on the statistics relating to the trading of goods by the Community and its Member States with non-member countries and the Act on statistics on cross-border trade of 1 May 1957 (*Gesetz über die Statistik des grenzüberschreitenden Warenverkehrs*).

2 Services, factor income, current and capital transfers, portfolio investment, long-term components of direct investment and other long-term financial transactions

Statistics of the Bundesbank on external payments (Foreign Trade and Payments Act (*Außenwirtschaftsgesetz*) of 28 April 1961, and supplementary provisions, especially sections 59 *et seq* of the Foreign Trade and Payments Regulation (*Außenwirtschaftsverordnung*)), supplemented by estimates.

3 Short-term components of credit transactions, foreign reserves and other assets and liabilities of the Bundesbank

Statistics of the Bundesbank on the external position of banks (section 18 of the Bundesbank Act of 26 July 1957 and supplementary provisions) and on short-term external assets and liabilities (financial operations and

trade credits, section 62 of the Foreign Trade and Payments Regulation) of domestic non-banks. The change in the foreign reserves and other assets and liabilities of the Bundesbank is computed from internal records of the Bundesbank.

Frequency and publication of the figures

The German balance of payments is published monthly in press releases of the Bundesbank, in its *Monthly Report* and in Statistical Supplement 3 to its *Monthly Report, Balance of payments statistics*; merchandise trade and services are computed on the basis of "exports fob/imports cif", ie imports are shown at their value at the German border. Only quarterly and annual figures are available in the customary international definition "exports fob/imports fob" (imports are shown at their value at the border of the country of origin). These figures are published in Tables I.2 and I.3 (a) of the Statistical Supplement, in the appendix which appears annually (usually in July) and in the Bundesbank's *Annual Report*.

External stock statistics

The transaction statistics of the balance of payments (Tables I.1 to 9 of this Supplement) are augmented by stock statistics on the external assets and liabilities of banks in Germany, their foreign branches and their foreign subsidiaries, external assets and liabilities of enterprises in Germany arising from financial operations and trade credits, and the external position of the Bundesbank. Together with the statistics on the level of direct investment and supplemented by some additional information, these provide the basis for computing Germany's external asset and liability position. This, being a survey of assets and liabilities at a specific point of time, corresponds to the flow account of the balance of payments. The balance on current account shows to what extent current external transactions change the stock of external assets and liabilities. In addition, the stock is also affected by capital transfers and by changes in value not due to transactions.

Germany's external asset and liability position is based mainly on stocks reported. Data on assets and liabilities in the form of portfolio securities, however, are partly obtained from cumulative transactions in the absence of original sources. The informational value of the securities

components of the stock statistics and of the corresponding flow account is impaired by the globalisation of securities transactions. The positions of private non-banks cannot always be ascertained with the desired accuracy from the existing reporting system. As not all transactions conducted abroad are reported, the value of foreign securities held by residents (assets) is probably too low. On the other hand, the holdings of domestic securities ascribed to non-residents (liabilities) in the past few years may possibly be too high since the figures on purchases by non-residents include orders from residents placed abroad. (See also Deutsche Bundesbank, Revenue from and economic implications of the tax on interest income, *Monthly Report*, January 1994, pages 43-55.)

The results of the stock statistics are printed in Tables II.1 to 7 of this Supplement. Between the introduction of this survey in 1984 and June 1990 the external assets and liabilities of the foreign subsidiaries of German banks comprised the positions vis-à-vis the former GDR. The stock statistics also include, from June 1990, the external assets and liabilities of banks in the former GDR and, from July 1990, the external assets and liabilities of enterprises in the former GDR. Germany's external asset and liability position includes the external assets and liabilities of banks and enterprises in the former GDR from December 1990.

Revision of travel statistics

Since January 2001 a new method has been used to collect travel data for the balance of payments and this has necessitated revising the data for previous years. It should be noted that the effect on expenditure is greater than that on income. The new calculation method became necessary because the quality of the data that had been used previously for estimating travel declined significantly as a result of the introduction of the euro banknotes and coins on 1 January 2002 or because the data sources themselves ceased to exist.

In the past, travel was estimated indirectly on the basis of payments for travel made through banks and credit card companies and credit transfers by tour operators. Where available, information from partner countries on the sale and purchase of D-Mark banknotes was included in the

estimation. The introduction of euro banknotes and coins led to a considerable information gap, especially in the case of the euro-area countries. This gap is now being closed by a direct survey of travellers based on a household sample. The survey covers travel and associated expenditure by German residents. It has been used consistently since the start of 2001 in order to enable at least a full year's results under the new method to be compared with the figures obtained under the previous method and to allow a quality check to be carried out. The expenditure determined for 2001 by the household survey exceeded the previous figure by more than € 6 billion.

While the direct survey yielded acceptable figures on travel expenditure, the situation with regard to travel-related income is less satisfactory. There is no substitute for the lost information on the use of cash. Only data on payments made by ec cards and credit cards and by credit transfer can now be used to obtain figures for receipts from the euro-area countries. These data, together with assessments of possible changes in payment behaviour, are used to compute total travel-related income. The corresponding data from important partner countries are also taken into account. With regard to income, the annual revision for 2001 showed an increase of more than € 1 billion.

In order to avoid statistical breaks caused by the change-over to the new method, country-specific or region-specific factors which apply to earlier years are calculated at 2001 values, ie at those of the "link" year. As the first results of the household sample are not available until five months after the reporting period at the earliest, the results at the current margin are based on ARIMA estimates.

For some countries and groups of countries, the estimated figures for travel-related receipts and/or expenditure are subject to considerable uncertainty and therefore unsuitable for publication. Where travel constitutes a major element of the services account or the current account, the aggregates for the countries and groups of countries concerned cannot be published either.

Further clarification is provided in Deutsche Bundesbank, German balance of payments in 2002, *Monthly Report*, March 2003, pp 53-67.

*) Bis 2000 stammen die Meldungen über Zahlungen im Auslandsreiseverkehr im Wesentlichen von Kreditinstituten und Reiseunternehmen. Sie sind zum Teil nach Währungen statt nach Reiseländern gegliedert und reflektieren Zahlungen von Reisenden in DM-Noten nur unvollständig; außerdem enthalten sie nicht zum Reiseverkehr rechnende Zahlungen, z.B. Bargeldmitnahmen von Gastarbeitern in ihre Heimatländer. Mit Hilfe von Informationen aus der Reise- und Verkehrsstatistik und aus zusätzlichen Erhebungen werden die gemeldeten Zahlungen schätzungsweise den Herkunfts- und Zielländern zugeordnet und um fehlende DM-Noten-Zahlungen ergänzt, während nicht zum Reiseverkehr rechnende Geldbewegungen eliminiert werden. Gleichwohl sind die Ergebnisse für eine Reihe von Ländern

nur Näherungswerte. Ab 2001 werden auf der Ausgabenseite die Stichprobenergebnisse einer Haushaltsbefragung genutzt. Aufgrund des Anstiegs des Stichprobenfehlers bei Ländereinzelergebnissen stehen Quartals- und Jahresergebnisse nur noch für wichtige Reiseausgabenländer und Länderaggregate zur Verfügung. — a Zugehörigkeit der Länder zu den einzelnen Ländergruppen nach dem neuesten Stand. — 1 Ergebnisse mit größerer Unsicherheit behaftet. — 2 Einschl. Französisch-Guayana, Guadeloupe, Martinique, Mayotte, Réunion und St. Pierre und Miquelon. — 3 Der Beitritt Griechenlands zur EWU erfolgte am 1.1.2001. — 4 Einschl. Kanarische Inseln, Ceuta und Melilla. — 5 Bis Ende 2002 einschl. Guernsey, Jersey und Insel Man.

* Bei den Leistungen im Rahmen des Haushalts der EU, die hier zusammengefasst dargestellt werden, handelt es sich überwiegend um laufende Übertragungen. Die Erstattungen von Erhebungskosten stellen in der Zahlungsbilanz Dienstleistungseinnahmen dar; Leistungen aus dem Regionalfonds und dem Ausrichtungsfonds im Rahmen des EAGFL sind bei den Vermögensübertragungen erfasst. — 1 Ohne den besonderen Währungsausgleich bei

der Ausfuhr nach Großbritannien und Italien. Die Währungsausgleichsbezüge für Einfuhren dieser Staaten aus anderen EU-Ländern werden über den ausführenden und nicht wie sonst üblich über den einführenden Mitgliedstaat ausbezahlt. — 2 Einschl. Zuckerabgaben. — 3 Zusätzliche Einnahme der EU zur Restfinanzierung des EU-Haushalts; sie wird nach dem deutschen Anteil am BNE der EU bemessen. — 4 Überwiegend Erzeugermit-

* Als Direktinvestitionen gelten Finanzbeziehungen zu in- und ausländischen Unternehmen, an denen der Investor 10 % oder mehr (bis Ende 1989 25 % oder mehr, von 1990 bis Ende 1998 mehr als 20 %) der Anteile oder Stimmrechte unmittelbar hält; einschl. Zweigniederlassungen und Betriebsstätten. Bis Ende 1995 umfassen die Direktinvestitionen Anteile am

Kapital einschl. Rücklagen, Gewinn- und Verlustvorträgen und langfristige Kredite. Als Direktinvestitionen gelten auch alle Anlagen in Grundbesitz. Ab 1996 werden auch kurzfristige Finanzkredite und Handelskredite einbezogen. Zudem ändert sich die Definition der Direktinvestitionen dadurch, dass die Aufnahme von Krediten der Direktinvestoren bei ihren Töchtern als

* Ergebnisse der Meldungen über den monatlichen Auslandsstatus der Banken. Die Meldungen von „Banken in Deutschland“ umfassen die Meldungen aller in Deutschland ansässigen Bankniederlassungen (ohne Deutsche Bundesbank); das bedeutet: von deutschen Banken mit Auslandsfilialnetz

sind nur Teilmeldungen mit Angaben über ihre Niederlassungen in Deutschland enthalten, während andererseits Meldungen von in Deutschland ansässigen rechtlich unselbständigen Niederlassungen ausländischer Banken mit einbezogen werden. Ab Dezember 2002 Wegfall der bisherigen Meldefreigren-

* Die Angaben stammen aus der halbjährlichen OTC-Derivatestatistik der Bank für Internationalen Zahlungsausgleich (BIZ). Zu dieser Statistik berichten rund 60 marktführende Banken (auf Konzernbasis, d.h. einschließlich ihrer Filialen und Töchter) mit Sitz in den G 10 – Ländern; auf diese Institute entfällt ein Anteil von mehr als drei Vierteln des globalen OTC-Marktes in De-

riven. Aus Deutschland nehmen an der Erhebung 7 im derivativen Geschäft aktive Banken teil. Erfasst wird der Stand der offenen OTC-Kontrakte jeweils zum Ende Juni und Ende Dezember. — 1 Ohne die von der BIZ geschätzten „anderen“ Kontrakte. — 2 Outright Forwards und FX-Swaps, Währungs-Swaps und Währungs-Optionen. — 3 Forward Rate Agreements,

* Der Vermögensstatus wird ab 1949 als Gesamtübersicht, ab 1984 nach Währungen (Deutsche Mark bzw. Euro / Fremdwährung) und nach Ländergruppen (Zugehörigkeit der Länder nach dem jeweiligen Stand) aufgestellt. Maßgebend für die Wertansätze sind in der Regel Marktpreise; bei den Positionen in Fremdwährung werden also die Devisenkurse und bei den Wertpapierpositionen zusätzlich die Börsenkurse berücksichtigt. Die Aus-

landsposition der Bundesbank entspricht bis Ende 1998 den Wertansätzen der Jahresbilanz (s. Tab. II. 7), ab 1999 sind die Währungsreserven zu Marktpreisen bewertet (s. Tab. II. 8). Die Werte für das Beteiligungskapital und für die Kredite im Rahmen der Direktinvestitionen beruhen im Wesentlichen auf den Bilanzen der Investitionsobjekte. — 1 Anteile am Kapital ausländischer bzw. inländischer Unternehmen von 10% oder mehr (ab 1999). —
