Reproduction permitted only if source is stated.

Annual and weekly publishing schedules for selected statistics of the Deutsche Bundesbank can be downloaded from the abovementioned internet address. The relevant data are published on the internet.

This Annex provides an English translation of the headings and explanatory notes to the data contained in the German original, which is the sole authoritative text.

The Statistical Supplement Balance of payments statistics is published at monthly intervals by the Deutsche Bundesbank, Frankfurt am Main, by virtue of section 18 of the Bundesbank Act. It is available to interested parties free of charge.

Further statistical data, supplementing the Monthly Report, are to be found in the following Supplements.

|                                  |                  |
|----------------------------------|------------------|
| <i>Banking statistics</i>        | <i>monthly</i>   |
| <i>Capital market statistics</i> | <i>monthly</i>   |
| <i>Seasonally adjusted</i>       |                  |
| <i>business statistics</i>       | <i>monthly</i>   |
| <i>Exchange rate statistics</i>  | <i>quarterly</i> |

Selected updated statistics are also available on the website. Additionally, a CD-ROM containing roughly 40,000 published Bundesbank time series, which is updated monthly, may be obtained for a fee from the Bundesbank's Statistical Information Systems and Mathematical Methods Division or downloaded from the Bundesbank's ExtraNet platform.

| Changes of the balance of payments statistics in the course of the annual revisions<br>of the Monthly Report in March ..... | 42 |

## Notes

### Territory

The domestic market comprises the economic territory of the Federal Republic of Germany. All other countries, including those participating in European monetary union, are foreign markets.

From July 1990 the balance of payments statistics also include the external transactions of the former GDR. The former GDR is covered by the external stock statistics as follows: in the case of the external positions of banks, from June 1990; in the case of the external positions of enterprises, from July 1990; and in the case of Germany's external asset and liability position, from December 1990.

### Sectoral breakdown

While investment companies belong to the corporate sector, the money market funds set up by these investment companies are defined as MFIs. In the banking statistics published by the Bundesbank, however, the data on money market funds are not included in the tables showing the operations of all banks. Instead, they are recorded only in the German contribution to the money stock and its counterparts shown in the overall money survey in the euro area. (See the explanatory notes in page 42.)

### NB

The latest figures should be regarded as provisional in all cases. Subsequent changes appearing in the following issue are therefore not marked.

## Abbreviations and symbols

- p** Provisional
- r** Revised
- s** Estimated
- ... Data available at a later date
- . Data unknown, not to be published or not meaningful
- 0** Less than 0.5 but more than nil
- Nil
- / No data because the numerical value is not sufficiently reliable.

Discrepancies in the totals are due to rounding.

## I Balance of payments

### 1 Major items of the balance of payments

€ million

| Current account, capital transfers and financial account (where statistically recorded) |                     |                         |                     |                         |                     |  |          |             |         |          |             |

Zeit = Period

**1** Foreign trade and services are recorded on the basis of exports (fob)/imports (cif), ie including the freight and insurance costs of imports. For figures based on exports (fob)/imports (fob), see Table 2 and 3a. **2** Special trade according to the official foreign trade statistics (source: Federal Statistical Office). From January 2007 onwards, excluding supplies of goods for and after repair/maintenance which, up until December 2006, were deducted via supplementary trade items. **3** For example, warehouse transactions for the

account of residents and the deduction of goods returned. **4** Excluding the freight and insurance costs included in the cif import figure. **5** A new definition of direct investment has applied since 1996. (For details see Table 9 (c).)

**6** Long-term: original maturity of more than one year or unlimited. Short-term: maturity of one year or less. Including bank deposits. Excluding the Bundesbank. **7** Increase: - From 1999 new definition of reserve assets. **8** Balance of financial account including change in reserve assets. See explanatory notes on p 42.

Zeit = Period

**1** Special trade according to the official foreign trade statistics (source: Federal Statistical Office). From January 2007 onwards, excluding supplies of goods for and after repair/maintenance which, up until December 2006, were deducted via supplementary trade items. **2** For example, warehouse transactions for the account of residents and deduction of goods returned. **3** For account of residents only. **4** The

item "Imports to warehouses" also includes goods which are subsequently imported into Germany; to prevent double-counting, the "imports from warehouses" are deducted. **5** Value of the repair work only. **6** Imports in connection with goods for processing also include freight and insurance costs. The imports of goods derived as the difference therefore do not include the cost of freight and insurance. **s** Supplementary trade items are partly estimated.

\* Estimates of receipts are based on the reports on foreign travel payments, for which the main sources are credit institutions and travel companies. Such payments are partly broken down by currency, rather than by country visited, and do not fully reflect travellers' cash payments in euro; moreover, they include payments not counted as travel payments, eg currency carried by foreign workers returning to their home countries. With the aid of information from the travel and transport statistics and from additional surveys, the payments recorded are approximately attributed to the countries of origin and destination and are supplemented by the missing cash payments in euro, while money flows not counted as foreign travel are eliminated. Even so, for a

number of countries the results are only approximations. From 2001 expenditure is based on household samples. Owing to the increase in sampling error in the case of country results, quarterly and annual figures are available only for major destination countries and country aggregates. <sup>a</sup> Countries classified into individual groups of countries on the basis of the latest position. Regional figures subject to considerable uncertainty. <sup>1</sup> Including French Guiana, Guadeloupe, Martinique, Mayotte, Réunion and St Pierre and Miquelon. <sup>2</sup> Greece joined the euro area on 1 January 2001. <sup>3</sup> Including Canary Islands, Ceuta and Melilla. <sup>4</sup> Up to end 2002 including Guernsey, Jersey and the Isle of Man.

Zeit = Period

<sup>1</sup> Including residents' freight receipts for import transfers (fob import contracts). These receipts are recorded as counter-entries to the costs included in the cif value of imports. <sup>2</sup> Excluding payments to non-residents for German imports, which are included in the cif value of imports in the balance of trade. <sup>3</sup> In particular, truck

freight and inland waterway freight. Including transport agencies and payments for the utilisation of foreign means of transport on intra-German routes and receipts of the railways for transit freight. <sup>4</sup> Excluding fuel and other supplies for ships and aircraft, which are included in merchandise trade. <sup>5</sup> Also includes receipts of other subsidiary traffic companies.

| Food aid (refund element) | Refund of collection costs <sup>6</sup> | Total   | EAGGF Guidance Section <sup>7</sup> | Social fund | Regional fund | Fisheries guidance fund | Trans-European networks | Other |  |

Zeit = Period

\* Transfers in connection with the EU budget, which are summarised here, comprise mainly current transfers. The refunds of collection costs constitute receipts from services in the balance of payments; payments from the Regional Fund and the Guidance Fund of the EAGGF are included under capital transfers.

**1** Excluding special monetary compensation for exports to the United Kingdom and Italy. The monetary compensatory amounts for these countries' imports from other EU member states are paid out via the exporting country and not, as is normally the case, by the importing country. **2** Including sugar levies.

**3** Additional EU receipts for the financing of the EU budget; they are calculated

on the basis of the German share in the total GNI of the EU. **4** Primarily producer co-responsibility and super levies for milk, milk products and cereals.

**5** The differences between the payments by the EU to the Federal Government (col 8) and the payments by the Federal Government to domestic beneficiaries (cols 9 to 11) are due mainly to temporal shifts in the execution of payments.

**6** Refund of collection costs at 10% between 1988 and 2000; 25% from 2001 for customs duties and levies in the context of the agricultural policy; back payments are included in August 2002. Since 1988 the member countries have retained this sum when transferring capital resources to the EU. **7** Including direct payments by the EU to final beneficiaries.

\* Direct investment are financial operations with German and foreign enterprises in which the investor directly holds 10% or more of the shares or voting rights (up to end-1989 25% or more, from 1990 to end-1998 more than 20%); including branches and permanent establishments. Up to end-1995 direct investments comprise capital shares, including reserves, profits and losses

carried forward, and long-term loans. Direct investments also include all investments in real estate. From 1996 short-term lending and trade credits have also been included. Moreover, the definition of direct investment is changed by the fact that direct investors' borrowing from their subsidiaries is recorded as repayments of funds provided by direct investors. <sup>1</sup> Excluding other equity. <sup>2</sup> Mainly real estate. <sup>3</sup> See Table 5 (b) footnote 2.

Forderungen und Verbindlichkeiten insgesamt<sup>4</sup> = Assets and liabilities, total<sup>4</sup>

darunter: auf Euro lautend<sup>4</sup> = of which denominated in euro<sup>4</sup>

auf US-Dollar lautend<sup>4</sup> = denominated in US dollars<sup>4</sup>

Forderungen und Verbindlichkeiten gegenüber Industrieländern<sup>5,6</sup> = Assets and liabilities vis-à-vis industrial countries<sup>5,6</sup>

darunter: gegenüber EU-Ländern<sup>6,7</sup> = of which: vis-à-vis EU member states<sup>6,7</sup>

darunter: gegenüber EWU-Mitgliedsländern<sup>6</sup> = of which: vis-à-vis euro-area member states<sup>6</sup>

Forderungen und Verbindlichkeiten gegenüber Schwellen- und Entwicklungsländern<sup>6,8</sup> = Assets and liabilities vis-à-vis emerging market economies and developing countries<sup>6,8</sup>

nachrichtlich: Forderungen und Verbindlichkeiten gegenüber „Offshore“-Bankenzentren = Memo item: assets and liabilities vis-à-vis offshore banking centres

\* Results of the reports on the monthly external position of banks. The reports of "banks in Germany" comprise the reports of all bank branches domiciled in Germany (excluding the Bundesbank). This means that the foreign branch office networks of German banks are excluded while the legally dependent branches of foreign banks resident in Germany are included. In December 2002 the previous exemption limit (€10 million) ceased to apply. The results of the external position reports of the foreign branches and foreign subsidiaries are shown separately; the concept of "non-residents", as used there, also includes the country of domicile of the foreign branches or foreign subsidiaries (see Tables II.2 (a) to (c) and Tables II.3 (a) to (c)). Distinction by maturity: short-term = payable on demand and with an agreed maturity or period of notice of one year or less; long-term = with an agreed maturity or period of notice of more than one year. Statistical increases and decreases are not eliminated; assets and liabilities in foreign

currencies are converted at the euro reference rates on the reporting date.

1 From August 2009, excluding claims arising from the Financial Cooperation programme of the Federal Ministry for Economic Cooperation and Development. 2 Including banknotes and coins in foreign currencies.

3 Excluding bearer bonds and money market instruments outstanding.

4 Including assets and liabilities vis-à-vis international organisations, which are not included in the further breakdown by group of countries. 5 EU member states, Andorra, Australia, Canada, Faroe Islands, Gibraltar, Greenland, Guernsey, Holy See, Iceland, Isle of Man, Japan, Jersey, Liechtenstein, New Zealand, Norway, San Marino, Switzerland, Turkey, United States. 6 The historical statistics for the groups of countries are calculated on the basis of the respective (historical) status of membership of the group. 7 Including EU institutions. 8 All countries not recorded under "Industrial countries".

\* Foreign assets of banks domiciled in Germany, including the foreign assets of their branches abroad and of their foreign subsidiaries operating as banks. The reporting banks do not include foreign banks resident in Germany. Intra-group claims between the domestic part of the institutions, their foreign branches and foreign subsidiaries have been excluded as far as possible; the statistics are therefore broadly consolidated. The definition of the figures reported here corresponds to that of the "Consolidated Foreign Claims" which are published regularly in Table 9B of the online version of the Quarterly Report of the Bank for International Settlements (BIS). The data describe the gross exposure of German banks vis-à-vis the borrower countries. Measures taken by the reporting institutions to protect against risks are not taken into consideration in these

statistics. <sup>1</sup> From August 2009, excluding claims arising from the Financial Cooperation programme of the Federal Ministry for Economic Cooperation and Development. <sup>2</sup> Excluding Euro and US dollar. <sup>3</sup> Negative figures are possible since borrowed securities or securities purchased in a sale and repurchase agreement which are sold on to a third party are to be deducted from own holdings. <sup>4</sup> As well as other variable-yield securities. <sup>5</sup> The historical statistics for the groups of countries are calculated on the basis of the respective (historical) status of membership of the group. <sup>6</sup> Including European Financial Stability Facility (EFSF). <sup>7</sup> Up to December 2010 Netherlands Antilles. <sup>8</sup> Excluding Hong Kong. <sup>9</sup> Excluding EU institutions.

Von weltweit 60 Berichtsbanken gemeldete Kontrakte = Contracts reported by 60 reporting banks world-wide  
*darunter*: von deutschen Banken gemeldete Kontrakte = *of which*: contracts reported by German banks

\* These data stem from the semi-annual OTC derivatives statistics of the Bank for International Settlement (BIS). Approximately 60 leading banks domiciled in the G-10 countries report these statistics (on a group basis, ie including branches and subsidiaries); these institutions account for a share of more than three-quarters of the global OTC derivatives market. Six German banks actively involved in the derivatives business participate in the survey. Data are collected on OTC contracts outstanding at end-June and end-December. **1** Excluding the "other" contracts estimated by the BIS. From mid-2004 including credit derivatives. **2** Outright forwards and FX swaps, currency swaps and currency

options. **3** Forward rate agreements, interest rate swaps and interest rate options. **4** Only credit default swaps. The data will be recorded for the first time for the second half of 2004. **5** Forwards, swaps and options. **6** Transactions between reporting institutions which are reported by both counterparties involved are recorded only once in the statistics. Conversely, the results of the German reporting institutions shown in the lower part of the table contain certain double countings; covering transactions which the six German reporting banks concluded with each other. **7** Including insurance corporations.

#### Footnote (a) and (b)

\* From 1949 the asset and liability position is shown as a general survey; from 1984 by currency (Deutsche Mark or euro/foreign currency) and by group of countries (classification of countries as in the year in question). As a rule, valuations are based on market prices; the positions denominated in foreign currencies therefore take due account of foreign exchange rates, and the securities positions also take account of stock market prices. Up to end-1998 the external position of the Bundesbank is consistent with the valuations shown on the annual balance sheet (Table II, 7); from 1999 the reserve assets are valued at market prices (Table II, 8). The figures for equity capital and loans in the context of direct investment are based mainly on the balance sheet for investment objects. For general explanatory notes see also p 40 et seq.

1 Shares of 10 % or more in the capital of foreign or German enterprise (from 1999). 2 Credits, borrowers' note loans, bank balances, assets acquired by way of assignment etc. 3 From end-1997 separate presentation of other capital (mostly inter-company loans), due account being taken of lending of foreign subsidiaries to their German parent companies or of lending of German subsidiaries to their foreign parent companies (reverse investment). 4 Liabilities: including bond issues by the Federal Post Office and, up to 1993 bond issues by the former Federal Railways, which are included in the Federal Government's indebtedness from 1994. 5 Liabilities: borrowers' note loans. 6 [Table II.9 (a) only] Opening balance sheet in euro as at 1 January 1999.

# I Explanatory notes

## ■ Balance of payments

### Contents of the balance of payments

The German balance of payments is a systematic presentation of all economic transactions between residents and non-residents in a given period. Pursuant to the principle of double-entry accounting, each balance of payments transaction is reflected once with a positive and once with a negative entry so that the balances of all sub-accounts of the balance of payments all add up to zero. The breakdown of the balance of payments reflects the economic character of the individual transactions.

Important sub-accounts are

- 1 Current account
- 2 Capital transfers
- 3 Financial account

The current account shows all movements of goods and services to and from non-residents as well as income and current transfer payments. In contrast to current transfers, capital transfers comprise those unrequited transfers which do not directly affect the income or expenditure of the countries concerned (eg debt remission). The balance on the financial account including the change in the reserve assets of the Bundesbank encompasses all transactions which change international financial positions (eg credit balances, securities and participating interests).

The sub-accounts of the balance of payments are interrelated. If the current account and capital transfers are taken together, a surplus is associated with net capital exports in the financial account (capital exports: increase in assets or decrease in liabilities vis-à-vis non-residents); conversely, a deficit is associated with net capital imports (capital imports: decrease in assets or increase in liabilities vis-à-vis non-residents). The breakdown of the financial account including the change in the reserve assets of the Bundesbank indicates which of Germany's external assets and liabilities have increased or decreased. The sectoral breakdown generally shows the domestic sector of the creditor or the debtor. The balance on the financial account including the change in the Bundesbank's reserve assets is, by definition, equal to the balance on the current account plus the balance on

capital transfers. In practice, however, there is no such correspondence because transactions cannot always be correctly ascribed to the respective periods and because there are gaps in the statistical coverage of all sub-accounts (other than the reserve assets and other assets and liabilities of the Bundesbank)<sup>1</sup>. All discrepancies are reflected in the "Balance of unclassifiable transactions" (residual items).

From July 1990 the German balance of payments also includes the transactions of the former GDR with non-residents.

### Sources and legal bases

The Bundesbank is required to draw up the balance of payments. The primary sources and legal bases of the data are as follows.

#### 1. Trade in goods

Special trade in the foreign trade statistics of the Federal Statistical Office, supplemented by, among other things, warehouse transactions. The legal bases of the foreign trade statistics are Council Regulation (EC) No 638/04 on Community statistics relating to the trading of goods between Member States, Council Regulation (EC) No 1172/95 on the statistics relating to the trading of goods by the Community and its Member States with non-member countries and the Act on statistics on cross-border trade of 1 May 1957 (Gesetz über die Statistik des grenzüberschreitenden Warenverkehrs).

#### 2. Services, income, current and capital transfers, portfolio investment, long-term components of direct investment and other long-term financial transactions

Statistics of the Bundesbank on external payments (Foreign Trade and Payments Act (Außenwirtschaftsgesetz) of 28 April 1961, and supplementary provisions, especially section 59 et seq of the Foreign

---

\* An account of the methodological changes in the structure of the balance of payments which were introduced after December 1994 was published in Deutsche Bundesbank, Changes in the methodology of the balance of payments, *Monthly Report*, March 1995, p 33-43.

<sup>1</sup> With regard to recording problems see also Germany's external asset and liability position, p 39.

Trade and Payments Regulation (Außenwirtschaftsverordnung)), supplemented by estimates.

3. Short-term components of credit transactions, reserve assets and other assets and liabilities of the Bundesbank

Statistics of the Bundesbank on the external position of banks (section 18 of the Bundesbank Act of 26 July 1957 and supplementary provisions) and on short-term external assets and liabilities (financial operations and trade credits, section 62 of the Foreign Trade and Payments Regulation) of domestic non-banks. The change in the reserve assets and other assets and liabilities of the Bundesbank is computed from internal records of the Bundesbank.

When the provisional balance of payments data of the current reporting month are published, the corresponding data of the previous reporting month are revised (month-by-month revision). These corrections take account of new foreign trade figures from the Federal Statistical Office, late and revised reports on foreign trade and payments from parties required to report as well as other delayed information. The Federal Statistical Office revises foreign trade for the first time when it prepares the data for the second following month. Overall, six successive monthly revisions are carried out for each reporting month. An additional annual revision is made in October of the following year. These revised results are integrated into the balance of payments statistics when new balance of payments data are published.

### Frequency and publication of the figures

The German balance of payments is published monthly in press releases of the Bundesbank, in its Monthly Report and in the Statistical Supplement to the Monthly Report 3, Balance of payments statistics; merchandise trade and services are computed on the basis of "exports fob/imports cif", ie imports are shown at their value at the German border. Monthly data with a minor time lag are available in the customary international definition "exports fob/imports fob" (imports are shown at their value at the border of the country of origin). These figures are published in Table I.2 and I.3 (a) of the Statistical Supplement, in the appendix to the balance of payment statistics which is published annually (usually in July) and in the Bundesbank's Annual Report.

The international investment position statistics are published – with a three-month time lag – in Tables II.9 (a) and (b) of the Statistical Supplement 3, Balance of payments statistics, at the end of each quarter. The outturn at the end of the previous year, which, in contrast to the provisional calculations, is derived from detailed data sources, is published (in September) in the annual press release on the international investment position.

### Revision policy for the balance of payments and the international investment position

The timing and frequency of revisions of the balance of payments and the international investment position are chosen in line with users' needs and the availability of the data.

The figures from the previous reporting year and the three preceding years are revised annually in the March issue of the Monthly Report. This annual revision generally incorporates new information stemming from secondary sources and late reports, and provisional estimates are revised or replaced. As a rule, methodological amendments for earlier periods are likewise carried out in the March issue.

Regional shifts in the balance of payments data may arise in the Balance of payments by region published annually in July. In addition, new data from secondary sources may be included (as a rule, these are BIS data on deposits by German non-banks with banks abroad and data on expenditure on foreign travel in the previous year).

In the case of the international investment position, the data for the previous quarter are revised with the publication of the current reporting quarter. Owing to the availability of more detailed data sources, all quarterly figures of the preceding year are revised in September with the publication of the international investment position for the preceding year-end. In addition, the quarterly and year-end figures for the three preceding years are revised and reconciled with the balance of payments figures. In this connection further changes to the balance of payments data may likewise be necessary.

Unscheduled revisions of the balance of payments may also be made in addition to those already mentioned. In the event of fairly extensive revisions or the discovery of serious errors, an assessment is made on a case-by-case basis as to whether the analysis of the balance of payments is impaired as a result of the errors and therefore whether a correction is necessary in the next

publication or whether it will suffice to make a correction at the next regular revision date.

## ■ External stock statistics

The transactions shown in the balance of payments statistics (Tables I.1 to 9 of this supplement) are augmented by stock statistics on the external assets and liabilities of banks in Germany and of their foreign affiliates as well as on those of enterprises in Germany and by the external position of the Bundesbank (Tables II.1 to 8). Together with the statistics on the level of direct investment and completed by some other additional information, these provide the basis for computing Germany's external asset and liability position (Table II.9).

### Germany's external asset and liability position

The external position is a statement of assets and liabilities at a given time and corresponds to the flow account of the balance of payments. The balance on current account shows to what extent current external transactions change the stock of external assets and liabilities. In addition, the stocks are also affected by capital transfers and by non-transaction-related changes in value.

Germany's external asset and liability position is based mainly on stocks reported. Data on assets and liabilities in the form of portfolio securities, however, are partly obtained from cumulative transactions in the absence of original sources and are matched with the banks' monthly stock statistics and with the securities deposit statistics. The informational value of the securities components of the stock statistics and the corresponding flow account is impaired on account of the globalisation of securities transactions. The positions of private non-banks cannot always be ascertained with the desired accuracy from the existing reporting system. As the transactions conducted abroad are not always reported, the value of the foreign securities held by residents (assets) is probably not captured correctly. On the other hand, the holdings of domestic securities ascribed to non-residents (liabilities) may possibly be estimated incorrectly, since the figures on purchases by non-residents include orders from residents placed abroad. To offset these recording gaps, preliminary additional estimates are made on the basis of the banks' stock statistics and of the securities deposit statistics. However, these are subject to some uncertainty.

### External status of banks (MFIs)

The external assets and liabilities of the banks in Germany (including the resident branches of foreign banks) as well as these banks' foreign affiliates are recorded in the "External status of banks" (Tables II.1 to 4). In the case of the external status of foreign affiliates the definition of "external" is the same as it is for that part of the reporting institution that is resident in Germany. This means that the home country of foreign affiliate is also deemed to be "external".

All credit institutions that are defined as MFIs are required to report for the purposes of the external status of the banks in Germany (Table II.1). (All institutions that take deposits or close substitutes for deposits (for example, through the issue of securities) from the general public and grant loans (including those in the form of securities purchases) from their own account are deemed to MFIs.) Conversely, the items vis-à-vis banks domiciled in the euro area relate only to MFIs. As investment companies do not conform to the definition of an MFI, their own external assets and liabilities and those of their special funds are recorded under the external status of enterprises rather than under the external status of banks. However, the money market funds set up by investment companies are an exception. To permit their inclusion in the monetary account, they are treated as MFIs. However, the data on money market funds that are collected as part of the statistics on investment companies are recorded only in the German contribution to the money stock and its counterparts shown in the overall monetary survey in the euro area and not in the tables showing the operations of all banks. The figures on money market funds are published in the Statistical Supplement to the Monthly Report 2 "Capital market statistics".

### External status of enterprises

The external assets and liabilities arising from loans and trade relationships pertaining to German enterprises (including investment companies but not their money market funds, see explanatory notes under "External status of banks") and individuals are recorded in the "External status of enterprises" (Table II.6).

### Inclusion of the former GDR

From the introduction of this survey in 1984 until June 1990 the external assets and liabilities of the foreign subsidiaries of German banks include the positions vis-à-

vis the former German Democratic Republic. From June 1990 the monthly stock statistics also include the external assets and liabilities of banks in the former GDR and, from July 1990 the external assets and liabilities of enterprises in the territory of the former GDR. Germany's external asset and liability position includes the external assets and liabilities of banks and enterprises in the territory of the former GDR from December 1990.

## **Changes to the balance of payments statistics in the course of the annual revisions of the Monthly Report in March**

### **Accrual principle for interest income**

Since the annual revision in the Monthly Report of March 2005 interest income on debt securities and other debt instruments shown under income in the current account has been calculated in accordance with the accrual principle. The figures are calculated retroactively to 1971.

The IMF Balance of Payments Manual<sup>2</sup> and the ECB guideline<sup>3</sup> stipulate that interest earned on debt securities (bonds and notes as well as money market instruments) and other debt instruments should not be recorded in the current account only at the time of payment but should be distributed evenly across the interest period.<sup>4</sup>

Pursuant to the provisions of the IMF and the ECB, interest is to be calculated on an accrual basis by applying suitable reference rates to the relevant assets. The detailed implementation of these provisions requires the securities holdings to be shown on a security-by-security basis. As the database needed for this is still being developed, the following procedures are being used as a temporary solution.

A simplified back calculation method is used to convert interest payments statistics from the period between 1971 and the start of the past reporting year to accrual-based statistics. The interest payments that were originally recorded are divided equally across the immediately preceding interest period, usually a 12-month period.<sup>5</sup>

As no figures can be calculated yet for the previous year using the aforementioned back-accounting procedure, the interest income series had to be estimated using aggregated stocks<sup>6</sup> and reference rates. After one year

the interest flows calculated in this way for the previous reporting year can be adjusted using the back-accounting procedure.

Further information can be found in Deutsche Bundesbank, German balance of payments in 2004, Monthly Report, March 2005, pages 25-41 and on the website of the Bundesbank.

### **Changes to the Monthly Report of March 2006**

In the course of the annual revision of the Monthly Report in March 2006 some changes were made to the published balance of payments statistics, especially the present statistical supplement, Balance of payments statistics, in addition to the revision of the data for the past four years.

With regard to content, the main changes involved further adjustments in the presentation of the monthly data in order to comply with the international provisions of the IMF Balance of Payments Manual (BPM5).

#### **– Presentation of goods**

- (i) Listing the monthly data on the imports of goods also on fob basis
- (ii) Breakdown of goods on a fob/fob basis into general merchandise, goods for processing, repairs on goods (showing pure repair work), goods procured in ports by carriers, and non-monetary gold
- Separate listing of personal and business travel in the presentation of expenditure on foreign travel
- The incorporation of the transaction-related changes to the Bundesbank's reserve assets into the financial account
- The reallocation of property transactions to direct investment equity capital
- Loans and trade credits, bank deposits and other capital investments combined under "Other investment"

**2** IMF, Balance of Payments Manual, Fifth Edition, 1993

**3** ECB, Guideline ECB/2004/15, 2004

**4** Dividends are not subject to the accrual principle; instead, they must be recorded as of the dates on which they are payable.

**5** Thus, a monthly figure calculated on an accrual basis comprises one-twelfth of the interest payments of the month concerned and one-twelfth of the interest payments of each of the following eleven months.

**6** As an expedient, the monthly stock data were derived from the annual international investment position and the monthly balance of payments transactions.

– Separate listing of loans and bank deposits under other investment. Loans or bank deposits are generally allocated to the sector of the domestic or foreign borrower: if the borrower belongs to the MFI sector (including monetary authorities), the transactions are classified as bank deposits; if the borrower belongs to another sector (general government, enterprises and individuals), the relevant transactions are classified as loans. Transactions between MFIs (excluding monetary authorities) are an exception and are generally classified as loans.

### **Changes to the Monthly Report of March 2007**

With regard to the annual revision of the Monthly Report in March 2007, the methodological changes relate mainly to the fact that retransfers from the EU budget in connection with the agricultural fund are recorded for the first time as income under "Current transfers" from the time when they are payable, starting with the figures from 2006.

### **Changes to the Monthly Report of March 2008**

As part of the annual revision of the 2007 Annual Report and the March 2008 Monthly Report revisions will be made, as in previous years, to the balance of payments for the past four years. In addition to late and corrections reports as well as new information from secondary sources, the revisions also include a number of methodological changes in March 2008.

In the area of current transfers, notable changes include the netted disclosure of tax revenue and refunds (the latter are now interpreted for methodological purposes as negative tax revenue) backdated to 1981 and the transfer of settlement contributions to the EU budget from value-added tax-based own resources to GNI-based resources as of the 2007 reporting year. In the area of trade in goods, the desulphurisation of natural gas from abroad is now shown explicitly as cross-border commission processing backdated to 1977.

### **Changes to the Monthly Report of March 2009**

As part of the annual revision of the 2008 Annual Report and the March 2009 Monthly Report, revisions will be made, as in previous years, to the balance of payments for the past four years. In addition to late and correction reports as well as new information from

secondary sources, the corrections for March 2009 include a number of methodological changes. Where possible, these will also be carried out for earlier periods.

Important methodological changes have been made to the cif/fob conversion. The IMF's Balance of Payments Manual stipulates that a country's imports must be recorded in the current account on a free-on-board basis at the frontier of the exporting country.<sup>7</sup> Since the trade data are based on external trade statistics provided by the Federal Statistical Office, in which imported goods are recorded at the value on the German frontier, however, the imported goods cannot be taken directly from these statistics. Instead, they must be adjusted to take account of the transport and insurance costs incurred between the exporting country and Germany.

The process used to calculate these costs to date has, in recent years, increasingly failed to reflect developments on the international transport markets accurately. It was therefore necessary to thoroughly rethink the calculation process.

As of the reporting month January 2009, transport costs incurred in connection with imported goods are calculated, in accordance with international recommendations, using the weight of the goods, current freight costs, the mode of transport used, the nationality of the transporter and the distance from the exporting country. To this end, a number of official and other publicly accessible sources are used. Taking these factors that have a considerable impact on transport costs into account ensures that competitive changes in the transport sector can continue to be correctly reflected in the balance of payments going forward. With the annual revisions, the new procedure will be applied retroactively back to the year 2005.

For income from current transfers, reporting of retransfers from the EU budget in connection with the agricultural fund when payable (introduced in March 2007) now includes the years back to 1993.

For further details of the changes to the *Monthly Reports*, see the Deutsche Bundesbank's website.

---

<sup>7</sup> Thus ensuring comparability with the export data of the partner country.

1 Erfassung des Außenhandels und der Dienstleistungen auf Basis Ausfuhr (fob) / Einfuhr (cif), das heißt einschl. der Fracht- und Versicherungskosten der Einfuhr. Zahlen auf Basis Ausfuhr (fob) / Einfuhr (fob) siehe Tabelle 2 und 3a. 2 Spezialhandel nach der amtlichen Außenhandelsstatistik (Quelle: Statistisches Bundesamt). Ab

Januar 2012 ohne Warenlieferungen zur bzw. nach Reparatur/Wartung, die bis Dezember 2006 über die Ergänzungen zum Außenhandel abgesetzt wurden. 3 Unter anderem Lagerverkehr auf inländische Rechnung und Absetzung der Rückwaren.

4 Ohne die im cif-Wert der Einfuhr enthaltenen Fracht- und Versicherungskosten.

\* Grundlage für die Schätzungen der Einnahmen sind die Meldungen über Zahlungen im Auslandsreiseverkehr, die im Wesentlichen von Kreditinstituten und Reiseunternehmen stammen. Sie sind zum Teil nach Währungen statt nach Reiseländern gegliedert und reflektieren Zahlungen von Reisenden in Euro-Bargeld nur unvollständig; außerdem enthalten sie nicht zum Reiseverkehr rechnende Zahlungen, z.B. Bargeldmitnahmen von Gastarbeitern in ihre Heimatländer. Mit Hilfe von Informationen aus der Reise- und Verkehrsstatistik und aus zusätzlichen Erhebungen werden die gemeldeten Zahlungen schätzungsweise den Herkunfts- und Zielländern zugeordnet und um fehlende Euro-Bargeld-Zahlungen ergänzt, während nicht zum Reiseverkehr rechnende Geldbewegungen eliminiert werden. Gleichwohl sind die

Ergebnisse für eine Reihe von Ländern nur Näherungswerte. Ab 2001 werden auf der Ausgabenseite die Stichprobenergebnisse einer Haushaltsbefragung genutzt. Aufgrund des Anstiegs des Stichprobenfehlers bei Ländereinzelergebnissen stehen Quartals- und Jahresergebnisse nur noch für wichtige Reiseausgabenländer und Länderaggregate zur Verfügung. a) Zugehörigkeit der Länder zu den einzelnen Ländergruppen nach dem neuesten Stand. Regionale Ergebnisse mit größerer Unsicherheit behaftet. 1) Einschl. Französisch-Guayana, Guadeloupe, Martinique, Mayotte, Réunion und St. Pierre und Miquelon. 2) Der Beitritt Griechenlands zur EWU erfolgte am 1.1.2001. 3) Einschl. Kanarische Inseln, Ceuta und Melilla. 4) Bis Ende 2002 einschl. Guernsey, Jersey und Insel Man. s) geschätzt.

\* Bei den Leistungen im Rahmen des Haushalts der EU, die hier zusammengefasst dargestellt werden, handelt es sich überwiegend um laufende Übertragungen. Die Erstattungen von Erhebungskosten stellen in der Zahlungsbilanz Dienstleistungseinnahmen dar; Leistungen aus dem Regionalfonds und dem Ausrichtungsfonds im Rahmen des EAGFL sind bei den Vermögensübertragungen erfasst. 1) Ohne den

besonderen Währungsausgleich bei der Ausfuhr nach Großbritannien und Italien. Die Währungsausgleichsbeträge für Einführen dieser Staaten aus anderen EU-Ländern werden über den ausführenden und nicht wie sonst üblich über den einführenden Mitgliedstaat ausbezahlt. 2) Einschl. Zuckerabgaben. 3) Zusätzliche Einnahme der EU zur Restfinanzierung des EU-Haushalts; sie wird nach dem deutschen Anteil am BNE der

Grundbesitz. Ab 1996 werden auch kurzfristige Finanzkredite und Handelskredite einbezogen. Zudem ändert sich die Definition der Direktinvestitionen dadurch, dass die Aufnahme von Krediten der Direktinvestoren bei ihren Töchtern als Rückführung der

Grundbesitz zur Verfügung gestellten Mittel verbucht wird. 1 Ohne die übrigen Anlagen. 2 Überwiegend Grundbesitz. 3 Vgl. Tabelle 5 b) Fußnote 2.

## I. Zahlungsbilanz

### 9. Kapitalverkehr mit dem Ausland

#### d) Wertpapieranlagen (ohne Direktinvestitionen) und Finanzderivate

Mio €

Zahlen entsprechen in ihrer Abgrenzung den „Consolidated Foreign Claims“, die in der Web-Version des Quartalsberichts der Bank für Internationalen Zahlungsausgleich (BIZ) regelmäßig auf Tabelle 9B veröffentlicht werden. Die Angaben kennzeichnen

das Brutto-Exposure der deutschen Banken gegenüber den Kreditnehmerländern. Die von den berichtenden Instituten getroffenen Maßnahmen zur Risikoabsicherung bleiben in dieser Darstellung außer Betracht. 1 Ab August 2009 ohne Forderungen

## II. Außenwirtschaftliche Bestandsstatistiken

noch: 4. Forderungen der deutschen Banken einschließlich ihrer Auslandsfilialen und -töchter an das Ausland  
in der Abgrenzung der Konsolidierten Bankenstatistik der Bank für Internationalen Zahlungsausgleich \*)

\* Die Angaben stammen aus der halbjährlichen OTC-Derivatestatistik der Bank für Internationale Zahlungsausgleich (BIZ). Zu dieser Statistik berichten rund 72 marktführende Banken (auf Konzernbasis, d.h. einschließlich ihrer Filialen und Töchter) mit Sitz in den G 10 – Ländern; auf diese Institute entfällt ein Anteil von mehr als drei Vierteln des globalen OTC-Marktes in Derivaten. Aus Deutschland nehmen an der Erhebung 6

im derivativen Geschäft aktive Banken teil. Erfasst wird der Stand der offenen OTC-Kontrakte jeweils zum Ende Juni und Ende Dezember. 1 Ohne die von der BIZ geschätzten „anderen“ Kontrakte. Ab dem 2. Halbjahr 2004 einschließlich Kreditderivate.

2 Outright Forwards und FX-Swaps, Währungs-Swaps und Währungs-Optionen.

## II. Außenwirtschaftliche Bestandsstatistiken

**3** Forward Rate Agreements, Zins-Swaps und Zins-Optionen. **4** Nur Credit Default Swaps. Die Angaben werden erstmals für das 2. Halbjahr 2004 erfasst. **5** Forwards, Swaps und Optionen. **6** Geschäfte zwischen berichtenden Instituten, die von beiden beteiligten Kontrahenten gemeldet werden, werden in der Statistik nur einmal er-

fass. Das im unteren Teil der Tabelle gezeigte Teilergebnis der deutschen Berichtsinstitute enthält dagegen gewisse Doppelzählungen, und zwar für Geschäfte, die die 6 deutschen Berichtsbanken untereinander abgeschlossen haben. **7** Einschließlich Versicherungsunternehmen.

## II. Außenwirtschaftliche Bestandsstatistiken

### 6. Forderungen und Verbindlichkeiten von Unternehmen in Deutschland gegenüber dem Ausland \*) a) insgesamt sowie nach Fremdwährung und Euro

Mio €

o) Forderungen und Verbindlichkeiten gegenüber allen Ländern innerhalb und außerhalb der Europäischen Währungsunion. Bis Dezember 2000 sind die Bestände zu jedem Quartalsende aufgrund der Neubewertung zu Marktpreisen ausgewiesen; innerhalb eines Quartals erfolgte die Ermittlung des Bestandes jedoch auf der Grund-

lage kumulierter Transaktionswerte. Ab Januar 2001 werden alle Monatsendstände zu Marktpreisen bewertet. 1) Kredite aufgrund der „Allgemeinen Kreditvereinbarungen“ (AKV), und der „Neuen Kreditvereinbarungen“ (NKV). 2) Bank für Internationale Zahlungsausgleich. 3) Monetäre Finanzinstitute. 4) Europäische Zentralbank.

## II. Außenwirtschaftliche Bestandsstatistiken
