Notes

Territory

The domestic market comprises the economic territory of the Federal Republic of Germany. All other countries, including those participating in European monetary union, are foreign markets.

Sectoral breakdown

While investment companies belong to the corporate sector, the money market funds set up by these investment companies are defined as MFIs. In the banking statistics published by the Bundesbank, however, the data on money market funds are not included in the tables showing the operations of all banks. Instead, they are recorded only in the German contribution to the money stock and its counterparts shown in the overall money survey in the euro area. (See the explanatory notes on page 38.) For a detailed description of the sector classification used in balance of payments statistics, see explanatory notes on page 41.

Changes to methodology and classification

The methodological concept of the German balance of payments statistics will be brought into line with the revised standard of the International Monetary Fund when the data for the reporting month of May are published in July 2014. The application of the sixth edition of the Balance of Payments and International Investment Position Manual (BPM6) is binding for EU member states by virtue of a regulation adopted by the European Commission.

NB

The latest figures should be regarded as provisional in all cases. Subsequent changes appearing in the following issue are therefore not marked. Furthermore, all results referring to foreign trade and consequently goods are preliminary, starting with reference month January 2015.

Abbreviations and symbols

- p Provisional
- r Revised
- s Estimated
- ... Data available at a later date
- . Data unknown, not to be published or not meaningful
- 0 Less than 0.5 but more than nil
- Nil
- / No data because the numerical value is not sufficiently reliable.

Discrepancies in the totals are due to rounding.

1 Until 2012 only goods exported for repairs. **2** Since 2014, construction sites existing less than one year are recorded as services. New investment and disinvestment of construction sites, existing more than one year, are recorded as direct investment, while the corresponding profits are recorded as primary income. Up to and including 2013, construction sites were not classified

according to how long they had existed and were all recorded under direct investment. **3** Domestic public authorities' receipts from and expenditure on services, not included elsewhere; including the receipts from foreign military bases.

Zeit = Period

* Transfers in connection with the EU budget, which are summarised here, comprise mainly secondary income. The refunds of collection costs constitute receipts from services in the balance of payments; payments from the Regional Fund and the European Agricultural Guarantee Fund (EAGF) (up until 2006 European Agricultural Guidance and Guarantee Fund (EAGGF)) are recorded in the capital account under capital transfers. **1** Excluding special monetary compensation for exports to the United Kingdom and Italy. The monetary compensatory amounts for these countries' imports from other EU member states are paid out via the exporting country and not, as is normally the case,

by the importing country. **2** Additional EU receipts for financing the remainder of the EU budget; they are calculated on the basis of the German share in the total gross national income (GNI) of the EU. **3** Refund of collection costs at 10% between 1988 and 2000; 25% from 2001 onwards for custom duties and levies under the common agricultural policy; back payments are included in the 2002 figure. Since 1988, the member states have retained this sum when transferring capital resources to the EU. **4** Until the end of 2006, includes payments by the EAGFL –Guidance Section. Including the European Fisheries Fund and direct payments from the EU to final beneficiaries.

Zeit = Period

* Direct investment comprises financial operations with domestic and foreign enterprises if 10% or more of the shares or voting rights are directly attributable to the capital provider, or directly and indirectly more than 50% are attributable to this investor; including branches and permanent establishments. Short-term loans and trade credits, construction sites that have existed for more than one year and all investments in real estate are also deemed to be direct investment.

¹ Estimated on the basis of the figures on the level of direct investment stocks abroad and in the Federal Republic of Germany (see Special Statistical Publication 10). ² Mainly real estate. ³ Reverse investments are loans granted counter to the direction of the direct investment relationship, ie by the direct investment enterprise to the direct investor.

nachrichtlich: Forderungen und Verbindlichkeiten gegenüber „Offshore“-Bankenzentren = Memo item: assets and liabilities vis-à-vis offshore banking centres

* Results of the reports on the monthly external position of banks. The reports of “banks in Germany” comprise the reports of all bank branches domiciled in Germany (excluding the Bundesbank). This means that the foreign branch office networks of German banks are excluded while the legally dependent branches of foreign banks resident in Germany are included. In December 2002 the previous exemption limit (€10 million) ceased to apply. The results of the external position reports of the foreign branches and foreign subsidiaries are shown separately; the concept of “non-residents”, as used there, also includes the country of domicile of the foreign branches or foreign subsidiaries (see Tables II.2 (a) to (c) and Tables II.3 (a) to (c)). Distinction by maturity: short-term = payable on demand and with an agreed maturity or period of notice of one year or less; long-term = with an agreed maturity or period of notice of more than one year. Statistical increases and decreases are not eliminated; assets and liabilities in foreign

currencies are converted at the euro reference rates on the reporting date.

1 From August 2009, excluding claims arising from the Financial Cooperation programme of the Federal Ministry for Economic Cooperation and Development **2** Including banknotes and coins in foreign currencies.

3 Excluding bearer bonds and money market instruments outstanding.

4 Including assets and liabilities vis-à-vis international organisations, which are not included in the further breakdown by group of countries. **5** EU member states, Andorra, Australia, Canada, Faroe Islands, Gibraltar, Greenland, Guernsey, Holy See, Iceland, Isle of Man, Japan, Jersey, Liechtenstein, New Zealand, Norway, San Marino, Switzerland, Turkey, United States. **6** The historical statistics for the groups of countries are calculated on the basis of the respective (historical) status of membership of the group. **7** Including EU institutions. **8** All countries not recorded under “Industrial countries”.

Von weltweit 60 Berichtsbanken gemeldete Kontrakte = Contracts reported by 60 reporting banks world-wide
 darunter: von deutschen Banken gemeldete Kontrakte = of which: contracts reported by German banks

* These data stem from the semi-annual OTC derivatives statistics of the Bank for International Settlement (BIS). Approximately 60 leading banks domiciled in the G-10 countries report these statistics (on a group basis, ie including branches and subsidiaries); these institutions account for a share of more than three-quarters of the global OTC derivatives market. Six German banks actively involved in the derivatives business participate in the survey. Data are collected on OTC contracts outstanding at end-June and end-December. **1** Excluding the "other" contracts estimated by the BIS. From mid-2004 including credit derivatives. **2** Outright forwards and FX swaps, currency swaps and currency

options. **3** Forward rate agreements, interest rate swaps and interest rate options. **4** Only credit default swaps. The data will be recorded for the first time for the second half of 2004. **5** Forwards, swaps and options. **6** Transactions between reporting institutions which are reported by both counterparties involved are recorded only once in the statistics. Conversely, the results of the German reporting institutions shown in the lower part of the table contain certain double countings; covering transactions which the six German reporting banks concluded with each other. **7** Including insurance corporations.

° Assets and liabilities vis-à-vis all countries within and outside the euro area. Up to December 2000, the levels at the end of each quarter are shown, owing to revaluations, at market prices; within each quarter, however, the levels are computed on the basis of cumulative transaction values. From January 2001, all end-of-month levels are valued at market prices. **1** Mainly net claims on TARGET2 balances (according to the respective country designation),

since November 2000 also balances with non-euro-area central banks within the ESCB. **2** Mainly long-term debt securities from issuers within the euro area. **3** In accordance with an ESCB agreement, also includes liabilities which would normally be assigned to non-euro-area residents. **4** See Deutsche Bundesbank, Monthly Report, October 2014, p 22. **5** Euro opening balance sheet of the Bundesbank as at 1 January 1999.

1 Direct investment comprises financial operations with domestic and foreign enterprises if 10% or more of the shares or voting rights are directly attributable to the capital provider, or directly and indirectly more than 50% are attributable to this investor; including branches and permanent establishments. Short-term loans and trade credits, construction sites that have existed for more than one year and all investments in real estate are also deemed to be direct investment. **2** Including investments in real estates and in unlisted companies as well as claims and liabilities from construction. **3** Reverse investments are loans granted counter to the direction of the direct investment relationship, ie by the direct investment enterprise to the direct investor. **4** Including participation

certificates. **5** Including reinvested earnings. **6** Original maturity up to one year. **7** Original maturity of more than one year or unlimited. Up to and including 2012, without accrued interest. **8** For details on the distinction between loans and currency and deposits, see explanatory notes on p 37. **9** Loans, borrowers' note loans, assets acquired by way of assignment and similar. **10** Excluding the Bundesbank; for more detailed information on the sectoral classification, see explanatory notes on p 37. **11** Assets and liabilities arising from credit terms granted and advance payments made in goods and service transactions. **12** Comprises all types of equity not recorded under direct investment and portfolio investment.

■ Explanatory notes

■ Balance of payments*

Contents of the balance of payments

The German balance of payments is a comprehensive systematic presentation of economic transactions between residents (natural and legal persons resident in Germany) and non-residents (natural and legal persons resident outside Germany) in a given reporting period (month, quarter, year). It is not a balance sheet in the sense of a point-in-time statement of assets and liabilities, but rather a flow account that also includes cross-border transactions, even if these do not lead to (direct) payment.

The balance of payments statistics provide important information on Germany's multi-faceted external trade links and are used by central banks, ministries, associations and enterprises, as well as by academics. The analyses deduced are, amongst other things, indispensable for decisions on monetary and economic policy. In addition, the German balance of payments constitutes an important part of the balances of payments of the European Monetary Union and the European Union.

The balance of payments is broken down into the following sub-accounts:

- 1 Current account
- 2 Capital account
- 3 Financial account

The current account shows the exports and imports of goods and services, together with primary and secondary income. The capital account comprises non-recurring unrequited transfers which do not have any direct effect on income or expenditure (eg debt forgiveness). The financial account presents the financial transactions between residents and non-residents, and is divided into foreign direct investment, portfolio investment, financial derivatives and employee stock options, other investment, and reserve assets. The sectoral breakdown generally shows the domestic sector of the creditor or the debtor.

In accounting terms, the three aforementioned sub-accounts are interrelated. If the current account and

capital account are taken together, a surplus is associated with an increase in external assets or decrease in external liabilities in the financial account. Conversely, a deficit in the current account and capital account is associated with a decrease in assets or increase in liabilities vis-à-vis non-residents.

In practice, however, there is no such precise correlation because transactions cannot always be correctly ascribed to the respective periods and because there are gaps in the statistical coverage of all sub-accounts (other than the reserve assets and other assets and liabilities of the Bundesbank).¹ All discrepancies are reflected in the "net errors and omissions".

Sources and legal bases

A modular system is used to collect the data required to compile the balance of payments. External sector reporting is the core component, which as a general rule requires resident banks, enterprises, households and public authorities participating in external transactions to report their transactions with non-residents to the Bundesbank. The legal basis is provided by section 11 (2) of the Foreign Trade and Payments Act (*Außenwirtschaftsgesetz*) together with section 67 et seq of the Foreign Trade and Payments Regulation (*Außenwirtschaftsverordnung*).

Data are also taken from other sources:

- Foreign trade statistics from the Federal Statistical Office
- Household survey on travel expenses abroad
- External position of banks and non-banks and foreign direct investment stock statistics
- The Deutsche Bundesbank's internal accounting
- Other national and international statistics for reconciliation and as a basis for estimates

* An account of the methodological changes to the balance of payments compared with the classifications used up until June 2014 was published in Deutsche Bundesbank, Changes in the methodology and classifications of the balance of payments and the international investment position, Monthly Report, June 2014, pp 57-68.

¹ With regard to recording problems, see also Germany's international investment position on page 38.

Since the publication of data for the reporting month of May in July 2014, the methodology and classifications of the balance of payments and the international investment position have been in line with the revised standard of the International Monetary Fund (IMF): IMF (2009), Balance of Payments and International Investment Position Manual, Sixth Edition (BPM6). The reporting obligations of the Bundesbank are also laid 184/2005 of 12 January 2005 and Guideline of the European Central Bank 23/2011 of 9 December 2011.

External stock statistics

The transactions shown in the balance of payments statistics (Tables I.1 to I.9 of this Supplement) are augmented by stock statistics on the external assets and liabilities of banks in Germany and of their foreign branches and subsidiaries, as well as on those of enterprises in Germany, and by the external position of the Bundesbank (Tables II.1 to II.7). Together with the foreign direct investment stock statistics and supplemented by a range of other additional information, these provide the basis for computing Germany's international investment position (Table II.8).

International investment position (IIP)

The international investment position (IIP) indicates Germany's assets and liabilities vis-à-vis non-residents at market value as at the end of each reporting period. Thus, the IIP provides information not only on the volume and structure of financial assets held abroad by residents, but also on financial assets held in Germany by non-residents.

The IIP and balance of payments are incorporated into an integrated statement. The difference between the initial and the end IIP value of a given period is determined by financial account transactions, the valuation effects arising from market price or exchange rate fluctuations and a variable referred to as "other adjustments" which can result from, say, write-offs on non-collectable credit claims. In practice, statistical discrepancies may also occur if the data on transactions and stocks stem from different sources.

Various sources are used to determine the IIP. In addition to the monthly stock reports on external assets and liabilities held by enterprises, households, general government and monetary financial institutions (MFIs), recourse is made to the monthly figures for the securities

holdings statistics; these include the securities holdings reported by German custodians. The annual stock data of German and foreign direct investment enterprises are also included. Items for which there are no stock data are calculated by aggregating balance of payments transactions. This applies to German securities liabilities in particular. Lastly, the Bundesbank also provides monthly accounting data, which are used to calculate its external position.

With respect to securities components in the stock statistics and in the corresponding flow account of the balance of payments statistics, the positions of private non-banks cannot always be ascertained with the desired accuracy as the transactions conducted abroad are not comprehensively reported.

When securities are traded via international brokers and clearing houses, it is also difficult to identify the country in which the actual purchaser of a German security is resident. To correct these regional distortions, the geographical breakdown of the IMF's Coordinated Portfolio Investment Survey (CPIIS) is applied to German securities liabilities.

External position of banks (MFIs)

The external assets and liabilities of banks in Germany (including affiliates of foreign banks in Germany) as well as these banks' foreign branches and subsidiaries are recorded in the "External position of banks" (Tables II.1 to II.4). In the case of the external position of foreign branches and subsidiaries, the definition of "external" is the same as it is for that part of the reporting institution that is resident in Germany. This means that the country of domicile of a foreign affiliate is also deemed to be "external".

All credit institutions that are defined as MFIs are required to report for the purposes of the external position of the banks in Germany (Table II.1). (All institutions that take deposits or close substitutes for deposits (for example, through the issue of securities) from the general public and grant loans (including those in the form of securities purchases) for their own account are deemed to be MFIs.) Conversely, the items vis-à-vis banks domiciled in the euro area relate only to MFIs. As investment companies do not conform to the definition of an MFI, their own external assets and liabilities and those of their special funds are recorded under the external position of enterprises rather than under the external position of banks. However, the money market

funds (MMFs) set up by investment companies are an exception. To permit their inclusion in the monetary account, they are treated as MFIs. However, the data on MMFs that are collected as part of the statistics on investment companies are recorded only in the German contribution to the money stock and its counterparts shown in the overall monetary survey in the euro area and not in the tables showing the operations of all banks. The figures on MMFs are published in Statistical Supplement 2 to the Monthly Report "Capital market statistics".

External position of enterprises

The external assets and liabilities arising from loans and trade relations pertaining to German enterprises (including investment companies but not their MMFs; see explanatory notes under "External position of banks") are recorded in the "External position of enterprises" (Table II.6).

■ Publication of results

Frequency

The German balance of payments is published monthly in the Bundesbank's press releases, its Monthly Reports, in the Statistical Supplement 3 to the Monthly Report "Balance of payments statistics", and in the Bundesbank's time series database. Further data on balance of payments statistics are available on the Bundesbank's website under Statistics/External sector/Balance of payments and in Special Statistical Publication 11 "Balance of payments by region".

The preliminary IIP is published in Tables II.8a and II.8b of Statistical Supplement 3 to the Monthly Report "Balance of payments statistics" at the end of each quarter with a time lag of one quarter. The results as at the end of the previous year, which are compiled based on more detailed data sources compared with the provisional calculations, are published in the annual IIP press release (in September).

Revision policy for the balance of payments and the IIP

When publishing the preliminary balance of payments data for a given reporting month, the corresponding data for the previous month are revised (prior-month revision). These revisions contain new foreign trade data from the

Federal Statistical Office, late and correction reports from reporting parties on external transactions, and other information subsequently made available. The Federal Statistical Office initially revises foreign trade figures together with the preparation of the data for two months later. Overall, six consecutive monthly revisions are carried out for each reporting month. An additional annual revision is made in November of the following year. These revised results are integrated into the balance of payments every time new balance of payments data are published.

Further revisions to the balance of payments are carried out in connection with the regular revisions to the quarterly IIP. Thus the revisions to data from preceding quarters have an impact on the corresponding financial account transactions, if, for example, new data from secondary sources are included (these are generally BIS data on deposits of German non-banks at banks abroad and data on German external liabilities arising from euro banknote issuance).

Annual revisions for the previous reporting year and the three preceding years are made in the March issue of the Monthly Report. This annual revision generally incorporates new information stemming from secondary sources and late reports, and provisional estimates are revised or replaced. Methodological changes, including those for earlier periods, are also generally carried out at this point.

Regional shifts in balance of payments data can arise in July's "Balance of payments by region" publication. In addition, new data from secondary sources may be included (these are generally data on foreign travel expenditure from the previous year).

In addition to the specified revision dates, unscheduled revisions to the balance of payments can also occur. In the event of extensive revisions or the discovery of serious errors, an assessment is made on a case-by-case basis as to whether the analysis of the balance of payments is impaired as a result of the errors and therefore whether a correction is necessary in the next publication or whether it will suffice to make a correction at the next regular revision date.

In the case of Germany's IIP, the data for the previous quarter are normally revised when the data for the current quarter are published. (In exceptional cases, data for earlier periods may also be revised). Each September, all quarterly figures for the four preceding years are

revised owing to the availability of more detailed data sources. (In exceptional cases, data for earlier periods may also be revised). In this context, the revised data on the IIP are reconciled with the balance of payments figures. Consequently, further revisions to the balance of payments data may be necessary.

Methodological notes

Accrual principle for interest income

Since the annual revision in the Monthly Report of March 2005, interest income on debt securities and other debt instruments shown under investment income in the current account has been calculated in accordance with the accrual principle. The figures are calculated retroactively to 1971.

The IMF Balance of Payments Manual² and the ECB Guideline³ stipulate that interest earned on debt securities (long- and short-term debt securities) and other debt instruments should not be recorded in the current account only at the time of payment, but should be distributed evenly across the interest period.⁴

Pursuant to the provisions of the IMF and the ECB, this accrual-based calculation is to be performed by applying suitable reference rates to the relevant assets. The detailed implementation of these provisions requires the securities holdings to be shown on a security-by-security basis. As the database needed for this is still being developed, the following procedures are being used as a temporary solution.

A simplified back-calculation method is used to convert interest payments statistics from the period between 1971 and the start of the last reporting year to accruals-based statistics. The interest payments that were originally recorded are divided equally across the immediately preceding interest period, usually 12 months.⁵

Under the described back-calculation procedure, no figures can be calculated yet for the previous reporting year. Thus, the interest income series had to be estimated using aggregated stocks⁶ and reference rates. After one year, the interest flows calculated in this way for the previous reporting year can be adjusted using the back-calculation procedure.

Further explanatory notes can be found in Deutsche Bundesbank, German balance of payments in 2004, Monthly Report, March 2005, pages 25 to 41 and on the Deutsche Bundesbank's website.

The distinction between loans and currency and deposits

Transactions are assigned to loans or currency and deposits approximately on the basis of the sector of the domestic or foreign debtor: if the debtor belongs to the MFI sector (including monetary authorities), the transactions are attributed to the item "Currency and deposits"; if the debtor belongs to another sector (general government, enterprises and households), the relevant transactions are assigned to loans.

Transition from foreign trade to trade in goods and the treatment of freight and insurance costs for imports

Conceptual differences exist between foreign trade in accordance with the official foreign trade statistics and trade in goods according to the balance of payments statistics: while foreign trade statistics record goods physically crossing a national border, the change-of-ownership principle is applied in the balance of payments. Consequently, the purchase of goods outside Germany by German traders and their resale to non-residents must, for instance, be included as an addition to foreign trade, provided the transfer of ownership between the German trader and the non-resident did not result in any national borders being crossed. Deductions must correspondingly be made from foreign trade when goods cross the German border without there being a change of ownership. This includes goods movements in connection with cross-border processing. Furthermore, the value of the goods in the foreign trade statistics is recorded at the German border (import cif, export fob),⁷ while in the balance of payments the value of the goods

² IMF, Balance of Payments Manual, Sixth Edition, 2009.

³ ECB, Guideline ECB/2011/23, 2011.

⁴ Dividends are not subject to the accruals principle; instead, they must be recorded at the time at which they are payable.

⁵ Thus, a monthly figure calculated on an accrual basis comprises one-twelfth of the interest payments of the month concerned and one-twelfth of the interest payments of each of the following eleven months.

⁶ As an expedient, the monthly stock data are derived from the annual IIP and the monthly balance of payments transactions.

⁷ cif: cost, insurance, freight (a freight clause that includes transport and insurance costs). fob: free on board, ie no transport or insurance costs.

is shown at the border of the exporting country (import fob, export fob). The transport and insurance costs (cif costs of imports) included in the import value in foreign trade statistics must therefore be deducted and, in the event of a non-German transporter, assigned to the corresponding services items.

A transition from foreign trade to trade in goods is shown in Table I.3a "Foreign trade and supplementary trade items". Foreign trade (explicitly the special trade) in accordance with the official foreign trade statistics plus supplementary trade items is referred to as general merchandise within the scope of balance of payments statistics. Together with net exports of goods under merchanting and exports/imports of non-monetary gold the trade in goods is ultimately calculated. With the introduction of the sixth edition of the IMF's Balance of Payments Manual, this trade in goods the latter will now always be presented in the German balance of payments excluding freight and insurance costs (in accordance with international practices).

Financial intermediation services indirectly measured (FISIM)

Financial intermediaries frequently choose to be remunerated for a service indirectly through the associated interest margin. These indirectly rendered services are now recorded under financial services. As a result, financial intermediation services indirectly measured (FISIM) will no longer be included in interest income. Under primary income, non-banks' interest income on deposits held abroad is to be expanded to include FISIM, whereas interest expenditure on cross-border loans will be reduced to take account of such services. Conversely, the interest revenue of domestic banks will fall and their interest expenditure will increase. The data on FISIM are calculated by the Federal Statistical Office within the framework of the national accounts using a designated model.

Travel

Estimates of receipts are based on reports for foreign travel payments, for which the main sources are credit institutions and travel companies as they handle a large number of travel-related transactions through the purchase and sale of foreign currency as well as through payments via credit and debit cards. Together with evaluations of potential changes in payment behaviour, these data are used to extrapolate travel receipts. The

result of this calculation is also checked against the figures from the Federal Statistical Office's accommodation statistics and corresponding data from major partner countries. Since 2001, the expenditure figures have been calculated on the basis of a direct household survey of persons travelling abroad. However, owing to the sampling error, the availability of results for individual countries is limited.

Sectoral classification

The revised Balance of Payments Manual (BPM6) has brought the sectoral classification into line with that of the System of National Accounts.⁸ However, in order to ensure that balance of payments data is consistent with the fifth edition of the Balance of Payments Manual (BPM5), the basic sectoral classification model was adopted while nevertheless consolidating several heavily subdivided areas. The division of economic agents by institutional sector used in the Statistical Supplement 3 to the Monthly Report, is very closely based on this manner of classification. Designations were largely retained in order to maintain consistency with previous sector designations.

By contrast, the reporting requirements at European level⁹ subdivides the sectors to a greater degree than in the Statistical Supplement 3 to the Monthly Report, although when compared with the national accounts, the sectors here are also aggregated into groups to some extent. All time series for the balance of payments in the Statistical Supplement 3 are available on the website under Statistics/External sector/Balance of payments.

The classification of institutional sectors used in the German balance of payments, together with reference to the internationally applicable classification of sectors pursuant to 2008 SNA (in brackets, if available), is shown in the following table. The sectors used in Statistical Supplement 3 to the Monthly Report have been highlighted:

⁸ 2008 SNA.

* Quelle: Statistisches Bundesamt und eigene Berechnungen auf Basis von Angaben des Statistischen Bundesamts. **1** Enthält auch Waren, die nicht zugeordnet werden konnten und Zuschätzungen für Meldeausfälle und nicht meldepflichtigen Außenhandel. Ab Januar 2007 ohne Reparatur- und Wartungsvorgänge. **2** Die Zuordnung der Gütergruppen des GP 2002 zu den industriellen Hauptgruppen erfolgt gemäß Verordnung (EG) Nr. 586/2001. Im Falle des GP 2009 erfolgt diese Einteilung gemäß Ver-

ordnung (EG) Nr. 656/2007. **3** Angaben ab Januar 2010 einschl. Zuschätzungen für Meldeausfälle und nicht meldepflichtigen Außenhandel. **4** Gegenüber dem GP 2002 ergeben sich insbesondere folgende Änderungen: Vorleistungsgüter einschl. elektronischer Induktoren, Elektromotoren, Generatoren und Transformatoren, ohne Werkzeuge für Bau- und Bergwerksmaschinen, elektrische Ausrüstungsgegenstände für Kraftwagen und Kraftwagenmotoren; Investitionsgüter einschl. Uhren, Sitzen für Kraft-

* Bei den Leistungen im Rahmen des Haushalts der EU, die hier zusammengefasst dargestellt werden, handelt es sich überwiegend um Sekundäreinkommen. Die Erstattungen von Erhebungskosten stellen in der Zahlungsbilanz Dienstleistungseinnahmen dar; Leistungen aus dem Regionalfonds und dem Europäischen Garantiefonds für Landwirtschaft (EGFL) (bis 2006 Europäischer Ausrichtungs- und Garantiefonds für Landwirtschaft (EAGFL)) sind in der Vermögensänderungsbilanz bei den Vermögensübertragungen erfasst. 1 Ohne den besonderen Währungsausgleich bei der Ausfuhr nach Großbritannien und Italien. Die Währungsausgleichsbeträge für Einfuhren aus anderen EU-Ländern werden über den ausführenden und nicht wie sonst

üblich über den einführenden Mitgliedstaat ausbezahlt. 2 Zusätzliche Einnahme der EU zur Restfinanzierung des EU-Haushalts; Sie wird nach dem deutschen Anteil am Bruttonationaleinkommen (BNE) der EU bemessen. 3 Erstattung von Erhebungskosten in Höhe von 10% von 1988 bis 2000; 25% ab 2001 für Zölle und Abgaben im Rahmen der Agrarpolitik; Nachzahlung ist im Jahr 2002 enthalten. Der Betrag wird seit 1988 von den Mitgliedsstaaten bei der Abführung von Eigenmitteln an die EU einbehalten. 4 Enthält bis Ende 2006 die Zahlungen des EAGFL – Abteilung Ausrichtung. Einschl. dem Europäischen Fischereifonds und den Direktzahlungen der EU an die Endbegünstigten.

* Ergebnisse der Meldungen über den monatlichen Auslandsstatus der Banken. Die Meldungen von „Banken in Deutschland“ umfassen die Meldungen aller in Deutschland ansässigen Bankniederlassungen (ohne Deutsche Bundesbank); das bedeutet: von deutschen Banken mit Auslandsfilialnetz sind nur Teilmeldungen mit Angaben

über ihre Niederlassungen in Deutschland enthalten, während andererseits Meldungen von in Deutschland ansässigen rechtlich unselbstständigen Niederlassungen ausländischer Banken mit einbezogen werden. Ab Dezember 2002 Wegfall der bisherigen Meldefreigrenze (10 Mio €). Die Ergebnisse der Auslandsstatus-Meldungen für die

Auslandsfilialen und die Auslandstöchter werden gesondert dargestellt; darin umfasst der Begriff „Ausland“ auch das Sitzland der Auslandsfilialen oder Auslandstöchter (s. Tab. II.2 a) bis c) sowie Tab. II.3 a) bis c)). Zur Unterscheidung nach Fristigkeiten: kurzfristig = täglich fällig sowie vereinbarte Laufzeit oder Kündigungsfrist bis 1 Jahr ein-

schließlich; langfristig = vereinbarte Laufzeit oder Kündigungsfrist von über 1 Jahr. Statistisch bedingte Zu- und Abgänge sind nicht ausgeschaltet; Forderungen und Verbindlichkeiten in Fremdwährung sind zu Euro-Referenzkursen am Meldestichtag umgerechnet. 1 Ab August 2009 ohne Forderungen aus der „Finanziellen Zusammenarbeit“

II. Außenwirtschaftliche Bestandsstatistiken

Zahlen entsprechen in ihrer Abgrenzung den „Consolidated Foreign Claims“, die in der Web-Version des Quartalsberichts der Bank für Internationalen Zahlungsausgleich (BIZ) regelmäßig auf Tabelle 9B veröffentlicht werden. Die Angaben kennzeichnen

das Brutto-Exposure der deutschen Banken gegenüber den Kreditnehmerländern. Die von den berichtenden Instituten getroffenen Maßnahmen zur Risikoabsicherung bleiben in dieser Darstellung außer Betracht. 1 Ab August 2009 ohne Forderungen

II. Außenwirtschaftliche Bestandsstatistiken

noch: 4. Forderungen der deutschen Banken einschließlich ihrer Auslandsfilialen und -töchter an das Ausland in der Abgrenzung der Konsolidierten Bankenstatistik der Bank für Internationalen Zahlungsausgleich *)

* Die Angaben stammen aus der halbjährlichen OTC-Derivatestatistik der Bank für Internationalen Zahlungsausgleich (BIZ). Zu dieser Statistik berichten rund 74 marktführende Banken (auf Konzernbasis, d.h. einschließlich ihrer Filialen und Töchter) mit Sitz in den G 10 – Ländern; auf diese Institute entfällt ein Anteil von mehr als drei Vierteln des globalen OTC-Marktes in Derivaten. Aus Deutschland nehmen an der Erhebung 5

im derivaten Geschäft aktive Banken teil. Erfasst wird der Stand der offenen OTC-Kontrakte jeweils zum Ende Juni und Ende Dezember. 1 Ohne die von der BIZ geschätzten „anderen“ Kontrakte. Ab dem 2. Halbjahr 2004 einschließlich Kreditderivate. 2 Outright Forwards und FX-Swaps, Währungs-Swaps und Währungs-Optionen.

3 Forward Rate Agreements, Zins-Swaps und Zins-Optionen. 4 Nur Credit Default Swaps. Die Angaben werden erstmals für das 2. Halbjahr 2004 erfasst. 5 Forwards, Swaps und Optionen. 6 Geschäfte zwischen berichtenden Instituten, die von beiden beteiligten Kontrahenten gemeldet werden, werden in der Statistik nur einmal er-

fasst. Das im unteren Teil der Tabelle gezeigte Teilergebnis der deutschen Berichtsinstitute enthält dagegen gewisse Doppelzählungen, und zwar für Geschäfte, die die 5 deutschen Berichtsbanken untereinander abgeschlossen haben. 7 Einschließlich Versicherungsunternehmen.

^{o)} Forderungen und Verbindlichkeiten gegenüber allen Ländern innerhalb und außerhalb der Europäischen Währungsunion. Bis Dezember 2000 sind die Bestände zu jedem Quartalsende aufgrund der Neubewertung zu Marktpreisen ausgewiesen; innerhalb eines Quartals erfolgte die Ermittlung des Bestandes jedoch auf der Grund-

lage kumulierter Transaktionswerte. Ab Januar 2001 werden alle Monatsendstände zu Marktpreisen bewertet. ¹ Enthält vor allem die Netto-Forderungen aus dem Target-System (in der jeweiligen Länderabgrenzung), seit November 2000 auch die

Salden gegenüber den Nicht-EWU-Zentralbanken innerhalb des ESZB. 2 In der Hauptsache langfristige Schuldverschreibungen von Emittenten innerhalb des Euro-Währungsgebiets. 3 Gemäß EZB-Vereinbarung werden hier auch Verbindlichkeiten

erfasst, die eigentlich den Ansässigen außerhalb der Eurozone zuzuordnen wären. 4 Vgl. Deutsche Bundesbank, Monatsbericht Oktober 2014, Seite 24. 5 Euro-Eröffnungsbilanz der Bundesbank zum 1. Januar 1999.
