Reproduction permitted only if source is stated.

This Annex provides an English translation of the headings and explanatory notes to the data contained in the German original, which is the sole authoritative text.

The Statistical Supplement Seasonally adjusted business statistics is published at monthly intervals by the Deutsche Bundesbank, Frankfurt am Main, by virtue of section 18 of the Bundesbank Act. It is available to interested parties free of charge.

Further statistical data, supplementing the Monthly Report, are to be found in the following Supplements.

Banking statistics	monthly
Capital market statistics	monthly
Balance of payments statistics	monthly
Exchange rate statistics	quarterly

Selected updated statistics are also available on the website. For a small fee to cover costs, a file which is updated monthly and contains approximately 40,000 time series published by the Bundesbank can also be obtained on magnetic tape cassette or CD-ROM from the Division for Statistical Information Systems and Mathematical Methods.

# Contents

## I Monetary indicators

---

1 German contribution to the money stock in the euro area, as variously defined	6
2 German contribution to the components of the money stock M3 in the euro area	6
3 German contribution to lending to non-banks (non-MFIs) in the euro area	6
4 German contribution to monetary capital formation at monetary financial institutions (MFIs) in the euro area	6

## II Economic indicators

---

1 GDP and gross value added of selected economic sectors	7
2 GDP expenditure components at previous-year prices	7
3 GDP expenditure components at current prices	7
4 National income	8
5 Households' income	8
6 Productivity and labour costs in the economy as a whole	8
7 Unit labour costs in selected economic sectors	9
8 Index of labour costs	
9 Employment and labour market	9
10 Output in the production sector – general survey	9
11 Output in industry, by main grouping	10
12 Output in selected branches of industry	10

13 Productivity and labour costs in industry	10
14 Orders received by industry, by main grouping	10
15 Orders received by industry from the domestic market	11
16 Orders received by industry from abroad	11
17 Orders received by selected branches of industry	11
18 Turnover of industry, by main grouping – total and domestic	11
19 Turnover of industry, by main grouping – export	11
20 Building permits granted for structural engineering work	12
21 Orders received by the construction sector – value	12
22 Orders received by the construction sector – volume	12
23 Employment, labour costs and turnover in the construction sector	12
24 Retail turnover	13
25 Producer and consumer prices	13
26 Prices and unit values in foreign trade	13

### III External sector

---

1 Current account	14
2 Foreign trade – general survey	14
3 Exports, by group of countries	14
4 Exports, by category of goods	14
5 Imports, by group of countries	15
6 Imports, by category of goods	15
7 Service transactions and factor income	15

### IV Trend-adjusted indicators

---

1 Industrial activity – demand	16
2 Industrial activity – output, employment, costs	16
3 Investment activity	16
4 External sector	16

### Explanatory notes

---

Seasonal adjustment	17
Figures in Deutsche Mark	18
Data in the national accounts at previous-year prices and contributions to growth	18
Unemployment data	19
Deviations from trend	19
Sources of unadjusted figures	19

## Notes

---

### Interpretation of data

Seasonally adjusted figures are estimated and hence subject to some uncertainty. Therefore, minor changes from one period to another affecting the last digit of the figures in this Supplement do not necessarily allow conclusions to be drawn as to economically relevant changes. The series are normally accurate enough to enable the reader to infer the mostly rounded rates of change given in the Bundesbank's analyses.

The factors used for seasonal adjustment are recalculated at regular intervals and as required. Revised time series or tables are marked with an (R).

The seasonal adjustment also includes adjustment for working-day variations, insofar as such variations can be proved and quantified (see also the notes on the seasonal adjustment methodology at the end of this Supplement).

### Release of updated figures

This tables in this Supplement updated to show the latest figures are available on the internet together with publication dates.

## Abbreviations and symbols

---

- p** Provisional
- r** Revised
- s** Estimated
- ts** Partly estimated
- ...** Data available at a later date
- .** Data unknown, not to be published, not meaningful or not informative owing to particular uncertainty relating to the seasonal adjustment
- 0** As the last digit means less than half of one but more than nil
- Nil
- A** Seasonal adjustment using the additive method
- R** Seasonal factors recalculated

Significant changes from the previous version are marked by vertical lines in the margin.

## I Monetary indicators

### 1 German contribution to the money stock in the euro area, as variously defined

End of month and change

Seasonally adjusted

Money stock M2 (Excluding currency in circulation) <sup>1</sup>			Money stock M3 (Excluding currency in circulation) <sup>2</sup>			Memo item Money stock M3 in the European monetary union <sup>3</sup>		
€ billion	Change during quarter <sup>4</sup> € billion	Annual rate <sup>4, 5</sup> in %	€ billion	Change during quarter <sup>4</sup> € billion	Annual rate <sup>4, 5</sup> in %	€ billion	Change during quarter <sup>4</sup> € billion	Annual rate <sup>4, 5</sup> in %

Zeit = Period

Source of the unadjusted figures for the changes: European Central Bank; provisional. — <sup>1</sup> Overnight deposits, deposits with an agreed maturity of up to 2 years and deposits redeemable at notice of up to 3 months. — <sup>2</sup> M2 plus repo transactions, money market fund shares held by euro-area residents,

money market paper and debt securities with agreed maturities of up to 2 years. — <sup>3</sup> Source: European Central Bank. Revision of data possible due to new information. — <sup>4</sup> Statistical changes have been eliminated. — <sup>5</sup> Change in the last six months, expressed as an annual rate.

### 2 German contribution to the components of the money stock M3 in the euro area

End of month and change

Seasonally adjusted

Overnight deposits			Deposits with an agreed maturity of up to 2 years			Deposits redeemable at notice of up to 3 months			Marketable instruments <sup>1</sup>		
€ billion	Change during quarter <sup>2</sup> € billion	Annual rate <sup>2, 3</sup> in %	€ billion	Change during quarter <sup>2</sup> € billion	Annual rate <sup>2, 3</sup> in %	€ billion	Change during quarter <sup>2</sup> € billion	Annual rate <sup>2, 3</sup> in %	€ billion	Change during quarter <sup>2</sup> € billion	Annual rate <sup>2, 3</sup> in %

Zeit = Period

Source of the unadjusted figures for the changes: European Central Bank; provisional. — <sup>1</sup> Repo transactions and money market fund shares held by

euro-area residents, money market paper and debt securities with agreed maturities of up to 2 years. — <sup>2</sup> Statistical changes have been eliminated. — <sup>3</sup> Change in the last six months, expressed as an annual rate.

### 3 German contribution to lending to non-banks (non-MFIs) in the euro area

End of month and change

Seasonally adjusted

Lending, total			Lending to enterprises and households			Lending to general government		
€ billion	Change during quarter <sup>1</sup> € billion	Annual rate <sup>1, 2</sup> in %	€ billion	Change during quarter <sup>1</sup> € billion	Annual rate <sup>1, 2</sup> in %	€ billion	Change during quarter <sup>1</sup> € billion	Annual rate <sup>1, 2</sup> in %

Zeit = Period

Source of the unadjusted figures for the changes: European Central Bank;

provisional. — <sup>1</sup> Statistical changes have been eliminated. — <sup>2</sup> Change in the last six months, expressed as an annual rate.

### 4 German contribution to monetary capital formation at monetary financial institutions (MFIs) in the euro area

End of month and change

Seasonally adjusted

Monetary capital formation, total <sup>1</sup>			of which								
			Deposits with an agreed maturity of over 2 years <sup>2</sup>			Deposits redeemable at notice of over 3 months			Debt securities with an agreed maturity of over 2 years		
€ billion	Change during quarter <sup>3</sup> € billion	Annual rate <sup>3, 4</sup> in %	€ billion	Change during quarter <sup>3</sup> € billion	Annual rate <sup>3, 4</sup> in %	€ billion	Change during quarter <sup>3</sup> € billion	Annual rate <sup>3, 4</sup> in %	€ billion	Change during quarter <sup>3</sup> € billion	Annual rate <sup>3, 4</sup> in %

Zeit = Period

Source of the unadjusted figures for the changes: European Central Bank; provisional. — <sup>1</sup> After deduction of inter-MFI holdings. — <sup>2</sup> Including

deposits with building and loan associations. — <sup>3</sup> Statistical changes have been eliminated. — <sup>4</sup> Change in the last six months, expressed as an annual rate.

## II Economic indicators

### 1 GDP and gross value added of selected economic sectors \*

Seasonally adjusted

Gross domestic product		Gross value added <sup>1, 2</sup>		of which									
				Production sector excluding construction <sup>2</sup>		Construction (A)		Wholesale and retail trade, hotels and restaurants and transport <sup>2, 3</sup>		Financial, real estate, renting and business services		Public and private services	
Index/ € billion	Change from previous period in %	Index/ € billion	Change from previous period in %	Index/ € billion	Change from previous period in %	Index/ € billion	Change from previous period in %	Index/ € billion	Change from previous period in %	Index/ € billion	Change from previous period in %	Index/ € billion	Change from previous period in %

Zeit = Period; Vj. = quarter

In Vorjahrespreisen = At previous-year prices

In jeweiligen Preisen = At current prices

Source of the unadjusted figures: Federal Statistical Office. — \* Last update:

(date see German table). — 1 Excluding net taxes on products. — 2 Derived from seasonally adjusted components. — 3 Including communication. — 4 See the explanatory notes at the end of this Supplement.

### 2 GDP expenditure components at previous-year prices \*

Seasonally adjusted

Gross domestic product		Domestic use <sup>1</sup>		of which							Net exports <sup>4</sup>	Exports <sup>1</sup>		Imports <sup>1</sup>	
				Private consumption <sup>2</sup>		Government consumption		Machinery and equipment		Buildings (A)					
Index	Change from previous period in %	Index	Change from previous period in %	Index	Change from previous period in %	Index	Change from previous period in %	Index	Change from previous period in %	Index	Change from previous period in %	Index	Change from previous period in %	Index	Change from previous period in %

Zeit = Period; Vj. = quarter; vj. = quarterly; hj. = half - yearly

Rechnerische Wachstumsbeiträge am Bruttoinlandsprodukt in Prozentpunkten = Statistical contribution to GDP growth in percentage points

Source of the unadjusted figures: Federal Statistical Office. — \* Last update: (date see German table). — 1 Derived from seasonally adjusted components. — 2 Including non-profit institutions serving households. — 3 Including net increase in valuables. — 4 Exports less imports. — 5 See the

explanatory notes at the end of this Supplement; half-year data calculated on the basis of half-year averages of the indices. — 6 GDP revised from the first quarter 2006 onwards. — 7 Exports and therefore also net exports positively influenced by late reports; changes in inventories and therefore also domestic use negatively influenced by being offset against net exports. — 8 Data subject to increased uncertainty.

### 3 GDP expenditure components at current prices \*

Seasonally adjusted +

Gross domestic product		Domestic use		of which							Net exports <sup>3, 4</sup>	Exports		Imports	
				Private consumption		Government consumption		Machinery and equipment		Buildings (A)					
DM/€	Change from previous period in %	DM/€	Change from previous period in %	DM/€	Change from previous period in %	DM/€	Change from previous period in %	DM/€	Change from previous period in %	DM/€	Change from previous period in %	DM/€	Change from previous period in %	DM/€	Change from previous period in %

Zeit = Period; Vj. = quarter

Mrd DM = DM billion; Mrd € = € billion

Source of the unadjusted figures: Federal Statistical Office. — \* Last update: (date see German table). — + Derived from seasonally adjusted components. — 1 Including non-profit institutions serving households. — 2 Including net increase in valuables. — 3 The seasonally adjusted series are subject to much greater

uncertainty than the basic series from which they are derived. — 4 Exports less imports. — 5 GDP revised from the first quarter 2006 onwards. — 6 Exports and therefore also net exports positively influenced by late reports; changes in inventories and therefore also domestic use negatively influenced by being offset against net exports.

## II Economic Indicators

### 4 National income \*

Seasonally adjusted +

Gross national income (GNP) <sup>1</sup>		National income (at factor prices)		Compensation of employees (residents) <sup>1, 2</sup>			Entrepreneurial and property income <sup>1, 3</sup>		
DM/€	Change from previous period in %	DM/€	Change from previous period in %	DM/€	Change from previous period in %	As % of national income	DM/€	Change from previous period in %	As % of national income

Zeit = Period; Vj. = quarter

Mrd DM = DM billion; Mrd € = € billion

Source of the unadjusted figures: Federal Statistical Office. — \* Last update: (date see German table). — + Not adjusted for working-day variations.

— 1 Derived from seasonally adjusted basic series. — 2 Including employers' contributions to social security funds. — 3 Including, besides entrepreneurial

income, income from interest, dividends, distribution of profits, net rents and reinvested earnings on foreign investment. — 4 Quarterly change in GNP, national income, and (calculated as a residual) entrepreneurial and property income influenced by particularly significant calendar irregularities, which are largely balanced out over a six-month period.

### 5 Households' income \*

Seasonally adjusted +

Gross wages and salaries <sup>1</sup>		Deductions <sup>2, 3</sup>		Net wages and salaries		Monetary social benefits received (A) <sup>4</sup>		Mass income <sup>3</sup>		Operating surplus/ mixed income <sup>5</sup>		Disposable income <sup>3, 6</sup>		Saving <sup>3, 6</sup>		Saving ratio <sup>3, 7</sup>
DM/€	Change from previous period in %	DM/€	Change from previous period in %	DM/€	Change from previous period in %	DM/€	Change from previous period in %	DM/€	Change from previous period in %	DM/€	Change from previous period in %	DM/€	Change from previous period in %	DM/€	Change from previous period in %	in %

Zeit = Period; Vj. = quarter

Mrd DM = DM billion; Mrd € = € billion

Source of the unadjusted figures: Federal Statistical Office. —

\* Households including non-profit institutions serving households. Last update: (date see German table). — + Not adjusted for working-day variations. — 1 Residence concept. — 2 Wage tax payable on gross wages and salaries, and employees' social contributions. — 3 Derived from

seasonally adjusted basic series. — 4 Cash benefits from the social security funds, general government and non-residents, pensions (net), private funded social benefits, less levies on social benefits, taxes on consumer goods and government charges. — 5 Including property income. — 6 Including the adjustment for the change in the net equity of households in pension funds reserves. — 7 Saving as a percentage of disposable income.

### 6 Productivity and labour costs in the economy as a whole \*

Seasonally adjusted +

GDP at previous-year prices per total hours worked		Compensation per employee hours worked (domestic concept)		Labour costs				GDP deflator	
				per unit of output <sup>1</sup>		per unit of turnover <sup>2</sup>			
2000 = 100	Change from previous period in %	2000 = 100	Change from previous period in %	2000 = 100	Change from previous period in %	2000 = 100	Change from previous period in %	2000 = 100	Change from previous period in %

Zeit = Period; Vj. = quarter

Source of the unadjusted figures: Federal Statistical Office, Institute for Employment Research of the Federal Employment Agency. — \* Last update: (date see German table). — + Not adjusted for working-day variations; derived from seasonally adjusted basic series. — 1 Index of compensation per

employee hours worked divided by index of GDP at previous-year prices per total hours worked. — 2 Index of compensation per employee hours worked divided by index of nominal GDP per total hours worked. — 3 Quarterly change mainly affected by the particularly significant calendar irregularities, which are largely balanced out over a six-month period.

### 7 Unit labour costs in selected economic sectors \*

Seasonally adjusted +

Enterprises <sup>1</sup>		<i>of which</i>							
		Production sector excluding construction		Construction		Wholesale and retail trade, hotels and restaurants and transport		Financial, real estate renting and business services	
2000 = 100	Change from previous period in %	2000 = 100	Change from previous period in %	2000 = 100	Change from previous period in %	2000 = 100	Change from previous period in %	2000 = 100	Change from previous period in %

Zeit = Period; Vj. = quarter

Source of the unadjusted figures: Federal Statistical Office, Institute for Employment Research of the Federal Employment Agency. — \* Labour costs (compensation per employee hours worked) in relation to labour productivity (gross value added at previous-year prices per total hours worked). Last

update: (date see German table). — + Not adjusted for working-day variations; derived from seasonally adjusted basic series. — 1 Excluding public and private service providers. — 2 Quarterly change mainly affected by the particularly significant calendar irregularities, which are largely balanced out over a six-month period.

## II Economic indicators

### 8 Index of labour costs

2008 = 100

Seasonally adjusted

Total		of which						Services activities		of which				Private sector	
		Production sector		Manufacturing		Construction				Market services sector		Non-market services sector			
B - S		B - F		C		F		G - S		G - N		O - S		B - N	
Index	Change from previous period in %	Index	Change from previous period in %	Index	Change from previous period in %	Index	Change from previous period in %	Index	Change from previous period in %	Index	Change from previous period in %	Index	Change from previous period in %	Index	Change from previous period in %

Zeit = Period; Vj. = quarter

Index der Arbeitskosten insgesamt = Index of labour cost; Index der Bruttolöhne und -gehälter = Index of gross wages and salaries; Index der Lohnnebenkosten = Index of non-wage costs

Source of the unadjusted figures: Federal Statistical Office. — \* Labour costs per hour worked, including special payments, employers' social contributions, excluding grants to employers (for example, subsidies linked to employing the

long-term unemployed); data calculated on the basis of indices with three decimal places (available at [http://www.bundesbank.de/statistik/statistik\\_zeit\\_reihen.en.php?func=&open=konjunktur](http://www.bundesbank.de/statistik/statistik_zeit_reihen.en.php?func=&open=konjunktur)). — 1 Production sector and market services sector. — 2 Classification of Economic Activities, 2008 edition. — 3 Results of the total annual survey of the main construction industry included from October 2010.

### 9 Employment and labour market \*

Seasonally adjusted

Employment <sup>1</sup> (Standardised EU definition)	Employment (Subject to social security contributions)	Exclusively marginal employment <sup>2</sup>	Unemployment, registered <sup>3</sup> (Definition of the Federal Employment Agency) <sup>4</sup>	Cyclically induced short-time workers <sup>5</sup>	Vacancies <sup>6</sup>
Thousands				As a percentage of the civilian labour force	Thousands

Zeit = Period; Vj. = quarter; mtl. = monthly; vj. = quarterly  
Deutschland = Germany

West-und Ostdeutschland = Western and eastern Germany

Sources of the unadjusted figures: Federal Statistical Office, Federal Employment Agency. — \* For employment (EU-definition): averages; employment (subject to social security contributions) and exclusively marginal employment: end-of-month-levels; unemployment (registered) and vacancies: mid-month-levels; short-time workers: mid-month levels; quarterly figures: averages. — 1 Employees and self-employed persons; workplace concept. — 2 Earned income does not regularly exceed € 400 per month. — 3 Average calculated using the results of a multiplicative and an additive approach to seasonal adjustment. — 4 See the explanatory notes at the end of this

Supplement. — 5 Not seasonally adjusted; until the end of 2006 excluding construction and agriculture; from 2007, in accordance with section 170 of the third Book of the Social Security Code. — 6 Excluding government-assisted forms of employment and seasonal jobs. — 7 From May 2009, excluding persons formally on the books of private employment agencies. — 8 From May 2010, calculated on the basis of updated labour force figures. — 9 Unadjusted data estimated by the Federal Employment Agency. The estimates for Germany in 2008 and 2009 deviated from the final data by a maximum of 0.2% for employees subject to social contributions, by a maximum of 2.0% for persons solely in jobs exempt from social contributions and, in 2009, by a maximum of 14% for cyclically induced short-time work. — 10 Initial preliminary estimate by the Federal Statistical Office.

### 10 Output in the production sector – general survey

2005 = 100

Seasonally adjusted

Production sector				of which									
Including construction sector		Excluding main construction industry		Main construction industry (A)						Energy		Industry	
				Total		Structural engineering work		Civil engineering work					
Monthly	Quarterly	Monthly	Quarterly	Monthly	Quarterly	Monthly	Quarterly	Monthly	Quarterly	Monthly	Quarterly	Monthly	Quarterly
100.00		94.44		5.56		3.47		2.09		8.76		85.69	

Gewicht in % = Percentage weight; Zeit = Period

Source of the unadjusted figures: Federal Statistical Office. — \* See explanatory notes at the end of this Supplement, section on classifications; quarterly figures for the production sector excluding construction based on reports from local units of enterprises with at least 20 employed persons; monthly breakdown from January 2007 on the basis of data provided by local

units with at least 50 employed persons but with a smaller reporting population before that date. — 1 Share of gross value added at factor cost of the production sector in base year 2005. — 2 Influenced by a change in holiday dates. — o Preliminary; pre-adjusted on the basis of estimations to the results of the quarterly production statistics by the Federal Statistical Office.

## II Economic Indicators

### 11 Output in industry \*, by main grouping

2005 = 100

Seasonally adjusted

						of which			
Intermediate goods		Capital goods		Consumer goods		Durable consumer goods		Non-durable consumer goods	
33.96		35.37		16.36		2.78		13.58	
Monthly	Quarterly	Monthly	Quarterly	Monthly	Quarterly	Monthly	Quarterly	Monthly	Quarterly

Gewicht in % = Percentage weight; Zeit = Period

Source of the unadjusted figures: Federal Statistical Office. — \* See explanatory notes at the end of this Supplement, section on classifications, manufacturing sector not allocated to main grouping "Energy" plus mining and quarrying except of energy producing materials, quarterly figures based on reports from local units of enterprises with at least 20 employed persons;

monthly breakdown from January 2007 on the basis of data provided by local units with at least 50 employed persons but with a smaller reporting population before that date. — 1 Share of gross value added at factor cost of the production sector in base year 2005. — 2 Influenced by a change in holiday dates. — o Preliminary; pre-adjusted on the basis of estimations to the results of the quarterly production statistics by the Federal Statistical Office.

### 12 Output in selected branches of industry

2005 = 100

Seasonally adjusted

Manufacture of food products; beverages and tobacco products		Manufacture of chemicals, chemical products, basic pharmaceutical products and pharmaceutical preparations		Manufacture of basic metals and fabricated metal products, except machinery and equipment		Manufacture of computer, electronic, optical products and of electrical equipment		Manufacture of machinery and equipment n.e.c.		Manufacture of motor vehicles, trailers and semi-trailers	
7.10		9.05		12.15		10.82		12.48		12.34	
10, 11 and 12		20 and 21		24 and 25		26 and 27		28		29	
Monthly	Quarterly	Monthly	Quarterly	Monthly	Quarterly	Monthly	Quarterly	Monthly	Quarterly	Monthly	Quarterly

Gewicht in % = Percentage weight; Zeit = Period

Source of the unadjusted figures: Federal Statistical Office. — \* Quarterly figures based on reports from local units of enterprises with at least 20 employed persons; monthly breakdown from January 2007 on the basis of data provided by local units with at least 50 employed persons but with a smaller reporting population before that date. — 1 Share of gross value

added at factor cost of the production sector in base year 2005. — 2 Classification of Economic Activities, 2008 edition. — 3 Influenced by a change in holiday dates. — o Preliminary; pre-adjusted on the basis of estimations to the results of the quarterly production statistics by the Federal Statistical Office.

### 13 Productivity and labour costs in industry \*

2005 = 100

Seasonally adjusted

Output				Gross wages and salaries <sup>1</sup>			
Per employed person		Per man-hour worked		Per employed person		Per man-hour worked	
				Per unit of output		Per unit of turnover	

Zeit = Period; Vj. = quarter; mtl. = monthly; vj. = quarterly  
Deutschland = Germany

Source of the unadjusted figures: Bundesbank calculations based on data from the Federal Statistical Office. — \* As well as mining of coal and lignite, extraction of crude petroleum and natural gas, manufacture of coke and

refined petroleum products. — 1 Excluding employers' compulsory social security contributions. — 2 Influenced by a change in holiday dates. — o Preliminary; production index pre-adjusted on the basis of estimates to the results of the quarterly production statistics by the Federal Statistical Office.

### 14 Orders received by industry \*, by main grouping

2005 = 100

Seasonally adjusted

Value								Volume <sup>1</sup>							
Industry		Intermediate goods		Capital goods		Consumer goods		Industry		Intermediate goods		Capital goods		Consumer goods	
100.00		36.43		55.51		8.06		100.00		36.43		55.51		8.06	
Month-ly	Quarter-ly	Month-ly	Quarter-ly	Month-ly	Quarter-ly	Month-ly	Quarter-ly	Month-ly	Quarter-ly	Month-ly	Quarter-ly	Month-ly	Quarter-ly	Month-ly	Quarter-ly

Gewicht in % = Percentage weight; Zeit = Period

Source of the unadjusted figures: Federal Statistical Office. — \* See explanatory notes at the end of this Supplement, section on classifications; results for specialist sections of local units; excluding value added tax; from January 2006, based on reports from local units with at least 50 employed

persons; previously, based on reports from local units of enterprises with at least 20 employed persons. — 1 Orders received at 2005 prices. — 2 Share of total orders received by industry in base year 2005. — 3 Influenced by a change in holiday dates.

## II Economic Indicators

### 15 Orders received by industry \* from the domestic market

2005 = 100

Seasonally adjusted

Value								Volume <sup>1</sup>							
Industry		Intermediate goods		Capital goods		Consumer goods		Industry		Intermediate goods		Capital goods		Consumer goods	
46.53		19.40		22.94		4.18		46.53		19.40		22.94		4.18	
Month-ly	Quarter-ly	Month-ly	Quarter-ly	Month-ly	Quarter-ly	Month-ly	Quarter-ly	Month-ly	Quarter-ly	Month-ly	Quarter-ly	Month-ly	Quarter-ly	Month-ly	Quarter-ly

Gewicht in % = Percentage weight; Zeit = Period

Source of the unadjusted figures: Federal Statistical Office. — \* See explanatory notes at the end of this Supplement, section on classifications; results for specialist sections of local units; excluding value added tax; from January 2006, based on reports from local units with at least 50 employed

persons; previously, based on reports from local units of enterprises with at least 20 employed persons. — <sup>1</sup> Orders received at 2005 prices. — <sup>2</sup> Share of total orders received by industry in base year 2005. — <sup>3</sup> Influenced by a change in holiday dates.

### 16 Orders received by industry \* from abroad

2005 = 100

Seasonally adjusted

Value				Volume <sup>1</sup>			
Industry	Intermediate goods	Capital goods	Consumer goods	Industry	Intermediate goods	Capital goods	Consumer goods

Gewicht in % = Percentage weight; Zeit = Period

Vj. = quarter; mtl. = monthly; vj. = quarterly

Insgesamt = Total

EWU und Nicht-EWU = Euro-area and non-euro-area countries

Source of the unadjusted figures: Federal Statistical Office. — \* See explanatory notes at the end of this Supplement, section on classifications; results for

specialist sections of local units; excluding value added tax; as of January 2006, based on reports from local units with at least 50 employed persons. — <sup>1</sup> Orders received at 2005 prices. — <sup>2</sup> Share of total orders received by industry in base year 2005. — <sup>3</sup> From January 2009 euro-area includes Slovakia, non-euro-area excludes Slovakia. — <sup>4</sup> As of January 2011, euro area includes Estonia, non euro area excludes Estonia.

### 17 Orders received by selected branches of industry \*

Value, 2005 = 100

Seasonally adjusted

Manufacture of chemicals, chemical products, basic pharmaceutical products and pharmaceutical preparations	Manufacture of basic metals and fabricated metal products, except machinery and equipment	Manufacture of computer, electronic, optical products and of electrical equipment	Manufacture of machinery and equipment n.e.c.	Manufacture of motor vehicles, trailers and semi-trailers	of which	
					Industry excluding manufacture of other transport equipment	Capital goods excluding manufacture of other transport equipment
20 and 21	24 and 25	26 and 27	28	29	Industry excluding 30	Capital goods excluding 30

Gewicht in % = Percentage weight; Zeit = Period

Vj. = quarter; mtl. = monthly; vj. = quarterly

Insgesamt = Total

In- und Ausland = Domestic and abroad

Source of the unadjusted figures: Federal Statistical Office. — \* Results for

specialist sections of local units; excluding value added tax; from January 2006, based on reports from local units with at least 50 employed persons. — <sup>1</sup> Classification of Economic Activities, 2008 edition. — <sup>2</sup> Share of total orders received by industry in base year 2005.

### 18 Turnover of industry, by main grouping \* – total and domestic

2005 = 100

Seasonally adjusted +

Industry		Intermediate goods		Capital goods		Consumer goods		of which

## IV Trend – adjusted indicators

### 1 Industrial activity\* – demand

General notes: Logarithmischer Maßstab = Logarithmic scale; Saisonbereinigte Werte und Trend = Seasonally adjusted figures and trend; Zweimonatlich, saisonbereinigte Werte, geglättet = Two-monthly,

Auftragseingang, Volumen = Orders received, volume; Insgesamt = Total orders; Inland = Domestic orders; Ausland = Orders received from abroad.

\* See the explanatory notes at the end of this Supplement, section on classifications. Indices for western Germany and for Germany linked over the annual average for 1995. Owing to the trend extrapolation required, trend and deviations from trend in the specially

seasonally adjusted figures, smoothed; Prozentuale Abweichungen saisonbereinigter Werte vom Trend = Percentage deviations of seasonally adjusted figures from trend; Linearer Maßstab = Linear scale.

Westdeutschland = Western Germany; Deutschland = Germany

marked area at the end of the series are subject to uncertainty. — 1 Two-month averages, smoothed with a three-period moving average. — 2 At 2005 prices. — # Owing to changeover to a standard EU economic sector classification, comparability disrupted.

### 2 Industrial activity\* – output, employment, costs

General notes to the charts, see IV. 1.

Produktion = Output; Kapazitätsauslastung = Capacity utilisation;

\* Including figures for mining of coal and lignite and manufacture of refined petroleum products. Indices for western Germany and for Germany linked over the annual average for 1995. Owing to the trend extrapolation required, trend and deviations from trend in the specially marked area at the end of the series are subject to uncertainty. — 1 Two-month averages (capacity utilisation: quarterly figures), smoothed with a

Beschäftigte = Employees; Löhne und Gehälter je Produkteinheit = Wages and salaries per unit of output

three-period moving average. — 2 Capacity utilisation as a percentage of the standard level of capacity utilisations, quarterly figures, excluding mining; up to 1994 excluding food, drink and tobacco industry and manufacture of chemicals, chemical products and man-made fibres (source of the unadjusted figures: Ifo Institute). — # Owing to changeover to a standard EU economic sector classification, comparability disrupted.

### 3 Investment activity\*

General notes to the charts, see IV. 1.

Auftragseingang aus dem Inland, Volumen = Domestic orders received, volume;

\* The data relate to the capital goods sector (with capacity utilisation up to 1994: capital goods producers). Indices for western Germany and for Germany linked over the annual average for 1995. Owing to the trend extrapolation required, trend and deviations from trend in the specially marked area at the end of the series are subject to uncertainty. — 1 Two-month

Produktion = Output; Kapazitätsauslastung = Capacity utilisation; Beschäftigte = Employees

averages (capacity utilisation: quarterly figures), smoothed with a three-period moving average. — 2 At 2005 prices. — 3 Capacity utilisation as a percentage of the standard level of full capacity utilisation, quarterly figures (source of the unadjusted figures: Ifo Institute). — # Owing to changeover to a standard EU economic sector classification, comparability disrupted.

### 4 External sector

General notes to the charts, see IV. 1.

Auftragseingang in der Industrie aus dem Ausland, Volumen = Orders received by industry from abroad,

1 Two-month averages, smoothed with a three-period moving average. Owing to the trend extrapolation required, trend and deviations from trend in the specially marked area at the end of the series are subject to uncertainty. — 2 At 2005 prices. — 3 Volumes valued at 2005 unit values. — 4 Exports from September to

volume; Ausfuhr, Volumen = Exports, volume; Einfuhr, Volumen = Imports, volume

November 2006 positively influenced by late data collection. — o Owing to a change in recording foreign trade, data from the start of 1993 are subject to greater uncertainty. — # Owing to changeover to a standard EU economic sector classification, comparability disrupted.

## Explanatory notes

### Seasonal adjustment

---

The Deutsche Bundesbank's purpose in seasonally adjusting time series is to filter out the usual seasonal fluctuations within the movements of the time series under review. "Usual seasonal fluctuations" means those movements which recur with similar intensity in the same season each year and which, on the basis of past movements of the time series in question, can, under normal circumstances, be expected to recur. Thus, fluctuations due to exceptionally strong or weak seasonal influences (for example, extreme weather conditions or atypical holiday constellations) will continue to be visible in the seasonally adjusted series to the extent that they exceed, or fall short of, the normal seasonal average. In general, other random disruptions and unusual movements that are readily understandable in economic terms (for example, the consequences of economic policy, large-scale orders or strikes) are also not eliminated.

Seasonal adjustment also includes the elimination of working-day variations insofar as influences deriving from differences in the number of working days or the dates of particular days (eg public holidays, weekday on the last day of the month in the case of stock series) can be demonstrated and quantified.

Generally, seasonal adjustment is based on the Census X-12-ARIMA method, version 0.2.8. Currently, only the results for construction permits issued in the construction sector, employment, wage and salary costs and turnover in the construction sector, producer prices and foreign trade prices are still seasonally adjusted using a modified version of the Census method II, version X-11. Gradually, however, these areas will also make the transition to seasonal adjustment using the new X-12-ARIMA method. The analysis of current business activity will not be affected by the temporary use of the two variants.

In general, the breakdown of the time series is based on the multiplicative model. Series adjusted by means of the additive method are marked (A).

Discrepancies between the aggregated series and their components are due to the fact that some of the seasonally adjusted aggregates are estimated directly and not derived from seasonally adjusted components.

To show the cyclical trend more clearly, the charts give, as a rule, the seasonally adjusted monthly figures as well as moving averages derived from them; the number of values included in the calculation is given in brackets beside the respective curve.

## Figures in Deutsche Mark

---

Data in Deutsche Mark relate either to statistics which, up to the end of 1998, were officially denominated in Deutsche Mark or to statistics which were officially converted to euro even before 1999 (for example, the national accounts). In the latter case the euro data have been converted to Deutsche Mark at the constant conversion rate (€1 = DM1.95583). This ensures that – apart from rounding differences – the figures in Deutsche Mark and the figures in euro show the same relative changes.

## Classifications

---

Directive ECB/2001/13 and the Deutsche Bundesbank's "Special Statistical Publication 1: Banking statistics guidelines and customer classification" form the basis for the harmonised balance sheet data from monetary financial institutions (MFIs) in Tables I 1 to I 4.

The data in the national accounts (Tables II 1 to II 7) are based on the European System of Accounts (ESA 95).

The classification of further economic indicators (Tables II 8, II 10 to II 24) is based on the Classification of Economic Activities, 2008 edition (WZ 2008). This is the national implementation and breakdown of the European classification NACE Rev 2 which contains the aggregated sections down to the disaggregated level for the classes (four-digit codes) (Regulation (EC) No 1893/2006). The main industrial groupings are defined in Regulation (EC) No 656/2007. The item "industry" has been added and is defined as an aggregate of producers of intermediate, capital and consumer goods. Energy and industry have been merged to form the item "Mining and quarrying, manufacturing and electricity, gas, steam and air conditioning supply" (WZ 2008 sections B, C and D). The production sector also includes the areas "Water supply; sewerage, waste management and remediation activities" as well as "Construction" (WZ 2008 sections E and F). However, section E and the items 41.1, 43.2 and 43.3 of section F are not included in the production index for the production sector. The statistics for industrial new orders

include data for the following sections of WZ 2008: 13, 14, 17, 20, 21 and 24 to 30. These economic activities account for just over 75% of industrial sales from 2005. Statistics regarding building permits granted for structural engineering work (Table II 20) are regulated by the Act on construction statistics (Hochbaustatistikgesetz). The national term "main construction industry" (Table II 9, II 21 to II 23) includes WZ 2008 items 41.2, 42, 43.1 and 43.9. The results for this area are listed by building type and contracting party.

An overview of the definitions used in the labour market statistics (Table II 9) can be found in the glossary for statistical reporting at the back of the Federal Employment Agency's monthly publication "Amtliche Nachrichten der Bundesagentur für Arbeit". All persons who have reached the age of 15 but have not yet reached the age of 65 and who are without employment or only with short-time employment (less than 15 hours per week) and seeking an employment of at least 15 hours per week subject to compulsory insurance are counted as unemployed. They must be registered as unemployed at an employment agency or at a basic allowance institution and be available for employment services and not be unfit for work owing to sickness.

The balance of payments statistics are based on the fifth edition of the IMF's Balance of Payments Manual (BPM5). Up to December 2008, the categorisation of groups of goods in Tables III 4 and III 6 follows the Product Classification for Production Statistics, 2002 edition (Güterverzeichnis für Produktionsstatistiken, GP 2002). Since the changeover in foreign trade statistics, the categorisation of groups of goods has been based on the Product Classification for Production Statistics, 2009 edition (GP 2009). The allocation of groups of goods from GP 2002 to main industrial groupings is carried out pursuant to Regulation (EC) No 586/2001. For GP 2009, this classification is based on Regulation (EC) No 656/2007.

## Data in the national accounts at previous-year prices and contributions to growth

---

Chain-linked Laspeyres indices (annual overlap) are at the centre of the report on the quarterly data at previous-year prices. This method evaluates the quarterly volume data of any given year at the average prices of the previous year and expresses them in terms of the quarterly average of

the nominal values of the previous year. This ratio is then chain-linked with the successively chain-linked annual average ratios. The resulting time series for the volumes may contain statistically-related breaks from the fourth quarter of one year to the first quarter of the following year. The smaller the relative prices change from year to year and the less the volume structure in the fourth quarter of the previous year deviates from that of the entire previous year, the smaller such breaks arising from the change of the price basis are. Within a year, however, the volume series do not experience any breaks. In addition, the method ensures that the annual average of the seasonally and calendar adjusted indices is equal to the average of the only calendar adjusted series and that the annual average of the only seasonally adjusted results is equal to the average of the unadjusted values (except for rounding differences).

Balancing items for which a change in the plus or minus sign is possible (eg changes in inventories and net exports) cannot be meaningfully expressed as chain-linked indices. Even so, in order to ascertain their importance for economic dynamics, mechanical contributions to growth are identified. For example, the mechanical contribution of net exports to growth is the difference between the actual rate of growth of GDP and that which one would obtain if, under otherwise equal conditions, both imports and exports had remained constant vis-à-vis the comparable period. Owing to the statistical break from the fourth quarter of one year to the first quarter of the following year, the sum of the contributions to growth of the components of GDP at previous-year prices for this period is not necessarily equal to the rate of change in real GDP. The additivity of the contributions to growth within one calendar year, however, is assured (except for rounding differences).

## Deviations from trend

---

Charts IV. to IV.4 show, for selected indicators of business activity, the seasonally adjusted figures, a trend ascertained as a moving average over several years (as a rule six) and the percentage deviations of the seasonally adjusted figures from this trend. The trend is intended to even up short and medium-term fluctuations in the course of the seasonally adjusted series and to describe the longer-term basic trend. The trend values for the years at the end of the series, for which moving

averages cannot be ascertained, are estimated by means of extrapolation of the trend over the past few years, and are therefore provisional. The method of presentation chosen is intended to reveal the dynamics and lag structures of major economic indicators.

### Sources of unadjusted figures

---

The source of the unadjusted figures of the seasonally adjusted time series is the Deutsche Bundesbank, unless stated otherwise in the tables.

Quellen der Ursprungswerte: Statistisches Bundesamt, Institut für Arbeitsmarkt- und Berufsforschung der Bundesagentur für Arbeit. — \* Rechenstand: Februar 2011. — + Kalendereinfluss nicht ausgeschaltet; bis auf den Preisindex des Bruttoinlandsprodukts ermittelt aus saisonbereinigten Grundreihen. — 1 Quotient aus dem Index des Arbeitnehmerentgelts je Arbeitnehmerstunde und dem Index des Bruttoinlandsprodukts in Vorjahres-

preisen je Erwerbstätigenstunde. — 2 Quotient aus dem Index des Arbeitnehmerentgelts je Arbeitnehmerstunde und dem Index des nominalen Bruttoinlandsprodukts je Erwerbstätigenstunde. — 3 Vierteljährliche Veränderung vor allem durch besonders große Kalenderrunregelmäßigkeiten beeinflusst, die sich im Halbjahr weitgehend ausgleichen.
