

Long time series

On economic development in Germany

Updated issue

Dataset

Please consult the relevant table for the date of the last update.

Notes

The "long time series" have limited comparability over time and geographical areas, as they are compiled by linking short time series that use different methodologies and territorial definitions. The breaks are normally indicated for the German data; for foreign data they are indicated only if the breaks are known.

Current data may be provisional. Data revisions are not indicated.

Totals may not add up due to rounding.

Reproduction permitted only if the source is stated.

Legend

...	Figure available at a later date
.	Data unknown, not to be published or not meaningful
-	Not available
