ISSN 2699-9161

Finalized on 10 March 2021.

This Statistical Series is released once a month and published on the basis of Section 18 of the Bundesbank Act (Gesetz über die Deutsche Bundesbank).

To be informed when new issues of this Statistical Series are published, subscribe to the newsletter at:
www.bundesbank.de/statistik-newsletter_en

Up-to-date information and time series are also available online at:
www.bundesbank.de/content/821976
www.bundesbank.de/timeseries

Further statistics compiled by the Deutsche Bundesbank can also be accessed at the Bundesbank web pages.

A publication schedule for selected statistics can be viewed on the following page:
www.bundesbank.de/statisticalcalendar

■ Contents

■ I. Major items of the balance of payments 6

■ II. Current account

1. Overview	8
2. Goods	
a) Overview	10
b) Special trade, by category of goods	12
3. Services	
a) Overview	14
b) Transport	18
4. Primary income	
a) Overview	20
b) Income from direct investment, other investment income	22
5. Secondary income	24
6. Regional breakdown	
a) Current account, by country and group of countries	26
b) Special trade, by country and group of countries	34
c) Travel – annual figures	36
d) Travel – quarterly figures	37
7. Memo item: Transfers in connection with the EU budget	38

■ III. Capital account 39

■ IV. Financial account

1. Overview	
a) Total	40
b) Direct investment	42
c) Portfolio investment	44
d) Other investment	48
2. Sectoral classification and regional breakdown	
a) Sectoral classification	52
b) Regional breakdown (excl. reserve assets): by country and group of countries	54

■ Explanatory notes and lists

Structure and content	62
Sources and legal bases	62
Publication of results	62
Methodological notes	63
List of countries	65
List of sectors	69

Abbreviations and symbols

p	Provisional
r	Revised
...	Data available at a later date
s	Estimated
.	Data unknown, not to be published or not meaningful
0	Less than 0.5 but more than nil
–	Nil
/	No data because the numerical value is not sufficiently reliable

Discrepancies in the totals are due to rounding.

Notes

The latest balance of payments figures should be regarded as provisional in all cases. Changes as a result of subsequent revisions appearing in the following edition are not specifically noted. Furthermore, all foreign trade (and thus goods) figures are provisional as of the reporting month of January 2020.

Note: Since 2017, the figures in the external statistics have been revised on the basis of late and correction reports as well as more recent information from secondary sources as part of the annual revision in the March Monthly Report.

In addition, the methodology for calculating direct investment income was adapted to the ESA 2010 definitions: Starting from the 2017 reporting year, two methodological changes have impacted the reinvested earnings included in income from equity and the reinvestment of earnings in the financial account. The first change concerns indirect reinvested earnings, by which retained earnings of indirectly owned direct investment enterprises are now also included in aggregate reinvested earnings. Previously, only the reinvestment of immediate direct investment enterprises (i.e. the first links in the chain of ownership of direct investment enterprises) had been included. The second change concerns investment in research and development. Since the 2017 reporting year, these items have been recorded under profit/loss, which likewise impacts the reinvested earnings. Not only do these adjustments implement requirements under European law, they also imply that the balance of payments now follows a similar approach to many financial accounting standards, which likewise require research and development expenditure to be capitalised.

I. Major items of the balance of payments

* Sources: Federal Statistical Office and Bundesbank calculations on the basis of data provided by the Federal Statistical Office. **1** Also includes goods which cannot be classified and additional estimates for transactions which failed to be reported, and transactions which do not have to be reported statistically. From January 2007, excluding repair and maintenance work. **2** The allocation of groups of goods from GP 2002 to main industrial groupings (MIGs) is carried out pursuant to Regulations (EC) No

586/2001. For GP 2009, this classification is based on Regulation (EC) No 656/2007. **3** As of January 2010, figures include additional estimates for transactions which failed to be reported, and transactions which do not have to be reported statistically. **4** The following principal changes have been made in comparison with GP 2002: intermediate goods including electronic inductors, electric motors, generators and transformers, excluding tools for construction and mining machines, electrical equipment for motor

1 Incl. freight and insurance costs of foreign trade, see "Explanatory notes and lists".

2 The sub-items of services do not add up to the aggregate because – due to methodological reasons – the construction item reports only the net receipts of domestic companies for construction services abroad and net expenditure to foreign com-

panies for construction services in the reporting country. 3 Incl. fees for processing goods that are not owned by the processor. 4 For a breakdown of transport services and comments, see table II. 3b). 5 Since 2001, the sample results of a household survey have been for expenditure. For further comments on foreign travel, see tables II 6c) and

II. Current account

3. Services

a) Overview

€ million

¹ Until 2012, only goods exported for repairs. ² Since 2014, construction sites that exist for less than one year are recorded as services. New investment and disinvestment in construction sites that exist for more than one year are recorded as direct investment (see table IV. 1b)), while the corresponding profits are recorded as primary income (see

* Transfers in connection with the EU budget, which are summarised here, comprise mainly secondary income. The refunds of collection costs constitute receipts from services in the balance of payments; payments from the Regional Fund and the European Agricultural Guarantee Fund (EAGF) (up until 2006 European Agricultural Guidance and Guarantee Fund (EAGGF)) are recorded in the capital account under capital transfers. **1** Excl. special monetary compensation for exports to the United Kingdom and Italy. The monetary compensatory amounts for these countries' imports from other EU Member States are paid out via the exporting country and not, as is normally the case, by the importing country. **2** Refund of collection costs at 10%

between 1988 and 2000; 25% from 2001 onwards for custom duties and levies under the common agricultural policy; back payments are included in the 2002 figure. Since 1988, the Member States have retained this sum when transferring own resources to the EU. **3** Until the end of 2006, includes payments by the guidance section of EAGFL. Incl. the European Fisheries Fund and direct payments from the EU to final beneficiaries. **4** Additional EU receipts for financing the remainder of the EU budget; they are calculated on the basis of the German share in the total gross national income (GNI) of the EU.

* Financial relationships with domestic and foreign enterprises are classified as direct investment if 10% or more of the shares or voting rights are directly attributable to the investor or, directly and indirectly combined, more than 50% of the shares or voting

rights can be attributed to the investor; incl. branches and permanent establishments. Short-term loans and trade credits, construction sites that exist for more than one year and all real estate investments are also deemed to be direct investment. ¹ Estimated on

IV. Financial account

■ Explanatory notes and lists

■ Structure and content

The German balance of payments is a comprehensive systematic presentation of economic transactions between residents (natural and legal persons resident in Germany) and non-residents (natural and legal persons resident outside Germany) in a given reporting period (month, quarter, year). It is not a balance sheet in the sense of a point-in-time statement of assets and liabilities, but rather a flow account that also includes cross-border transactions, even if these do not lead to (direct) payment.

The balance of payments statistics provide important information on Germany's multi-faceted external trade links and are used by central banks, ministries, associations and enterprises, as well as by academics. The analyses derived from these form, amongst other things, an indispensable basis for decisions on monetary and economic policy. In addition, the German balance of payments constitutes an important part of the balances of payments of the euro area and the European Union.

The balance of payments is broken down into the following sub-accounts:

1. current account;
2. capital account;
3. financial account.

The current account records the purchases and sales of goods and services, together with primary and secondary income. The capital account comprises unrequited transfers which do not have any direct effect on income or expenditure (e.g. debt forgiveness). The financial account documents the financial transactions between residents and non-residents, and is broken down into direct investment, portfolio investment, financial derivatives and employee stock options, other investment, and reserve assets.

In accounting terms, the three aforementioned sub-accounts are interrelated. If the current account and capital account are taken together, a surplus is associated with an increase in external assets or decrease in external liabilities in the financial account. Conversely, a deficit in the current account and capital account is associated with a decrease in external assets or increase in external liabilities.

In practice, however, there is no such precise correlation due to the fact that, first, transactions cannot always be recorded on an accrual basis and, second, all of the sub-ac-

counts (other than the reserve assets and other assets and liabilities of the Bundesbank) have gaps in their statistical coverage. All discrepancies are reflected in the "Net errors and omissions" item.

■ Sources and legal bases

A modular system is used to collect the data required to compile the balance of payments. External sector reporting is the core component, which as a general rule requires resident banks, enterprises, households and public authorities participating in external transactions to report their transactions with non-residents to the Bundesbank. The legal basis is provided by Section 11(2) of the Foreign Trade and Payments Act (*Außenwirtschaftsgesetz*) together with Sections 67 et seq. of the Foreign Trade and Payments Regulation (*Außenwirtschaftsverordnung*).

Other data sources include:

- foreign trade statistics from the Federal Statistical Office;
- household survey on travel expenses abroad;
- external positions of banks, external positions of non-banks and stock surveys on direct investment;
- the Bundesbank's internal accounting;
- other national and international statistics for reconciliation and as a basis for estimates.

Since the publication of data for the reporting month of May 2014 in July 2014, the methodology and classifications used for the balance of payments have been in line with the revised standard of the International Monetary Fund (IMF): IMF (2009), Balance of Payments and International Investment Position Manual, Sixth Edition (BPM6). The reporting obligations of the Bundesbank are also laid down in Regulation (EC) No 184/2005 of 12 January 2005 and Guideline of the European Central Bank 2011/23 of 9 December 2011, as last amended.

■ Publication of results

Frequency

The German balance of payments is published monthly in the Bundesbank's press releases, its Monthly Reports, in this statistical series and in the Bundesbank's time series database. Further balance of payments statistics are avail-

able on the Bundesbank's website under Statistics/External sector/Balance of payments.

Revision policy

When publishing the provisional data for a given reporting month, the corresponding data for the previous month are generally revised (prior-month revision). These revisions contain new foreign trade data from the Federal Statistical Office, late and correction reports from reporting parties on external transactions, and other information subsequently made available. Overall, revisions are made to foreign trade data for each reporting month over a period of eight consecutive months. An additional annual revision takes place in November of the following year. These revised results are integrated into the balance of payments every time new balance of payments data are published.

Further revisions are carried out in connection with the regular revisions to the quarterly international investment position (i.i.p.). In the reporting months of January, April, July and October, results from the reconciliation of mirror statistics and on euro banknote issuance for the months in the preceding quarter are also incorporated. In September, currency in circulation for the months in the preceding quarter is also revised.

Annual revisions for the previous reporting year and the three preceding years are made in the March Monthly Report. These annual revisions generally incorporate new information stemming from secondary sources and late reports, and provisional estimates are revised or replaced. Methodological changes, including those for earlier periods, also tend to be implemented at this point.

Regional shifts in balance of payments data can arise in July's publication. In addition, new data from secondary sources may be included (these are generally data on travel expenditure from the previous year).

In addition to the specified revision dates, unscheduled revisions can also occur. In the event of extensive revisions or the discovery of serious errors, an assessment is made on a case-by-case basis as to whether the analysis of the balance of payments is impaired as a result of the errors and, therefore, whether a correction should be made in the next publication or whether a correction at the next regular revision date will suffice.

Methodological notes

Territory

The domestic market comprises the economic territory of the Federal Republic of Germany. All other countries, including those participating in the euro area, are foreign markets.

Transition from foreign trade to goods trade

Conceptual differences between foreign trade in accordance with the official foreign trade statistics and trade in goods pursuant to the balance of payments statistics exist, in the first instance, with respect to the recording approach adopted. While foreign trade statistics record goods physically crossing a national border, the change-of-ownership principle is applied in the balance of payments. This means that, for example, the purchase of goods outside Germany by German traders and their resale to non-residents must be included as an addition to foreign trade, provided the transfer of ownership between the German trader and the non-resident did not result in any national borders being crossed. Deductions must correspondingly be made from foreign trade when goods cross the German border without there being a change of ownership. This includes goods movements in connection with cross-border processing services. Second, in the foreign trade statistics, the goods value recorded is the value at the German border (import c.i.f., export f.o.b.),¹ whereas, in the balance of payments, the value recorded is the value at the border of the exporting country (import f.o.b., export f.o.b.). The transport and insurance costs (c.i.f. costs of imports) included in the import value in the foreign trade statistics must therefore be deducted and, for non-German transporters, assigned to the corresponding services items.

Travel

Estimates of receipts are based on reports for foreign travel payments, the main sources of which are credit institutions and travel companies, which handle a large proportion of travel-related transactions through buying and selling foreign currency as well as via credit and debit card payments. Together with evaluations of potential changes in payment behaviour, these data are used to determine travel receipts. The value determined is also checked against the figures from the Federal Statistical Office's accommodation statistics and corresponding data from major part-

¹ c.i.f.: cost, insurance, freight (a freight clause that includes transport and insurance costs). f.o.b.: free on board, i.e. no transport or insurance costs.

ner countries. Since 2001, the expenditure figures have been calculated on the basis of a direct household survey of persons travelling abroad. However, owing to the sampling error, the availability of results for individual countries is limited.

Financial intermediation services indirectly measured (FISIM)

Financial intermediaries frequently choose to be remunerated for a service indirectly through the associated interest margin. These indirectly rendered services are now recorded under financial services. As a result, financial intermediation services indirectly measured (FISIM) are no longer included under interest income. Under primary income, non-banks' interest income on deposits held abroad has been expanded to include FISIM, whilst interest expenditure on external loans has been reduced to disregard such services. Conversely, there has been a decrease in domestic banks' interest income and an increase in their interest expenditure. The data on FISIM are calculated by the Federal Statistical Office within the framework of the national accounts using a designated model.

The distinction between loans and currency and deposits

Transactions are assigned to loans or currency and deposits broadly on the basis of the sector of the domestic or foreign debtor: if the debtor belongs to the MFI sector (including monetary authorities), the transactions are assigned to the "Currency and deposits" item; if the debtor belongs to another sector (general government, enterprises and households), the relevant transactions are assigned to the "Loans" item.

Sectoral classification

The revised Balance of Payments Manual (BPM6) has brought sectoral classification into line with that of the System of National Accounts.² However, in order to ensure that balance of payments data would be consistent with the fifth edition of the Balance of Payments Manual (BPM5), the sectoral classification model was adopted in principle while nevertheless consolidating several heavily subdivided sectors. The division of economic agents into institutional sectors, which has been adopted in this statistical series, is very closely based on this manner of classification. Designations were largely retained in order to maintain consistency with previous sector designations. The sectoral classification is generally that of the domestic sector of the creditor or the debtor.

By contrast, the reporting requirements at European level³ subdivide the sectors to a greater extent than in this statistical series, although, when compared with the national accounts, some of the sectors here are also aggregated into groups.

² 2008 SNA.

³ See Commission Regulation (EU) No 555/12 of 22 June 2012 and Guideline of the European Central Bank 2011/23 of 9 December 2011.

Comoros
Congo (Democratic Republic of)
Congo (Republic of)

⁴ In general, the group of countries specified in the table are based on the addition of individual listed countries. However, the balance of payments include also transactions whose assignment to an individual country is not possible. In this case, we use the category "not allocated countries" according to the nearest group possible of such a country. Because of the combination of both geographical and economic features, the "not allocated countries" are not listed here.

Côte d'Ivoire
Djibouti
Equatorial Guinea
Eritrea
Eswatini
Ethiopia
