# Contents

## I. Banks and other financial institutions

|    |  |    |
|----|--|----|
| 1. | German contribution to monetary aggregates in the euro area  |    |
| a) | German contribution to the monetary aggregate M3 and its components in the euro area .....                             | 6  |
| b) | German contribution to important counterparts of the monetary aggregate M3 in the euro area .....                      | 8  |
| 2. | Deposits and loans in Germany  |    |
| a) | Loans of monetary financial institutions (excluding the Bundesbank) in Germany<br>to the domestic private sector.....  | 10 |
| b) | Deposits held with monetary financial institutions (excluding the Bundesbank) in Germany<br>by domestic non-banks..... | 12 |

## II. Macroeconomic accounting systems

|    |  |    |
|----|--|----|
| 1. | GDP and gross value added of selected economic sectors ..... | 14 |
| 2. | GDP expenditure components at previous-year prices .....     | 16 |
| 3. | GDP expenditure components at current prices.....            | 18 |
| 4. | National income .....  | 20 |
| 5. | Households' income .....                                     | 22 |
| 6. | Productivity and labour costs in the economy as a whole..... | 24 |
| 7. | Unit labour costs in selected economic sectors.....          | 26 |

## III. Economic activity and prices

|    |  |    |
|----|--|----|
| 1. | Output   |    |
| a) | Output in the production sector – general survey .....                       | 28 |
| b) | Output in industry, by main grouping .....                                   | 30 |
| c) | Output in selected branches of industry .....                                | 32 |
| d) | Productivity and labour costs in industry.....                               | 34 |
| e) | Employment, labour costs and turnover in the main construction industry..... | 36 |
| 2. | Orders received  |    |
| a) | Orders received by industry, by main grouping .....                          | 38 |
| b) | Orders received by industry from the domestic market .....                   | 40 |
| c) | Orders received by industry from abroad .....                                | 42 |
| d) | Orders received by selected branches of industry – value.....                | 44 |
| e) | Orders received by selected branches of industry – volume.....               | 46 |
| f) | Orders received by main construction industry – value.....                   | 48 |
| g) | Orders received by main construction industry – volume .....                 | 50 |
| h) | Building permits granted for structural engineering work .....               | 52 |
| 3. | Stock of orders  |    |
| a) | Stock of orders by industry, by main grouping .....                          | 54 |
| b) | Stock of orders by industry from the domestic market .....                   | 56 |
| c) | Stock of orders by industry from abroad.....                                 | 58 |
| d) | Stock of orders by selected branches of industry – value.....                | 60 |
| e) | Stock of orders by selected branches of industry – volume .....              | 62 |

|   |    |
|---|----|
| 4. Turnover   |    |
| a) Turnover of industry, by main grouping – total and domestic..... | 64 |
| b) Turnover of industry, by main grouping – exports .....           | 66 |
| c) Retail turnover .....  | 68 |
| d) Turnover and employed persons in services .....                  | 70 |
| 5. Employment and labour market.....                                | 72 |
| 6. Labour costs.....  | 74 |
| 7. Producer and consumer prices                                     |    |
| a) Producer and harmonised index of consumer prices.....            | 76 |
| b) Consumer price index (national concept).....                     | 78 |
| 8. Foreign trade prices .....                                       | 80 |

## ■ IV. Corporate financial statements

|   |    |
|---|----|
| 1. Revenues and operating income of listed non-financial groups ..... | 82 |
|---|----|

## ■ V. External sector

|  |    |
|--|----|
| 1. Current account                                       |    |
| a) Current account.....                                  | 84 |
| b) Exports and imports of goods and its components ..... | 86 |
| c) Services and primary income.....                      | 88 |
| 2. Exports   |    |
| a) Exports, by group of countries .....                  | 90 |
| b) Exports, by category of goods.....                    | 92 |
| 3. Imports   |    |
| a) Imports, by group of countries.....                   | 94 |
| b) Imports of industry, by main grouping.....            | 96 |
| c) Imports, by selected branches of industry.....        | 98 |

## ■ Explanatory notes

|  |     |
|--|-----|
| Seasonal adjustment .....  | 100 |
| Classifications .....  | 101 |
| Data in the national accounts at previous-year prices and contributions to growth .....  | 101 |
| Adjustment for changes in the basis of consolidation and in the reporting sample in the consolidated financial statement statistics..... | 102 |
| Sources of unadjusted figures .....  | 102 |

## Interpretation of data

Seasonally adjusted figures are estimated and hence subject to some uncertainty. Therefore, minor changes from one period to another affecting the last digit of the figures in this Series do not necessarily allow conclusions to be drawn as to economically relevant changes. The series are normally accurate enough to enable the reader to infer the mostly rounded rates of change given in the Bundesbank's analyses.

The factors used for seasonal adjustment are recalculated at regular intervals and as required. Revised time series or tables are marked with an (R).

The seasonal adjustment also includes adjustment for working-day variations, insofar as such variations can be proved and quantified (see also the explanatory notes, section on seasonal adjustment).

## Abbreviations and symbols

|           |  |
|-----------|--|
| <b>p</b>  | Provisional  |
| <b>r</b>  | Revised  |
| <b>s</b>  | Estimated  |
| <b>ts</b> | Partly estimated   |
| ...       | Data available at a later date   |
| .         | Data unknown, not to be published, not meaningful<br>or not informative owing to particular uncertainty relating<br>to the seasonal adjustment |
| <b>0</b>  | Less than 0.5 but more than nil  |
| <b>-</b>  | Nil  |
| <b>A</b>  | Seasonal adjustment using the additive method  |
| <b>R</b>  | Seasonal factors recalculated  |

## I. Banks and other financial institutions

### 1. German contribution to monetary aggregates in the euro area

#### a) German contribution to the monetary aggregate M3 and its components in the euro area

| Period  | seasonally adjusted +   |   |                    |   |   |                                | Memo item: |  |
|---|---|---|--------------------|---|---|--------------------------------|------------|--|
|   | of which:   |   | of which:          |   |   | Marketable instruments 1,2 (R) |            |  |
|   | Monetary aggregate M3 (excluding currency in circulation) 1 (R) | Monetary aggregate M2 (excluding currency in circulation) (R) | Overnight deposits | Deposits with an agreed maturity of up to 2 years (R) | Deposits redeemable at notice of up to 3 months |                                |            |  |
| <b>Outstanding amounts in € billion <sup>4</sup></b>                              |   |   |                    |   |   |                                |            |  |

Sources of the unadjusted figures: Federal Statistical Office, Institute for Employment Research of the Federal Employment Agency. \* Last update: November 2021. + Not adjusted for working-day variations; derived from seasonally adjusted basic series, except GDP deflator. 1 Index of compensation per employee hours worked divided by index of GDP at previous-year prices per total hours worked. 2 Index of compensation

per employee hours worked divided by index of nominal GDP per total hours worked.

3 Quarterly change mainly affected by the particularly significant calendar irregularities, which are largely balanced out over a six-month period. 4 Figures partially revised as of Q1 2021.

Sources of the unadjusted figures: Federal Statistical Office, Institute for Employment Research of the Federal Employment Agency. \* Labour costs (compensation per employee hours worked) in relation to labour productivity (gross value added at previous-year prices per total hours worked). Last update: November 2021. + Not

adjusted for working-day variations; derived from seasonally adjusted basic series.

1 Excluding public and private service providers. 2 Quarterly change mainly affected by the particularly significant calendar irregularities, which are largely balanced out over a six-month period. 3 Figures partially revised as of Q1 2019.

Sources of the unadjusted figures: Federal Statistical Office, Federal Employment Agency. \* For employment (EU definition): averages; employment (subject to social security contributions) and exclusively marginal employment: end-of-month levels; unemployment (registered) and vacancies: mid-month levels; short-time workers: flows; quarterly figures: averages. <sup>1</sup> Workplace concept. <sup>2</sup> Earned income does not regularly exceed €450 per month (until December 2012: €400). <sup>3</sup> See explanatory notes. <sup>4</sup> Definition in accordance with Section 96 of the Social Security Code (SGB III). <sup>5</sup> Excluding government-assisted forms of employment and seasonal jobs, including jobs located abroad. <sup>6</sup> Statistical break due to ex post registration of unemployed persons in the jurisdiction SGB II. <sup>7</sup> As of May 2021, calculated on the basis of updated labour figures. <sup>8</sup> Unadjusted figures estimated by the Federal Employment Agency. The estimates for Germany in 2019 and 2020 deviated from the final figures by a maximum of 0.1 % for employees subject to social contributions, by a maximum of 0.9 % for persons solely in jobs exempt from social contributions and by a maximum of 55.3 % for cyclically induced short-time work. <sup>9</sup> Initial preliminary estimate by the Federal Statistical Office.

### III. Economic activity and prices

#### 5. Employment and labour market

<sup>1</sup> Registered unemployment as a percentage of the civilian labour force. <sup>2</sup> Definition of the Federal Employment Agency. <sup>3</sup> Excluding government-assisted forms of employment. <sup>4</sup> Definition in accordance with Section 96 of the Social Security

Code (SGB III). <sup>5</sup> Statistical break due to ex post registration of unemployed persons in the jurisdiction SGB II.

### III. Economic activity and prices

## 6. Labour costs \*

Source of the unadjusted figures: Federal Statistical Office. **1** Domestic sales; excluding value added tax. **2** Derived from seasonally adjusted components, subindex of energy and energy sources, respectively, not seasonally adjusted as of 2010. **3** Energy sources

include refined petroleum and coke oven products, crude petroleum, electricity, gas, coal and district heating (Bundesbank calculation). **4** Influenced by a reduction of value added tax. **5** Figures as of January 2021 provisional.

### III. Economic activity and prices

#### 7. Producer and consumer prices

##### a) Producer and harmonised index of consumer prices

<sup>1</sup> Domestic sales; excluding value added tax.

### III. Economic activity and prices

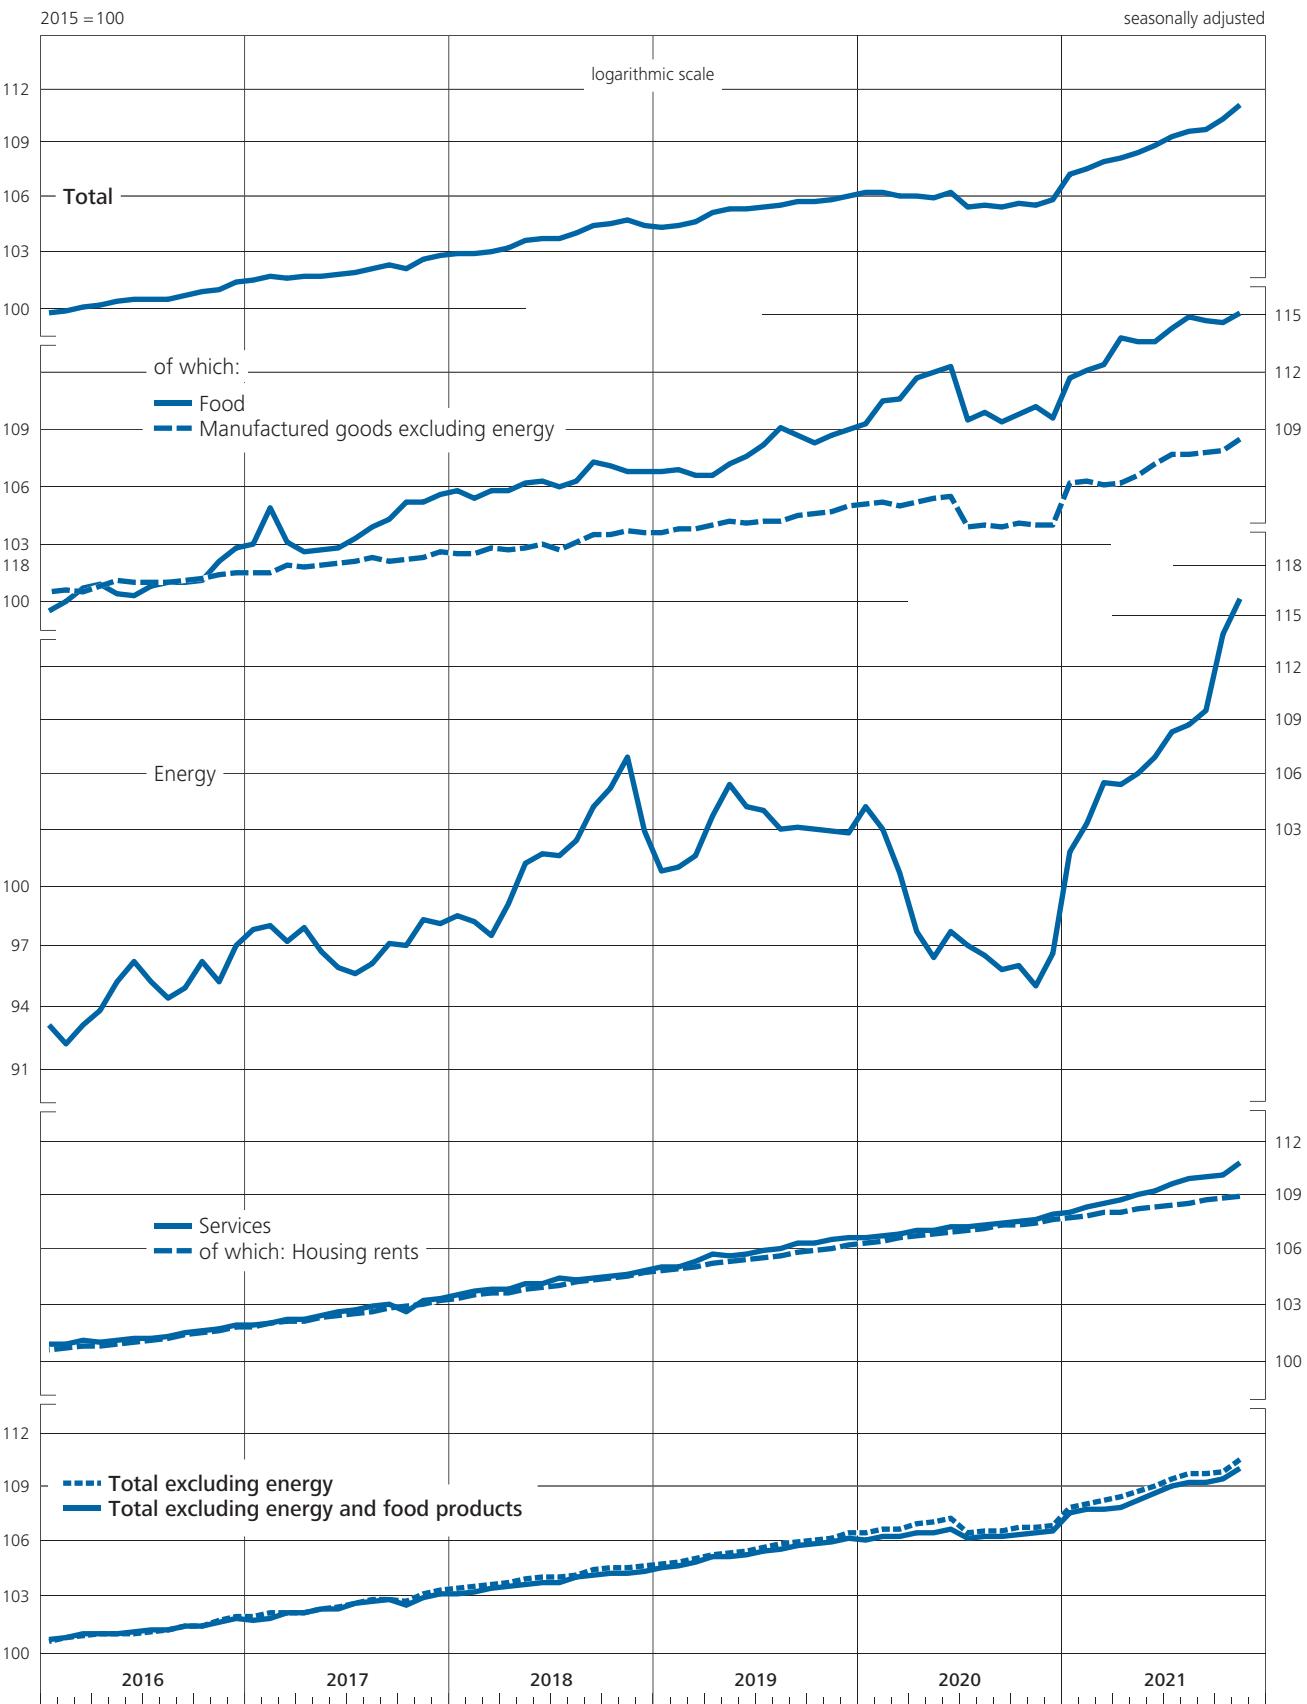

#### 7. Producer and consumer prices b) Consumer price index (national concept)

Source of the unadjusted figures: Bundesbank calculations based on data from consolidated financial statements. \* Non-financial groups admitted to the Prime Standard segment of the Frankfurt Stock Exchange which publish IFRS consolidated financial statements on a quarterly or half-yearly basis and make a noteworthy contribution to value added in Germany, partially revised. Excluding groups engaged in real estate activities. 1 Earnings before interest, taxes, depreciation and amortisation.

2 Quantile data are based on the groups' unweighted return on sales. 3 Adjusted for substantial changes in the basis of consolidation of large groups and in the reporting sample. See explanatory notes. 4 As of H1 2018 significant changes in IFRS standards, impairing comparability with previous periods. 5 Including groups in agriculture and forestry.

#### IV. Corporate financial statements

##### Revenues and operating income of listed non-financial groups

# Explanatory notes

## ■ Seasonal adjustment

The Deutsche Bundesbank's purpose in seasonally adjusting time series is to filter out the usual seasonal fluctuations within the movements of the times series under review. "Usual seasonal fluctuations" are those movements which recur with similar intensity in the same season each year and which, on the basis of past movements of the time series in question, can, under normal circumstances, be expected to recur. Thus, fluctuations due to exceptionally strong or weak seasonal influences (for example, extreme weather conditions or atypical holiday constellations) will continue to be visible in the seasonally adjusted series to the extent that they exceed, or fall short of, the normal seasonal average. In general, other random disruptions and unusual movements that are readily understandable in economic terms (for example, the consequences of economic policy, large-scale orders or strikes) are also not eliminated.

Seasonal adjustment also includes the elimination of working-day variations insofar as influences deriving from differences in the number of working days or the dates of particular days (e.g. public holidays, weekday on the last day of the month in the case of stock series) can be demonstrated and quantified.

For the most part, seasonal adjustment is based on the Census X-13ARIMA-SEATS method, as implemented in the seasonal adjustment software JDemetra+, version 2.2.2. Some time series are seasonally adjusted with the Census X-12-ARIMA method, version 0.2.8, but will be successively migrated to JDemetra+. This is not impairing the analysis of current economic developments. As a rule, the breakdown of time series is based on a multiplicative model. Time series adjusted using the additive approach are marked with an (A).

Discrepancies between the aggregated series and their components are due to the fact that some of the seasonally adjusted aggregates are estimated directly and not derived from seasonally adjusted components. To show the cyclical trend more clearly, the charts give, as a rule, the seasonally adjusted monthly figures as well as moving averages derived from them; the number of values included in the calculation is given in brackets beside the respective curve.

## ■ Classifications

Directive ECB/2001/13 and the Deutsche Bundesbank's Special Statistical Publication 1 – Banking statistics guidelines and customer classification form the basis for the harmonised balance sheet data from monetary financial institutions (MFIs) in Tables I.

The data in the national accounts (Tables II) are based on the European System of Accounts (ESA 2010).

The classification of further economic indicators (Tables III.1 to III.4 and III.6) is based on the Classification of Economic Activities, 2008 edition (WZ 2008). This is the national implementation and breakdown of the European classification NACE Rev. 2 which contains the aggregated sections down to the disaggregated level for the classes (four-digit codes) (Regulation (EC) No 1893/2006). The main industrial groupings are defined in Regulation (EC) No 656/2007. The item "Industry" has been added and is defined as an aggregate of producers of intermediate, capital and consumer goods. Energy and industry have been merged to form the item "Mining and quarrying, manufacturing and electricity, gas, steam and air conditioning supply" (WZ 2008 sections B, C and D). The production sector also includes the areas "Water supply; sewerage, waste management and remediation activities" as well as "Construction" (WZ 2008 sections E and F). However, section E and item 41.1 in section F are not included in the production index for the production sector. The statistics for industrial new orders include data for the following sections of WZ 2008: 13, 14, 17, 20, 21 and 24 to 30. These economic activities account for just about 75% of industrial sales from 2010. Statistics regarding building permits granted for structural engineering work (Table III.2.h) are regulated by the Act on Construction Statistics (Hochbaustatistikgesetz). The national term "Main construction industry" (Tables III.1.a, III.1.e, III.2.f and III.2.g) includes WZ 2008 items 41.2, 42, 43.1 and 43.9. The results for this area are listed by building type and contracting party.

An overview of the definitions used in the labour market statistics (Table III.5) can be found in the glossary for statistical reporting at the back of the Federal Employment Agency's monthly publication "Amtliche Nachrichten der Bundesagentur für Arbeit". All persons who have reached the age of 15 but have not yet reached the age of 65 and who are without employment or only with short-time employment (less than 15 hours per week) and seeking an employment of at least 15 hours per week subject to compulsory insurance are counted as unemployed. They must be registered as unemployed at an employment

agency or at a basic allowance institution and be available for employment services and not be unfit for work owing to sickness.

The balance of payments statistics are based on the sixth edition of the IMF's Balance of Payments Manual (BPM6) (see Deutsche Bundesbank, Changes in the Methodology and Classifications of the Balance of Payments and the International Investment Position, June 2014, pp. 57-68). Up to December 2008, the categorisation of groups of goods in Tables V.2.b, V.3.b and V.3.c follows the Product Classification for Production Statistics, 2002 edition (Güterverzeichnis für Produktionsstatistiken, GP 2002). Since the changeover in foreign trade statistics, the categorisation of groups of goods has been based on the Product Classification for Production Statistics, 2009 edition (GP 2009). The allocation of groups of goods from GP 2002 to main industrial groupings is carried out pursuant to Regulation (EC) No 586/2001. For GP 2009, this classification is based on Regulation (EC) No 656/2007.

## ■ Data in the national accounts at previous-year prices and contributions to growth

Chain-linked Laspeyres indices (annual overlap) are at the centre of the report on the quarterly data at previous-year prices. This method evaluates the quarterly volume data of any given year at the average prices of the previous year and expresses them in terms of the quarterly average of the nominal values of the previous year. This ratio is then chain-linked with the successively chain-linked annual average ratios. The resulting time series for the volumes may contain statistically-related breaks from the fourth quarter of one year to the first quarter of the following year. The smaller the relative price change from year to year and the less the volume structure in the fourth quarter of the previous year deviates from that of the entire previous year, the smaller such breaks arising from the change of the price basis are. Within a year, however, the volume series do not experience any breaks. In addition, the method ensures that the annual average of the seasonally and calendar-adjusted indices is equal to the average of the only calendar adjusted series and that the annual average of the only seasonally adjusted results is equal to the average of the unadjusted values (except for rounding differences).

Balancing items for which a change in the plus or minus sign is possible (e.g. changes in inventories and net exports) cannot be meaningfully expressed as chain-linked

indices. Even so, in order to ascertain their importance for economic dynamics, mechanical contributions to growth are identified. For example, the mechanical contribution of net exports to growth is the difference between the actual rate of growth of GDP and that which one would obtain if, under otherwise equal conditions, both imports and exports had remained constant vis-à-vis the comparable period. Owing to the statistical break from the fourth quarter of one year to the first quarter of the following year, the sum of the contributions to growth of the components of GDP at previous-year prices for this period is not necessarily equal to the rate of change in real GDP. The additivity of the contributions to growth within one calendar year, however, is assured (except for rounding differences).

## **Adjustment for changes in the basis of consolidation and in the reporting sample in the consolidated financial statement statistics**

In the biannual consolidated financial statement statistics of non-financial groups of enterprises listed in Germany, not only absolute and percentage revenue and profitability ratios are made available, but also rates of change adjusted for changes in the basis of consolidation and in the reporting sample. The method used is similar to the annual overlap method applied in biannual revenue and

profitability figures are calculated based on the basis of consolidation and on the reporting sample both being kept constant over the entire calendar year and are compared with the respective biannual average of the previous year defined in the same way.

The information on the quantitative impact of changes in the basis of consolidation is taken from the annexes of the consolidated financial statements. This cannot be used as a basis for constructing reliably collected multi-year adjusted time series. Rather, there are overlaps in the data from year to year for any two given bases of consolidation, which are chain-linked to form one statistical time series. Furthermore, financial statements are generally unavailable for the second half of the year and these are therefore estimated by deducting the figures of the first half-year from the annual figures (additivity).

As searching the annexes to find the relevant information about changes in the basis of consolidation is a resource-intensive process, the figures are adjusted only for large groups. See also Deutsche Bundesbank, Statistical adjustment for changes in the basis of consolidation and in the reporting sample in the consolidated financial statement statistics, Monthly Report, July 2014, pp. 56-57.

## **Sources of unadjusted figures**

The source of the unadjusted figures of the seasonally adjusted time series is the Deutsche Bundesbank, unless stated otherwise in the tables.
