Table of Contents

Terms and Abbreviations

The terms and abbreviations used in the User Handbook, but not included in the T2S glossary are shown in the table below. You find terms with their description and the abbreviations, both in an alphabetical order.

Letter	Description
A	
Alert icon	An *alert* icon is an icon that is shown on an active T2S screen for those users with appropriate rights to approve a pending action.
A2A	Application-to-application
B	
BIC	Bank identifier code
C	
Check box	Square box which can be filled with a checkmark by clicking on it with the mouse. In contrast to the radio button, you can select more than one option with a check box.
D	
DD	Day (e.g. used within the timestamp, every letter stands for one digit)
d	Decimal number
E	
e.g.	For example (Latin: 'exempli gratia')
G	
GUI	Graphical user interface which is a type of user interface which allows users to interact with electronic devices.
H	
hh	Hour (e.g. used within the timestamp, every letter stands for one digit)
I	
i.e.	That is (Latin: 'id est')
IP port	Internet Protocol address port, is the port which connects a numerical label assigned to each device (e.g., computer, printer) participating in a computer network that uses the Internet Protocol for communication.
Incl.	Including

Letter	Description
M	
Mouse-over	Additional information for some elements of the GUI is only shown when you move the mouse-pointer to these elements.
MM	Month (e.g. used within the timestamp, every letter stands for one digit)
mm	Minute (e.g. used within the timestamp, every letter stands for one digit)
µsµsµsµsµs	Microsecond (e.g. used within the timestamp, every 'µs' stands for one digit)
min.	Minimum
max.	Maximum
10m	10 million
N	
NRO	Non-repudiation of origin (NRO) provides the recipient (T2S) with the evidence NRO which ensures that the originator (T2S actor) will not be able to deny having sent the U2A instruction. The evidence of origin is generated by the originator and held by the recipient.
Q	
QQ	Quarter, indicates a time span of three months, e.g. Q2 stands for the second quarter of the year.
R	
Radio button	A type of GUI element which allows the user to choose only one of a predefined set of options.
S	
Select box	A select field in the GUI with an arrow on the right side. By clicking on the arrow, all possible input values are shown and can be selected with a mouse-click.
SS	Semester, indicates a time span of six months, e.g. S1 stands for the first semester.

Letter	Description
ss	Second (e.g. used within the timestamp, every letter stands for one digit)
T	
10t	10 thousand
Timestamp	A sequence of characters, denoting the date and the time in T2S.
U	
UHB	User Handbook
U2A	User-to-application
Y	
YYYY	Year (e.g. used within the timestamp, every letter stands for one digit)

1 Introduction

1.1 Overview of the User Handbook

The T2S User Handbook, hereinafter called UHB, aims at facilitating the use of the Graphical User Interface of TARGET2-Securities (T2S GUI) and related common components: Common Reference Data Management (CRDM), Business Day Management (BDM), Billing common component (BILL). It is intended for any T2S user regardless of the focus of activities and describes the full range of functionalities available in user-to-application (U2A) mode. The UHB provides detailed reference information on all GUI screens and step-by-step instructions for typical workflows.

Target Audience
There is only one handbook addressing all T2S actors: central banks (CBs), central securities depositories (CSDs), CSD participants, external CSD users, payment banks/settlement banks. By referring to the table of contents as well as to the usage indication list, each reader can easily identify the relevant parts.

Related Documentation
The UHB is part of the functional documentation and complements the general, technical and detailed specifications. Among these, the UDFS is particularly relevant for UHB readers. Although it is mainly focused on the application-to-application mode (A2A), chapter one of the UDFS contains a detailed description of the business concepts used in T2S, which are also relevant when using the GUI.

In addition to the T2S specifications, the Business Functionality for T2S Graphical User Interface - as the basis for the design and implementation of the GUI - provides helpful information. References to the GUI Business Functionalities are made in the screen descriptions of the UHB.

Both documents are available on the ECB`s T2S webpage.

Updates
Updated versions of the UHB will be provided on a regular basis.

1.1.1 UHB Methodology

Several symbols and methodological elements are used throughout the T2S UHB to ease orientation and help you to find your desired information quickly.

Page Layout
Every page of the main UHB parts has a similar page layout. You can find four different elements:

☐ the header, which shows the chapter and sub-chapter title

☐ the margin column on the left side of each page, which is used for subheadings and information signs

☐ the text column, which contains the main information, tables and screenshots

☐ the footer, which shows the name and the release of the document as well as the page number

Information Signs

Name	Icon	Description
Notice sign		Notice signs are used to highlight useful information. Read its content to find out about hints, action alternatives or other details helping you to improve your usage of the T2S GUI.
Example sign		Example signs are used to highlight examples, which illustrate the corresponding text, especially when a verbal description is difficult or too extensive.

Links

Links are illustrated throughout the UHB with a little triangle followed by a page number within squared brackets. These links help you to jump to related sections by clicking on them or turning to the relevant page.

Please find the information on page 6. [▷ 6]
Illustration 1: Link illustration

Tables

Tables are used to present information in a clearly arranged format. They consist of a table head and a table body. The body is divided into a left and a right column. The left column contains keywords, for example field names, which are explained in the right column. Subsections within a table are preceded by a heading. The order of the description follows the appearance on the screen from left to right and from top to bottom.

Type Set

Regular text in the UHB is written in Arial Unicode MS font with a size of 11pt. Screen and button names are written in italic letters, GUI paths use the Courier New font. Field names and field values are put in quotation marks if they appear in a context other than their dedicated description.

Element	Format	Example
Screen name	Italic letters	*Data changes – search/list* screen
Button name	Italic letters	*New* button

Element	Format	Example
GUI path	PC code	T2S >> Market-Specific Configuration >> Market-Specific Attributes >> Search
Field name or value quotation	'...'	'Opening Date' ; 'Active'

Action Steps   Business scenarios are divided into single action steps. These action steps are numbered sequentially. Intermediate results are described where appropriate and marked with an indented arrow. Each business scenario ends with a final result, indicated by an arrow.

Example

1. Action step 1

2. Action step 2

   ➡ Intermediate result

3. Action step 3

➡ Result

Screenshots   Screenshots are used to illustrate the corresponding text. Note that there might be minor deviations between the screenshot and your screen appearance, according to your access rights or a specific selection you have made. Also, some functions are mutually exclusive and cannot be represented in a single screenshot. In these cases, the screenshot illustrates the more prevalent use of the screen.

Values shown on a screenshot might also deviate from the default values indicated in the description. In these cases, the description is valid rather than the screenshot.

Wherever relevant, specific parts of a screenshot are highlighted with a red box. If there is more than one box, position numbers point out the relation to the corresponding description.

Illustration 2: Screenshot with red box and position number

1.1.2 UHB Structure

The UHB is structured in five parts and is complemented by an annex.

Part 1

The **introduction** explains the aim, the content and the approach of both the UHB and the GUI. While the first section explains how to use the UHB, the second section focuses on the design and common functionalities of the GUI.

The overview of the UHB includes information about:

☐ The UHB methodology [▶ 25]

☐ The UHB structure [▶ 28]

The overview of the GUI consists of information about:

☐ Setup and login procedures [▶ 30]

☐ GUI structure for T2S GUI [▶ 31], including information about the menu structure [▶ 31], screen structure [▶ 32], screen types [▶ 34], field types and properties [▶ 36], and common buttons and icons [▶ 42]

☐ GUI structure for CoCo GUI [▶ 56], including information about the menu structure [▶ 57], screen structure [▶ 57], screen types [▶ 59], field types and properties [▶ 60], and common buttons and icons [▶ 67]

☐ Validation [▶ 48]

☐ Communication network and services [▶ 53]

☐ User administration [▶ 53]

☐ Security and certification services [▶ 53]

☐ Online help [▶ 53]

Refer to this part if you need information on how to use the UHB or on common functionalities of the GUI.

Part 2   The **screen reference part** starts with a general section serving as a reader's guide for this part. It is followed by the screen descriptions of all screens contained in the GUI. Each description follows an identical structure which comprises detailed information on all screen fields.

The screen reference part is structured along the first and second GUI menu level, followed by the screens in alphabetical order. Within this alphabetical order, all screen types belonging to the same business function are grouped together to follow the business logic (*search/list* screen, *details* screen, *new/edit* screen).

Refer to this part if you need detailed and precise information on a screen, field or button.

Part 3   The **user instructions part** starts with a general section serving as a reader's guide for this part. It is followed by step-by-step instructions for typical GUI workflows, called business scenarios. Each description follows an identical structure.

Related business scenarios are grouped into comprehensive business packages, which are further grouped into categories.

Refer to this part if you need to know how to carry out an action using the GUI.

Part 4   The **trouble management system** (TMS) part offers an overview of the TMS screens that are available in U2A mode. Refer to this part if you need a description and explanation of the usage and functionalities of the TMS external interface to the relevant users.

TMS is a tool and database which is used to track and follow-up on relevant communication between the T2S users and the T2S Service Desk for which a trouble case has been created.

Annex   The **annex** supplies detailed information complementing the UHB:

☐ Annex A - Indication of usage [▷ 1055]: List of primary users (CSD or CB) for each screen and business scenario

☐ Annex B - Sitemap [▷ 1067]: Hierarchical, structured illustration of all screens and their interrelations

☐ Annex C - List of privileges [▷ 1089]: For each screen, all privileges and their corresponding description are listed

☐ Annex D - List of references for error messages [▷ 1168]: For each screen (incl.TMS screens), all references for error messages, the error text and the corresponding description are listed

1.2 Overview of the Graphical User Interface for T2S GUI

The GUI is a browser-based application for communication with T2S in U2A mode. It is based on the ISO norm 9241 'Ergonomics of human system interaction'.

1.2.1 Setup and Login Procedures

Before entering the GUI, make sure that your workstation complies with the hardware and software requirements and implement all necessary preparations (e.g. firewall settings) described below.

Hardware Requirements	Please refer to ESMIG qualified configurations document annexed to the ESMIG UDFS.
Software Requirements	Please refer to ESMIG qualified configurations document
Supported Web-Browsers and Settings	Please refer to ESMIG qualified configurations document annexed to the ESMIG UDFS.
Firewall Settings	Please refer to ESMIG qualified configurations document annexed to the ESMIG UDFS.
GUI Access	Users are directed to an initial page named ESMIG portal that ensures proper routing to the web applications the user has been granted to enter.
Authentication	Authentication takes place on the login screen provided by the network provider (SWIFT or ~~SIA COLT~~ **Nexi**).**{CR-833}** On this login screen you are requested to authenticate yourself via the certificate used together with your password. Both pieces of information (choosing a certificate and typing in a password) are only required once at the beginning of every session and the authentication remains active for the entire session.
System User Reference	Please refer to ESMIG qualified configurations document annexed to the ESMIG UDFS.
Limitations of the T2S GUI	The T2S GUI is designed as a user interface where a user handles entries into the T2S GUI and views the result of queries, reports etc. on his computer screen. It is recommend to use the T2S GUI in a restrictive way, i.e. using search parameters to limit the resulting data volume and avoid open ended queries.

In case the user does not consider this limitation the T2S GUI would first wait and finally could run into a time-out. Depending on various parameters (bandwidth, concurrent users, customer infrastructure processing, DB query duration, record size, operational day phase, timeout limitation) further effects may be encountered.

1.2.2 GUI Structure

This chapter explains the basic elements of the T2S GUI structure (i.e. structure of the menu and the screens) helping you to navigate through the system and to use it quickly and efficiently.

The first subsection describes the menu structure where screens are grouped hierarchically. Afterwards, the second subsection explains the layout structure common to each screen. The following subsections provide details on the different screen types [▷ 34] and on recurring elements, such as common field types [▷ 36] or buttons and icons [▷ 42].

1.2.2.1 Menu Structure

The GUI menu is structured into three hierarchical menu levels. The first level is presented as a menu bar containing the five first-level menu items, which are always visible on top of each screen.

Hint

Depending on your access rights, it is possible that not all menu entries are visible for you. Contact your system administrator to verify that you have the necessary privileges to access all screens relevant to you. The privileges are listed in each screen and business scenario description.

The items are colour-coded for ease of referencing:

☐ Securities (orange)

☐ Cash (green)

☐ Services (blue)

☐ Monitoring (yellow)

The second and third menu levels are accessible via mouse-over on the first-level menu items.
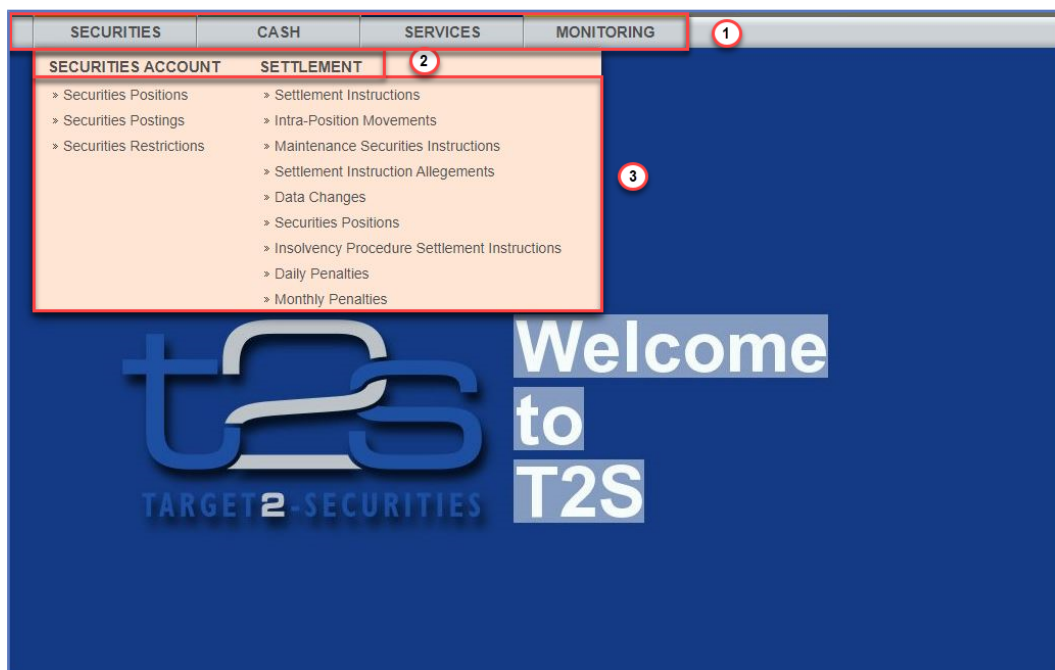

Illustration 3: T2S menu levels

Position No.	Description
1	Menu level 1
2	Menu level 2
3	Menu level 3

All entries on the second menu level are structural subcategories. To access a screen you have to click on the third menu level. For ease of use, some screens are available more than once. All identical menu entries on level three lead to the same screen. You can arbitrarily access them according to your business preferences.

Example

The *securities positions – search/list* screen can be accessed via the following two paths:

```
- Securities >> Securities Account >> Securities Positions
- Securities >> Settlement >> Securities Positions
```

1.2.2.2 Screen Structure

In general, each screen of the T2S GUI follows the same layout containing a header and a content area.

Header   The header appears at the top of every screen. It contains four main elements providing useful information and helping you to navigate between the different screens as shown in the illustration below.

Illustration 4: Header elements

Position No.	Element	Description
1	*T2S logo* button	... links to the welcome screen. While using the *new/edit* screens, the *T2S logo* button is locked in order to ensure a safe and complete submission process.
2	Information panel	... displays your login name, the *logout* and *help* buttons as well as date and time of last data access.
3	Menu bar	... presents the five main menu items and allows you to navigate to the screens.
4	T2S System User Reference logo	... displays the respective logo in accordance with the chosen T2S system user reference in line with the white-labelling approach.

Content Area   The content area is the part of the GUI where you can trigger all business actions. It is organised by five main elements which help you to interact properly with the GUI as shown in the illustration below.

To structure large amounts of data, the content area is further separated into frames and sub-frames.

Illustration 5: Content area elements

Position No.	Element	Description
1	*Back* icon	... leads to the previous screen.
2	Breadcrumb	... shows the main path to the current screen.
3	*Print* icon	... prints the screen content.
	Export icon	... exports the content, which can then be saved to your local directory.
	Refresh icon	... reloads the screen.
4	Frame and sub-frame title	... groups related information as a structural function.
5	Button bar	... shows all available buttons for the current screen.

Further information about the icons can be found in the common buttons and icons section [▶ 42].

1.2.2.3 Screen Types

The T2S GUI consists of the following types of screens, each with a different function:

- *Welcome* screen

- *Search/List* screen

- *Details* screen

- *Enter* screen (usually *new* or *edit* screen)

Welcome Screen

The *welcome* screen is the entrance into the T2S GUI and allows you to choose your system user reference. It also contains a ticker line providing you with the latest information. The ticker is managed by the T2S operator.

Search/List Screen

Generally, you can access all *search/list* screens on menu level three. You can find all possible ways of accessing the screen directly in the respective screen description within the screen reference part.

The *search/list* screen allows you to query the T2S database using a predefined set of search criteria. After executing a search, a list of data records matching your search criteria is displayed in a table. To select an entry from a list displayed on a *search/list* or *list* screen, click on the desired entry. The background colour of the table line changes to indicate the selected entry. If the search retrieves only one record, the *details* screen is displayed directly, if you are authorised to access the details screen, else the record is displayed in the table in the list screen. You can browse through the list using the table buttons [▷ 42]. Further-more, it is possible to arrange your search results in ascending or descending order by the columns shown. This does not trigger a refreshed query.

🛈 **Hint**

If you find underlined static data objects (e.g. like a hyperlink on a webpage) in a list, this is an indication that there is further information available. By clicking on such an entry a new query is started and the corresponding information to this entry is shown in a separate pop-up window.

You can also execute a new search with different search criteria by changing the values in the search fields and clicking on the *search* button, triggering a new query.

The search/list function is usually combined in one screen. Before proceeding further with a screen button, select one of the data records in the table by clicking on it.

🛈 **Hint**

If you submit a query for a business object (e.g. eligible counterparty CSD) in a 'Valid from - Valid to' range, the query retrieves the values of the main business object and the values of the linked business object (e.g. investor BIC, parent BIC).
For the main business object, you receive the valid values of the 'Valid from - Valid to' range.
For the linked business object, you always receive the currently valid values of the date of the search and not the valid values of the 'Valid from - Valid to' range.

Details Screen In contrast to the *search/list* screen, you can only access the *details* screens via other screens. As the only exception, the *T2S calendar* screen is already available on menu level three. You can find all possible ways of accessing the screen via other screens in the respective screen description within the screen reference part.

All *details* screens provide you with in-depth information of a previously selected data record.

Before showing the *details* screen, a new query is forwarded to the system to ensure most up-to-date data.

Enter Screen Similar to the *details* screens, you can only access the *enter* screens through other screens, except for the *resend communication* screen, which is already available on menu level three.

Enter screens allow you to enter data, which can be done in two enter modes:

☐ New mode, represented by the *new* screens

☐ Edit mode, represented by the *edit* screens

In general, both modes contain the same fields. In the case of the *new* mode, all fields are blank. In the case of the *edit* mode, existing data are prefilled in the fields. In addition, one past value is reported (if available) which cannot be edited. You can edit the existing currently valid value by changing the content of the field. You can also enter a new future value by clicking on the *pencil* icon [▶ 42]. You can only edit an existing currently valid value if there is no future value stored.

As a general rule, all the 'Instructing Party BIC' and 'Instructing Party Parent BIC' fields are automatically filled in with the respective 'Party BIC' of the current GUI user in case they are not filled in when clicking on the *submit* button.

1.2.2.4 Field Types and Properties

On *search/list* and *enter* screens, you can enter information via input fields and select fields. Information is displayed in read-only fields.

Field Types

Input Fields In input fields you can enter text and/or numeric content. Make sure to comply with the format requirements, which are part of each field/screen description.

Input-sensitive fields are input fields with an auto-complete mode that helps you to input data. As soon as you start typing the first characters of the respective data into an input-sensitive field, T2S automatically proposes possible matching entries from which you can select the desired one.
Illustration 6: Input- sensitive field

Hint

You can use the tab key on your keyboard to navigate through the GUI fields.

BIC8 that are entered via GUI are automatically supplemented to BIC11 by adding 'XXX' in order to unambiguously identify a party with the exception of the BICs referring to parties on party level 3-5 of the 'Settlement Instruction – New Screen'.

Select Fields   Select fields are either select boxes, radio buttons or check boxes.

☐ **Select boxes**: Functionally a select box is a way to enter data from a limited list of possible values. In T2S you can find different types of select boxes: standard select box and auto-complete select box.

☐ The **standard select box** enables you to choose one entry from a pre-defined set of values. To select an entry, click on the little box with the arrow to open the menu. Then select the desired value by clicking on it.
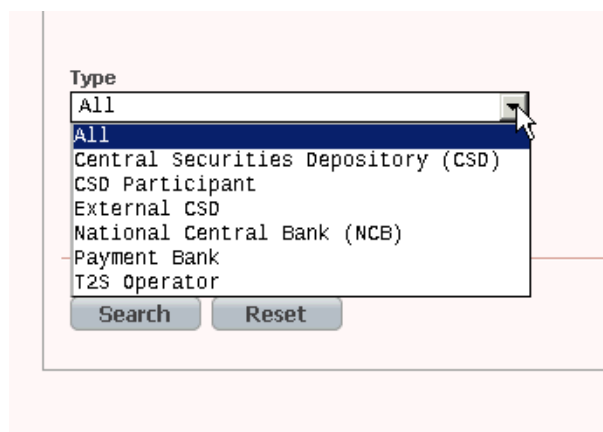

Illustration 7: Standard select box

The **auto-complete select box** enables you to either enter your desired value manually which will be used to reduce the possible set of values in the auto-complete select box to be chosen from or to click on the *auto-complete select box* icon, which provides you with a drop-down menu that shows the 10 first entries of the set of values irrespective of what you might have entered in the text field. In either way (meaning clicking on the icon or start typing an entry with the automatically shown list) up to 10 entries will be shown in the drop-down menu.

Auto-complete select box using the *auto-complete select box* icon and auto-complete select box with manually entered values.

The **google-style select box** enables you, on difference to the auto-complete select box, to make entries and choose values outside the standard set of values to be sent to the back-end for further validation (extended data scope). Due to that possibility of transporting unqualified data the validation of the values is restricted to basic checks and will be carried out mainly in the backend. Apart from that, the google-style select box functions similar to the auto-complete select box.

Illustration 8: Google-style select box

☐ **Radio buttons**: Enable you to make exact selections using one value from a set of options. You can select only one value at the same time. Click on the icon corresponding to the option you would like to select.
Illustration 9: Radio buttons

☐ **Check boxes**: Enable you to select more than one value at the same time. Click on the boxes corresponding to the options you would like to select. Selected check boxes contain a check mark.
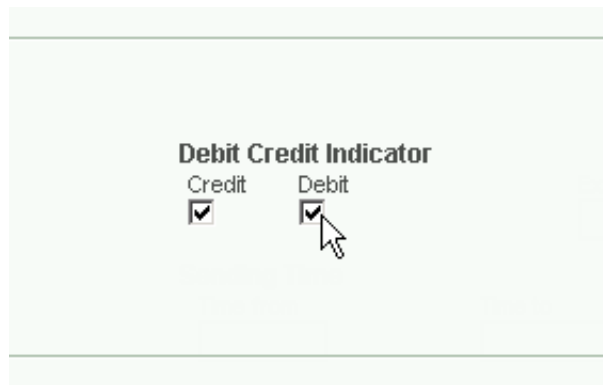

Illustration 10: Check boxes

Read-only Fields   In addition to enter and select fields, the T2S GUI has also read-only fields, which are pre-filled and do not allow data changes.

Field Properties

All field types have specific properties with respect to possible character sets, usage of wildcards and mandatory content.

Characters   T2S operates in British English and uses the SWIFT-x character set to enter data. After the coexistence, T2S will be using the UTF-8 character set with the exception of '<', '>' and '&'. Amounts are automatically displayed with decimal points. While negative amounts are displayed in red and marked with a '-', you can only type amounts that are greater than or equal to 0 into input fields, unless specified otherwise in the screen description.

The GUI does not differentiate between upper and lower case in terms of data input for input fields.

Hint

Use the abbreviations 10m to enter the amount of 10 million (10,000,000) and 10t to enter the amount of 10 thousand (10,000).

The SWIFT-x character set is used in the text fields during the period of coexistence and corresponds with the following content:

Character	Description
a - z	26 small characters of the Latin alphabet
A - Z	26 capital characters of the Latin alphabet
0 - 9	10 numeric characters
/	Solidus (slash)
-	Hyphen
?	Question mark
:	Colon

(	Opening parenthesis
)	Closing parenthesis
.	Full stop
,	Comma
´	Apostrophe
+	Plus
	Space (blank)
CR	Carriage return
LF	Line feed

Hint

T2S does not process fields (mandatory or optional), that are only filled with blanks. Blanks appearing at the beginning or at the end of a field entry are deleted automatically without any notification.

Fields in a *list* or *details* screen, where the dataset was saved without an entry, are filled with '---'.

Some reference and identification fields need a reduced version of the SWIFT-x character set. For them, the character '/' cannot be accepted at the beginning or end of the string. Moreover the combination '//' cannot be present in any part of the string itself.

These fields are identified by the SWIFT-x-red type.

Please note that because blank characters are always deleted from the beginning or end of the input – any sequence like ' /' (for the beginning) or '/ ' (for the end) must be considered not accepted.

Wildcards   A wildcard is a placeholder for characters. In T2S you can use a wildcard in an input field to search for data. The required number of characters is indicated in the field description. You can use wildcards in two different ways:

☐   As a placeholder for one or more characters of the input value, use an asterisk ('*')

☐   As a placeholder for exactly one character of the input value, use a question mark ('?')

Examples

TARGET2*: The result list contains all data records beginning with 'TARGET2'.

*Securities: The result list contains all data records ending with 'securities'.

TARGET2-Securities: The result list contains all data records that have exactly one character before the 'TARGET2-Securities'.

The combination of several wildcards directly after each other is not possible (e.g. TARGET2?* or TARGET2**), but it is possible to use several wildcards within one entry (e.g. 'TARGET2-*').

To properly search with wildcards, you have to insert at least two or four characters depending on the field requirements. If the fields do not allow wildcards, it is mentioned explicitly in the respective field description (under format requirements). Please note that the wildcard functionality is only available for input fields and not for select boxes.

Mandatory Content

In the GUI all mandatory fields are marked with an asterisk in the label. All marked fields have to be filled in before you are allowed to proceed.

Illustration 11: Mandatory fields

Position No.	Description
1	Mandatory input field
2	Mandatory select field

1.2.2.5 Common Buttons and Icons

While working with the T2S GUI you will find that some buttons and icons appear regularly. There are three types of common elements:

☐ Basic icons, which you can find on every screen

☐ Utility elements, which represent functions within the content area

☐ Table elements, which you can find below data record lists on *search/list*

The buttons contained in the button bar are variable and therefore explained in the screen descriptions.

Basic Icons
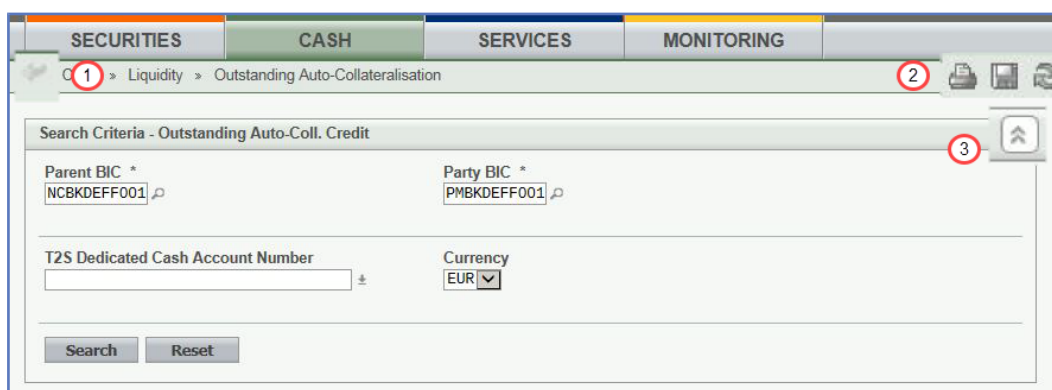

Illustration 12: Basic buttons

Posi-tion No.	Element	Description
1	*Back* icon	... always leads to the previous functional screen.
		The usage of the *back* icon does not lead to an update or a refresh of the query of the screen.
		Do not use the *back* button of your web-browser to return to the previous screen, to avoid data loss.
		The *back* icon is common to all T2S screens except for the *welcome* and *search* screens.
2	*Print* icon	... prints the data of the current screen.
		The printout includes the name of the printed screen, the date and the time of printing, the data access time, the name of the user who triggered the printing, the classification label 'Restricted' and the data available on the screen.
		It is strongly recommended to use this button for generating a clearly arranged overview of data on the printout.

Posi-tion No.	Element	Description
		When printing a *list* screen on your standard printer, the whole list and search criteria are printed instead of only the part of the table visible on the screen.
		If you print an *edit* screen with data that have already been modified, the printout has the remark 'Changed Data'.
		If you print a *new* screen with data that have already been entered, the printout has the remark 'Not Stored Yet'.
		The *print* icon is common to all T2S screens except for the *welcome* screen.
	Export icon	... exports the data of the executed query from the current screen into a csv-file.
		Leading and trailing space-characters adjacent to comma field separators are to be ignored.
		If exporting a list, the related search criteria are exported as well whereas detailed data are only exported, if the respective *list* and the *details* screen are covered by the same query. Otherwise just the list entry will be exported.
		The *export* icon is common to all T2S screens except for the *welcome* and the *new* screens.
		In addition to the exported data from the screen the following information is exported at the start of the file: name of the exported screen (including menu path), current date, name of the user who triggered the exporting, classification label 'RESTRICTED', defined search criteria (query parameters, if applicable), 'CHANGED DATA' when exporting an *edit* screen which contains amended data that has not been submitted yet.
	Refresh icon	... reloads the screen.
		In new and edit modes the screen is locked, so it is not possible to refresh.
		The refresh function takes into account the search criteria that were chosen the last time the *search* button was clicked. Those search criteria will be displayed again.
		Changes that have not yet been saved are lost after using the *refresh* icon.

Posi-tion No.	Element	Description
		The *refresh* icon is common to all T2S screens except for the *welcome* screen.
3	*Collapse* icon	... hides/displays the frame. When first entering a screen, all frames are shown but can be hidden according to your preference by using the *collapse* icon.

**Utility
Elements**
Illustration 13: Utility elements

Posi-tion No.	Element	Description
1	*Calendar* icon	... opens a calendar where you can select a day. If applic-able, you can also select the time via the *calendar* icon.
2	*Add row* icon	... adds an empty row to the corresponding list.

Posi-tion No.	Element	Description
		The *add row* icon is only available on *new* and *edit* screens.
		You can insert a maximum of 10 rows at a time.
3	*Magnifier* icon	... provides the possibility to search for data on other screens.
		If you are not aware of the exact/correct value, but you know other related data, click on the *magnifier* icon to enter the *search* screen. There you can enter all information known to you and execute a search. By clicking on the *select* button, you are redirected to the initial screen with the desired data entered in the respective fields.
		The attribute equipped with magnifier icon works otherwise like an auto-complete select box.
4	*Auto-complete select box* icon	...provides you the possibility to use the auto-complete functionality, while the drop-down menu opens when clicking on it.
		You can select one of the provided entries, when clicking on an entry in the list.

**Table
Elements**
Illustration 14: Table elements

Posi-tion No.	Element	Description
1	*Sort* icon	... sorts the list in ascending or descending order by clicking on the up or down arrow.
2	Number of data records	... allows you to select the number of records displayed in the list. You can choose between 5, 10, 20, 50 or 100 data records to be displayed. The default number of data records to be displayed is 100.
3	*First* icon	... displays the first page of the list.
	Previous icon	... allows you to navigate through the displayed list and takes you to the previous page.
	Next icon	... allows you to navigate through the displayed list and takes you to the following page.
	Last icon	... displays the last page of the list.
4	Number of table pages	... allows you to select the table page number you would like to go to.

1.2.3 Validation

In T2S, all submission processes undergo various validations, which take place in the front-end and/or in the back-end. Only correct entries, fulfilling all predefined criteria, can be further processed. To indicate the status of the recently performed action, T2S uses two different types of messages to indicate a successful or failed validation as described below.

In addition to the automatic validation carried out by T2S, human validation can be imposed by using the 4-eyes mode.

Furthermore, non-repudiation of origin (NRO) is implemented for a specified number of screens.

Front-End Validation As first part of the validation process, the front-end validation takes place without communication to the back-end. The front-end validation includes both the field validation and the cross-field validation. It is carried out after clicking on a button.

The field validation verifies that all entries comply with the required format.

The cross-field validation checks the data consistency between two or more fields/buttons in relation to each other.

Confirmation Prompt In the case of business actions in 2-eyes mode, a confirmation prompt is shown after successful front-end validation to give you the opportunity to submit or reject the business action. This confirmation prompt does not appear in 4-eyes mode.

Illustration 15: Confirmation prompt

Back-End Validation The back-end validation is the second part of the validation process. After successful front-end validation, your request is submitted to the back-end and checked for compliance with the business validation rules. In case of failure an error message is displayed. You can find a detailed list of all error messages and their description in the annex of the UHB (list of references for error messages [▷ 1168]).

Result After each validation, the T2S GUI informs you about the result. There are two different message types available, the **error message** and the **success message.**

Error Message

Each error message is marked with a circle symbol and appears at the top of the content area and next to the field containing the error. In the case of a failed front-end or back-end validation, it indicates the source of the failure, the type of error and a short hint. This message is also shown as mouse-over text when you move the mouse curser over the circle symbol next to the respective input field.

In case a Settlement Instruction or Settlement Restriction fulfils a rejection restriction type one positive rule, the error message provided in the GUI will also contain the relevant rule id fulfilled, the restriction type name and its description, in addition to the relevant error message applicable as described in the error messages annex of the UHB (list of references for error messages).

Illustration 16: Error message

Position No.	Description
1	Type of error and short hint
2	Source of the failure

Success Message

The success message appears in a green frame at the top of the content area. It confirms that your data have been submitted successfully.

In case a Settlement Instruction fulfils a CSD validation hold restriction type one positive rule, the success message provided in the GUI will also contain the relevant rule id fulfilled, the restriction type name and its description, in addition to the relevant error message applicable as described in the error messages annex of the UHB (list of references for error messages).

If the Settlement Instruction fulfils a rejection and/or CSD validation hold restriction type one negative rule, the success message provided in the GUI will also contain the relevant rule id fulfilled, the restriction type name and its description. The same applies in case a Settlement Restriction fulfils a rejection restriction type one negative rule.

If you are working in 4-eyes mode, the success message also provides you with the 4-eyes principle ID. This identification number helps you to search for the respective transaction via the *data changes – search/list* screen [▶ 607].

Illustration 17: Success message

Queued Message

If you are submitting a static data request outside real-time settlement, your request could be queued. In this case, instead of the above mentioned success message the following message is shown: 'Your request has been queued successfully and will be resumed after the end of the current night-time settlement sequence'.

4-Eyes Mode   Depending on the access rights setup, you can use T2S in 2-eyes or in 4-eyes mode. The 2-eyes mode and the 4-eyes mode apply for *enter* screens (new and edit mode) and for any kind of deletion processes. If you are a 4-eyes mode user, your actions have to be confirmed by a second user in order to be processed.

First User

In 4-eyes mode the first user enters, changes or deletes the data on a screen and afterwards submits the action by clicking on the *submit* button in the button bar. The success message appearing after successful validation includes a 4-eyes principle ID. For the final execution a second user is needed to confirm the action.

Second User

After the first user has entered, changed or deleted the data, a second user (with the required privilege) has to approve or revoke this action via the *data changes* screen [▶ 607] either using the 4-eyes mode ID or the search functionality.

An *alert* icon is shown on the active T2S screen for those users with appropriate privileges to approve a pending action via the *data changes* screen. By clicking on the *alert* icon you are directed to the *data changes - search/list* screen [▶ 607] where you can first search and then approve/revoke the pending changes.

🛈   **Hint**

Ask the first user for the 4-eyes principle ID and use it to limit the number of search results on the *data changes – search/list* screen.

As soon as the data changes are positively approved, T2S marks these data as approved and they are forwarded to further processing.

Digital Signature – NRO   In order to ensure non-repudiation of origin (NRO) for critical transactions, the use of a digital signature has been implemented for specified screens. This means that the user will be asked to enter a PIN code for signature purposes whenever an instruction is initiated. With the entry of the PIN, T2S attaches a digital signature to the instruction entered by the T2S actor.

Illustration 18: Digital signature

The following (exhaustive) list provides an overview of screens for which the NRO feature is implemented:

☐ *Amendment cash instruction - new* screen [▶ 409]

☐ *Amendment securities instruction - new* screen [▶ 102]

☐ *Broadcast - new* screen [▶ 621]

☐ *Cancellation cash instruction - new* screen [▶ 419]

☐ *Cancellation securities instruction - new* screen [▶ 116]

☐ *Data change – details* screen [▶ 611]

☐ *Hold/release instruction - new* screen [▶ 125]

☐ *Immediate liquidity transfer order - new* screen [▶ 386]

☐ *Intra-balance movement - new* screen [▶ 436]

☐ *Intra-position movement - new* screen [▶ 150]

☐ *Penalty – details* screen [▶ 290]

☐ *Penalty - re-allocation* screen [▶ 317]

☐ *Penalty - removal* screen [▶ 314]

☐ *Penalty - switch* screen [▶ 321]

☐ *Settlement instruction - new* screen [▶ 210]

1.2.4 Communication Network and Services

Refer to the T2S Connectivity Guide document for details on the communication network and services.

1.2.5 User Administration

Registration Only registered users have access to the T2S GUI, therefore registration in T2S reference data and to the network is necessary prior to the first GUI access. The Registration Guide for User Testing provides information on how to fill in T2S Registration Forms properly, e.g. access rights or white labelling.

After registration the system administrator is given the possibility to grant and revoke privileges to its users within the T2S GUI as described in both the screen reference part and the user instructions part.

1.2.6 Security and Certification Service

In order to guarantee a secure and safe handling of the information and to protect customer data provided via the GUI, various security elements have been put into place:

☐ Each action requires system or human validation as described in the validation [▷ 48]

☐ The scope of available data and functions is controlled via the management of access rights

☐ The security features provided by the network providers and described in their respective user documentation prevent unauthorised access

1.2.7 Online Help

The content of the UHB can be accessed from the T2S GUI by clicking on the *help* button. The online help is context sensitive, which means that the screen description corresponding to the current screen is displayed. Other parts of the online help can be reached using the table of contents on the left side of the help window.
Illustration 19: Online help screen for 'Administration of Participants' business package.

Position No.	Description
1	Structure tree showing the table of contents, providing access to all handbook sections
2	Clickable breadcrumb
3	*Index* button leading to the online help index
4	*Table of contents* button leading to the online help table of contents
5	*Home* button leading to online help welcome screen
6	*Help* screen content

1.3 Overview of the Graphical User Interface for CoCo GUI

The following sections refers to CRDM but the same structure can be considered valid for other common components.

The GUI is a browser-based application for communication with CRDM in U2A mode. It is based on the ISO norm 9241 'Ergonomics of human system interaction'.

1.3.1 Setup and Login Procedures

Before entering the GUI, make sure that your workstation complies with the hard-ware and software requirements and implement all necessary preparations (e.g. firewall settings) described below.

Such requirements/preparations may be subject to periodical review/update to comply with changing technical/regulatory scenario.

Common components are accessed entering the ESMIG Portal and selecting the proper common components under the service T2S.

Hardware Requirements   Please refer to ESMIG qualified configurations document.

Software Requirements   Please refer to ESMIG qualified configurations document.

Supported Web-Browsers and Settings   Please refer to ESMIG qualified configurations document.

GUI Access   Users are directed to an initial page named ESMIG portal that ensures proper routing to the web applications the user has been granted to enter.
Illustration 20: ESMIG Portal

The ESMIG Portal screen expects the user to select the relevant service to enter.

After the selection of the Service, the user is invited to select a specific component or application.

As a third step, once the component or application is selected, the user is requested to select the System User.

After submitting the screen, the user is redirected to the selected component or application.

In order to properly access the EMIG PORTAL and to select service and components, the user must be granted with the relevant privileges:

☐ T2S Access: the user granted with this privileges can see "T2S" under "Choose a Service" section and "T2S GUI" under "Choose Component or Application" section.

☐ CRDM_Access: the user granted with this privileges can see "CRDM" under "Choose Component or Application" section.

☐ BILL_Access: the user granted with this privileges can see "Billing" under "Choose Component or Application" section.

☐ BDM_Access: the user granted with this privileges can see "Business Day Management" under "Choose Component or Application" section.

☐ DMT_Access: the user granted with this privileges can see "Data Migration Tool" under "Choose Component or Application" section.

☐ TMS_Access: the user granted with this privileges can see "TMS" under "Choose Component or Application" section.

☐ ORT_Access: the user granted with this privileges can see "Operational Reporting Tools" under "Choose Component or Application" section.

NRO specific requirements   Please refer to ESMIG qualified configurations document.

1.3.2 GUI Structure

This chapter explains the basic elements of the CRDM GUI structure (i.e. structure of the menu and the screens) helping you to navigate through the system and to use it quickly and efficiently.

The first subsection describes the menu structure where screens are grouped hierarchically. Afterwards, the second subsection explains the layout structure common to each screen. The following subsections provide details on the different Screen Types [▶ 59] and on recurring elements, such as common Field Types [▶ 60] or Buttons and Icons [▶ 67].

1.3.2.1 Menu Structure

The GUI menu is structured into four hierarchical menu levels. The hamburger menu appears when the proper icon is selected. After the first level is presented, it is possible to choose the functionalities that are common to the shared services and those that are specific for T2 or TIPS. Then the menu can be further navigated - the second, third and fourth menu levels are accessible via mouse-over on the first-level menu item - in order to select the desired functionality.

> 🛈 **Hint**
>
> All the menu entries are visible to all users. Anyway, depending on your access rights, it is possible that not all menu entries are available for you. Contact your system administrator to verify that you have the necessary privileges to access all screens relevant to you. The privileges are listed in each screen and business scenario description.
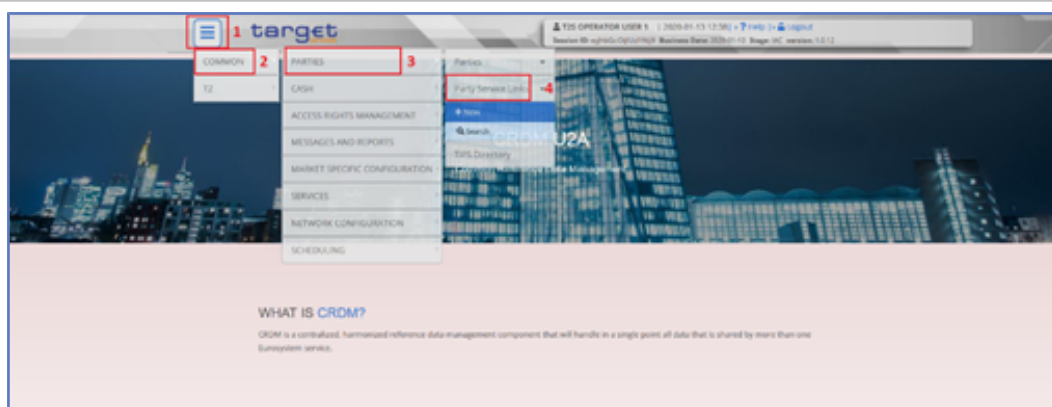

Illustration 21: CRDM menu levels

Position No.	Description
1	Menu level 1
2	Menu level 2
3	Menu level 3
4	Menu level 4

All entries on the third menu level are structural subcategories. To access a screen you have to click on the fourth menu level.

1.3.2.2 Screen Structure

In general, each screen of the CRDM GUI follows the same layout containing a header and a content area.

The header appears at the top of every screen. It contains three main elements providing useful information and helping you to navigate between the different screens as shown in the illustration below.
Header
Illustration 22: Header elements

Position No.	Element	Description
1	Menu bar	... presents the main menu item and allows you to navigate to the screens.
2	CRDM logo button	... links to the welcome screen.
3	Information panel	... displays your login name, the logout and help buttons as well as date and time of last data access.

Content Area

The content area is the part of the GUI where you can trigger all business actions. It is organised by five main elements which help you to interact properly with the GUI as shown in the illustration below.

To structure large amounts of data, the content area is further separated into frames and sub-frames.

Illustration 23: Content area elements

Position No.	Element	Description
1	Breadcrumb	... shows the main path to the current screen.

Position No.	Element	Description
2	Basic icons	... exports or prints the screen content.
3	Frame and sub-frame title	... groups related information as a structural function.
4	Button bar	... shows all available buttons for the current screen.

Further information about the icons can be found in the common buttons and icons section.

1.3.2.3 Screen Types

The CRDM GUI consists of the following types of screens, each with a different function:

☐ Welcome screen

☐ Search/List screen

☐ Details screen

☐ Enter screen (usually new or edit screen)

Welcome Screen

Business scenarios are divided into single action steps. These action steps are numbered sequentially. Intermediate results are described where appropriate and marked with an indented arrow. Each business scenario ends with a final result, indicated by an arrow.

Search/List Screen

You can access all search/list screens on menu level four.

The search/list screen allows you to query the CRDM database using a pre-defined set of search criteria. After executing a search, a list of data records matching your search criteria is displayed in a table. To select an entry from a list displayed on a search/list or list screen, click on the desired entry. The background colour of the table line changes to indicate the selected entry. If the search retrieves only one record, the details screen is displayed directly, if you are authorised to access the details screen, else the record is displayed in the table in the list screen. You can browse through the list using the table buttons. Furthermore, it is possible to arrange your search results in ascending or descending order by the columns shown. This does not trigger a refreshed query.

Details Screen

In contrast to the search/list screen, you can only access the details screens via other screens.

All details screens provide you with in-depth information of a previously selected data record.

Before showing the details screen, a new query is forwarded to the system to ensure most up-to-date data.

Enter Screen   Similar to the details screens, you can only access the enter screens through other screens.

Enter screens allow you to enter data, which can be done in two enter modes:

☐   New mode, represented by the new screens

☐   Edit mode, represented by the edit screens

In general, both modes contain the same fields. In the case of the new mode, all fields are blank. In the case of the edit mode, existing data are prefilled in the fields. In addition, one past value is reported (if available) which cannot be edited. You can edit the existing currently valid value by changing the content of the field. You can only edit an existing currently valid value provided that there is no future value. Otherwise, you need to delete the existing future value beforehand. You can also enter a new future value by clicking on the pencil icon.

1.3.2.4 Field Types and Properties

Field Types   The description of the common field types with the proper descriptions follow.

Input Fields   In input fields you can enter text and/or numeric content. Make sure to comply with the format requirements, which are part of each field/screen description.

Input-sensitive fields are input fields with an auto-complete mode that helps you to input data. As soon as you start typing the first characters of the respective data into an input-sensitive field, CRDM automatically proposes possible matching entries from which you can select the desired one.
Illustration 24: Input-sensitive field

> ❗ **Hint**
>
> You can use the tab key on your keyboard to navigate through the GUI fields.

BIC8 that are entered via GUI are automatically supplemented to BIC11 by adding 'XXX' in order to unambiguously identify a party.

Select Fields   Select fields are either select boxes, radio buttons or check boxes.

☐ **Select boxes**: Functionally a select box is a way to enter data from a limited list of possible values. In CRDM you can find different types of select boxes, standard select box, input-sensitive select box and auto-complete select box.

☐ **The standard select box** enables the user to choose one entry from a pre-defined set of values. To select an entry, click on the little box with the arrow to open the menu. Then select the desired value by clicking on it.
Illustration 25: Standard select box

☐ **The input-sensitive select box** enables the user to enter the desired value manually, which will be used to reduce the possible set of values in the input-sensitive select box list, which provides you with a drop-down menu that shows the 10 first entries of the set of values irrespective of what you might have entered in the text field.
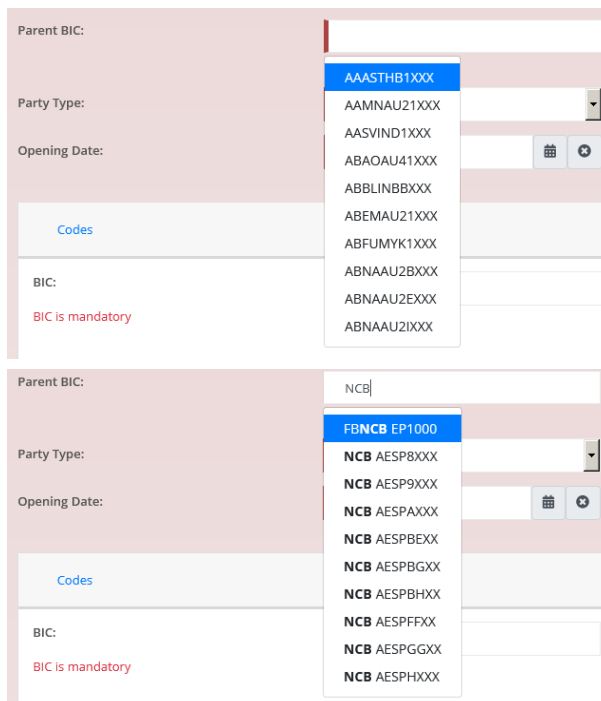

Illustration 26: Input-sensitive select box using the input-sensitive select box icon and input-sensitive select box with manually entered values.

☐ **The auto-complete select box** enables the user, differently from the input-sensitive select box, to make entries and choose values outside the standard set of values to be sent to the back-end for further validation (extended data scope). Due to that possibility of transporting unqualified data the validation of

the values is restricted to basic checks and will be carried out mainly in the backend. Apart from that, the auto-complete select box functions similar to the input-sensitive select box.
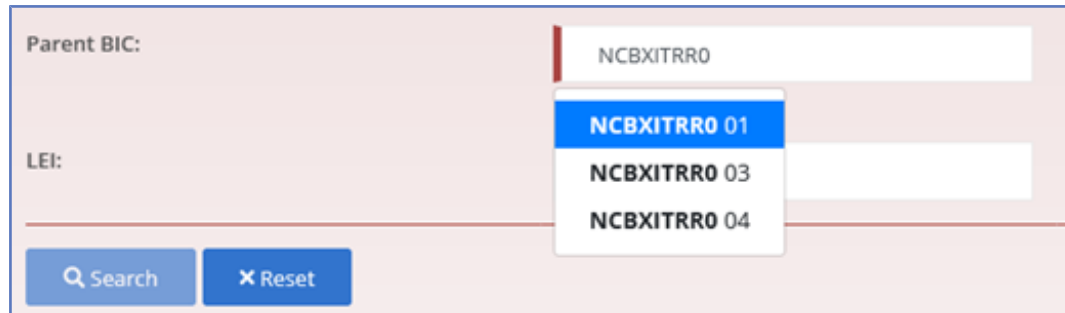

Illustration 27: Auto-complete select box

☐ **Radio buttons**: Enable the user to make exact selections using one value from a set of options. You can select only one value at the same time. Click on the icon corresponding to the option you would like to select.
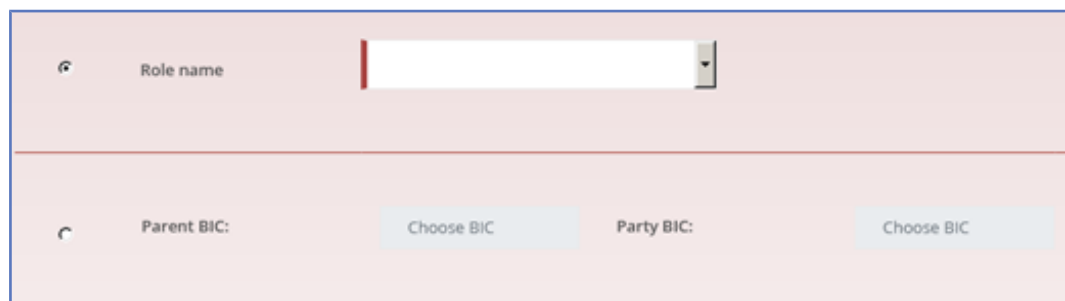

Illustration 28: Radio buttons

☐ **Check boxes**: Enable you to select more than one value at the same time. Click on the boxes corresponding to the options you would like to select. Selected check boxes contain a check mark.

Illustration 29: Check boxes

Wildcards   A wildcard is a placeholder for characters and it represents any acceptable character or a set of them in a string. In CRDM you can use a wildcard in input fields or google-style fields in all the search screens to search for data widening the result to all the strings matching the pattern. The required number of characters is indicated in the field description. CRDM accepts two possible values:

☐ '*' that is a placeholder for one or more characters of the input value;

☐ '?' that is a placeholder for exactly one character of the input value.

Examples

CRDM*: The result list contains all data records beginning with 'CRDM'.

*Account: The result list contains all data records ending with 'Account'.

CRD?: The result list contains all data records that have any acceptable character at the end of 'CRD', e.g. 'CRDM', 'CRDX', etc.

The combination of the wildcard '*' is not possible, e.g 'CRD?*' or 'CR**'

The wildcards are always usable in the fields reported before with the following restrictions:

☐   It is possible that to properly search with wildcards you have to insert at least two or four characters. In this case, the minimum number of characters to be entered is reported in the field remarks;

☐   It is possible that a field does not allow wildcards; in this case, this is explicitly mentioned in the Remarks field.

Read-only Fields	In addition to enter and select fields, the CRDM GUI has also read-only fields, which are pre-filled and do not allow data changes.
Field Properties	All field types have specific properties with respect to possible character sets, and mandatory content.
Date	A Date type field has the following format: YYYY-MM-DD. There are four digits representing the year, two digits representing the month and two digits representing the day.
	The default value of Date fields, unless differently specified, is BLANK.
	Generally, if a closing date value is not specified, the system will automatically set the date "9999-12-31".
	The field Date is always linked to a calendar icon that opens a calendar where you can select a day. It is possible to insert a date writing in the field or using the calendar.
Time [1]	The Time type field has the following format: HH:MM. There are two digits representing the hour and two digits representing the minute.
DateTime [2]	A DateTime type field has the following format: YYYY-MM-DD HH:MM. There are four digits representing the year, two digits representing the month, two digits representing the day, two digits representing the hour and two digits representing the minute. The field DateTime is always linked to a calendar icon that opens a calendar where you can select a day. It is possible to insert a date writing in the field or using the calendar.
Amount	The GUI will show the amounts with all decimal points, English Format (the decimal separator will be a "." and the thousand separator is ",") and right alignment.

---

1   The Time in the system refers to the CET/CEST zone.

2   The Time in the system refers to the CET/CEST zone.

Amounts can be entered up to 18 figures, that is maximum 19 characters if the decimal separator is present.

When the amount field is in read-only mode or the amount field is not selected for typing, the amount shows the thousand separator.

When the user is typing the numbers, the amount is shown without the thousand separators.

The amount fields should allow shortcuts:

☐ enter "Xm" and the system will transfer this automatically into X,000,000.00[.00]

☐ enter "Yt" and automatically translated into Y,000[.00].

The number of decimals is defined by the currency.

Negative amounts (shown by the system but not entered by the user) are written in red and marked with a "-" (This rule applies for all negative values).

According to the character set, only numerical characters (decimal – abbreviation "d") can be used for amounts plus the negative symbol.

Field	Description	Validation	Error Code
Amounts	Contains an Amount.	The Amount must be greater than or equal to 0.	The amount must be greater than or equal to 0.
Amounts	Number of Decimals of an amount	The Amount must have <number of decimals stored for the currency> decimals.	Wrong format in field <field name>. The correct format has to be xxx.xxx,<number of decimals stored for the currency>.
Amounts	Character set to be used	It is only possible to use a numerical character set.	Only numerical characters are allowed

Numeric   There are different type of numeric field. In general these fields, in edit mode, can contain only numbers and "-" symbol.

Field	Description	Edit mode	New mode
Numeric	Can contain only natural numbers (positive integer).	Only numbers are allowed.	The thousand separator is shown.
Integer	Can contain positive and negative integer values.	Numbers and char "-" are allowed.	The thousand separator is shown. When negative, the char "-" is shown and the string is in red.

Field	Description	Edit mode	New mode
Positive Real	Can contain positive values with decimals. When using this type, the number of decimal must be specified.	Numbers and decimal separator are allowed.	The thousand and decimal separators are shown.
Real	Can contain positive and negative values with decimals. When using this type, the number of decimal must be specified.	Numbers, decimal separator and char "-" are allowed.	The thousand and decimal separators are shown. When negative, the char "-" is shown and the string is in red.
Percentage	Can contain positive values with decimals. When using this type, a maximum of 5 digit(s) including decimal point (thereof max. 2 decimal places and decimal point) are allowed.	Numbers and decimal separator are allowed.	The thousand and decimal separators are shown plus "%" symbol.
Percentage + negative	Can contain positive and negative values with decimals. When using this type, the number of decimal must be specified.	Numbers, decimal separator and char "-" are allowed.	The thousand and decimal separators are shown plus "%" symbol. When negative, the char "-" is shown and the string is in red.
Telephone Number	Shall contain numbers from 0 to 9 and chars "+","-", "(" , ")".	Numbers and chars "+", "-" ,"(", ")" are allowed.	The chars "+", "-", "(", ")" are shown (e.g. '+012-3456789').

Field	Description	Edit mode	New mode
	When using this type, the following pattern shall be respected: Starting with "+" Then at least one to maximum three digits Then symbol "-" Then at least one to maximum thirty characters (digits and symbols "+", "-", "(", ")" are allowed).		

Characters   CRDM operates in British English and uses the SWIFT-x character set to enter data: if not described differently, the fields are intended to be based on the SWIFT-x character set. CRDM can accept the UTF-8 character set with the exception of '<', '>' and '&' in specific fields; when this happens, this is explicitly reported.

The GUI does not differentiate between upper and lower case in terms of data input for input fields.

The SWIFT-x character set corresponds with the following content:

Character	Description
a - z	26 small characters of the Latin alphabet
A - Z	26 capital characters of the Latin alphabet
0 - 9	10 numeric characters
/	Solidus (slash)
-	Hyphen
?	Question mark
:	Colon
(	Opening parenthesis
)	Closing parenthesis
.	Full stop
,	Comma

Character	Description
´	Apostrophe
+	Plus
	Space (blank)
CR	Carriage return
LF	Line feed

Hint

CRDM does not process fields (mandatory or optional), that are only filled with blanks. Blanks appearing at the beginning or at the end of a field entry are deleted automatically without any notification.

Fields in a list or details screen, where the dataset was saved without an entry, are filled with '---'.

Mandatory Content

In the GUI all mandatory fields are marked with a red line in the label. All marked fields have to be filled in before you are allowed to proceed. The red line is turned into green when the field contains a value or is selected.
Illustration 30: Mandatory fields

Position No.	Description
1	Mandatory select field
2	Mandatory input field

1.3.2.5 Common Buttons and Icons

While working with the CRDM GUI you will find that some buttons and icons appear regularly. There are three types of common elements:

☐ Basic icons, which you can find on every screen

☐ Utility elements, which represent functions within the content area

☐ Table elements, which you can find below data record lists on search/list

The buttons contained in the button bar are variable and therefore explained in the screen descriptions.

Basic Icons

Illustration 31: Basic icons

Position No.	Element	Description
1	Export icon	... exports the data of the executed query from the current screen into a csv-file.
		If exporting a list, the related search criteria are exported as well whereas detailed data are only exported, if the respective list and the details screen are covered by the same query. Otherwise just the list entry will be exported.
		The export icon is common to all CRDM screens except for the welcome and the new screens.
		In addition to the exported data from the screen the following information is exported at the start of the file: name of the exported screen (including menu path), current date, name of the user who triggered the exporting, classification label 'RESTRICTED', timestamp of the export, defined search criteria (query parameters, if applicable), 'CHANGED DATA' when exporting an edit screen which contains amended data that has not been submitted yet.
2	Print icon	... prints the data of the current screen.
		It is strongly recommended to use this button for generating a clearly arranged overview of data on the printout.
		The print icon is common to all CRDM screens except for the welcome screen.

Utility Elements
Illustration 32: Utility Elements

Position No.	Element	Description
1	Calendar icon	... opens a calendar where you can select a day. If applicable, you can also select the time via the calendar icon.

Position No.	Element	Description
2	Pencil icon	... enables you to enter a new future value into an input field.
		In edit mode, you can either change an existing data record or enter a new future one. If you have changed the existing current value before entering a future one, the data are restored.
		The pencil icon is only available on edit screens.
3	Delete row icon	... removes the selected row in the corresponding list as well as fields or subframes.
		The delete row icon is only available on new and edit screens.
4	Submit changes icon	... updates the selected row in the corresponding list using the values inserted in the related fields.
		The submit changes icon is only available on new and edit screens.
5	Cancel changes icon	... enables you to leave the selected and edited row without causing any changes.
		The cancel changes icon is only available on new and edit screens.
6	Magnifier icon	... provides the possibility to search for data on other screens.
		If you are not aware of the exact/correct value, but you know other related data, click on the magnifier icon to enter the search screen. There you can enter all information known to you and execute a search. By clicking on the select button, you are redirected to the initial screen with the desired data entered in the respective fields.
		The attribute equipped with magnifier icon works otherwise like an auto-complete select box.

Position No.	Element	Description
7	Heart icon, Restore row icon	... restores the selected row in the corresponding list or sub-frames. The Heart icon is only available on lists or sub-frames.

Table Elements
Illustration 33: Table Elements – Sort icon
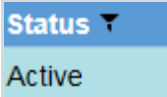

Illustration 34: Table Elements - Supplementary filters in list objects

Position No.	Element	Description
1	Sort icon	... sorts the list in ascending or descending order by clicking on the up or down arrow.
2	Supplementary filter	… allows in-memory filtering, depending on the type of fields, of the displayed list of items according to additional criteria as shown below. Data fields supplementary filter criteria: ☐ Equals ☐ Greater than ☐ Less than

Position No.	Element	Description
		☐ Not equal
		☐ In range
		Text fields supplementary filter criteria:
		☐ Equals
		☐ Not equal
		☐ Starts with
		☐ Ends with
		☐ Contains
		☐ Not contains
		Predefined supplementary filter criteria:
		It contains an adaptive list of values which is consistent with the related search criterion. E.g. for any Status field, the predefined supplementary filter contains the following values: 'All', 'Active', 'Deleted'.
		When a supplementary filter criterion is used, the list is automatically filtered in memory without submitting the query to the back-end. When applied, any supplementary filter can be removed by individually resetting the corresponding filter.
		If a supplementary filter is applied, a small icon near the column header is displayed, as shown in the following image.
		Status ▼ Active

1.3.3 Validation

In CRDM, all submission processes undergo various validations, which take place in the front-end and/or in the back-end. Only correct entries, fulfilling all pre-defined criteria, can be further processed. To indicate the status of the recently performed action, CRDM uses two different types of messages to indicate a successful or failed validation as described below.

In addition to the automatic validation carried out by CRDM, human validation can be imposed by using the 4-eyes mode.

Furthermore, non-repudiation of origin (NRO) is implemented for a specified number of screens.

Front-End Validation

As first part of the validation process, the front-end validation takes place without communication to the back-end. The front-end validation includes both the field validation and the cross-field validation. It is carried out after clicking on a button.

The field validation verifies that all entries comply with the required format.

The cross-field validation checks the data consistency between two or more fields/buttons in relation to each other.

Back-End Validation

The back-end validation is the second part of the validation process. After successful front-end validation, your request is submitted to the back-end and checked for compliance with the business validation rules. In case of failure an error message is displayed. You can find a detailed list of all error messages and their description in the annex of the UHB (List of References for Error Messages [▷ 1168]).

Result

After each validation, the CRDM GUI informs you about the result. There are two different message types available, the error message and the success message.

Error Message

Each error message appears as a pop-up on the upper right corner of the screen. In the case of a failed front-end or back-end validation, it indicates the source of the failure, the type of error and a short hint.

Illustration 35: Error message

Success Message

The success message appears as a pop-up on the upper right corner of the screen. It confirms that your data have been submitted successfully.

If you are working in 4-eyes mode, the success message also provides you with the 4-eyes principle ID.

Illustration 36: Success message

4-Eyes Mode   Depending on the access rights setup, you can use CRDM in 2-eyes or in 4-eyes mode. The 2-eyes mode and the 4-eyes mode apply for enter screens (new and edit mode) and for any kind of deletion processes. If you are a 4-eyes mode user, your actions have to be confirmed by a second user in order to be processed.

First User   In 4-eyes mode the first user enters, changes or deletes the data on a screen and afterwards submits the action by clicking on the submit button in the button bar. The success message appearing after successful validation includes a 4-eyes principle ID. For the final execution a second user is needed to confirm the action.

Second User   After the first user has entered, changed or deleted the data, a second user (with the required privilege) has to approve or revoke this action via the data changes screen either using the 4-eyes mode ID or the search functionality.

As soon as the data changes are positively approved, CRDM marks these data as approved and they are forwarded to further processing.

Digital Signature NRO   For further information refer to chapter Digital Signature (NRO).

1.3.4 Communication Network and Services

Refer to the ESMIG UDFS document for details on the communication network and services.

1.3.5 User Administration

Registration   Only registered users have access to the CRDM GUI, therefore registration in CRDM reference data and to the network is necessary prior to the first GUI access. The Registration Guide provides information on how to fill in Registration Forms properly.

After registration the system administrator is given the possibility to grant and revoke privileges to its users within the CRDM GUI as described in both the screen reference part and the user instructions part.

1.3.6 Security and Certification Services

In order to guarantee a secure and safe handling of the information and to protect customer data provided via the GUI, various security elements have been put into place:

☐ Each action requires System or human validation as described in the Validation [▶ 72]

☐ The scope of available data and functions is controlled via the management of access rights

☐ The security features provided by the network providers and described in their respective user documentation prevent unauthorised access

1.3.7 Online Help

The content of the UHB can be accessed from the CRDM GUI by clicking on the help button.

2 Screen Reference Part

2.1 General

The screen reference part offers a complete overview of all T2S GUI screens that are available in U2A mode. Each screen description focuses on a single screen and explains all fields contained therein. An exception is made for the *new* and *edit* screens, which are largely similar and therefore included in a single screen description. The description is always based on and contains only the screenshot of the *edit* screen, but describes deviations for the *new* screen in a separate row for each field or button description.
Illustration 37: Example of a *new* and *edit* screen description

Position No.	Element
1	Description relevant for *edit* mode.
2	Description relevant for *new* mode.

In detail, every screen description has the same structure and contains the following elements.

Context of Usage The context of usage explains what a screen displays, what you can do with the screen and which special features are available for the screen, for example the need for confirmation in 4-eyes mode or usage restrictions. If the export functionality produces more data than shown on the screen (if a *list* screen is based on a detailed query), this is also indicated in the context of usage.

Screen Access The screen access lists all possible ways to access the screen. This includes navigation via the menu and navigation via other screens.

Examples

Navigation via the menu:

`Common >> Cash >> Cash Accounts >> Search`

Navigation via other screens:

`Common >> Parties >> Parties >>` *Parties – search/list* screen >> Click on the *search* and *details* button >> Click on the *cash accounts* button

When navigating via a *search/list* or *list* screens, a data record has to be selected by clicking on a table row. Afterwards, you can click on specific buttons in the button bar, e.g. the *edit* or *details* button.

Privileges

The privileges segment lists all necessary privileges to access the screens and to use its functions. First, the privileges to access a screen are mentioned, followed by the privileges that are necessary to use all functions on the screen.
For further information, refer to the list of privileges.

References

The first reference lists all business scenarios containing the respective screen (reference to the user instructions part). The second reference indicates the business functions related to the respective screen (reference to GUI Business Functionalities Document).

Screenshot

You can use the screenshot as orientation for your work with the UHB. All screenshots are based on the maximum of access rights, so deviations are possible if you do not own all privileges which are necessary to use the screen in its full extent. In addition, deviations between the screenshot and the field/button description are possible in the case of mutually exclusive functions and based on a specific selection you have made. Values shown on the screenshot might also deviate from the default values indicated in the description.

In the case of the *new/edit* screen description, the screenshot of the *edit* screen is used. Differences appearing in the *new* screen are explained in the field description.

Field Description

The field description provides all the relevant information related to the respective field name. It is structured in table format with a separate table for each frame. Subframes are indicated by subsection headings in the table. The following illustration explains the structure of a field description.

Illustration 38: Example of a screen description

Position No.	Element	Description
1	Field name	... indicates the respective name of each screen field. Mandatory fields are marked with an asterisk after the field name. In the case of the *new/edit* screen description, the mandatory field is marked with an asterisk in brackets, which indicates that the respective field is either mandatory in the edit or in the new mode. Input and select fields without an asterisk are always optional.
2	Frame name	... indicates the respective name of each screen frame.
3	Sub-frame name	... indicates the respective name of each screen sub-frame.
4	Field description	... indicates the field type and required content. Each field description starts with a keyword, which illustrates your required activity: ☐ 'Shows...' indicates a read-only field [▸ 36] ☐ 'Select...' indicates a select field [▸ 36]

Position No.	Element	Description
		☐ 'Enter...' indicates an input field [▷ 36] If there is an exhaustive list of possible values, these are listed.
5	Required/Displayed format	... indicates all field format requirements related to the fields. If there is more than 1 format requirement, they are separated with a comma. In read-only fields the displayed format is only mentioned, if the field content is ambiguous. This applies especially to date fields. The following keywords are used for the format requirements: ☐ 'Digit' indicates numbers ☐ 'Character' indicates a character from the SWIFT-x character set [▷ 36] ☐ 'Letter' indicates upper and lower case letters of the Latin alphabet
6	Cross-field validations	... indicate interdependencies between fields relevant for the validation of your input. For further details on the validation process, refer to validation [▷ 48].
7	References for error message	... indicates the code of all possible errors applying to the field during the back-end validation. The corresponding error text and error description is listed in the annex (list of references for error messages [▷ 1168]). For further details on the validation process, refer to validation [▷ 48].
8	Additional information	... section indicates the useful information that is for filling in the field.

Buttons   All buttons specific to the screen are listed and described in a table at the end of the screen description. The following illustration explains the structure of a button description.

Illustration 39: Example of a button description

Position No.	Element	Description
1	Button name	... indicates the respective name of each button.
2	Button description	... indicates the action that is triggered when clicking on the button. Each button description starts with 'This function enables you...'
3	Next screen	... element lists the screen which is displayed after clicking on a button. If there are various possible next screens depending on your previous actions, all of them are listed.
4	Cross-field validations	... indicate interdependencies between a field and the button relevant for the validation of your input. For further details on the validation process, refer to validation [▷ 48].
5	References for error messages	... indicates the code of all possible errors applying to the button during the back-end validation. The corresponding error text and error description is listed in the annex (list of references for error messages [▷ 1168]).

Position No.	Element	Description
		For further details on the validation process, refer to validation [▶ 48].
6	Additional information	... section indicates useful information regarding the button and/or its function.

For further information on common buttons, refer to Common Buttons and Icons [▶ 42].

2.2 Securities

2.2.1 Securities Account

2.2.1.1 Securities Positions - Search/List Screen

See *Securities Positions – Search/List* Screen [▶ 168].

2.2.1.2 Securities Position - Details Screen

See *Securities Positions – Details* Screen [▶ 173].

2.2.1.3 Securities Postings - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for securities postings, which are the individual debits and credits impacting the selected securities positions. The search results are displayed in a list, which is sorted by the values of the 'Securities Account Number' column in ascending order (default setting). After selecting an entry, you can proceed further by clicking the buttons below.

This screen is not relevant for CB users.

Screen Access

☐ `Securities >> Securities Account >> Securities Postings`

☐ `Securities >> Securities Account >> Securities Positions` >> *Securities positions – search/list* screen >> Click on the *search* and/or *details* button >> *Securities position - details* screen >> Click on the *postings* button

☐ `Securities >> Settlement >> Securities Positions` >> *Securities positions – search/list* screen >> Click on the *search* and/or *details* button >> *Securities position - details* screen >> Click on the *postings* button

☐ `Monitoring >> Monitoring >> Securities Positions` >> *Securities positions – search/list* screen >> Click on the *search* and/or *details* button >> *Securities position - details* screen >> Click on the *postings* button

□ `Securities >> Settlement >> Intra-position Movements >>` *Intra-position movement – details* screen >> Click on the *securities position details* button >> >> *Securities position - details* screen >> Click on the *postings* button

Privileges

To use this screen, you need the following privilege [▷ 1144]:

□ Securities posting query

References

User Instructions Part

This screen is part of the following business scenario:

□ View current securities positions and related postings [▷ 681]

Business Functionality Document

This screen corresponds to the following business functions:

□ Query securities account postings (T2S.GUI.SESE.POS.0030)

□ Display securities account postings (T2S.GUI.SESE.POS.0040)

Screenshot
Illustration 40: Securities postings – search/list screen

Field Description

Securities Postings – Search Criteria	
Parent BIC*	Select the BIC of the CSD from the drop-down menu.
	Required format is: max. 11 characters (SWIFT-x)
	If you have accessed this screen via the securities positions – details screen, this field is already filled in.
Party BIC*	Select the BIC of the party from the drop-down menu.
	Required format is: max. 11 characters (SWIFT-x)
	If you have accessed this screen via the securities positions – details screen, this field is already filled in.
Securities Account Number	Select the number of the securities account from the drop-down menu.

Securities Postings – Search Criteria	
	Required format is: max. 35 characters (SWIFT-x)
	No default value but filled if only one account possible.
	If you have accessed this screen via the securities positions – details screen, this field is already filled in.
	Reference for error message:
	☐ QMPC030
ISIN	Enter the ISIN of the security.
	Required format is: 12 characters (SWIFT-x)
	Must be a valid existing ISIN.
	If you have accessed this screen via the securities positions – details screen, this field is already filled in.
Restriction Type	Select the restriction type from the drop-down menu.
	Required format is: max. 4 characters (SWIFT-x)
	Value 'All' defined as postings of all securities positions.
	If you have accessed this screen via the securities positions – details screen, this field is already filled in.
Date	Enter the date of the securities postings or use the *calendar* icon.
	Required format is: YYYY-MM-DD
	The default value is the current business day.
	This date must be a valid business date earlier than or equal to the current business date.
	If you have accessed this screen via the securities positions – details screen, this field is already filled in.
Date and Time from	Enter the starting date and time of the securities postings or use the *calendar* icon.
	Required format is: YYYY-MM-DD HH:MM
	This date and time must be a valid business date earlier than or equal to the current business date and time.
Date and Time to	Enter the ending date and time of the securities postings or use the *calendar* icon.
	Required format is: YYYY-MM-DD HH:MM

Securities Postings – Search Criteria	
	This date and time must be a valid business date earlier than or equal to the current business date and time. The date and time must be equal or later than the 'Date and Time From'.
Securities Postings - List	
Securities Account Number	Shows the number of the securities account of the securities posting. Reference for error message: □ QMPC030
ISIN	Shows the ISIN of the security.
Restriction Type	Shows the restriction type of the securities posting.
Date	Shows the date of the last movement of the securities posting. Displayed format is: YYYY-MM-DD
Quantity Impacted	
Debit/Credit Indicator	Shows the debit credit indicator related to the securities posting from one of the possible values: □ D (for debit) □ C (for credit)
Settlement Type	Shows the quantity type related to the securities positing from one of the possible values: □ U (for unit) □ F (for face amount)
Currency	Shows the issuance currency of the security related to the securities posting. Provided only when quantity of securities is given as a face amount.
Quantity	Shows the quantity of the securities posting.
Instruction	
Instruction Type	Shows the type of instruction related to the securities posting from the possible values: □ SI (for settlement instruction) □ SR (for settlement restriction)
Internal Reference	Shows the identification of the T2S internal reference of the instruction related to the securities posting.

Securities Postings – Search Criteria	
Restriction Reference	Shows the identification of the restriction reference related to the securities posting.
Date and Time	Shows the date and time of the securities posting. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs

Buttons

Search	This function enables you to start a search according to the criteria entered. The results are displayed in a list on the same screen. Next screen: □ *Securities postings – search/list* screen Reference for error message: □ QMPC030
Reset	This function enables you to set default search criteria and blanks out all optional criteria. Next screen: □ *Securities postings – search/list* screen
Display Settlement Instruction or Restriction	This function enables you to display the details of the securities instruction or restriction for the selected row. Next screen: □ *Settlement instruction - details* screen [▷ 191] □ *Intra-position movement – details* screen [▷ 143]

2.2.1.4 Securities Restriction Details - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for securities restrictions which are sub positions reserved, blocked or earmarked for specific purpose. The search results will be displayed in a list, which is sorted by the value of the 'Securities Account Number' column in ascending order (default setting). After selecting an entry, you can further proceed by clicking on the buttons below.

During the Start of Day, when the CRDM data is being replicated in the Settlement domain, only the securities restrictions data available at the End-of-Day of the previous business day is displayed on the screen. The securities restrictions data for the new business day is available as of the end of the CRDM data replication.

During night-time, the securities restriction details can only be displayed in-between night-time settlement sequences.

This screen is not relevant for CB users.

2.2.2 Settlement

2.2.2.1 Allegement Instructions - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for allegement instructions. The search results will be displayed in a list, which is sorted by the values of the 'Allegement Identification' column in ascending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

When exporting the content of this screen, you receive the list and the corresponding details for each data record.

This screen is not relevant for CB users.

This function is only available in U2A mode.

Screen Access

☐ Securities >> Settlement >> Settlement Instruction Allegements

Privileges

To use this screen you need the following privilege [▷ 1113]:

☐ Allegement query

References

User Instructions Part

This screen is part of the following business scenarios:

☐ Respond to an allegement instruction [▷ 696]

☐ View allegement settlement instruction details [▷ 702]

Business Functionality Document

This screen corresponds to the following business functions:

☐ Query allegements (T2S.GUI.SESE.ALG.0010)

☐ Display allegement list (T2S.GUI.SESE.ALG.0020)

Screenshot
Illustration 42: Allegement instructions - search/list screen

Field Description

Settlement Instruction Allegement – Search Criteria	
Allegement Identification	Enter the unique identification of the allegement. Required format is: max. 16 characters (SWIFT-x)
Status	Select the status of the allegement from the possible values: ☐ Sent ☐ Removed ☐ Cancelled ☐ All (default value)
Creation Date and Time from	Enter the lower bound of the search range for the date and time from which the allegement was created or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss Reference for error message [▶ 1174]: ☐ QMPC015
Creation Date and Time to	Enter the upper bound of the search range for the date and time until which the allegement was created or use the *calendar* icon.

Settlement Instruction Allegement – Search Criteria	
	Required format is: YYYY-MM-DD hh:mm:ss Reference for error message [▷ 1174]: ☐ QMPC015
Alleged Parties	
Alleged Depository BIC	You can choose to either enter the BIC of the alleged depository or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x)
Alleged CSD Participant BIC	You can choose to either enter the BIC of the alleged CSD participant or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x)
Alleged Client of the CSD Participant BIC	You can choose to either enter the BIC of the alleged client of the CSD participant or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x)
Alleging Parties	
Alleging Depository BIC	You can choose to either enter the BIC of the alleging depository or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x)
Alleging CSD Participant BIC	You can choose to either enter the BIC of the alleging CSD participant or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x)
Alleging Client of the CSD Participant BIC	You can choose to either enter the BIC of the alleging client of the CSD participant or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x)
Instruction Details	
Actor Reference	Enter the identification of the settlement instruction assigned by the T2S actor. Required format is: max. 16 characters (SWIFT-x)

Settlement Instruction Allegement – Search Criteria	
Instructing Party BIC	You can choose to either enter the BIC of the instructing party or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x)
Instructing Party Parent BIC	You can choose to either enter the parent BIC of the in-structing party or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x)
T2S Reference	Enter the identification of the settlement instruction as-signed by T2S. Required format is: max. 16 characters (SWIFT-x)
ISIN	Select the ISIN of the security from the drop-down menu.
Securities Account	You can choose to either enter the securities account number or to select it from the suggested items in the drop-down menu. For a RECE SI the securities account number is the secur-ities account of the delivering party. For a DELI SI the se-curities account number is the securities account of the re-ceiving party. Required format is: max. 35 characters (SWIFT-x)
Settlement Instruction Allegement - List	
Allegement Identific-ation	Shows the unique identification of the allegement.
Creation Date and Time	Shows the date and time when the allegement was cre-ated. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Status	Shows the status of the allegement from the possible val-ues: ☐ Sent ☐ Removed ☐ Cancelled
Alleging Depository BIC	Shows the BIC of the party that interacts with the deposit-ory.
Alleging CSD Parti-cipant BIC	Shows the BIC of the CSD participant.

Settlement Instruction Allegement – Search Criteria	
ISIN	Shows the ISIN of the security.
Securities Account	Shows the securities account number. For a RECE SI the securities account number is the securities account of the delivering party. For a DELI SI the securities account number is the securities account of the receiving party.

Buttons

Search	This function enables you to start a search according to the criteria entered. The results are displayed in a list on the same screen.
	If the search retrieves a single record, the *details* screen is displayed directly.

Illustration 43: Allegement instruction – details screen

Field Description

Allegement Details	
Allegement Identification	Shows the unique identification of the allegement.

Allegement Details	
Status	Shows the status of the allegement from the possible values: ☐ Sent ☐ Removed ☐ Cancelled
Creation Date and Time	Shows date and time when the allegement was created. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Alleged Parties	
Alleged Depository BIC	Shows the BIC of the alleged party that interacts with the depository.
Alleged CSD Participant BIC	Shows the BIC of the alleged CSD participant.
Alleged Client of the CSD Participant BIC	Shows the BIC of the alleged client of the CSD participant.
Alleging Parties	
Alleging Depository BIC	Shows the BIC of the alleging party that interacts with the depository.
Alleging CSD Participant BIC	Shows the BIC of the alleging CSD participant.
Alleging Client of the CSD Participant BIC	Shows the BIC of the client of the alleging CSD participant.
Instruction Details	
Actor Reference	Shows the identification of the settlement instruction assigned by the T2S actor.
Instructing Party BIC	Shows the BIC of the instructing party of the settlement instruction.
Instructing Party Parent BIC	Shows the parent BIC of the instructing party of the settlement instruction.
T2S Reference	Shows the identification of the settlement instruction assigned by T2S.
Common Reference	Shows the reference provided by the T2S actor when the LCMM instruction is already matched or in order to facilitate the matching within T2S.
Beneficial Ownership	Shows if there is a change of beneficial ownership: ☐ Empty (default value)

Allegement Details	
	☐ Yes
	☐ No
Payment Type Code	Shows if the transaction is to be settled with or without payment from the possible values:
	☐ APMT (for 'Against Payment Settlement')
	☐ FREE (for 'Separate Settlement')
Securities Movement Type Code	Shows if the movement on a securities account results from a deliver or a receive instruction from the possible values:
	☐ DELI (for 'Delivery')
	☐ RECE (for 'Receive')
Credit Debit Indicator	Shows if the original settlement amount is to be credited or debited from the possible values:
	☐ CRDT (for 'Credit')
	☐ DBIT (for 'Debit')
Trade Date	Shows the date at which the contract was made.
	Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Intended Settlement Date	Shows the date at which the settlement instruction becomes eligible to be submitted to settlement.
	Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Entry Date and Time	Shows the date and time when the settlement instruction has been created.
	Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Cash Amount	Shows the settlement amount and the currency stated in the settlement instruction.
Securities Quantity	Shows the quantity of the securities stated in the settlement instruction.
Settlement Type	Shows the type of settlement foreseen for the security stated in the settlement instruction from the possible values:
	☐ Units
	☐ Face Amount
ISIN	Shows the ISIN of the security.
Delivering Party – Securities Account	Shows the number of the securities account of the delivering party.

Allegement Details	
Receiving Party – Securities Account	Shows the number of the securities account of the receiving party.
CUM/EX Indicator	Shows whether the contract was traded cum or ex coupon from the possible values:
	☐ Empty
	☐ CUM
	☐ EX

Illustration 44: Amendment securities instruction - details screen

Field Description

Amendment Securities Instruction Details	
Referenced Instruction	
Instruction Type	Shows the type of instruction referenced by the amendment instruction from the possible values: ☐ Intra-position movement ☐ Settlement instruction
Actor Reference	Shows the reference assigned by the T2S actor to the referenced instruction.
T2S Reference	Shows the identification of the reference given the referenced instruction by T2S.
Securities Account Number	Shows the securities account number to or from which a securities entry is made.
Securities Account Owner BIC	Shows the BIC of the owner of the securities account.

Amendment Securities Instruction Details	
General	
Instructing Party BIC	Shows the BIC of the instructing party.
Instructing Party Parent BIC	Shows the parent BIC of the instructing party.
User Identification	Shows user identification of the sending party.
Entry Date and Time	Shows the date and time when the amendment instruction has entered in T2S. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Execution Date and Time	Shows the date and time when the amendment instruction has been executed. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Cancellation Status	Shows the cancellation status of the amendment instruction from the possible values: ☐ DEND (for 'Denied') ☐ NDEN (for 'Not denied') If the 'Reason Code' field is informed, the cancellation status is set to 'Denied'.
Reason Code	Shows the reason code that informs the reasoning why the amendment instruction has been denied.
Reason Code Description	Shows the description of the reasoning why the amendment instruction has been denied.
Execution Status	Shows the execution status of the amendment instruction from the possible values: ☐ EXCD (for 'Executed') ☐ NEXD (for 'Not executed')
Amendment Type	Shows the amendment instruction type from the possible values: ☐ Priority ☐ Partial settlement ☐ Linkages If the value is set to 'Priority', the 'Priority' frame is displayed. If the value is set to 'Partial Settlement', the 'Partial Settlement Indicator' frame is displayed.

Amendment Securities Instruction Details	
	If the value is set to 'Linkages', the 'Linkages' frame is displayed.
Priority	
Priority	Shows the value of the priority assigned by the amendment instruction from the possible values: ☐ Normal ☐ High ☐ Reserved This frame is only available if the amendment type is set to 'Priority'.
Partial Settlement Indicator	
Partial Settlement Indicator	Shows the value of the partial settlement indicator indicated in the amendment instruction from the possible values: ☐ Partial not allowed ☐ Partial settlement cash threshold allowed ☐ Partial settlement quantity threshold allowed ☐ Partial allowed This frame is only available if the amendment type is set to 'Partial Settlement Indicator'.
Link	
Link	Shows the type of the link action indicated in the amendment instruction from the possible values: ☐ Link ☐ Unlink This frame is only available if the amendment type is set to 'Linkages'.
Link Type	Shows the processing position indicated in the amendment instruction from the possible values: ☐ After ☐ Before ☐ With This frame is only available if the amendment type is set to 'Linkages'.

Amendment Securities Instruction Details	
Reference Type	Shows the reference type of the instruction to be linked/ unlinked to from the possible values:
	☐ Account owner settlement instruction reference
	☐ Account owner intra balance movement reference
	☐ Account owner intra position movement reference
	☐ Account servicer reference
	☐ Third party reference
	☐ T2S reference
	This frame is only available if the amendment type is set to 'Linkages'.
Reference	Shows the identification of the instruction to be linked/un-linked to.
	This frame is only available if the amendment type is set to 'Linkages'.
Reference Owner	Shows the BIC of the instructing party of the instruction to be linked/unlinked to.
	This field is only filled in if the 'Reference Type' is set to any value different than 'T2S Reference'.
	This frame is only available if the amendment type is set to 'Linkages'.

Referenced Instruction	
Actor Reference	Shows the reference assigned by the T2S actor to the referenced instruction.
T2S Reference	Shows the identification of the reference assigned to the referenced instruction by T2S.
Securities Account Number	Shows the securities account number to or from which a securities entry is made.

Hold/Release Instruction	
Securities Account Owner BIC	Shows the owner of the securities account.
General	
Instructing Party BIC	Shows the BIC of the instructing party.
Instructing Party Parent BIC	Shows the parent BIC of the instructing party.
User Identification	Shows user identification of the sending party.
Entry Date and Time	Shows the date and time when the hold/release instruction has entered in T2S. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Execution Date and Time	Shows the date and time when the hold/release instruction has been executed. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Execution Status	Shows the execution status of the hold/release instruction from the possible values: ☐ Executed ☐ Not executed
Cancellation Status	Shows the cancellation status of the hold/release instruction from the possible values: ☐ Denied ☐ Not denied If the 'Reason Code Reference' field is filled in, the cancellation status is always set to 'Denied'.
Reason Code Reference	Shows the reason code that informs the reasoning why the hold/release instruction has been denied.
Reason Code Description	Shows the description that informs the reason why the hold/release instruction has been denied.
Hold/Release	
Indicator	Shows the hold/release instruction type from the possible values: ☐ Hold ☐ Release
Hold Status Type	Shows the type of hold indicator from the possible values: ☐ Party hold

Hold/Release Instruction	
	☐ CSD hold
	☐ CSD validation hold
	☐ CoSD hold

Buttons	
Revisions	This function enables you to display the revisions of the selected hold/release instruction.

2.2.2.10 Hold/Release Instruction - New Screen

Context of Usage

This screen contains a number of fields regarding hold/release instructions. You can enter new data. Afterwards you can proceed further by clicking on the buttons below.

You can use this screen either in 2-eyes or in 4-eyes mode.

This screen is not relevant for CB users.

Screen Access

☐ `Securities >> Settlement >> Settlement Instructions >>` *Settlement instructions – search/list* screen >> Click on the *search* and/or *details* button >> *Settlement instruction - details* screen >> Click on the *hold/release* button

Privileges

To use this screen, you need the following privileges [▷ 1128]:

☐ Party hold settlement instruction on a securities account or on behalf of an external CSD

☐ CSD hold settlement instruction either on a securities account or on behalf of the CSD in T2S

☐ Release party hold settlement instruction on a securities account or on behalf of an external CSD

☐ Release party hold auto-collateralisation instruction on a securities account

☐ Release CSD hold settlement instruction either on a securities account or on behalf of the CSD in T2S

☐ Release CSD validation hold settlement instruction either on a securities account or on behalf of the CSD in T2S

☐ Release CoSD hold settlement instruction on behalf of administering party

☐ Hold non-modifiable instructions on behalf of the instructing party of the underlying settlement instruction

☐ Release non-modifiable instructions on behalf of the instructing party of the underlying settlement instruction

References

User Instructions Part

This screen is part of the following business scenarios:

☐ Put a settlement instruction on CSD hold [▷ 715]

☐ Put a settlement instruction on party hold [▷ 713]

☐ Release a settlement instruction from CoSD hold [▷ 722]

☐ Release a settlement instruction from CSD hold [▷ 720]

☐ Release a settlement instruction from CSD validation hold [▷ 724]

☐ Release a settlement instruction from party hold [▷ 717]

☐ Partially release a settlement instruction from party hold [▷ 718]

Business Functionality Document

This screen corresponds to the following business function:

☐ Hold/release instruction (T2S.GUI.SESE.INX.0060)

Field Description

Hold / Release Instruction	
Referenced Instruction	
Actor Reference	Shows the identification of the referenced settlement instruction assigned by the T2S actor. References for error messages [▸ 1214]: ☐ MVCP004 ☐ MVRI591 ☐ MVRI593
T2S Reference	Shows the identification of the referenced settlement instruction assigned by T2S. References for error messages [▸ 1214]: ☐ MVCP004 ☐ MVRI591 ☐ MVRI593 ☐ MVRI555 ☐ MVRI575

Hold / Release Instruction	
	☐ MVRI584
Securities Account Number	Shows the securities account of the referenced settlement instruction. References for error messages [▷ 1214]: ☐ MVCP019 ☐ MVCP020 ☐ MVCP044 ☐ MVCP106 ☐ MVCP107 ☐ MVCP111 ☐ MVCP112 ☐ MVCP113
Securities Account Owner BIC	Shows the BIC of the owner of the securities account of the referenced settlement instruction.
Externally Matched	Shows whether the settlement instruction was sent to T2S already matched or not.
General	
Instructing Party Parent BIC	Select the parent BIC of the instructing party from the drop-down menu or search via the *magnifier* icon. Required format is: max. 11 characters (SWIFT-x) References for error messages [▷ 1214]: ☐ MVCP121 ☐ MVCV109 ☐ MVCV233 ☐ MVDC026 ☐ MVRI584 ☐ MVRI595 In case the instructing party is not entered, the instructing party informed to the back end module will be the party you belong to. If the 'Instructing Party Parent BIC' is filled in, the 'Instructing Party BIC' has to be filled in too.
Instructing Party BIC	Select the BIC of the instructing party of the hold/release instruction from the drop-down menu or search via the *magnifier* icon.

Hold / Release Instruction
Required format is: max. 11 characters (SWIFT-x)

References for error messages [▶ 1214]:

☐ MVCP121

☐ MVCV109

☐ MVCV233

☐ MVDC026

☐ MVRI584

☐ MVRI595

In case the instructing party is not entered, the instructing party informed to the back end module will be the party you belong to. If the 'Instructing Party BIC' is filled in, the 'Instructing Party Parent BIC' has to be filled in too.

Hold/Release Counterparty Instruction	Select if you want to hold/release both legs of the settlement instruction.

References for error messages [▶ 1214]:

☐ MVCP106

☐ MVCP107

☐ MVCP111

☐ MVCP112

☐ MVCP113

☐ MVCP114

☐ MVCP115

☐ MVCP116

☐ MVCP117

☐ MVCP118

If the referenced settlement instruction is not an already matched instruction or the actor reference is empty the field is greyed out.

Hold / Release
Current Hold Status
Party Hold Status	Shows the current status of the party hold of the referenced settlement instruction as set by the T2S party.
CSD Hold Status	Shows the current CSD hold status of the referenced settlement instruction as set by the CSD.

Hold / Release Instruction

CSD Validation Hold Status	Shows the current CSD validation hold status of the referenced settlement instruction.
	When the settlement instruction fulfills one market-specific restriction which is configured in the T2S reference data table, this attribute has the value:
	☐ Yes
	☐ No
	References for error messages [▷ 1214]:
	☐ MMPR207
	☐ MVRI575
CoSD Hold Status	Shows the current CoSD hold status of the referenced settlement instruction.
	When the settlement instruction fulfills a CoSD rule set by an administering party, this attribute has the value:
	☐ Yes
	☐ No
	References for error messages [▷ 1214]:
	☐ MVRI575
	☐ MVRI593
Hold Types	
Party Hold	Select the party hold that allows you to send a hold/release instruction to T2S in order to put the referenced instruction on party hold.
	This field is greyed out in case the referenced instruction is already on 'Party Hold' or you have not the privileges to perform such an operation.
	References for error messages [▷ 1214]:

Hold / Release Instruction	
	☐ MVCP116 ☐ MMPR207
CSD Hold	Select the CSD hold allows you to send a hold/release instruction to T2S in order to put the referenced instruction on CSD hold. This field is greyed out in case the referenced instruction is already on 'CSD Hold' or you have not the privileges to perform such an operation. References for error messages [▷ 1214]: ☐ MMHI104 ☐ MMHI105 ☐ MVCP020 ☐ MVCP021 ☐ MVCP046 ☐ MVCP107 ☐ MVCP115 ☐ MVCP117 ☐ MMPR207
Release Types	
Party Release	Select the party release allows you to send a hold/release instruction to T2S in order to release the referenced instruction which has been previously put on party hold. This field is greyed out in case the referenced instruction is not on 'Party Hold' or you have not the privileges to perform such an operation. References for error messages [▷ 1214]: ☐ MMRI201 ☐ MMRI202 ☐ MMRI204 ☐ MVCP022 ☐ MVCP047 ☐ MVCP094 ☐ MVCP111 ☐ MVCP129

Hold / Release Instruction	
	☐ MVRI591
CSD Release	Select the CSD release allows you to send a hold/release instruction to T2S in order to release the referenced instruction which has been previously put on CSD hold.
	This field is greyed out in case the referenced instruction is not on 'CSD Hold' or you have not the privileges to perform such an operation.
	References for error messages [▷ 1214]:
	☐ MMRI201
	☐ MMRI202
	☐ MMRI204
	☐ MVCP023
	☐ MVCP025
	☐ MVCP047
	☐ MVCP112
	☐ MVRI591
CSD Validation Release	Select the CSD validation release allows you to send a hold/release instruction to T2S in order to release the referenced instruction which has been previously put on CSD validation hold by the system.
	You cannot put an instruction on 'CSD Validation Hold'. This operation can only be performed by the system.
	This field is greyed out in case the referenced instruction is not on 'CSD Validation Hold' or you have not the privileges to perform such an operation.
	References for error messages [▷ 1214]:
	☐ MMRI201
	☐ MMRI202
	☐ MMRI204
	☐ MVCP024
	☐ MVCP026
	☐ MVCP047
	☐ MVCP113
	☐ MVCP118

Hold / Release Instruction	
	☐ MVRI591
CoSD Release	Select the CoSD release allows you to send a hold/release instruction to T2S in order to release the referenced instruction which has been previously put on 'CoSD Hold' by the system.
	References for error messages [▷ 1214]:
	☐ MMPR201
	☐ MMPR202
	☐ MMPR203
	☐ MMPR204
	☐ MMPR207
	☐ MMPR208
	☐ MMPR209
	☐ MMRI201
	☐ MMRI202
	☐ MMRI204
	☐ MVCP047
	☐ MVRI584
	☐ MVRI591
	☐ MVRI593
	☐ MVRI595
CoSD Rule Identification	Enter the reference of the CoSD rule to be released by the hold/release instruction.
	Required format is: max. 35 characters (SWIFT-x)
	In case the referenced instruction is not on 'CoSD Hold', this field must be greyed out.
	References for error messages [▷ 1214]:
	☐ MMPR203
	☐ MMPR204
	☐ MMPR208
	☐ MMPR209
	☐ MVCP043
	☐ MVRI571

Hold / Release Instruction	
	☐ MVRI572
	☐ MVRI584
	☐ MVRI595
Quantity	
Released Quantity	Enter the quantity to be released if you want to partially release a delivering settlement instruction which has been previously put on party hold.
	This field is only available in case the released instruction is on 'Party Hold' and it is the delivering side of the transaction. If any other hold applies to the instruction, the released instruction is the receiving part of the transaction, it is unmatched, it is an internally generated instruction or its intended settlement date has not been reached, the field is greyed out.
	Required format is:
	For settlement type = Unit, max.15 digit(s) incl. decimal point (thereof max. 14 decimal places)
	For settlement type = Face amount, max. 15 digit(s) incl. decimal point (thereof max. 5 decimal places)
	References for error messages: [▸ 1214]

Field Description

Intra-Position Movement	
Securities Account Owner Reference	Shows the reference assigned by the T2S party to the settlement restriction.
	Only one of the three references exists. The reference in bold and underlined font is the actor reference owned by the instructing party.
Securities Account Servicer Reference	Shows the reference assigned by the CB to the settlement restriction on securities.
	Only one of the three references exists. The reference in bold and underlined font is the actor reference owned by the instructing party.
Third Party Reference	Shows the reference assigned by a third party to the instruction.

Intra-Position Movement	
	Only one of the three references exists. The reference in bold and underlined font is the actor reference owned by the instructing party.
T2S Reference	Shows the identification of the reference assigned for a settlement restriction on securities by T2S.
Instructing Party BIC	Shows the BIC of the instructing party.
Instructing Party Parent BIC	Shows the parent BIC of the instructing party.
User Identification	Shows user identification of the sending party.
Entry Date and Time	Shows the date and time when the instruction has entered in T2S. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Intended Settlement Date	Shows the date at which the instruction becomes eligible to be submitted to settlement. Displayed format is: YYYY-MM-DD
Final Settlement Date and Time	Shows the business date and the calendar time when the settlement restriction has been totally settled. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Actual Settlement Date and Time	Shows the business date and the calendar time when the settlement restriction has been settled or totally settled. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Accepted Timestamp (SF1)	Shows the accepted timestamp of the settlement restriction. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Corporate Action Event Identification	Shows the identification assigned by the account servicer to unambiguously identify a corporate action event.
Priority	Shows the level of priority assigned by T2S or by the T2S actor from the possible values: ☐ Normal ☐ High ☐ Top ☐ Reserved
	Position and Securities Details
Securities Account Number	Shows the securities account of the settlement restriction on securities.

Intra-Position Movement	
Securities Account Owner BIC	Shows the BIC of the owner of the securities account.
ISIN	Shows the ISIN of the securities account.
Securities Description	Shows the textual description of a securities account.
Original Settlement Quantity	Shows the total quantity of securities to be settled.
Settled Settlement Quantity	Shows the settled quantity of securities.
Settlement Type	Shows the type of settlement foreseen for the securities from the possible values: ☐ Units ☐ Face amount
Balance from	
Restriction Type	Shows the code defined in reference data to identify the restriction.
Restriction Processing Type	Shows the type of processing T2S shall apply for the restriction from the possible values: ☐ Rejection ☐ Reservation ☐ Blocking ☐ Earmarking ☐ Earmarking for auto-collateralisation ☐ Deliverable ☐ Collateralised ☐ CoSD blocking
Balance to	
Restriction Type	Shows the code defined in reference data to identify the restriction.
Restriction Processing Type	Shows the type of processing T2S shall apply for the restriction from the possible values: ☐ Rejection ☐ Reservation ☐ Blocking

Intra-Position Movement	
	☐ Earmarking
	☐ Earmarking for auto-collateralisation
	☐ Deliverable
	☐ Collateralised
	☐ CoSD blocking
Restriction Reference	Shows the unique identification of a restriction reference.
Status Information	
Cancellation Status	Shows the current cancellation status of the settlement restriction from the possible values: ☐ Cancelled ☐ Not cancelled
Settlement Status	Shows the current settlement status of the settlement restriction from the possible values: ☐ Settled ☐ Partially settled ☐ Unsettled
ISO Settlement Status	Shows the current ISO settlement status of the settlement restriction from the possible values: ☐ Pending ☐ Failing
Link	
Link Type	Shows the type of link of the instruction your restriction is linked with from the possible values: ☐ After ☐ Before ☐ With ☐ Info
Reference Type	Shows the reference type of the instruction to be linked/ unlinked to from the possible values: ☐ Account owner settlement instruction reference ☐ Account owner settlement instruction reference ☐ Account owner intra balance movement reference

Intra-Position Movement	
	□ Account owner intra position movement reference
	□ Account servicer reference
	□ Third party reference
	□ T2S reference
Reference	Shows the identification of the instruction to be linked/un-linked to.
Reference Owner	Shows the BIC of the instructing party of the instruction to be linked/unlinked to. This field is only filled in if the 'Reference Type' is set to any value different than 'T2S Reference'.
Pool Instruction reference	Shows the collective reference identifying a set of messages.
Pool Instruction Counter	Shows the maximum number of instructions included in the pool.
Pool Reference Owner BIC	Shows the BIC of the owner of the Pool Instruction Reference

Buttons

Amendment Instruction	This function enables you to create a new amendment instruction for your settlement restriction on securities. This button is not available in case any status of the settlement restriction on securities does not allow the creation of the amendment instruction. Next screen: □ *Amendment securities instruction - new* screen [▷ 102]
Cancellation Instruction	This function enables you to create a new cancellation instruction for your settlement restriction on securities. This button is not available in case any status of the settlement restriction on securities does not allow the creation of the cancellation instruction. Next screen: □ *Cancellation securities instruction - new* screen [▷ 116]
Revisions	This function enables you to display the revisions of the settlement restriction on securities. Next screen: □ *Revisions/audit trail – list* screen [▷ 661]

Related Outbound Messages	This function enables you to display the outbound messages related to the settlement restriction on securities.
	In case the settlement restriction on securities is linked to more than 1 outbound message, the *outbound messages - search/list* screen is displayed.
	In case the query only returns 1 valid message, the *outbound message – details* screen is displayed directly.
	Next screens:
	☐ *Outbound messages – search/list* screen [▸ 645]
	☐ *Outbound message – details* screen [▸ 653]
Related Inbound Messages	This function enables you to display the inbound messages related to the settlement restriction on securities.
	In case the settlement restriction on securities is linked to more than 1 inbound message, the *inbound messages - search/list* screen is displayed.
	In case the query only returns 1 valid message, the *inbound message – details* screen is displayed directly.
	Next screens:
	☐ *Inbound messages – search/list* screen [▸ 628]
	☐ *Inbound message – details* screen [▸ 635]
Copy Instruction	This function enables you to copy fields to create a new settlement restriction on securities with the same attributes.
	Next screen:
	☐ *Intra-position movement – new* screen
Securities Position Details	This function enables you to display the position details related to the settlement restriction on securities.
	All the position details from the 'Settlement Restriction on Securities' are shown, including the restriction type from the 'Balance From' and the 'Balance to'.
	Next screen:
	☐ *Securities position - details* screen [▸ 173]
Status History	This function enables you to display the status history of the settlement restriction on securities.
	Next screen:

	☐ *Status history – details* screen [▷ 266]
Links	This function enables you to display all the links data preventing settlement at the moment when the request is performed.
	This button is not available in the following cases:
	☐ Cancellation Status = "cancelled"
	☐ Settlement Status="settled"
	Next screen:
	☐ Links Preventing Settlement-screen

2.2.2.13 Intra-Position Movement - New Screen

Context of Usage
The screen contains a number of fields regarding settlement restrictions on securities (intra-position movement). You can enter new data. Afterwards you can proceed further by clicking on the buttons below.

You can use this screen either in 2-eyes or in 4-eyes mode.

This screen is not relevant for CB users.

Screen Access
☐ `Securities >> Settlement >> Intra-Position Movements >>` *Intra position movements – search/list* screen >> Click on the *new* button

Privileges
To use this screen you need the following privileges [▷ 1134]:

☐ Send new instruction using a specific instructing party

☐ Send new settlement instruction/settlement restriction on securities either on a securities account or on behalf of an external CSD

☐ Link to an instruction/pool reference belonging to a specific party

☐ Unblock CoSD securities blocking related to cancelled CoSD settlement instructions on behalf of the relevant CSD in T2S

References
User Instructions Part

This screen is part of the following business scenarios:

☐ Enter a settlement restriction on securities [▷ 745]

☐ Copy a settlement restriction on securities [▷ 747]

Business Functionality Document

This screen corresponds to the following business function:

☐ Add settlement instruction or settlement restriction (T2S.GUI.SESE.INX.0070)

2.2.2.14 Maintenance Securities Instructions - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for maintenance securities instructions. The search results will be displayed in a list. After selecting an entry, you can proceed further by clicking on the buttons below.

This screen is not relevant for CB users.

Screen Access

☐ `Securities >> Settlement >> Maintenance Securities In-structions` **>>** *Maintenance securities instructions – search/list* screen

Privileges

To use this screen, you need the following privileges [▶ 1136]:

☐ Amendment instruction query for intra-position movements and settlement instructions

☐ Maintenance for intra-position movements and settlement instructions query

☐ Cancellation instruction query for intra-position movements and settlement instructions

References

User Instructions Part

This screen is part of the following business scenarios:

☐ View amendment instruction for a settlement instruction details [▶ 711]

☐ View amendment instruction for a settlement restriction on securities details [▶ 764]

☐ View cancellation instruction for a settlement instruction details [▶ 729]

☐ View cancellation instruction for a settlement restriction on securities details [▶ 775]

☐ View hold/release instruction details [▶ 725]

Business Functionality Document

This screen corresponds to the following business function:

☐ Query instruction (T2S.GUI.SESE.INX.0010)

☐ Display instruction list (T2S.GUI.SESE.INX.0020)

Screenshot
Illustration 53: Maintenance securities instructions - search/list screen

Field Description

Maintenance Securities Instructions – Search Criteria	
Actor Reference	Enter the identification assigned by the T2S actor. Required format is: max. 16 characters (SWIFT-x)
T2S Reference	Enter the identification of the reference assigned to the referenced instruction by T2S. Required format is: max. 16 characters (SWIFT-x)
Instruction Type	Select the instruction type of the maintenance securities instruction from the possible values: ☐ Settlement Instruction (default value) ☐ Intra-Position Movement ☐ All

Maintenance Securities Instructions – Search Criteria	
Instructing Party BIC	You can choose to either enter the BIC of the instructing party or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x) References for error messages [1288]: ☐ QMPC032 ☐ QMPC084
Instructing Party Parent BIC	You can choose to either enter the parent BIC of the in-structing party or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x) References for error messages [1288]: ☐ QMPC048 ☐ QMPC084
Securities Account Number	You can choose to either enter the 'Securities Account Number' or to select it from the suggested items in the drop-down menu. Reference for error message [1288]: ☐ QMPC030
Maintenance In-struction Type*	Select the type of the maintenance instruction from the possible values: ☐ Cancellation Instruction ☐ Amendment Instruction ☐ Hold/release Instruction (default value) The value 'Hold/Release Instruction' cannot be selected if the 'Instruction Type' is 'Intra-Position Movement'.
Entry Date	Enter the date when the maintenance instruction was cre-ated in T2S or use the *calendar* icon. Required format is: YYYY-MM-DD Reference for error message [1288]: ☐ QMPC073
Execution Date	Enter the business date when the maintenance instruction has been executed or use the *calendar* icon. Required format is: YYYY-MM-DD

Maintenance Securities Instructions – Search Criteria	
	References for error messages [▷ 1288]: ☐ QMPC016 ☐ QMPC073
Execution Status	Select the execution status of the maintenance instruction from the possible values: ☐ All (default value) ☐ Not Executed ☐ Executed
Cancellation Status	Select the cancellation status of the maintenance instruction from the possible values: ☐ All (default value) ☐ Denied ☐ Not Denied
Pending Cancellation	Select the pending cancellation status of the maintenance instruction (only for cancellation instruction) from the possible values: ☐ All (default value) ☐ Yes ☐ No
Maintenance Securities Instructions - List [3]**{CR-833}**	
Actor Reference	Shows the identification assigned by the T2S Actor.
Maintenance Instruction Type	Shows the type of the maintenance instruction from the possible values:

_____

[3]   **The line counter can state a higher number than the provided actual lines (i.e. query results) because the "orphan" registers are only removed from the query results and not from counter.**

Orphan results are resulting from:

☐ **Maintenance instructions sent in a moment in which its underlying instruction was already in a final status (and hence the maintenance could no longer be executed). These maintenance instructions are purged after 90 days and would be shown in the query results until then.**

☐ **Maintenance instructions in status AWAP, whose underlying settlement instruction is in its final status or has even been purged. In this case, the maintenance instructions cannot be purged (as they are awaiting for user action) and will be shown permanently, unless the user rejects them and it can be, after 90 days, purged.{CR-833}**

Maintenance Securities Instructions – Search Criteria	
	☐ Amendment instruction
	☐ Cancellation instruction
	☐ Hold/release instruction
Referenced Instruction Type	Shows the type of the referenced instruction from possible values:
	☐ Settlement instruction
	☐ Intra-position movement
Instructing Party BIC	Shows the BIC of the instructing party of the referenced instruction.
Instructing Party Parent BIC	Shows the parent BIC of the instructing party of the referenced instruction.
Securities Account Number	Shows the number of the securities account.
Entry Date and Time	Shows the date and time when the maintenance instruction has been created. Displayed format is: YYYY-MM-DD hh:mm:ss
Execution Status	Shows the execution status of the maintenance instruction from the possible values:
	☐ Not executed
	☐ Executed
Cancellation Status	Shows the cancellation status of the maintenance instruction from the possible values:
	☐ Not denied
	☐ Denied

Buttons

Search	This function enables you to start a search according to the criteria entered. The results are displayed in a list on the next screen.
	If the search retrieves a single record, the *details* screen is displayed directly.

2.2.2.15 Securities Positions - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for securities positions. This screen retrieves information for any T2S securities account owner, i.e. a party which is a CSD, a CB (as CSD participant) or a settlement bank. The search results will be displayed in a list, which is sorted by the value of the 'Securities Account Number' column in ascending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

During the Start of Day, when the CRDM data is being replicated in the Settlement domain, only the securities positions data available at the End-of-Day of the previous business day is displayed at the screen. The securities positions data for the new business day is available as of the end of the CRDM data replication.

During night-time, the securities positions can only be displayed in-between night-time settlement sequences.

Screen Access

☐ `Securities >> Securities Account >> Securities Positions`

☐ `Securities >> Settlement >> Securities Positions`

☐ `Monitoring >> Monitoring >> Securities Positions`

Privileges

To use this screen, you need the following privilege [▷ 1144]:

☐ Securities account position query

References

Field Description

Securities Positions – Search Criteria	
Party BIC*	Select the BIC of the party owning the securities positions you want to retrieve from the drop-down menu or search via the *magnifier* icon.
	At least Party BIC or ISIN must be provided as search criteria. When opening the screen, this field will be defaulted to the Party BIC of the user's party.
	References for error messages: [▶ 1298]
	☐ QMPC032
	☐ QMPC065
Parent BIC*	Select the BIC of the CSD where the above party holds the securities positions you want to retrieve from the drop-down menu.
	When opening the screen, this field will be defaulted to the Parent BIC of the user's party.
	References for error messages: [▶ 1298]
	☐ QMPC048
	☐ QMPC065
Securities Account Number	Select the number of the securities account from the drop-down menu.
	If there is only 1 possible securities account, this field is read-only.
	References for error messages: [▶ 1298]
	☐ QMPC030
	☐ QMPC065
ISIN	Enter the ISIN of the security.
	Required format is: 12 characters (SWIFT-x), input-sensitive
	The ISIN must exist in T2S.
	At least Party BIC or ISIN must be provided as search criteria.
	Reference for error message: [▶ 1298]
	☐ QMPC018
Country of Issuance - Code	Select the country where the securities are issued from the drop-down menu.

Securities Positions – Search Criteria	
Restriction Type	Select the restriction type if you want to view only the securities positions for one restriction type from the drop-down menu. If you select the value 'All', the sum of all securities positions is displayed in the list. Reference for error message: [▸ 1298] ☐ QMPC091
Date from	Enter the date from which you want to view the securities positions or use the *calendar* icon. The default value is the current business day. Required format is: YYYY-MM-DD The Date from date must be a valid business date earlier than or equal to the current business date and earlier than or equal to the Date to date. References for error messages: [▸ 1298] ☐ QMPC015 ☐ QMPC016
Date to	Enter the date until which you want to view the securities positions or use the *calendar* icon. The default value is the date entered in the 'Date from' field. Required format is: YYYY-MM-DD The Date to date must be a valid business date earlier than or equal to the current business date. Reference for error message: [▸ 1298] ☐ QMPC015
Nil Securities Position included	Select whether securities position(s) equal to 0 are included. The default value is 'No (not checked)'.
Multiple Securities Positions (Multiple Securities Accounts / Multiple Securities)	
Securities Account Number	Shows the number of the securities account of the securities position. References for error messages: [▸ 1298] ☐ QMPC030 ☐ QMPC065
ISIN	Show the ISIN of the security. Reference for error message: [▸ 1298]

Securities Positions – Search Criteria	
	☐ QMPC018
Securities Short Name	Shows the short name of the security.
Restriction Type	Shows the restriction type of the securities position. Reference for error message: [▶ 1298] ☐ QMPC091
Date and Time	Shows the date and time of the last movement of the securities position when positions are retrieved for the current business date and the date of the position when positions are retrieved for a period. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Settlement Type	Shows the quantity type related to the securities from the possible values: ☐ U (for unit) ☐ F (for face amount)
Currency	Shows the currency in which the securities were issued. This field is only filled if the quantity of the securities position is given as a face amount.
Total Quantity	Shows the total quantity of the securities position per securities account and ISIN. If the Date to is different from the Date from, the different end of day values of the position for each date of the selected period are shown. Provision of '99999...99' in case oversizing occurs in the integer portion. Truncation of decimals in case oversizing occurs in the decimal portion.

2.2.2.16 Securities Position - Details Screen

Context of Usage

This screen displays detailed information on the securities positions for a T2S securities account owner, i.e. a party which is a CSD, a CB (as CSD participant) or a settlement bank. You can check the data and proceed further by clicking on the buttons below.

During the Start of Day, when the CRDM data is being replicated in the Settlement domain, only the securities positions data available at the End-of-Day of the previous business day is displayed at the screen. The securities positions data for the new business day is available as of the end of the CRDM data replication.

During night-time, the securities positions can only be displayed in-between night-time settlement sequences.

Screen Access	☐ `Securities >> Securities Account >> Securities Positions` >> *Securities positions – search/list* screen >> Click on the *search* and/or *details* button

Illustration 56: Settlement instructions - search/list screen

Field Description

Settlement Instructions – Search Criteria	
General Criteria	
Actor Reference	Enter the identification assigned by the T2S actor.
	The settlement instruction can be identified by the T2S reference or the combination of the actor reference and the instructing party BIC.

Settlement Instructions – Search Criteria	
	Required format is: max. 16 characters (SWIFT-x)
T2S Reference	Enter the instruction identification code assigned by T2S. Required format is: max. 16 characters (SWIFT-x)
Securities Account Owner Reference	Enter the reference assigned by the T2S delivering/receiving party to the instruction. Required format is: max. 16 characters (SWIFT-x)
Securities Account Servicer Reference	Enter the reference of an instruction as assigned by the CSD. Required format is: max. 16 characters (SWIFT-x)
Third Party Reference	Enter the reference of an instruction as assigned by the third party. Required format is: max. 16 characters (SWIFT-x)
T2S Matching Reference	Enter the common reference assigned by T2S to all the settlement instructions comprising a transaction. Required format is: max. 16 characters (SWIFT-x)
Instructing Party BIC	You can choose to either enter the 'Instructing Party BIC' or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x) Reference for error message [▷ 1361]: ☐ QMPC032
Instructing Party Parent BIC	You can choose to either enter the 'Instructing Party Parent BIC' or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x) Reference for error message [▷ 1361]: ☐ QMPC048
ISIN	Select the ISIN of the settlement instruction from the drop-down menu. Required format is: 12 characters (SWIFT-x) Reference for error message [▷ 1361]: ☐ QMPC018
Securities Account Number	You can choose to either enter the 'Securities Account Number' or to select it from the suggested items in the drop-down menu.

Settlement Instructions – Search Criteria	
	In order to query external CSD settlement instructions the selection criterion 'Securities Account Number' must not be filled in.
	Required format is: max. 35 characters (SWIFT-x)
	Reference for error message [▶ 1361]:
	☐ QMPC030
Securities Account Owner BIC	You can choose to either enter the 'Securities Account Owner BIC' or to select it from the suggested items in the drop-down menu.
	Required format is: max. 11 characters (SWIFT-x)
T2S Dedicated Cash Account Number	You can choose to either enter the 'T2S Dedicated Cash Account Number' or to select it from the suggested items in the drop-down menu.
	Required format is: max. 34 characters (SWIFT-x)
	Reference for error message [▶ 1361]:
	☐ QMPC031
Pool Reference	Enter the reference of the pool of the settlement instruction.
	Required format is: max. 35 characters (SWIFT-x)
Common Reference	Enter the common reference of the settlement instruction.
	Required format is: max. 35 characters (SWIFT-x)
Corporate Action Event	Enter the reference of the corporate action event.
	Required format is: max. 35 characters (SWIFT-x)
Multiple Value Criteria	
Securities Movement Type	Select the securities movement type code from the possible values:
	☐ All (default value)
	☐ Delivery
	☐ Receive
Payment Type Code	Select the payment type code from the possible values:
	☐ All (default value)
	☐ Against payment settlement
	☐ Free of payment

Settlement Instructions – Search Criteria	
Securities Transaction Type	Enter or select the securities transaction type expressed as an ISO 20022 code from the possible values: ☐ All (default value) ☐ AUTO (for auto-collateralisation) ☐ BYIY (for buy-in) ☐ BSBK (for buy sell back) ☐ CLAI (for market claim) ☐ CNCB (for central bank collateral operation) ☐ COLI (for collateral in) ☐ COLO (for collateral out) ☐ CONV (for depository receipt conversion) ☐ CORP (for corporate action) ☐ ETFT (for exchange traded funds) ☐ FCTA (for factor update) ☐ INSP (for move of stock) ☐ ISSU (for depository receipt issue) ☐ MKDW (for mark down) ☐ MKUP (for mark up) ☐ NETT (for netting) ☐ NSYN (for non syndicated) ☐ OWNE (for external account transfer) ☐ OWNI (for internal account transfer) ☐ PAIR (for pair off) ☐ PLAC (for placement) ☐ PORT (for portfolio move) ☐ REAL (for realignment) ☐ REDI (for withdrawal) ☐ REDM (for redemption) ☐ RELE (for depository receipt release cancellation) ☐ REPU (for repo) ☐ RODE (for return delivery without matching) ☐ RVPO (for reverse repurchase agreement)

Settlement Instructions – Search Criteria	
	☐ SBBK (for sell buy back)
	☐ SBRE (for borrowing reallocation)
	☐ SECB (for securities borrowing)
	☐ SECL (for securities lending)
	☐ SLRE (for lending reallocation)
	☐ SUBS (for subscription)
	☐ SWIF (for switch from)
	☐ SWIT (for switch to)
	☐ SYND (for syndicate underwriters)
	☐ TBAC (for TBA closing)
	☐ TRAD (for trade)
	☐ TRPO (for triparty repo)
	☐ TRVO (for triparty reverse repo)
	☐ TURN (for turnaround)
Cum/Ex Indicator	Select the cum/ex indicator from the possible values: ☐ All (default value) ☐ Cum ☐ Ex
Opt/Out ISO Settlement Transaction Condition Indicator	Select the opt/out settlement transaction condition indicator from the possible values: ☐ All (default value) ☐ No ☐ Yes
Debit Credit Indicator	Select the credit/debit code from the possible values: ☐ All (default value) ☐ Credit ☐ Debit
Settlement Currency	Select the eligible currency for settlement in T2S from the drop-down menu. The default value is 'all'. Reference for error message [▷ 1361]: ☐ QMPC054

Settlement Instructions – Search Criteria	
Country of Issuance - Code	Select the country where the security was issued from the drop-down menu.
Other Criteria	
Priority	Select the priority from the possible values: ☐ All (default value) ☐ Normal ☐ High ☐ Top ☐ Reserved
Issuer CSD	You can choose to either enter the BIC of the 'Issuer CSD' or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x)
Delivering CSD BIC	You can choose to either enter the 'Delivering CSD BIC' or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x)
Receiving CSD BIC	You can choose to either enter the 'Receiving CSD BIC' or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x)
Delivering CSD Participant	You can choose to either enter the BIC of the 'Delivering CSD Participant' or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x)
Receiving CSD Participant	You can choose to either enter the BIC of the 'Receiving CSD Participant' or to select it from the suggested items in the drop-down menu. Required format is: max. 11 characters (SWIFT-x)
Delivering CSD Participant Processing Reference	Enter the delivering CSD participant processing reference. Required format is: max. 34 characters (SWIFT-x)
Receiving CSD Participant Processing Reference	Enter the receiving CSD participant processing reference. Required format is: max. 34 characters (SWIFT-x)

Settlement Instructions – Search Criteria	
Delivering CSD Client of the Participant BIC	Enter the 'Delivering CSD Client of the Participant BIC'. Required format is: max. 11 characters (SWIFT-x)
Receiving CSD Client of the Participant BIC	Enter the 'Receiving CSD Client of the Participant BIC'. Required format is: max. 11 characters (SWIFT-x)
Partial Settlement Indicator	Select the partial settlement indicator from the possible values: ☐ All (default value) ☐ Yes ☐ No
CoSD Flag	Select the CoSD Flag from the possible values: ☐ All (default value) ☐ Yes ☐ No
Range Criteria	
Trade Date from	Enter the lower bound of the search range for the date from which the trade date is valid or use the *calendar* icon. Required format is: YYYY-MM-DD References for error messages [▷ 1361]: ☐ QMPC007 ☐ QMPC010 ☐ QMPC011
Trade Date to	Enter the upper bound of the search range for the date until which the trade date is valid or use the *calendar* icon. Required format is: YYYY-MM-DD Reference for error message [▷ 1361]: ☐ QMPC007
Intended Settlement Date from	Enter the lower bound of the search range for the date from which the intended settlement date is valid or use the *calendar* icon. Required format is: YYYY-MM-DD References for error messages [▷ 1361]: ☐ QMPC010

Settlement Instructions – Search Criteria	
	☐ QMPC012
Intended Settlement Date to	Enter the upper bound of the search range for the date until which the intended settlement date is valid or use the *calendar* icon. Required format is: YYYY-MM-DD Reference for error message [▶ 1361]: ☐ QMPC012
Actual Settlement Date and Time from	Enter the lower bound of the search range for the date and time from which the actual settlement date is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss References for error messages [▶ 1361]: ☐ QMPC011 ☐ QMPC013 ☐ QMPC014
Actual Settlement Date and Time to	Enter the upper bound of the search range for the date and time until which the actual settlement date is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss Reference for error message [▶ 1361]: ☐ QMPC014
Quantity/Nominal from	Enter the lower bound of the search range for the quantity of securities. Required format is: Decimal Number Reference for error message [▶ 1361]: ☐ QMPC006
Quantity/Nominal to	Enter the upper bound of the search range for the quantity of securities. Required format is: Decimal Number Reference for error message [▶ 1361]: ☐ QMPC006
Settlement Type	Select the settlement type from the possible values: ☐ All (default value) ☐ Units

Settlement Instructions – Search Criteria	
	☐ Nominal
Settlement Cash Amount More than	Enter the lower bound of the search range for the settlement cash amount. Required format is: max. 19 digit(s) incl. decimal point (thereof max. 5 decimal places) Reference for error message [▶ 1361]: ☐ QMPC005
Settlement Cash Amount Equal/less	Enter the upper bound of the search range for the settlement cash amount. Required format is: max. 19 digit(s) incl. decimal point (thereof max. 5 decimal places) Reference for error message [▶ 1361]: ☐ QMPC005
Status Criteria	
ISO Settlement status	Select the settlement status of the settlement instruction from the possible values: ☐ All (default value) ☐ Pending ☐ Failing If value 'Settlement Status' field is set to 'Settled' or 'Cancellation Status' field is set to 'Cancelled', this field is disabled. No date search range is allowed for the ISO Settlement Status.
Settlement Status	Select the settlement status from the possible values: ☐ All (default value) ☐ Unsettled ☐ Settled ☐ Partially settled
Date and Time from	Enter the lower bound of the search range for the date and time from which the settlement status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss

Settlement Instructions – Search Criteria	
Date and Time to	Enter the upper bound of the search range for the date and time until which the settlement status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss
Matching Status	Select the match status from the possible values: ☐ Unmatched ☐ Matched ☐ All (default value)
Date and Time from	Enter the lower bound of the search range for the date and time from which the match status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss
Date and Time to	Enter the upper bound of the search range for the date and time to which the match status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss
Cancellation Status	Select the cancellation status from the possible values: ☐ All (default value) ☐ Not cancelled ☐ Cancelled
Date and Time from	Enter the lower bound of the search range for the date and time from which the cancellation status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss
Date and Time to	Enter the upper bound of the search range for the date and time until which the cancellation status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss
CSD Hold Status	Select the CSD hold status from the possible values: ☐ All (default value) ☐ No ☐ Yes
Date and Time from	Enter the lower bound of the search range for the date and time from which the CSD hold status is valid or use the *calendar* icon.

Settlement Instructions – Search Criteria	
	Required format is: YYYY-MM-DD hh:mm:ss
Date and Time to	Enter the upper bound of the search range for the date and time until which the CSD hold status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss
Party Hold Status	Select the party hold status from the possible values: ☐ All (default value) ☐ No ☐ Yes
Date and Time from	Enter the lower bound of the search range for the date and time from which the party hold status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss
Date and Time to	Enter the upper bound of the search range for the date and time until which the party hold status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss
CSD Validation Hold Status	Select the party hold status from the possible values: ☐ All (default value) ☐ No ☐ Yes
Date and Time from	Enter the lower bound of the search range for the date and time from which the CSD validation hold status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss
Date and Time to	Enter the upper bound of the search range for the date and time until which the CSD validation hold status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss
CoSD Hold Status	Select the CoSD hold status from the possible values: ☐ All (default value) ☐ No ☐ Yes

Settlement Instructions – Search Criteria	
Date and Time from	Enter the lower bound of the search range for the date and time from which the CoSD hold status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss
Date and Time to	Enter the upper bound of the search range for the date and time until which the CoSD hold status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss
Approval Status	Select the approval status from the possible values: ☐ All (default value) ☐ Approved ☐ Awaiting Approval ☐ Rejected ☐ Revoked
Date and Time from	Enter the lower bound of the search range for the date and time from which the approval status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss
Date and Time to	Enter the upper bound of the search range for the date and time until which the approval status is valid or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss
Settlement Instructions – List	
Actor Reference	Shows the identification of the referenced instruction assigned by the T2S actor.
Instructing Party BIC	Shows the BIC of the instructing party.
Instructing Party Parent BIC	Shows the parent BIC of the instructing party.
Securities Account Number	Shows the securities account of the referenced instruction.

Illustration 57: Settlement instruction - details screen

Field

Description

Settlement Instruction	
Securities Account Owner Reference	Shows the reference assigned by the account owner to the settlement instruction.
	Only one of the three references can be the T2S actor reference.

Settlement Instruction	
Securities Account Servicer Reference	Shows the reference assigned by the account servicer to the settlement instruction. Only one of the three references can be the T2S actor reference.
Third Party Reference	Shows the reference assigned by the third party to the settlement instruction. Only one of the three references can be the T2S actor reference.
T2S Reference	Shows the reference assigned by T2S to the settlement instruction.
T2S Matching Reference	Shows the common reference assigned by T2S to all the settlement instructions comprising a transaction. Only shown if the settlement instruction is matched.
User Identification	Shows the identification of the user who introduced the settlement instruction.
Instructing Party BIC	Shows the BIC of the instructing party of the settlement instruction.
Instructing Party Parent BIC	Shows the BIC of the instructing party parent of the settlement instruction.
Matching Status	Shows the match status of the settlement instruction from the possible values: ☐ Unmatched ☐ Matched
Settlement Status	Shows the settlement status of the settlement instruction from the possible values: ☐ Unsettled ☐ Settled ☐ Partially settled
ISO Settlement Status	Shows the current ISO settlement status of the settlement instruction from the possible values: ☐ Pending ☐ Failing
Partial Settlement Indicator	Shows the value of the partial settlement indicator of the settlement instruction from the possible values: ☐ Partial not allowed

Settlement Instruction	
	☐ Partial settlement cash threshold allowed
	☐ Partial settlement quantity threshold allowed
	☐ Partial allowed
Matched Settlement Amount	Shows the matched effective amount on the transaction.
Matched Priority	Shows the priority of the transaction from the possible values: ☐ Normal ☐ High ☐ Top ☐ Reserved
Matched Partial Settlement Indicator	Shows the value of the partial settlement indicator of the transaction from the possible values: ☐ Partial not allowed ☐ Partial settlement cash threshold allowed ☐ Partial settlement quantity threshold allowed
Securities Movement Type Code	Shows if the movement on a securities account results from a deliver or a receive instruction from the possible values: ☐ Deliver ☐ Receive
ISIN	Shows the ISIN code of the security.
Securities Description	Shows the description of the security.
Securities Account Number	Shows the account to or from which a securities entry is made.
Securities Account Owner BIC	Shows the BIC of the securities account owner.
Original Settlement Quantity	Shows the quantity stated in the settlement instruction.
Settlement Type	Shows the type of settlement foreseen for the security stated in the settlement instruction from the possible values: ☐ Units

Settlement Instruction	
	☐ Face Amount
Settled Settlement Quantity	Shows the total quantity settled so far.
Payment Type Code	Shows if the transaction is to be settled with or without payment from the possible values: ☐ Against payment settlement ☐ Free of payment
Debit Credit Indicator	Shows if the original settlement amount is to be credited or debited from the possible values: ☐ Credit ☐ Debit
T2S Dedicated Cash Account Number	Shows the cash account stated in the settlement instruction.
Original Settlement Amount	Shows the settlement amount stated in the settlement instruction.
Currency	Shows the currency stated in the settlement instruction.
Settled Settlement Amount	Shows the total settlement amount settled so far.
Currency	Shows the currency stated in the settlement instruction.
Entry Date Time	Shows the date and timestamp when the settlement instruction has been created. Displayed format is: YYYY-MM-DD hh:mm:ss:μsμsμsμsμs
Intended Settlement Date	Shows the date at which the settlement instruction becomes eligible to be submitted to settlement. Displayed format is: YYYY-MM-DD
Trade Date	Shows the date at which the contract was made. Displayed format is: YYYY-MM-DD
Actual Settlement Date and Time	Shows the business date and the calendar time when the last settlement occurred. Displayed format is: YYYY-MM-DD hh:mm:ss:μsμsμsμsμs
Cancellation Date	Shows the business date when the settlement instruction has been cancelled. Displayed format is: YYYY-MM-DD
Accepted Timestamp (SF1)	Shows the accepted timestamp of the settlement instruction.

Settlement Instruction	
	Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Matched Timestamp (SF2)	Shows the matched timestamp of the settlement instruction.
	In case the settlement instruction is unmatched no timestamp will be shown.
	Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Receiving Depository BIC	Shows the BIC of the receiving depository.
Receiving CSD Participant BIC	Shows the BIC of the receiving CSD participant.
Processing Identification	Shows the reference of the instruction assigned by the receiving CSD participant.
Receiving CSD Participant Securities Account	Shows the Securities account of the receiving CSD participant.
Client of the Receiving CSD Participant BIC	Shows the BIC of the client of the receiving CSD participant.
Name	Shows the name and address of the client of the receiving CSD participant.
Identification	Shows the proprietary information, often a code, issued by the data source scheme issuer.
Issuer	Shows the entity that assigns the identification.
Schema Name	Shows the short textual description of the schema.
Delivering Depository BIC	Shows the BIC of the delivering depository.
Delivering CSD Participant BIC	Shows the BIC of the delivering CSD participant.
Processing Identification	Shows the reference of the instruction assigned by the delivering CSD participant.
Delivering CSD Participant Securities Account	Shows the securities account of the delivering CSD participant.
Client of the Delivering CSD Participant BIC	Shows the BIC of the client of the delivering CSD participant.

Settlement Instruction	
Name	Shows the name and address of the client of the delivering CSD participant.
Identification	Shows the proprietary information, often a code, issued by the data source scheme issuer.
Issuer	Shows the entity that assigns the identification.
Schema Name	Shows the short textual description of the schema.
Detailed Information	
Priority*	Shows the level of priority assigned to the settlement instruction from the possible values: ☐ Normal ☐ High ☐ Top ☐ Reserved
Allowed Modification Flag	Shows if a settlement instruction is non-modifiable by CSD participants from the possible values: ☐ No ☐ Yes
CoSD Flag	Shows if the Settlement Instruction has been identified as CoSD.
Corporate Action Event Identification	Shows the identification assigned by the account servicer to unambiguously identify a corporate action event.
Common Reference	Shows the reference provided by the T2S actor when the LCMM instruction is already matched or in order to facilitate the matching within T2S.
Beneficial Ownership	Shows if there is a change of beneficial ownership: ☐ Empty (default value) ☐ Yes ☐ No
Repo Reference	Shows the identification of a collateral transaction as assigned by the instructing party.
Securities Transaction Type*	Shows the securities transaction type expressed as an ISO 20022 code from the possible values: ☐ AUTO (for auto-collateralisation) ☐ BYIY (for buy-in)

Settlement Instruction
☐ BSBK (for buy sell back)
☐ CLAI (for market claim)
☐ CNCB (for central bank collateral operation)
☐ COLI (for collateral in)
☐ COLO (for collateral out)
☐ CONV (for depository receipt conversion)
☐ CORP (for corporate action)
☐ ETFT (for exchange traded funds)
☐ FCTA (for factor update)
☐ INSP (for move of stock)
☐ ISSU (for depository receipt issue)
☐ MKDW (for mark down)
☐ MKUP (for mark up)
☐ NETT (for netting)
☐ NSYN (for non syndicated)
☐ OWNE (for external account transfer)
☐ OWNI (for internal account transfer)
☐ PAIR (for pair off)
☐ PLAC (for placement)
☐ PORT (for portfolio move)
☐ REAL (for realignment)
☐ REBL (for rebalancing)
☐ REDI (for withdrawal)
☐ REDM (for redemption)
☐ RELE (for depository receipt release cancellation)
☐ REPU (for repo)
☐ RODE (for return delivery without matching)
☐ RVPO (for reverse repurchase agreement)
☐ SBBK (for sell buy back)
☐ SBRE (for borrowing reallocation)
☐ SECB (for securities borrowing)
☐ SECL (for securities lending)

Settlement Instruction	
	☐ SLRE (for lending reallocation)
	☐ SUBS (for subscription)
	☐ SWIF (for switch from)
	☐ SWIT (for switch to)
	☐ SYND (for syndicate underwriters)
	☐ TBAC (for TBA closing)
	☐ TRAD (for trade)
	☐ TRPO (for triparty repo)
	☐ TRVO (for triparty reverse repo)
	☐ TURN (for turnaround)
Cum/EX Indicator	Shows whether the contract was traded cum or ex coupon from the possible values: ☐ Empty ☐ CUM ☐ EX
Settlement Transaction Condition Indicator	Shows the Settlement Transaction Condition Indicator from the possible values (This field can show multiple Settlement Transaction Condition Indicators): ☐ Empty (default value) ☐ ADEA (accept after regular settlement deadline) ☐ ASGN (assignment) ☐ BUTC (buy to cover) ☐ BSSP (buy in partially succesful) ☐ CLEN (clean) ☐ DIRT (dirty) ☐ DLWM (delivery without matching) ☐ DRAW (drawn) ☐ EXER (exercised) ☐ EXPI (expired) ☐ FRCL (free clean settlement) ☐ KNOC (knocked out) ☐ NOMC (no automatic market claim) ☐ PENS (pending sale)

Settlement Instruction	
	☐ PHYS (physical)
	☐ RESI (residual)
	☐ RHYP (rehypothecation)
	☐ RPTO (reporting)
	☐ SHOR (short sell)
	☐ SPDL (special delivery)
	☐ SPST (split settlement)
	☐ TRAN (transformation)
	☐ TRIP (triparty segregation)
	☐ UNEX (unexposed)
Status Information	
CSD Validation Hold Status	Shows the CSD validation hold status of the settlement instruction from the possible values: ☐ No ☐ Yes
CoSD Hold Status	Shows the CoSD hold status of the settlement instruction from the possible values: ☐ No ☐ Yes
CSD Hold Status	Shows the CSD hold status of the settlement instruction from the possible values: ☐ No ☐ Yes
Party Hold Status	Shows the party hold status of the settlement instruction from the possible values: ☐ No ☐ Yes
Cancellation Status	Shows the cancellation status of the settlement instruction from the possible values: ☐ Not cancelled ☐ Cancelled
Cancellation Re-quested	Shows if the settlement instruction has been requested for cancellation by its counterpart from the possible values:

Settlement Instruction	
	☐ Empty (default value)
	☐ Yes
	This situation occurs when the counterparty´s cancellation instruction is processed in T2S.
Reason Code Reference	Shows the applicable reason code(s) for the cancellation of the settlement instruction, or an unsuccessful attempt of settlement.
Link	
Linkages	
Pool Instruction Reference	Shows the collective reference that identifies a set of messages.
Pool Instruction Counter	Shows the pool identification of the settlement instruction within the pool reference.
Pool Reference Owner BIC	Shows the BIC of the owner of the Pool Instruction Reference.
Link (List)	
Link Type	
Link Type	Shows the link processing position of the settlement instruction from the possible values:
	☐ After
	☐ Before
	☐ With
	☐ Info
Reference Type	Shows the reference type of the instruction to be linked/ unlinked to from the possible values:
	☐ Account Owner Settlement Instruction Reference
	☐ Account Owner Intra Balance Movement Reference
	☐ Account Owner Intra Position Movement Reference
	☐ Account Servicer Reference
	☐ Third Party reference
	☐ T2S reference
Reference	Shows the identification of the instruction to be linked/unlinked to.

Settlement Instruction	
Reference Owner	Shows the BIC of the instructing party of the instruction to be linked/unlinked to. This field is only filled in if the 'Reference Type' is set to any value different than 'T2S reference'.
Use Of Restriction	
Cash Sub Balance Type	Shows a code defined by the CB to identify the restriction on cash.
Securities Sub Balance Type	Shows a code defined by the CSD to identify the restriction on securities. If it is a delivering instruction, the Delivering Securities Sub Balance Type is shown; if it is a receiving instruction, the Receiving Securities Sub Balance Type is shown.
Use Of Restriction (List)	
Restriction Reference	Shows the reference of a restricted cash balance or securities position included in the settlement instruction.
Additional Delivering Parties	
Delivering Party 3	
BIC	Shows the BIC of the client of the delivering CSD participant.
Name	Shows the name of the party.
Identification	Shows proprietary information, often a code, issued by the data source scheme issuer.
Issuer	Shows the entity that assigns the identification.
Schema Name	Shows a short textual description of the scheme.
Delivering Party 4	
BIC	Shows the BIC of the client of the delivering CSD participant.
Name	Shows the name of the party.
Identification	Shows proprietary information, often a code, issued by the data source scheme issuer.
Issuer	Shows the entity that assigns the identification.
Schema Name	Shows a short textual description of the scheme.
Delivering Party 5	
BIC	Shows the BIC of the client of the delivering CSD participant.

Settlement Instruction	
Name	Shows the name of the party.
Identification	Shows proprietary information, often a code, issued by the data source scheme issuer.
Issuer	Shows the entity that assigns the identification.
Schema Name	Shows a short textual description of the scheme.
Additional Receiving Parties	
Receiving Party 3	
BIC	Shows the BIC of the client of the receiving CSD participant.
Name	Shows the name of the party.
Identification	Shows proprietary information, often a code, issued by the data source scheme issuer.
Issuer	Shows the entity that assigns the identification.
Schema Name	Shows a short textual description of the scheme.
Receiving Party 4	
BIC	Shows the BIC of the client of the receiving CSD participant.
Name	Shows the name of the party.
Identification	Shows proprietary information, often a code, issued by the data source scheme issuer.
Issuer	Shows the entity that assigns the identification.
Schema Name	Shows a short textual description of the scheme.
Receiving Party 5	
BIC	Shows the BIC of the client of the receiving CSD participant.
Name	Shows the name of the party.
Identification	Shows proprietary information, often a code, issued by the data source scheme issuer.
Issuer	Shows the entity that assigns the identification.
Schema Name	Shows a short textual description of the scheme.
Other Information	
Deal Price	
Value Amount	Shows the value of the amount of the deal price.
Value Currency	Shows the currency of the amount of the deal price.

Settlement Instruction	
Value Rate	Shows the price expressed as a rate.
Value Type	Shows the type of value in which the price is expressed from the possible values: ☐ Empty ☐ Discount ☐ Par ☐ Premium
Yielded	Shows whether the price is expressed as a yield.
Foreign Exchange	
Exchange Rate	Shows the factor used for the conversion of an amount from one currency into another. This reflects the price at which one currency was bought with another currency.
Quoted Currency	Shows the currency into which the base currency is converted in a currency exchange.
Resulting Amount	Shows the counter value of a foreign exchange conversion.
Resulting Amount Currency	Shows the currency of the counter value of a foreign exchange conversion.
Unit Currency	Shows the currency into which the base currency is converted in a currency exchange for unit.
Place of Trade	
Place of Trade Description	Shows the market in which a trade transaction has been executed.
Place of Trade Market Identifier Code	Shows the Identifier Code of the market in which a trade transaction has been executed.
Place of Trade Code	Shows the Place of Trade information expressed as an ISO 20022 code from the possible values: ☐ EXCH (for Stock Exchange) ☐ OTCO (for Over the Counter) ☐ PRIM (for Primary Market) ☐ SECM (for Secondary Market) ☐ VARI (for Various) Either this field or the proprietary identification of the place of trade in addition to the issuer and scheme name is available.

Settlement Instruction	
Issuer Name	Shows the entity that assigns the identification.
Proprietary Identific-ation	Shows the identification assigned by an institution.
Schema Name	Shows the name of the identification scheme.
Other	
Number of Days Ac-crued	Shows the number of days on which the interest rate ac-crues.
Original Ordered Amount	Shows the original ordered amount.
Original Ordered Currency	Shows the currency of the original ordered amount.
Market Client Side Code	Specifies if an instruction is for a market side or client side transaction: ☐ CLNT (for Client Side) ☐ MAKT (for Market Side) Either this field or the proprietary identification of the mar-ket client side in addition to the issuer and scheme name is available.
Place of Clearing	Shows the BIC code of the Clearing House involved in the settlement (if any).

Buttons

Amendment Instruc-tion	This function enables you to create a new amendment in-struction of the selected settlement instruction. This button is not available in case any status of the settle-ment instruction does not allow the creation of the amend-ment instruction. Next screen: ☐ *Amendment securities instruction – new* screen [▷ 102]
Hold/Release In-struction	This function enables you to create a new hold/release/partial release instruction of the selected settlement in-struction. This button is not available in case any status of the settle-ment instruction does not allow the creation of the hold/re-lease/partial release instruction. Next screen:

	☐ *Hold/release instruction – new* screen [▷ 125]
Cancellation Instruction	This function enables you to create a new cancellation instruction of the selected settlement instruction.
	This button is not available in case any status of the settlement instruction does not allow the creation of the cancellation instruction.
	Next screen:
	Cancellation securities instruction – new screen [▷ 116]
Revisions/Audit Trail	This function enables you to display the revisions of the selected settlement instruction.
	Next screen:
	☐ *Revisions/audit trail – list* screen [▷ 661]
Status History	This function enables you to display the status history of the selected settlement instruction.
	Next screen:
	☐ *Status history – details* screen [▷ 266]
Related Outbound Message	This function enables you to display the outbound messages related to the settlement instruction.
	In case the instruction is linked to more than one outbound message, the *outbound messages - search/list* screen is displayed. In case the query only returns 1 valid message, the *outbound message – details* screen is displayed directly.
	Next screens:
	☐ *Outbound messages – search/list* screen [▷ 645]
	☐ *Outbound message – details* screen [▷ 653]
Related Inbound Message	This function enables you to display the inbound message related to the settlement instruction.
	Next screens:
	☐ *Inbound messages – search/list* screen [▷ 628]
	☐ *Inbound message – details* screen [▷ 635]
Copy Instruction	This function enables you to copy fields to create a new settlement instruction with the same attributes.
	Next screen:
	☐ *Settlement instruction – new* screen [▷ 210]

Associated Penalties	This function enables you to display the details of the possible penalty(ies) associated to the Settlement Instruction:
	☐ If there is only one result Penalty - details screen is displayed.
	☐ If there are more than one result Penalty – search/list - screen is displayed.
	This function will not be available during the processing of penalties i.e. between the Events "PMSS" (Penalty Mechanism- Stop Screens and penalty modification requests) and "PMRR" (Penalty Mechanism- Restart GUI and Restart processing penalty modification requests).
	This function replicates the penalty query using as parameter the T2S Actor Reference or the T2S Reference of the underlying Settlement Instruction.
	This button shall be only visible for those having the privilege: "Penalty Query Privilege". This privilege should be only granted to CSDs and the T2S Operator. To ensure it has not been granted by mistake to any other party, this button is only visible if the Party type of the User is "CSDY" or "TCSO".
	Next screens:
	☐ Penalty – search/list screen
	☐ Penalty – details screen
Links	This function enables you to display all the links data preventing settlement at the moment when the request is performed.
	This button is not available in the following cases:
	☐ Cancellation Status = "cancelled"
	☐ Settlement Status = "settled"
	☐ Match Status = "Unmatched"
	Next screen:
	☐ Links Preventing Settlement - screen [▷ 276]
Matched Instruction	This function enables you to display the settlement instruction details of the matched business settlement instruction.

	This button is not available in case the instruction is un-matched or if the user doesn´t have the 'Settlement Instruction Query' privilege on the securities account of the counterparty.
	Next screen:
	☐ Settlement instruction – details screen

2.2.2.19 Settlement Instruction - New Screen

Context of Usage

This screen contains a number of fields regarding settlement instructions. You can enter new data. Afterwards you can proceed further by clicking on the buttons below.

The screen can be used either in 2-eyes mode or 4-eyes mode.

This screen is not relevant for CB users.

Any schema validation error will be reported back to you for correction prior being able to leave the screen for further processing.

Alternatively you may cancel the action of entering the settlement instruction and leave the screen without clicking on the submit button.

Screen Access

☐ `Securities >> Settlement >> Settlement Instruction` >> *Settlement instructions– search/list* screen >> Click on *new* button

☐ `Securities >> Settlement >> Settlement Instructions Allegements` >> *Allegements instructions - search/list* screen >> Click on *search* button >> *Allegement instructions – search/list* screen >> Click on the *details* button >> *Allegement instruction – details* screen >> Click on the *new settlement instruction* button

☐ `Securities >> Settlement >> Settlement Instruction` >> *Settlement instructions – search/list* screen >> Click on *search* button >> *Settlement instructions – search/list* screen >> Select the relevant settlement instruction and click on the *details* button >> *Settlement instruction – details* screen >> Click on the *copy* button

Privileges

To use this screen, you need the following privileges [▶ 1145]:

☐ Send new settlement instruction/settlement restriction on securities either on a securities account or on behalf of an external CSD

☐ Send new instruction using a specific instructing party

☐ Send settlement Instruction with non-modifiable flag activated

☐ Link to an instruction / pool reference belonging to a specific party

☐ Use ISO transaction code AUTO (auto-collateralisation)

☐ Use ISO transaction code BYIY (buy-in)

☐ Use ISO transaction code BSBK (buy sell back)

☐ Use ISO transaction code CLAI (market claim)

☐ Use ISO transaction code CNCB (central bank collateral operation)

☐ Use ISO transaction code COLI (collateral in)

☐ Use ISO transaction code COLO (collateral out)

☐ Use ISO transaction code CONV (depository receipt conversion)

☐ Use ISO transaction code CORP (corporate action)

☐ Use ISO transaction code ETFT (exchange trade funds)

☐ Use ISO transaction code FCTA (factor update)

☐ Use ISO transaction code INSP (move of stock)

☐ Use ISO transaction code ISSU (issuance)

☐ Use ISO transaction code MKDW (mark down)

☐ Use ISO transaction code MKUP (mark up)

☐ Use ISO transaction code NETT (netting)

☐ Use ISO transaction code NSYN (non syndicated)

☐ Use ISO transaction code OWNE (external account transfer)

☐ Use ISO transaction code OWNI (internal account transfer)

☐ Use ISO transaction code PAIR (pair off)

☐ Use ISO transaction code PLAC (placement)

☐ Use ISO transaction code PORT (portfolio move)

☐ Use ISO transaction code REAL (realignment)

☐ Use ISO transaction code REDI (withdrawal)

☐ Use ISO transaction code REDM (redemption)

☐ Use ISO transaction code RELE (depository receipt release cancellation)

☐ Use ISO transaction code REPU (repo)

☐ Use ISO transaction code RODE (return delivery without matching)

☐ Use ISO transaction code RVPO (reverse repurchase agreement)

☐ Use ISO transaction code SBBK (sell buy back)

☐ Use ISO transaction code SBRE (borrowing reallocation)

☐ Use ISO transaction code SECB (securities borrowing)

☐ Use ISO transaction code SECL (securities lending)

☐ Use ISO transaction code SLRE (lending reallocation)

☐ Use ISO transaction code SUBS (subscription)

☐ Use ISO transaction code SWIF (switch from)

☐ Use ISO transaction code SWIT (switch to)

☐ Use ISO transaction code SYND (syndicate underwriters)

☐ Use ISO transaction code TBAC (TBA closing)

☐ Use ISO transaction code TRAD (trade)

☐ Use ISO transaction code TRPO (triparty repo)

☐ Use ISO transaction code TRVO (triparty reverse repo)

☐ Use ISO transaction code TURN (turnaround)

☐ Party hold settlement instruction on a securities account or on behalf of an external CSD

☐ CSD hold settlement instruction either on a securities account or on behalf of the CSD in T2S

References

User Instructions Part

This screen is part of the following business scenarios:

☐ Copy a settlement instruction [▷ 690]

☐ Enter a settlement instruction [▷ 686]

☐ Respond to an allegement instruction [▷ 696]

Business Functionality Document

This screen corresponds to the following business function:

☐ Add settlement instruction or settlement restriction (T2S.GUI.SESE.INX.0070)

Screenshot

Securities Account Owner BIC	Enter the BIC of the securities account owner.
	Required format is: max. 11 characters (SWIFT-x)
	References for error messages: [▶ 1299]
	☐ MVCV243
	☐ MVCV253
	☐ MVCV279
	☐ MVCV281
	If the 'Securities Movement Type Code' is set to 'RECE', and both the 'Securities Account Owner BIC' field and the 'Receiving CSD Participant – Party BIC' field are filled in, they must be the same. If the Securities Movement Type

General
	Code is set to DELI and both the 'Securities Account Owner BIC' field and the 'Delivering CSD Participant – Party BIC' field are filled in, they must be the same.
ISIN*	Select the ISIN of the security from the drop-down menu. References for error messages: [▸ 1299] ☐ MVCV205 ☐ MVCV298 ☐ MVCV299 ☐ MVCV301 ☐ MVCV303 ☐ MVIC305 ☐ MVIC307 ☐ MVIC308 ☐ MVIC309 ☐ MVIC311 ☐ MVIC313 ☐ MVIC315 ☐ MVIC316 ☐ MVIC317 ☐ MVIC318 ☐ MVIC319 ☐ MVIC320 ☐ MVSQ602 ☐ MVSQ604 ☐ MVSQ606 ☐ MVRR945
Securities Short Name	Shows the description of the selected ISIN. This field is automatically filled in when you have entered an ISIN in the 'ISIN' field.
Settlement Quantity*	Enter the quantity stated in the settlement instruction. Required format is: For settlement type = Unit, max. 15 digit(s) incl. decimal point (thereof max. 14 decimal places)

General
	For settlement type = Face Amount, max. 15 digit(s) incl. decimal point (thereof max. 5 decimal places) References for error messages: [▸ 1299] ☐ MVCV286 ☐ MVSQ602 ☐ MVSQ604 ☐ MVSQ606 ☐ MVSQ610 ☐ MVSQ612 In case there is no exchange of securities the value must be set to zero (i.e. for a PFOD the value needs to be set to '0' value).
Settlement Type*	Select the type of settlement foreseen for the securities from the possible values: ☐ Units ☐ Face Amount References for error messages: [▸ 1299] ☐ MVCV286 ☐ MVSQ604 ☐ MVSQ612 This field is automatically filled in when an ISIN is chosen.
Payment Type Code	Select how the transaction is to be settled, against payment or free of payment from the possible values: ☐ APMT ☐ FREE References for error messages: [▸ 1299] ☐ MVCU103 ☐ MVCU107 ☐ MVCA105 ☐ MVCA503 ☐ MVCA505 ☐ MVCA507 ☐ MVCA511

General
☐ MVCA517
☐ MVCA518
☐ MVSD403
☐ MVSD406
☐ MVRR941
☐ MVRR942
If the 'Payment Type Code' field is set to 'APMT', the 'Debit Credit Indicator' field must be filled in too.
If the payment type code is set from 'APMT' to 'FREE', the fields 'Debit Credit Indicator', 'Currency' and 'Settlement Amount' become optional. Additionally, in case any data has been previously filled in any of these fields, it will be automatically removed upon the update of the payment type code from 'APMT' to 'FREE'. After the automatic deletion of the data, the fields can be filled in again.

Debit Credit Indicator	Select the relevant value when the original settlement amount has a value from the possible values:
	☐ CRDT
	☐ DBIT
	References for error messages: [▶ 1299]
	☐ MVCV256
	☐ MVCV257
	☐ MVCA517
	☐ MVCA518
	☐ MVCA519
	In case the Payment Type Code is set to 'APMT' or the 'Settlement Amount' field is filled, the field Debit Credit indicator becomes mandatory.
	If the 'Debit Credit Indicator' field is filled, the 'Settlement Amount' field must be filled in too (and vice versa).
T2S Dedicated Cash Account Number	Enter the dedicated cash account number.
	In case the T2S dedicated cash account number is not filled in, T2S uses the default DCA stored in reference data for the relevant securities account and currency defined in the settlement instruction.

General
Required format is: max. 34 characters (SWIFT-x)

Use of Restriction Additional Information
Lot Quantity/Unit   Enter the quantity that is part of the lot described expressed in units. Required format: max. 15 digit(s) incl. decimal point (thereof max. 14 decimal places). Only one of the values for quantity can be filled in: 'Unit', 'Face Amount' or 'Amortised Value'.
Lot Quantity/Face Amount   Enter the quantity that is part of the lot described expressed in face amount. Required format: max. 15 digit(s) incl. decimal point (thereof max. 5 decimal places). Only one of the values for quantity can be filled in: 'Unit', 'Face Amount' or 'Amortised Value'.

General	
Lot Quantity/Amortised Value	Enter the quantity that is part of the lot described expressed in amortised value. Required format: max. 15 digit(s) incl. decimal point (thereof max. 5 decimal places). Only one of the values for quantity can be filled in: 'Unit', 'Face Amount' or 'Amortised Value'.
Lot Date Time/Date	Enter the date on which the lot was purchased or use the *calendar* icon. Required format: YYYY-MM-DD Only one field among 'Date' and 'Date Time' can be filled in.
Lot Date Time/Date Time	Enter the date/time on which the lot was purchased or use the *calendar* icon. Required format: YYYY-MM-DD hh:mm:ss.µsµsµsµsµs Only one field among 'Date' and 'Date Time' can be filled in.
Lot Price/Type/Yielded	Select whether or not the price is expressed as a yield from the possible values: ☐ Yes ☐ No Only one field among 'Value Type' and 'Yielded' can be filled in.
Lot Price/Type/Value Type	Select the type of value in which the price is expressed from the possible values: ☐ Discount (default value) ☐ Premium ☐ Par Only one field among 'Value Type' and 'Yielded' can be filled in.
Lot Price/Value/Rate	Enter the price expressed as a rate. Required format is: max. 12 digit(s) incl. decimal point (thereof max. 10 decimal places) Only one field among 'Value Amount' and 'Value Rate' can be filled in.

General
Lot Price/Value/ Amount	Enter the price expressed as a value. Required format is: max. 15 digit(s) incl. decimal point (thereof max. 13 decimal places) Only one field among 'Value Amount' and 'Value Rate' can be filled in.
Lot Price/Value/Currency	Select the currency of the value amount from the drop-down menu. Required format is: 3 characters (SWIFT-x)
Type of Price/Code	Select the ISO 20022 codes to indicate the type of price from the possible value: ☐ Average Only one of the following types can be filled in for a given place of trade: 'Code' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Type of Price/Proprietary/Identification	Enter the proprietary information, often a code, of the type of price. Required format is: max. 4 characters (SWIFT-x) Only one of the following types can be filled in for a given type of price: 'Code' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Type of Price/Proprietary/Issuer	Enter the issuer information of the type of price. Required format is: max. 4 characters (SWIFT-x) Only one of the following types can be filled in for a given type of price: 'Code' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Type of Price/Proprietary/Schema Name	Enter a short textual description of the schema of the type of price. Required format is: max. 4 characters (SWIFT☐x) Only one of the following types can be filled in for a given type of price: 'Code' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.

General
Additional Receiving Parties

Receiving Party 3	
Party BIC	Enter the BIC of the client of the receiving CSD participant.
	Required format is: max. 11 characters (SWIFT-x)
	In case a BIC8 is entered for this field no automatic supplementation to BIC11 is performed.
	Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Name	Enter the name and address of the party.
	Required format is: max. 140 characters (SWIFT-x)
	Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Proprietary Identification	Enter the proprietary information, often a code, issued by the data source scheme issuer.
	Required format is: max. 34 characters (SWIFT-x)
	Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Issuer	Enter the entity that assigns the identification.
	Required format is: max. 4 characters (SWIFT-x)
	Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Schema Name	Enter the short textual description of the schema.
	Required format is: max. 4 characters (SWIFT-x)
	Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Receiving Party 4	

General	
Party BIC	Enter the BIC of the client of the receiving CSD participant.
	Required format is: max. 11 characters (SWIFT-x)
	In case a BIC8 is entered for this field no automatic supplementation to BIC11 is performed.
	Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Name	Enter the name and address of the party.
	Required format is: max. 140 characters (SWIFT-x)
	Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Proprietary Identification	Enter the proprietary information, often a code, issued by the data source scheme issuer.
	Required format is: max. 34 characters (SWIFT-x)
	Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Issuer	Enter the entity that assigns the identification.
	Required format is: max. 4 characters (SWIFT-x)
	Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Schema Name	Enter the short textual description of the schema.
	Required format is: max. 4 characters (SWIFT-x)
	Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Receiving Party 5	
Party BIC	Enter the BIC of the client of the receiving CSD participant.
	Required format is: max. 11 characters (SWIFT-x)

General
In case a BIC8 is entered for this field no automatic supplementation to BIC11 is performed. Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.

Name	Enter the name and address of the party. Required format is: max. 140 characters (SWIFT-x) Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Proprietary Identification	Enter the proprietary information, often a code, issued by the data source scheme issuer. Required format is: max. 34 characters (SWIFT-x) Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Issuer	Enter the entity that assigns the identification. Required format is: max. 4 characters (SWIFT-x) Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Schema Name	Enter the short textual description of the schema. Required format is: max. 4 characters (SWIFT-x) Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Additional Delivering Parties	
Delivering Party 3	
Party BIC	Enter the BIC of the client of the delivering CSD participant. Required format is: max. 11 characters (SWIFT-x)

General	
	In case a BIC8 is entered for this field no automatic supplementation to BIC11 is performed. Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Name	Enter the name and address of the party. Required format is: max. 140 characters (SWIFT-x) Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Proprietary Identification	Enter the proprietary information, often a code, issued by the data source scheme issuer. Required format is: max. 34 characters (SWIFT-x) Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Issuer	Enter the entity that assigns the identification. Required format is: max. 4 characters (SWIFT-x) Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Schema Name	Enter the short textual description of the schema. Required format is: max. 4 characters (SWIFT-x) Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Delivering Party 4	
Party BIC	Enter the BIC of the client of the delivering CSD participant. Required format is: max. 11 characters (SWIFT-x)

General
In case a BIC8 is entered for this field no automatic supplementation to BIC11 is performed.   Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Name — Enter the name and address of the party.   Required format is: max. 140 characters (SWIFT-x)   Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Proprietary Identification — Enter the proprietary information, often a code, issued by the data source scheme issuer.   Required format is: max. 34 characters (SWIFT-x)   Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Issuer — Enter the entity that assigns the identification.   Required format is: max. 4 characters (SWIFT-x)   Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Schema Name — Enter the short textual description of the schema.   Required format is: max. 4 characters (SWIFT-x)   Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Delivering Party 5
Party BIC — Enter the BIC of the client of the delivering CSD participant.   Required format is: max. 11 characters (SWIFT-x)

General	
	In case a BIC8 is entered for this field no automatic supplementation to BIC11 is performed.
	Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Name	Enter the name and address of the party.
	Required format is: max. 140 characters (SWIFT-x)
Proprietary Identification	Enter the proprietary information, often a code, issued by the data source scheme issuer.
	Required format is: max. 34 characters (SWIFT-x)
	Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Issuer	Enter the entity that assigns the identification.
	Required format is: max. 4 characters (SWIFT-x)
	Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Schema Name	Enter the short textual description of the schema.
	Required format is: max. 4 characters (SWIFT-x)
	Only one of the following party identifications can be filled in for a given settlement party: 'Party BIC', 'Name' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Other Information	
Deal Price	
Value Amount	Enter the value of the amount of the deal price.
	Required format is: max. 15 digit(s) incl. decimal point (thereof max. 13 decimal places)
	Only one field among 'Value Amount' and 'Value Rate' can be filled in. If any of these two fields is filled in the other one cannot be filled in.

General
If either 'Value Amount' or 'Value Rate' is filled in, then either 'Value Type' or 'Yielded' must also be filled in.

Value Currency	Select the currency of the amount of the deal price from the possible values. Required format is: 3 characters (SWIFT-x)
Value Rate	Enter the price expressed as a rate. Required format is: max. 12 digit(s) incl. decimal point (thereof max. 10 decimal places) Only one field among 'Value Amount' and 'Value Rate' can be filled in. If any of these two fields is filled in the other one cannot be filled in. If either 'Value Amount' or 'Value Rate' is filled in, then either 'Value Type' or 'Yielded' must also be filled in.
Value Type	Select the type of value in which the price is expressed from the possible values: ☐ Empty (default value) ☐ Discount ☐ Par ☐ Premium Only one field among 'Value Type' and 'Yielded' can be filled in. If any of these two fields is filled in the other one cannot be filled in. If either 'Value Type' or 'Yielded' is filled in, then either 'Value Amount' or 'Value Rate' must also be filled in.
Yielded	Select yes or no to indicate that the price is expressed as a yield. Possible values: ☐ Empty (default value) ☐ Yes ☐ No Only one field among 'Value Type' and 'Yielded' can be filled in. If any of these two fields is filled in the other one cannot be filled in. If either 'Value Type' or 'Yielded' is filled in, then either 'Value Amount' or 'Value Rate' must also be filled in.

General
Foreign Exchange

Exchange Rate	Enter the factor used for the conversion of an amount from one currency into another. This reflects the price at which one currency was bought with another currency. Required format is: max. 12 digit(s) incl. decimal point (thereof max. 10 decimal places)
Quoted Currency	Select the currency into which the base currency is converted, in a currency exchange from the drop-down menu.
Resulting Amount	Enter the counter value of a foreign exchange conversion. Required format is: max. 15 digit(s) incl. decimal point (thereof max. 5 decimal places)
Resulting Amount Currency	Select the currency of the counter value of a foreign exchange conversion from the drop-down menu.
Unit Currency	Select the currency into which the base currency is converted, in a currency exchange for unit from the drop-down menu.
Place of Trade	
Place of Trade Description	Enter the description of the market in which a trade transaction has been executed. Either this field or Place of Trade Market Identifier Code can be filled, but not both. Required format is: max. 30 characters (SWIFT-x-red)
Place of Trade Market Identifier Code	Enter the Identifier Code of the market in which a trade transaction has been executed. Either this field or Place of Trade Description can be filled, but not both. Required format is: max. 4 characters (SWIFT-x)
	Place of Trade Additional Information
Type/Code	Select the ISO 20022 code to indicate the type of market in which transactions take place from the possible values: ☐ PRIM (for Primary Market) ☐ SECM (for Secondary Market) ☐ OTCO (for Over the Counter)

General
□ VARI (for Various) □ EXCH (for Stock Exchange) Required format is: max. 4 characters (SWIFT-x). In case either 'Place of Trade Description' or'Place of Trade Market Identifier Code' are filled, either'Place of Trade Code' or Proprietary Information must be provided. Only one of the following types can be filled in for a given place of trade: 'Code' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.

Type/Proprietary/ Identification	Enter the proprietary information, often a code, of the place of trade type. Required format is: max. 4 characters (SWIFT-x). Only one of the following types can be filled in for a given place of trade: 'Code' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Type/Proprietary/Is- suer	Enter the issuer information of the place of trade type. Required format is: max. 4 characters (SWIFT-x). Only one of the following types can be filled in for a given place of trade: 'Code' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Type/Proprietary/ Schema Name	Enter a short textual description of the schema of the place of trade type. Required format is: max. 4 characters (SWIFT-x). Only one of the following types can be filled in for a given place of trade: 'Code' or the combination of 'Identification', 'Issuer' and optionally 'Schema Name'.
Other Information	
Other	
Number of Days Ac- crued	Enter the number of days on which the interest rate accrues (daily accrual note). Required format is: Integer values from -999 to 999

General	
Original Ordered Amount	Enter the original ordered amount. Required format is: max. 15 digit(s) incl. decimal point (thereof max. 5 decimal places)
Original Ordered Currency	Select the currency of the original ordered amount from the drop-down menu.
Market Client Side Code	Specifies if an instruction is for a market side or client side transaction: ☐ CLNT (for Client Side) ☐ MAKT (for Market Side) Either this field or the proprietary identification of the market client side in addition to the issuer and scheme name is available. Required format is: max. 4 characters (SWIFT-x)
Market Client Side Proprietary Identification	Select the identification assigned by an institution. In case Proprietary Information is filled, at least Identification and Issuer must be provided. Required format is: max. 4 characters (SWIFT-x)
Market Client Side Issuer	Select the entity that assigns the identification. In case Proprietary Information is filled, at least Identification and Issuer must be provided. Required format is: max. 4 characters (SWIFT-x)
Market Client Side Schema Name	Select the name of the identification scheme. Required format is: max. 4 characters (SWIFT-x)
Additional Information	
Level 1	Select the first level of the XML hierarchy.
Level 2	Select the second level of the XML hierarchy.
Level 3	Select the third level of the XML hierarchy.
Level 4	Select the fourth level of the XML hierarchy.
Level 5	Select the fifth level of the XML hierarchy.
Level 6	Select the sixth level of the XML hierarchy.
Value	Enter the value of the corresponding XML field chosen through the different levels.
Path	Shows the XML selected hierarchy.

General
Value	Shows the value of the corresponding XML field chosen through the different levels.

Buttons

Cancel	This function enables you to cancel the process and return to the previous screen. Next screen: ☐ *Settlement instructions – search/list* screen [▷ 176]
Reset	This function enables you to set all fields to default value and blanks out all optional fields. Next screen: ☐ *Settlement instruction – new* screen
Submit	This function enables you to create a new settlement instruction. Upon clicking on the *submit* button you will be asked to enter your PIN for digital signature purposes (NRO). With the entry of the PIN, T2S attaches a digital signature to the instruction entered by the T2S actor. Field Description

Settlement Instruction - Status History	
Instruction	Shows the reference of the instruction for which the status history is shown. Displayed format is: max. 16 characters (SWIFT-x)
Effective Date and Time	Shows the timestamp when the status query was made. Displayed format is: YYYY-MM-DD hh:mm:ss
Date and Time	Shows the date and time when the status value was modified. Displayed format is: YYYY-MM-DD hh:mm:ss
Status Type	Shows the status type depending on the instruction type from the possible values: ☐ Settlement Status (for settlement instructions and restrictions) ☐ Match Status (for all types of LCMM instructions) ☐ Cancellation Status (for all types of LCMM instructions) ☐ Party Hold (for settlement instructions) ☐ CSD Hold Status (for settlement instructions) ☐ CSD Validation Hold Status (for settlement instructions) ☐ CoSD Hold Status (for settlement instructions) ☐ Execution Status (for cancellation instructions and condition modification instructions) ☐ Approval Status (for all types of LCMM instructions)

Settlement Instruction - Status History	
Status Value	Shows the status value of the 'Status Type' field depending on the status type and the instruction type from the possible values:
	☐ Match status: 'Matched' or 'Unmatched'
	☐ Cancellation status for settlement instructions and restrictions: 'Cancelled' or 'Not Cancelled'
	☐ Cancellation status for cancellation instructions and condition modification instructions: 'Denied' or 'Not Denied'
	☐ Settlement status: 'Unsettled'- Pending' or 'Unsettled - Failing' or 'Partially Settled'- Pending' or 'Partially Settled' - Failing' or 'Settled'
	☐ CoSD hold status: 'Yes' or 'No'
	☐ Party hold status: 'Yes' or 'No'
	☐ CSD hold status: 'Yes' or 'No'
	☐ CSD validation hold status : 'Yes' or 'No'
	☐ Execution status: 'Executed' or 'Not Executed'
	☐ Approval status: 'Approved' or 'Awaiting for Approval' or 'Revoked'
Settled Settlement Amount	Shows the amount settled in the current status update. This field is only filled for an update in a settlement status.
Settled Settlement Quantity	Shows the quantity settled in the current status update. This field is only filled for an update in a settlement status.

2.2.2.21 Insolvency procedure Settlement Instructions - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for settlement instructions under insolvency situation. The search results will be displayed in a list.

After selecting an entry, you can proceed further by clicking on the buttons below.

This screen will be available for the User in case the Insolvency system parameter is activated.

When exporting the content of this screen, you receive the query result in a csv-file.

This screen is not relevant for CB users.

Screen Access	☐ `Securities >> Settlement >> Insolvency procedure Settle-` `ment Instructions`

Field description

Insolvency procedure Settlement Instructions – Search Criteria	
Insolvent Object Criteria*	
Securities Account Number	You can choose to either enter the 'Securities Account Number' or to select it from the suggested items in the drop-down menu. Only one of the insolvent object criteria must be filled in: 'Securities Account Number', 'Dedicated Cash Account Number' or the combination of 'Insolvent Party BIC' and 'Insolvent Parent Party BIC'. In order to query external CSD settlement instructions the search criterion 'securities account' must not be filled in. Required format is: max. 35 characters (SWIFT-x) Reference for error message [▷ 1238]: ☐ QMPC030
Dedicated Cash Account Number	You can choose to either enter the 'Dedicated Cash Account Number' or to select it from the suggested items in the drop-down menu.

Insolvency procedure Settlement Instructions – Search Criteria	
	Only one of the insolvent object criteria must be filled in: 'Securities Account Number', 'Dedicated Cash Account Number' or the combination of 'Insolvent Party BIC' and 'Insolvent Parent Party BIC'.
	Required format is: max. 34 characters (SWIFT-x)
	Reference for error message [▶ 1238]:
	☐ QMPC031
Insolvent Party BIC	You can choose to either enter the 'Insolvent Party BIC' or to select it from the suggested items in the drop-down menu.
	Only one of the insolvent object criteria must be filled: 'Securities Account Number', 'Dedicated Cash Account Number' or the combination of 'Insolvent Party BIC' and 'Insolvent Parent Party BIC'.
	If the Insolvent Party BIC is filled in, the Insolvent Parent Party BIC needs to be filled in as well.
	Required format is: max. 11 characters (SWIFT-x)
	References for error messages [▶ 1238]:
	☐ QMPC032
	☐ QMPC084
Insolvent Parent Party BIC	You can choose to either enter the 'Insolvent Party Parent BIC' or to select it from the suggested items in the drop-down menu.
	Only one of the insolvent object criteria must be filled in: 'Securities Account Number', 'Dedicated Cash Account Number' or the combination of 'Insolvent Party BIC' and 'Insolvent Parent Party BIC'.
	If the Insolvent Parent Party BIC is filled in, the Insolvent Party BIC needs to be filled in as well.
	Required format is: max. 11 characters (SWIFT-x)
	References for error messages [▶ 1238]:
	☐ QMPC048
	☐ QMPC084
Additional Criteria	

Insolvency procedure Settlement Instructions – Search Criteria	
Acceptance Date and Time – from	Enter the lower bound of the search range for the acceptance date and time (i.e. SF1: moment of acceptance) or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss Reference for error message [▷ 1238]: ☐ QMPC015 Only Settlement Instructions successfully created in 4-eyes mode (i.e. approval status = approved) will be considered in the query. Settlement Instructions with other approval status value will not be included in the search results.
Acceptance Date and Time – to	Enter the upper bound of the search range for the acceptance date and time (i.e. SF1: moment of acceptance) or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss Reference for error message [▷ 1238]: ☐ QMPC015 Only Settlement Instructions successfully created in 4-eyes mode (i.e. approval status = approved) will be considered in the query. Settlement Instructions with other approval status value will not be included in the query results.
Matching Status	Select the matching status from the possible values: ☐ All (default value) ☐ Unmatched ☐ Matched
Matching Date and Time - from	Enter the lower bound of the search range for the matching date and time (i.e. SF2: moment of irrevocability) or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss Reference for error message [▷ 1238]: ☐ QMPC015
Matching Date and Time - to	Enter the upper bound of the search range for the matching date and time (i.e. SF2: moment of irrevocability) or use the *calendar* icon.

Insolvency procedure Settlement Instructions – Search Criteria	
	Required format is: YYYY-MM-DD hh:mm:ss Reference for error message [▶ 1238]: ☐ QMPC015
Settlement Status	Select the settlement status from the possible values: ☐ All (default value) ☐ Unsettled ☐ Settled ☐ Partially settled
ISO Settlement status	Select the settlement status of the settlement restriction from the possible values: ☐ All (default value) ☐ Pending ☐ Failing If value 'Settlement Status' field is set to 'Settled' or 'Cancellation Status' field is set to 'Cancelled', this field is disabled.
Cancellation Status	Select the cancellation status from the possible values: ☐ All (default value) ☐ Cancelled ☐ Not cancelled
Party Hold Status	Select the party hold status from the possible values: ☐ All (default value) ☐ On hold ☐ Released
CSD Hold Status	Select the CSD hold status from the possible values: ☐ All (default value) ☐ On hold ☐ Released
CSD Validation Hold Status	Select the CSD validation hold status from the possible values: ☐ All (default value) ☐ On hold ☐ Released

Insolvency procedure Settlement Instructions – Search Criteria	
CoSD Hold status	Select the CoSD hold status from the possible values: ☐ All (default value) ☐ On hold ☐ Released
Insolvency procedure Settlement Instructions - List	
Actor Reference	Shows the reference assigned by the Actor to the settlement instruction.
T2S Reference	Shows the reference assigned by T2S to the settlement instruction.
Instructing Party BIC	Shows the BIC of the instructing party of the settlement instruction.
Instructing Party Parent BIC	Shows the parent BIC of the instructing party of the settlement instruction.
Accepted Timestamp (SF1)	Shows the accepted timestamp of the settlement instruction.
Matched Timestamp (SF2)	Shows the matched timestamp of the settlement instruction. In case the settlement instruction is unmatched no timestamp will be shown.
Securities Account Number	Shows the securities account number to or from which a securities entry is made.
ISIN	Shows the ISIN code of the security.
Securities Description	Shows the description of the security.
Securities Movement Type Code	Shows the securities movement type code from the possible values: ☐ DELI ☐ RECE
Original Settlement Quantity/Nominal	Shows the quantity of securities to be settled.
Settled Quantity/ Nominal	Shows the settled quantity of the settlement instructions.

Insolvency procedure Settlement Instructions – Search Criteria	
T2S Dedicated Cash Account Number	Shows the T2S dedicated cash account number stated in the settlement instruction or the default T2S dedicated cash account number in case it was not stated in the settlement instruction.
Debit/Credit Indicator	Shows the debit credit indicator related to the cash posting from one of the possible values: ☐ DEBIT ☐ CREDIT ☐ Empty In case the settlement instruction does not contain the debit credit information, no value will be shown.
Currency	Shows the currency stated in the settlement instruction.
Settlement Amount	Shows the settlement amount as stated in the settlement instruction. In case the settlement instruction does not contain the Settlement Amount information, no value will be shown.
Settled Amount	Shows the total settled amount.
Settlement Status	Shows the settlement status of the settlement instruction. Possible values: ☐ Unsettled ☐ Settled ☐ Partially settled
Matching Status	Shows the matching status of the settlement instruction. Possible values: ☐ Unmatched ☐ Matched
Cancellation Status	Shows the cancellation status of the settlement instruction. Possible values: ☐ Cancelled ☐ Not Cancelled

Buttons

Search	This function enables you to start a search according to the criteria entered. The results are displayed in a list on the next screen.

	If the search retrieves a single record, the s*ettlement in-struction - details* screen is displayed (to retrieve the relevant timestamps, the *back* icon of the *settlement instruction - details* screen must be used). Next screen: ☐ *Insolvency procedure settlement instructions –search/ list* screen ☐ *Settlement instruction – details* screen [▷ 191] References for error messages [▷ 1238]: ☐ QMPC015 ☐ QMPC030 ☐ QMPC031 ☐ QMPC032 ☐ QMPC048 ☐ QMPC084
Reset	This function enables you to set all fields to default value and blanks out all optional fields Next screen: ☐ *Insolvency procedure settlement instructions – search/ list* screen
Details	This function enables you to display the details of the selected instruction. Next screen: ☐ *Settlement Instruction – details* screen [▷ 191]

2.2.2.22 Links Preventing Settlement - List Screen

Context of Usage

This screen displays the list of all the linked instructions preventing settlement of the selected instruction with the associated constraints.

You can perform the following action: You can check the data.

Screen Access

☐ Securities >> Settlement >> Settlement Instructions >> *Settlement instructions – search/list* screen >> Click on the *search* button >> *Settlement instructions – search/list* screen >> Click on the *details* button >> *Settlement instruction - details* screen >> Click on the *Links* button

☐ `Securities >> Settlement >> Intra-Position Movements >>` *In-tra-position movements – search/list* screen >> Click on the *search* button >> *Intra-position movements – search/list* screen >> Click on the *details* button >> *Intra-position movement - details* screen >> Click on the *Links* button

☐ `Cash >> Settlement >> Intra-Balance Movements >>` *Intra-balance movements – search/list* screen >> Click on the *search* button >> *Intra-balance movements – search/list* screen >> Click on the *details* button >> *Intra-balance movement - details* screen >> Click on the *Links* button

Privileges

To use this screen, you need the following privileges:

☐ Settlement instruction audit trail query

☐ Intra position movements query

☐ Intra balance movement audit trail list query

References

User Instructions Part

This screen is part of the following business scenarios:

☐ View the list of links data preventing settlement of a selected settlement instruction

☐ View the list of links data preventing settlement of a selected settlement restriction on securities

☐ View the list of links data preventing settlement of a selected settlement restriction on cash

Business Functionality Document

This screen corresponds to the following business functions:

☐ Query instruction (T2S.GUI.SESE.INX.0010)

☐ Display instruction list (T2S.GUI.SESE.INX.0020)
Illustration 61: Links preventing settlement – list screen

**Field
Description**

Settlement Restriction / Instruction – Links preventing settlement	
Links to the restriction / Instruction reference	Shows theT2S Reference assigned by T2S to the settlement instruction or settlement restriction selected in one of the following screens: ☐ Settlement instruction details ☐ Intra-Position movement details ☐ Intra-balance movement details
Links with associated constraints	
Restriction / Instruction reference	Shows the T2S Reference of the linked settlement restriction or settlement instruction preventing the settlement of the selected settlement instruction or settlement restriction
Constraint	Lists the constraint applied to the linked settlement instruction or settlement restriction preventing the settlement of the selected settlement instruction or settlement restriction

2.2.2.23 Penalty - Search/List Screen

**Context of
Usage**

This screen contains a number of search fields. By inputting the relevant data, you can search for penalties computed for settlement instructions.

This screen is structured according to the allowed queries.

This screen will only return results where the relevant CSD has the right to access the underlying data (i.e. the penalty is in its data scope).

The search results will be displayed in a list when more than one result is retrieved by T2S. After selecting an entry, you can proceed further by clicking on the buttons below.

When only one result is retrieved, the Penalty – details Screen will be displayed.

When exporting the content of this screen, you receive the query result in a csv-file.

This screen is only available for CSD authorised users and T2S Operator user.

This screen will not be available during the processing of penalties, i.e. between the Events "PMSS" (Penalty Mechanism- Stop Screens and penalty modification requests) and "PMRR" (Penalty Mechanism- Restart GUI and Restart processing penalty modification requests).

Screen Access

☐ `Securities >> Settlement >> Daily Penalties`

☐ `Securities >> Settlement >> Settlement Instructions >>` *Settlement instructions – search/list* screen >> Click on the *search* button >> *Settlement instructions – search/list* screen >> Click on the *details* button >> *Settlement Instruction – details* screen >> Click on the *associated penalties* button

Privileges

To use this screen, you need the following privilege:

☐ Penalty List Query Privilege

☐ Settlement Instruction Audit Trail Query

References

User Instructions Part

This screen is part of the following business scenarios:

☐ View the individual penalty details

☐ View list of penalties

Screenshot
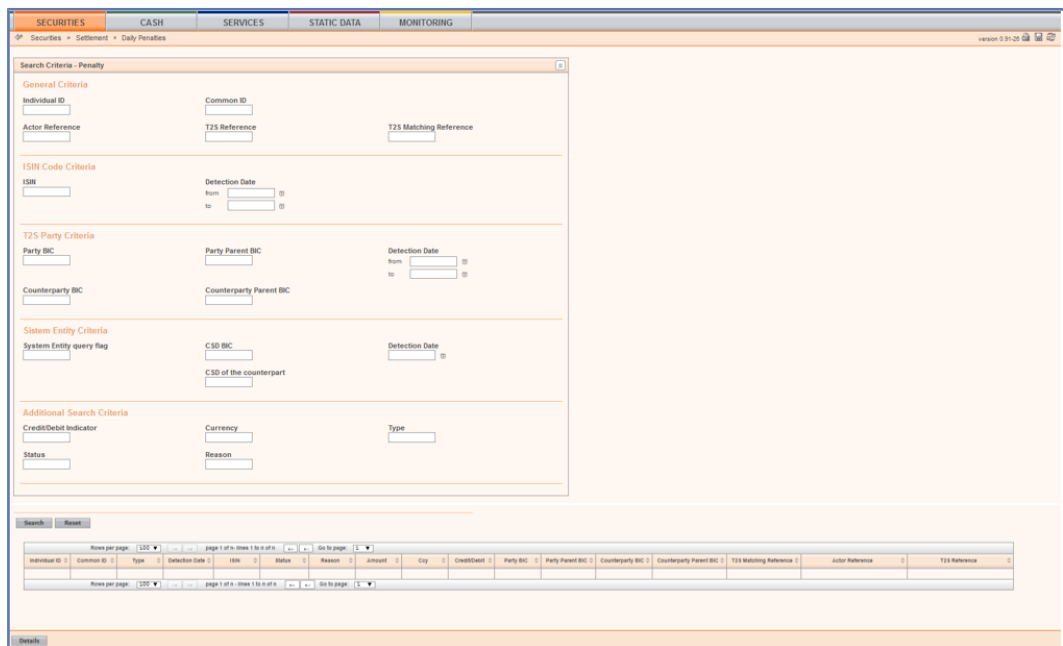

Illustration 62: Penalty – search/list screen

Field Description

Penalty – Search Criteria	
General Criteria	
Individual ID	Enter the individual unique reference assigned to the penalty by T2S for the relevant party.
	A given penalty can be identified by its individual unique reference assigned by T2S for either the failing or the non-failing party.

Penalty – Search Criteria	
	At least one of the reference parameters needs to be specified to perform this query with a reference. This parameter cannot be combined with parameters of any other queries (i.e. parameters in other Groups). Specifying this parameter will return the Penalty - details screen. Required format is: max. 16 characters (SWIFT-x) , no wildcards allowed.
Common ID	Enter the common reference assigned to the penalty by T2S. A given penalty can be identified by its common reference assigned by T2S for both the failing and the non-failing party. At least one of the reference parameters needs to be specified to perform this query with a reference. This parameter cannot be combined with parameters of any other queries (i.e. parameters in other Groups). Specifying this parameter will return the Penalty - details screen if only a single penalty is retrieved (because only one of the two individual penalties is under the data scope of the CSD). Otherwise, the screen will return the relevant list of penalties (i.e. two penalties, the penalty as reported for the failing party and the penalty as reported to the non-failing party). Required format is: max. 16 characters (SWIFT-x), no wildcards allowed
Actor Reference	Enter the identification of the settlement instruction assigned by the T2S Actor.

Penalty – Search Criteria	
	Penalties can be identified by the T2S Actor Reference of the underlying settlement instruction.
	At least one of the reference parameters needs to be specified to perform this query.
	This parameter cannot be combined with parameters of any other queries (i.e. parameters in other Groups).
	Specifying this parameter will return the Penalty - details screen if only a single penalty is found, otherwise it will return the relevant list of penalties.
	Required format is: max. 16 characters (SWIFT-x), no wildcards allowed
T2S Reference	Enter the identification assigned by T2S to the settlement instruction.
	Penalties can be identified by the T2S Reference of the underlying settlement instruction.
	At least one of the reference parameters needs to be specified to perform this query.
	This parameter cannot be combined with parameters of any other queries (i.e. parameters in other Groups).
	Specifying this parameter will return the Penalty - details screen if only a single penalty is found, otherwise it will return the relevant list of penalties.
	Required format is: max. 16 characters (SWIFT-x), no wildcards allowed
T2S Matching Reference	Enter the settlement instruction matching identification assigned by T2S.
	Penalties can be identified by the T2S Matching Reference of the underlying settlement instruction.

Penalty – Search Criteria	
	At least one of the reference parameters needs to be specified to perform this query.
	This parameter cannot be combined with parameters of any other queries (i.e. parameters in other Groups).
	Specifying this parameter will return the Penalty - details screen if only a single penalty is found, otherwise it will return the relevant list of penalties.
	Required format is: max. 16 characters (SWIFT-x), no wildcards allowed
ISIN Code Criteria	
ISIN	Enter the ISIN of the security relevant for the penalty.
	This query parameter is mandatory for queries by ISIN Code Criteria.
	The ISIN must exist in T2S.
	Required format is: 12 characters (SWIFT-x).
Detection Date (Date from or equal/ Date to)	Enter the specific business day on which the penalty was detected or use the *calendar* icon.
	In order to search for a period, enter the lower and the upper bound of the search range for the business day for which the penalty was initially detected or use the calendar icon.
	Note: This date is not updated upon re-calculation of the penalty and always relates to the business day for which the penalty was initially detected.
	This query parameter is mandatory for queries by ISIN Code Criteria.
	Required format is: YYYY-MM-DD
T2S Party Criteria	

Penalty – Search Criteria	
Party BIC	You can choose to either enter the 'Party BIC' or to select it from the suggested items in the drop-down menu.
	The selected BIC corresponds to the party imposed with or entitled to receive the penalty(ies) retrieved by the query.
	This query parameter is mandatory for queries by T2S Party Criteria.
	Required format is: max. 11 characters (SWIFT-x)
Party Parent BIC	This parameter is mandatory when Party BIC is fulfilled.
	Field is empty by default. You can select the 'Party Parent BIC' from the suggested items in the drop-down menu, which displays the following values to be input:
	☐ The BIC of the CSD
	☐ T2S BIC
	Note: In order to determine the data scope of the query, T2S automatically considers the CSD associated to the user performing the query. Hence, the parameter 'Party Parent BIC' is only relevant to query those penalties where the CSD itself is reported as failing or non-failing party (for which case, the user needs to input the T2S BIC)
	Required format is: max. 11 characters (SWIFT-x).
Detection Date (Date from or equal/ Date to)	Enter the specific business day for which the penalty was detected or use the *calendar* icon.
	In order to search for a period, enter the lower and upper bound of the search range for the business day for which the penalty was initially detected or use the *calendar* icon.

Penalty – Search Criteria	
	Note: This date is not updated upon re-calculation of the penalty and always relates to the business day for which the penalty was initially detected. This query parameter is mandatory for queries by T2S Party Criteria. Required format is: YYYY-MM-DD
Counterparty BIC	You can choose to either enter the 'Counterparty BIC' or to select it from the suggested items in the drop-down menu. The selected BIC corresponds to the counterparty entitled to receive or imposed with the penalty(ies) retrieved by the query. This parameter can be used as search criteria only if the Party BIC is provided. Required format is: max. 11 characters (SWIFT-x)
Counterparty Parent BIC	You can select the 'Counterparty Parent BIC' from the suggested items in the drop-down menu. The selected BIC corresponds to the parent of the counterparty entitled to receive or imposed with the penalty(ies) retrieved by the query. This parameter is mandatory when Counterparty BIC is fulfilled. Field is empty by default, displays the following values to be imput: ☐ The BICs of all CSD and the T2S BIC. Required format is: max. 11 characters (SWIFT-x).
System Entity Criteria	

Penalty – Search Criteria	
System Entity query flag	Select if the query desired is a System Entity wide Penalty Query from the possible values: ☐ Yes ☐ No (default value) This parameter is mandatory for queries by System Entity Criteria.
CSD BIC	Select the BIC of the CSD whose Participants are imposed with or entitled to receive the penalties retrieved by the query. This parameter is mandatory for queries by System Entity Criteria. If the System Entity query flag = NO, this field is not available. If the System Entity query flag = YES, this field is mandatory and displays the following value: ☐ CSD BIC Required format is: max. 11 characters (SWIFT-x)
Detection Date	Enter the specific business day for which the penalty was detected or use the *calendar* icon. Note: This date is not updated upon re-calculation of the penalty and always relates to the business day for which the penalty was initially detected. This parameter is mandatory for queries by System Entity Criteria. If the System Entity query flag = NO, this field is not available. If the System Entity query flag = YES, this field is mandatory Required format is: YYYY-MM-DD

Penalty – Search Criteria	
CSD of the counterpart	Select the BIC of the CSD of the counterparty of the penalty
	If the System Entity query flag = NO, this field is not available.
	If the System Entity query flag = YES, this field displays the following values:
	☐ All (default value)
	☐ The BICs of all CSDs
	Required format is: max. 11 characters (SWIFT-x)
Additional Search Criteria **(Use to limit query results of ISIN Code, T2S Party and System Entity Search Criteria)**	
Credit/Debit Indicator	Select the Party Credit/Debit Code identifying the party as non-failing or failing from the possible values:
	☐ All (default value)
	☐ DBIT (Debit)
	☐ CRDT (Credit)
	Required format is: 4 characters (SWIFT-x)
Currency	Enter the relevant T2S currency of the penalty or use the drop-down menu
	Possible values:
	☐ 'All' (default value)
	☐ Reference Data Settlement Currencies
	Required format is: 3 characters (SWIFT-x)
Type	Select the type of penalty from the possible values:
	☐ All (default value)
	☐ SEFP (Settlement Fail Penalty)
	☐ LMFP (Late Match Fail Penalty)

Penalty – Search Criteria	
	Required format is: 4 characters (SWIFT-x)
Status	Select the status of the penalty from the possible values: ☐ All (default value) ☐ ACTV (Active) ☐ REMO (Removed) ☐ NCOM (Not computed) Required format is: 4 characters (SWIFT-x)
Reason	Select the reason of the penalty status from the possible values: ☐ All (default value) ☐ UPDT (updated) ☐ NEWP (New penalty resulting from the insertion of a Security Subject to Penalties with Valid From in the past, or from a contingency scenario) ☐ RALO (re-allocated) ☐ SWIC (switched) ☐ INSO (removed due to insolvency) ☐ SESU (removed due to ISIN suspension from SETT) ☐ SUSP (removed due to ISIN suspension from trading) ☐ SEMP (removed due to settlement on multiple platforms) ☐ TECH (removed due to technical impossibilities that prevent settlement) ☐ OTHR (removed due to another reason) Required format is: 4 characters (SWIFT-x)

Penalty – Search Criteria	
Penalty - List	
Individual ID	Shows the individual unique reference assigned to the penalty by T2S.
Common ID	Shows the common reference assigned to the penalty by T2S, which is common for both the failing and the non-failing participant.
Type	Shows the type of penalty from the possible values: ☐ SEFP (Settlement Fail Penalty) ☐ LMFP (Late Match Fail Penalty)
Detection Date	Shows the Business day when the penalty was detected.
ISIN	Shows the ISIN of the security used for the penalty calculation.
Status	Shows the status of the penalty from the possible values: ☐ ACTV (Active) ☐ REMO (Removed) ☐ NCOM (Not computed)
Reason	Shows the reason of the penalty status from the possible values: ☐ Empty (default value) ☐ UPDT (updated) ☐ NEWP (New penalty resulting from the insertion of a Security Subject to Penalties with Valid From in the past, or from a contingency scenario) ☐ RALO (re-allocated) ☐ SWIC (switched) ☐ INSO (removed due to insolvency) ☐ SESU (removed due to ISIN suspension from SETT)

Penalty – Search Criteria	
	☐ SUSP (removed due to ISIN suspension from trading)
	☐ SEMP (removed due to settlement on multiple platforms)
	☐ TECH (removed due to technical impossibilities that prevent settlement)
	☐ OTHR (removed due to another reason)
Amount	Shows the amount of the penalty.
Ccy	Shows the T2S relevant currency of the amount of the penalty.
Credit/Debit	Shows the Party Credit/Debit Code identifying the party as non-failing or failing.
Party BIC	Shows the BIC of the Party imposed with or entitled to receive the penalties retrieved by the query.
Party Parent BIC	Shows the BIC of the Parent Party imposed with or entitled to receive the penalties retrieved by the query.
Counterparty BIC	Shows the BIC of the counterparty entitled to receive or imposed with the amount retrieved by the query.
Counterparty Parent BIC	Shows the BIC of the parent of the counterparty entitled to receive or imposed with the amount retrieved by the query.
T2S Matching Reference	Shows the matching identification code assigned by T2S to the related settlement instruction.
Actor Reference	Shows the identification assigned by the T2S Actor to the related settlement instruction.
T2S Reference	Shows the instruction identification code assigned by T2S to the related settlement instruction.

Note: the above order is the default one provided by T2S as a result of the query. Nevertheless, once the list is displayed in the screen it should be allowed for the user to reorganise the order of the columns in the screen (although in case it is exported, the list is displayed in the original order).

Buttons

Search	This function enables you to start a search according to the criteria entered.
	The results are displayed in a list on the next screen, if the search retrieves several records.
	If the search retrieves a single record, the Penalty - details screen is displayed.

Field Description

Penalty Details	
General Details	
Individual ID	Shows the individual unique reference assigned to the penalty by T2S.

Penalty Details	
	A given penalty can be identified by its individual unique reference assigned by T2S for either the failing or the non-failing party.
Common ID	Shows the common reference assigned to the penalty by T2S.
	A given penalty can be identified by its common reference assigned by T2S for both the failing and the non-failing party.
Re-allocated to/from penalty	Shows the Common ID of the penalty re-allocated to/from the penalty retrieved by the query.
	It will be updated with the new/old Common Id after a re-allocation execution.
Party BIC	Shows the BIC of the Party imposed with or entitled to receive the penalty retrieved by the query.
	The party is the failing or the non-failing party depending on the direction of the penalty.
Party Parent BIC	Shows the BIC of the Parent Party imposed with or entitled to receive the penalty retrieved by the query.
Credit/Debit Indicator	Shows the Party Credit/Debit Code identifying the party as non-failing or failing from the possible values:
	☐ CRDT (Credit)
	☐ DBIT (Debit)
Counterparty BIC	Shows the BIC of the counterparty of the party imposed with or entitled to receive the penalty retrieved by the query.
	The Counterparty is the failing or the non-failing party depending on the direction of the penalty.

Penalty Details	
Counterparty Parent BIC	Shows the BIC of the parent of the counterparty imposed with or entitled to receive the penalty retrieved by the query.
Type	Shows the type of penalty from the possible values: ☐ SEFP (Settlement Fail Penalty) ☐ LMFP (Late Match Fail Penalty)
Detection Date	Shows the business day when the penalty was detected. I.e. ☐ The date on which the instruction matched for LMFPs. ☐ The date on which an instruction failed to settle in T2S for SEFPs. This date is not updated upon re-calculation of the penalty.
In appeal period	Shows if the penalty is within its appeal period. Possible values: ☐ YES ☐ NO
Amount of the penalty	Shows the amount of the penalty with its T2S relevant currency.
To be recalculated	Shows if the penalty is pending to be re-calculated after being modified. Possible values: ☐ YES ☐ NO
Status	Shows the status of the penalty from the possible values: ☐ ACTV (Active) ☐ REMO (Removed) ☐ NCOM (Not computed)

Penalty Details	
	Note: If the status of the penalty is REMO, the attributes of "Calculation Details" are not visible.
Reason	Shows the reason of the penalty status from the possible values: ☐ Empty (default value, for new penalties) ☐ UPDT (updated) ☐ NEWP (New penalty resulting from the insertion of a Security Subject to Penalties with Valid From in the past, or from a contingency scenario) ☐ RALO (re-allocated) ☐ SWIC (switched) ☐ INSO (removed due to insolvency) ☐ SESU (removed due to ISIN suspension from SETT) ☐ SUSP (removed due to ISIN suspension from trading) ☐ SEMP (removed due to settlement on multiple platforms) ☐ TECH (removed due to technical impossibilities that prevent settlement) ☐ OTHR (removed due to another reason)
Description	Shows the reason for the removal (when the status of the penalty is 'Removed' and the reason is 'OTHR') and for the switch (when the status of the penalty is 'Active' and the reason is 'SWIC') as provided by the CSD when the penalty modification was requested.
Number of Days	The value is 1 always in case of 'SEFP'.

Penalty Details	
	Shows the number of business days used for the calculation of the penalty in case of 'LMFP'.
Calculation Method	Shows the calculation rule used to compute the penalty from the possible values:
	☐ SECU (The penalty is based on the quantity of securities failed to be delivered and penalty rate of the relevant asset type).
	☐ MIXE (The penalty is based on the quantity of securities failed to be delivered and penalty rate is the discount rate of the relevant currency).
	☐ CASH (The penalty is based on the amount of cash failed to be delivered and the penalty rate is the discount rate of the relevant currency).
	☐ BOTH (The penalty is the sum of SECU and CASH).
Calculation Details Block with the details for any of the applicable Business Days considered in the computation of the penalty The block is not shown in case the penaty is Removed.	
Date	Shows the Business Day for the data provided in this block. When "Number of Days" = 1 this field will be displayed as a text (i.e. the date of the penalty is displayed) When "Number of Days">1 it will display a list with all the applicable Busines Days (i.e. when there is a subamount).

Penalty Details
	The order of the list will be descending (i.e. first value of the list will be the Closest Business Day to the current Business day). Limit: The user can only select (to see the Calculation Details) dates within the last 3 months. Former days (before 3 months) have the same Calculation Details than the ones for the Date equal to 3 months ago.
Security Subject to Penalties	Shows if the security is subject to penalties on the business day. Possible values: ☐ TRUE (default) ☐ FALSE It will be shown the information corresponding to the date chosen in the field DATE. If no value is retrieved, it will show "---"
Cannot be calculated	This information is only provided for penalties where there is missing or diverging reference data needed for the penalty calculation. Possible values: ☐ Empty (default). If value is FALSE in the data base or if no value is retrieved, it will show empty ("---") ☐ TRUE
Reason for not calculation	Shows the reason why the Penalty cannot be calculated. Only shown if the Cannot be calculated field is TRUE.
Financial Instrument Type	Shows the type of the financial instrument from the possible values: ☐ SHRS ☐ SOVR

Penalty Details	
	☐ DEBT
	☐ SECU
	☐ ETFS
	☐ UCIT
	☐ MMKT
	☐ EMAL
	☐ OTHR
	It will be shown the information corresponding to the date chosen in the field DATE. If no value is retrieved, it will show "---"
Liquidity	Shows the binary classification of securities applying for shares. It will show the information corresponding to the date chosen in the field DATE. Possible values: ☐ Empty ("---") ☐ TRUE ☐ FALSE Informed only if: ☐ The Security is Subject to penalties ☐ The Financial Instrument Type of the security (Classification type) is "SHRS", and ☐ The Calculation method code is "SECU" or "BOTH". Otherwise it is empty. If no value is retrieved, it will also show "---"
Place of Trade Market Identifier Code	Shows the Market identifier Code when it was informed equally in the Place of Trade of the two matched Settlement Instructions. If it was not informed equally, the field will be empty.

Penalty Details	
	If no value is retrieved, it will show "---"
SME Growth Market	Shows if the Place of Trade (MIC) is in the list of recognised SME Growth Markets Trading Venues. It will show the information corresponding to the date chosen in the field DATE. ☐ Possible values: ☐ Empty ("---") ☐ TRUE ☐ FALSE Informed only if: ☐ The Security is Subject to penalties ☐ The Financial Instrument Type of the security (Classification type) is different from "SOVR", and ☐ The Calculation method code is "SECU" or "BOTH". Otherwise it is empty. If no value is retrieved, it will also show "---"
Security Penalty Rate	Shows the security penalty rate that based on the asset type was used for the calculation of the penalty. It will show the information corresponding to the date chosen in the field DATE. Informed when the calculation method is "SECU" or "BOTH". Otherwise it is empty. If no value is retrieved, it will show "---"
Original Currency	Shows the currency of the reference price (I.e. when the security is in Unit) or of the reference security (i.e when the security is in FAMT) of the Settlement Instruction.

Penalty Details	
	It will show the information corresponding to the date chosen in the field DATE.
	If no value is retrieved, it will show "---"
Euro Foreign Exchange	Shows the Euro Foreign Exchange unit and currency used for the computation of the penalty, when necessary.
	It will show the information corresponding to the date chosen in the field DATE.
	If no value is retrieved, it will show "---"
EURDKK FX (for pivot)	Shows the second Euro Foreign Exchange unit and currency used as pivot for the computation of the penalty, when necessary.
	It will show the information corresponding to the date chosen in the field DATE.
	If no value is retrieved, it will show "---"
Sub-amount Securities	Shows the amount of the penalty for this business day and its T2S relevant currency.
	It is only provided if the number of days is higher than one (i.e. when it is a LMFP and the block calculation details has more than one instance) or if the calculation method is BOTH (in this case Sub-amount cash is also provided).
	It will show the information corresponding to the date chosen in the field DATE.
	If no value is retrieved, it will show "---"
Cash Discount Penalty Rate	Shows the currency discount penalty rate used for the computation of the penalty.

Penalty Details	
	Informed when the calculation method is MIXE, CASH or BOTH. Otherwise it is empty.
	It will show the information corresponding to the date chosen in the field DATE.
	If no value is retrieved, it will show "---"
Sub-amount Cash	Shows the amount of the penalty for this business day and its T2S relevant currency.
	It is only provided if the number of days is higher than one (i.e. when it is a LMFP and the block calculation details has more than one instance) or if the calculation method is BOTH (in this case also Sub-amount securities is provided).
	It will show the information corresponding to the date chosen in the field DATE.
	If no value is retrieved, it will show "---"
Related Settlement Instruction Details	
Actor Reference	Shows the identification assigned by the T2S Actor to the related settlement instruction.
Reference Owner BIC	Shows the BIC of the Instructing Party of the settlement instruction.
Reference Owner Parent BIC	Shows the Parent BIC of the Instructing Party of the settlement instruction.
T2S Reference	Shows the instruction identification code assigned by T2S to the related settlement instruction.
T2S Matching Reference	Shows the matching identification code assigned by T2S to the related settlement instruction.

Penalty Details	
Common Reference	Shows the reference provided by the T2S Actor when the LCMM Instruction is already matched or in order to facilitate the matching within T2S.
Corporate Action Event Id	Shows the identification assigned by the account servicer to unambiguously identify a corporate action event.
Intended Settlement Date	Shows the date when the settlement instruction becomes eligible to be submited to settlement. Displayed format is: YYYY-MM-DD
Securities Transaction Type	Shows the securities transaction type expressed as an ISO 20022 code from the possible values: ☐ AUTO (for auto-collateralisation) ☐ BSBK (for buy sell back) ☐ BYIY (for buy-in) ☐ CLAI (for market claim) ☐ CNCB (for central bank collateral operation) ☐ COLI (for collateral in) ☐ COLO (for collateral out) ☐ CONV (for depository receipt conversion) ☐ CORP (for corporate action) ☐ ETFT (for exchange traded funds) ☐ FCTA (for factor update) ☐ INSP (for move of stock) ☐ ISSU (for depository receipt issue) ☐ MKDW (for mark down) ☐ MKUP (for mark up) ☐ NETT (for netting) ☐ NSYN (for non syndicated) ☐ OWNE (for external account transfer)

Penalty Details	
	☐ OWNI (for internal account transfer)
	☐ PAIR (for pair off)
	☐ PLAC (for placement)
	☐ PORT (for portfolio move)
	☐ REAL (for realignment)
	☐ REBL (Rebalancing)
	☐ REDI (for withdrawal)
	☐ REDM (for redemption)
	☐ RELE (for depository receipt release cancellation)
	☐ REPU (for repo)
	☐ RODE (for return delivery without matching)
	☐ RVPO (for reverse repo)
	☐ SBBK (for sell buy back)
	☐ SBRE (for borrowing reallocation)
	☐ SECB (for securities borrowing)
	☐ SECL (for securities lending)
	☐ SLRE (for lending reallocation)
	☐ SUBS (for subscription)
	☐ SWIF (Switch From)
	☐ SWIT (Switch To)
	☐ SYND (for syndicate underwriters)
	☐ TBAC (for TBA closing)
	☐ TRAD (for trade)
	☐ TRPO (for triparty repo)
	☐ TRVO (for triparty reverse repo)
	☐ TURN (for turnaround)
Already Matched Flag	Shows if the settlement instruction was sent as already matched to T2S or not (for LMFP). Possible values:
	☐ YES
	☐ NO

Penalty Details	
Securities Movement Type	Shows if the movement on a securities account results from a deliver or a receive instruction from the possible values: ☐ DELI (for deliver) ☐ RECE (for receive)
ISIN	Shows the ISIN code of the security.
Quantity	Shows the remaining quantity of the underlying Settlement Instruction used for the calculation of the SEFP. Shows the matched quantity of the underlying Settlement Instruction used for the calculation of the LMFP
Securities Account Number	Shows the account to or from which a securities entry is made.
Account Owner BIC	Shows the BIC of the Securities Account owner.
BIC of the Depository	Shows the BIC of the CSD of the Securities Account Owner. It is filled only in case of LMFP. Otherwise, it will show "---".
Settlement Type	Shows the type of settlement foreseen for the security, stated in the instruction. Possible values: ☐ Units ☐ Face Amount
Payment Type Code	Shows if the transaction is to be settled with or without payment from the possible values: ☐ APMT (for 'Against Payment Settlement') ☐ FREE (for 'Separate Settlement')

Penalty Details	
Credit/Debit	Shows if the original settlement amount is to be credited or debited. from the possible values: ☐ DBIT (Debit) ☐ CRDT (Credit)
Amount	Shows the remaining amount of the underlying Settlement Instruction used for the calculation of the SEFP. Shows the matched amount of the underlying Settlement Instruction used for the calculation of the LMFP. This field also shows the T2S relevant currency of the amount of the instruction.
Dedicated Cash Account Number	Shows the cash account stated in the settlement instruction (only in case of settlement instructions against payment).
DCA Owner BIC	Shows the BIC of the owner of the cash account stated in the settlement instruction (only in case of settlement instructions against payment).
Accepted Timestamp	Shows the accepted timestamp of the settlement instruction.
Matched Timestamp	Shows the matched timestamp of the settlement instruction.
Failed Reason	Shows the reason for the instruction not being fully settled at the end of the processing of its cut-off (for SEFP)
Cut-off	Shows the relevant cut-off considered in the calculation of the penalty (for SEFP).
Cut-off Start TS	Shows the start time of execution of the relevant cut-off (for SEFP).
Cut-off End TS	Shows the end time of execution of the relevant cut-off (for SEFP).

Buttons

Removal	This function enables you to remove existing penalties. This button will only be available if the Penalty: ☐ has status 'Active' (ACTV) ☐ is a 'Debit' ☐ is in its appeal period (i.e. "In appeal period" is "Yes") By clicking this button the d [▷ 314] will pop up with the relevant information to create a Removal Request based on the Penalty of the screen.
Re-include	This function enables you to re-include penalties with status 'Removed' and reason different from 'Re-allocated'. Upon clicking on the Re-include button you will be asked to enter your PIN for digital signature purposes (NRO). With the entry of the PIN, T2S attaches a digital signature to the modification request entered by the T2S actor. ☐ This button will only be available if the Penalty; ☐ has status 'Removed' (REMO) ☐ is a 'Debit' ☐ is in its appeal period (i.e. "In appeal period" is Yes) By clicking this button the Confirmation prompt will pop-up. Hence, the action is triggered (i.e. the Re-inclusion Request is sent) and the Penalty - details screen is displayed again: ☐ Either updated (i.e. Penalty with new status ACTV, (Active), new Reason Code UPDT (Updated) and description (if applies), penalty amount and Calculation details be-

	fore the penalty was removed and the flag To be recalculated set to YES) if the Re-inclusion Request is confirmed and executed (the action was triggered in Two-eyes);
	☐ Or not updated if:
	☐ the Re-inclusion Request is Validated and Awaiting for Approval (the action was triggered in Four-eyes and the Penalty - details screen shows the ID for the action awaiting for approval)
	☐ the Re-inclusion Request is rejected shows the reason for rejecting the action).
	References for error messages:
	☐ PMMO010
	☐ PMMO016
	☐ PMMO031
	☐ PMMO032
Re-allocate	This function enables you to re-allocate existing penalties if they are LMFP over a Settlement Instruction sent as already matched to T2S.
	This button will only be available if :
	☐ The status of the penalty is "Active"
	☐ It is a LMFP
	☐ The LMFP has not been re-allocated before (i.e. "Re-allocated to/from penalty" is empty)
	☐ Underlying settlement instruction was sent as already matched to T2S (i.e. "Already Matched Flag" is Yes)

	☐ The penalty is still in its appeal period (i.e. "In appeal period" is Yes) By clicking this button the Penalty re-allocation screen will pop-up with the relevant information to create a Re-allocation Request based on the Penalty of the screen.
Switch	This function enables you to switch the failing party and non-failing party of existing penalties. This button will only be available if the Penalty: ☐ has status 'Active' (ACTV) ☐ is a 'Debit' ☐ is in its appeal period (i.e. "In appeal period" is Yes) By clicking this button the Penalty switch screen will pop-up with the relevant information to create a Switch Request based on the Penalty of the screen.
Revisions	This function enables you to display the revisions of the selected penalty. Next screen: ☐ Revisions/Audit Trail - list Screen [▶ 661]
SI Details	This function enables you to display the details of the relevant settlement instruction. Next screen: ☐ Settlement Instruction - details Screen

2.2.2.25 Monthly Net Penalty Amounts - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for monthly net amounts for the penalties computed by T2S for the business days of a previous month, for a given T2S Party and counterpart(s).

The query allows to search per currency, party and counterparty.

This screen will only return results where the relevant CSD has the right to access the underlying data (i.e. party is in its data scope).

The search results will be displayed in a list when more than one result is retrieved by T2S.

When only one result is retrieved, the relevant aggregated amount resulting from the query will be displayed in the same format used by the list screen.

The monthly net amounts of a particular month will be available only once T2S has produced the Monthly reporting of aggregated amounts of cash penalties for that month.

When exporting the content of this screen, you receive the query result in a csv-file.

This screen is only available for CSD authorised users and T2S Operator user.

Screen Access

☐ `Securities >> Settlement >> Monthly Penalties >>` *Monthly Net Penalty Amounts – Search/List* screen

Privileges

To use this screen, you need the following privilege:

☐ Monthly Net Penalty Amount Query Privilege

References

User Instructions Part

This screen is part of the following business scenarios:

☐ View monthly net amounts of penalties

Screenshot
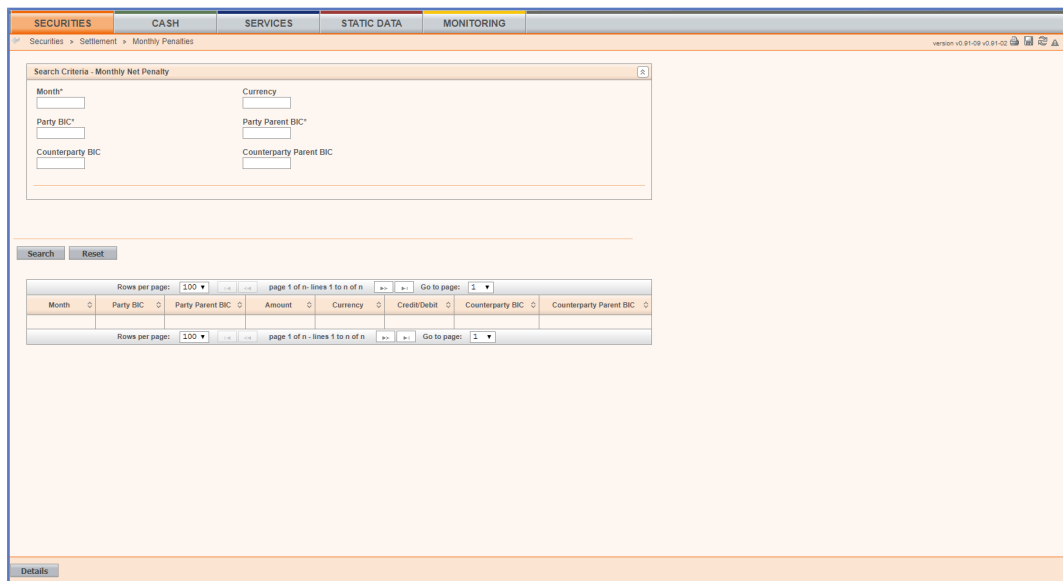

Illustration 64: Monthly net penalty amounts – search/list screen

Field Description

Monthly Net Penalty Amount – Search Criteria	
Month	Enter the relevant month you search for or select it from the drop-down menu.
	Only the past 3 months will be available.
	This parameter is mandatory for queries by Search Criteria.
	Required format is: YYYY-MM
Currency	Enter the relevant T2S currency of the monthly net penalty amount or use the drop-down menu.
	The default value is 'All'.
	Required format is: 3 characters (SWIFT-x)
Party BIC	You can choose to either enter the 'Party BIC' or to select it from the suggested items in the drop-down menu.
	The selected BIC corresponds to the party imposed with or entitled to receive the amount retrieved by the query.
	This parameter is mandatory for queries by Search Criteria.
	Required format is: max. 11 characters (SWIFT-x)

Monthly Net Penalty Amount – Search Criteria	
Party Parent BIC	You can select the 'Party Parent BIC' from the suggested items in the drop-down menu.
	The selected BIC corresponds to the parent of the party imposed with or entitled to receive the amount retrieved by the query.
	This parameter is mandatory for queries by Search Criteria.
	In order to determine the data scope of the query, T2S automatically considers the CSD associated to the user performing the query. Hence, the parameter 'Party Parent BIC' is only relevant to query those amounts where the CSD itself is reported as failing or non-failing party(for which case, the user needs to input the T2S BIC).
	Field is empty by default and displays the following values to be input:
	☐ CSD BIC
	☐ T2S BIC
	Required format is: max. 11 characters (SWIFT-x).
Counterparty BIC	You can choose to either enter the 'Counterparty BIC' or to select it from the suggested items in the drop-down menu.
	The selected BIC corresponds to the counterparty entitled to receive or imposed with the amount retrieved by the query.
	Required format is: max. 11 characters (SWIFT-x).
Counterparty Parent BIC	You can select the 'Counterparty Parent BIC' from the suggested items in the drop-down menu.

Monthly Net Penalty Amount – Search Criteria	
	The selected BIC corresponds to the parent of the counterparty entitled to receive or imposed with the amount retrieved by the query.
	This parameter can be used as search criteria only if the Counterparty BIC is introduced. Hence, this parameter is mandatory when Counterparty BIC is fulfilled.
	This field displays the BICs of all CSD and the T2S BIC.
	Required format is: max. 11 characters (SWIFT-x).
Monthly Net Penalty Amount – List	
Month	Shows the relevant month for the amount calculation.
	Only the aggregated amounts for the past 3 months will be available.
Party BIC	Shows the 'Party BIC' of the party imposed with or entitled to receive the amount retrieved by the query.
Party Parent BIC	Shows the 'Party Parent BIC' of the party imposed with or entitled to receive the amount retrieved by the query.
Amount	Shows the monthly net amount retrieved by the query and equal to:
	☐ The sum of all penalties of the relevant month in the relevant currency and that this party is entitled to receive (reported as credit) from the same counterpart (i.e. to be paid by this counterpart);
	Minus

Monthly Net Penalty Amount – Search Criteria	
	☐ The sum of all penalties of the relevant month in the relevant currency, that were imposed to this party (reported as debit), and to be paid to a given counterpart.
Currency	Shows the relevant T2S currency of the monthly net penalty amount.
Credit/Debit	Shows the Credit/Debit Code identifying the monthly net amount as to be debited or credited to the party. Possible values: ☐ DBIT (Debit) ☐ CRDT (Credit) Note: If the amount is equal to zero, this field is empty.
Counterparty BIC	Shows the 'Counterparty Party BIC' of the party imposed with or entitled to receive the amount retrieved by the query.
Counterparty Parent BIC	Shows the 'Counterparty Parent BIC' of the party imposed with or entitled to receive the amount retrieved by the query.

Buttons

Search	This function enables you to start a search according to the criteria entered. The results are displayed on the list screen. Next screens: ☐ Monthly Net Penalty Amounts – search/list screen
Reset	This function enables you to set all fields to default value and blanks out all optional fields. Next screen:

	☐ Monthly Net Penalty Amounts – search/list screen

2.2.2.26 Penalty - Removal Screen

Context of Usage

This screen is accessible by clicking on the "Remove" button of the Penalty – details screen. This action triggers a pop up screen (the Penalty removal screen) that allows entering relevant information to remove the penalty (i.e. the individual Id of the penalty, a drop-down menu to select the reason code and also a text box to insert a description text if the reason selected is OTHR). The confirmation will be completed after clicking on the "Submit" button.

This function is available if the status of the penalty is "Active", it is a debit and it is still in the appeal period.

The Penalty removal screen is linked to the related Penalty - details screen.

This screen is only available for CSD authorised users and T2S Operator user.

This screen will not be available during the processing of penalties, i.e. between the Events "PMSS" (Penalty Mechanism- Stop Screens and penalty modification requests) and "PMRR" (Penalty Mechanism- Restart GUI and Restart processing penalty modification requests).

Screen Access

☐ `Securities >> Settlement >> Daily Penalties >>` *Penalty – search/list* screen >> Click on the *search* button >> *Penalty – details* screen >> Click on the *removal* button

☐ `Securities >> Settlement >> Daily Penalties >>` *Penalty – search/list* screen >> Click on the *search* button >> *Penalty – search/list* screen >> Click on the *details* button >> Penalty – details screen >> Click on the *removal* button

☐ `Securities >> Settlement >> Settlement Instruction >>` *Settlement instructions – search/list* screen >> Click on the *search* and/or *details* button >> *Settlement Instruction – details* screen >> Click on the *associated penalties* button >> *Penalty – details* screen >> Click on the *removal* button

Privileges

To use this screen, you need the following privilege:

☐ Penalty Details Query Privilege

☐ Settlement Instruction Audit Trail Query

☐ Modification of penalties

References

User Instructions Part

This screen is part of the following business scenarios:

☐ Modification of existing penalties

☐ View the individual penalty details

Screenshot

Illustration 65: Penalty – removal screen

Field Description

Penalty Removal	
Individual ID	Shows the individual unique reference assigned to the penalty by T2S. This attribute is passed from previous screen.
Reason	Selects the reason for the removal of the penalty from the possible values: ☐ INSO (removed due to insolvency) ☐ SESU (removed due to ISIN suspension from SETT) ☐ SUSP (removed due to ISIN suspension from trading) ☐ SEMP (removed due to settlement on multiple platforms) ☐ TECH (removed due to technical impossibilities that prevent settlement) ☐ OTHR (removed due to another reason)
Description	A free text box to insert a description text if the reason selected is "OTHR". Therefore, description must be fulfilled if the Reason Code is OTHR, otherwise it must be blank.

Buttons

Submit	This function enables you to complete the Removal Request of the penalty. Upon clicking on the submit button you will be asked to enter your PIN for digital signature purposes (NRO). With the entry of the PIN, T2S attaches a digital signature to the modification request entered by the T2S actor. When the button is clicked, the pop up is closed and the Penalty – details screen is displayed again as follows: ☐ Either displayed updated (i.e. Penalty with new status REMO, the corresponding Reason Code and description (if applies), the penalty amount reduced to zero and Calculation Details no longer visible) if the Removal Request is confirmed and executed (the action was triggered in Two-eyes); ☐ Or not updated if the Removal Request is Validated and Awaiting for Approval (the action was triggered in Four-eyes and the Penalty - details screen shows the ID for the action awaiting for approval). When the Removal Request is rejected the pop up is closed and the Penalty – details screen is displayed not updated (with the previous values) but showing the reason for rejecting the action. Next screen: ☐ Penalty - Details Screen [▶ 290] References for error messages: ☐ PMMO010 ☐ PMMO016 ☐ PMMO030

Cancel	This function enables you to get back to the previous screen without removing the penalty.

When Penalty – details screen is displayed again, it should be displayed not updated (with the previous values, i.e. still as an active penalty).

Next screen:

☐ Penalty - Details Screen [▸ 290] |

2.2.2.27 Penalty - Re-allocation Screen

Context of Usage

This screen is accessible by clicking on the "Re-allocate" button of the Penalty - details screen. This action triggers a pop up screen (the Penalty re-allocation screen) that allows entering the relevant information, to re-allocate the penalty. The confirmation will be completed after clicking on the "Submit" button.

This function is available if the status of the penalty is "Active", the penalty is a LMFP and the LMFP has not been reallocated before. Furthermore, the underlying instruction must have been sent as already matched to T2S and the penalty must be still in its appeal period.

The Penalty re-allocation screen is linked to the related Penalty – details screen.

This screen is only available for CSD authorised users and T2S Operator user.

This screen will not be available during the processing of penalties, i.e. between the Events "PMSS" (Penalty Mechanism- Stop Screens and penalty modification requests) and "PMRR" (Penalty Mechanism- Restart GUI and Restart processing penalty modification requests).

Screen Access

☐ Securities >> Settlement >> Daily Penalties >> *Penalty – search/list* screen >> Click on the *search* button >> *Penalty – details* screen >> Click on the *re-allocation* button

☐ Securities >> Settlement >> Daily Penalties >> *Penalty – search/list* screen >> Click on the *search* button >> *Penalty – search/list* screen >> Click on the *details* button >> *Penalty – details* screen >> Click on the *re-allocation* button

User Instructions Part

This screen is part of the following business scenarios:

☐ Modification of existing penalties

☐ View the individual penalty details

Screenshot

Illustration 66: Penalty – re-allocation screen

Field Description

Penalty Re-allocation	
Common ID	Shows the common reference assigned to the penalty by T2S, which is common for both the failing and the non-failing participant. This attribute is passed from previous screen.
New Parties	
New Failing Party BIC	BIC of the Party that will become the failing party of the penalty after the re-allocation. Possible values are the BICs of the underlying Settlement Instruction, as follows: ☐ The BIC of the T2S Delivering Party ☐ The BIC of the T2S Receiving Party References for error messages: ☐ PMMO021 ☐ PMMO023
New Non-Failing Party BIC	BIC of the non-failing party of the penalty.

Penalty Re-allocation	
	This field is fulfilled automatically with the other value (BIC) not chosen/selected for the New Failing Party BIC.
T2S Reference of Failing Settlement Instruction	Instruction identification code assigned by T2S to the related settlement instruction.

It must be provided in case the two BICs retrieved for the New failing Party BIC are the same

Otherwise, it must be blank.

References for error messages:

PMMO025 |
| Movement of the Failing Settlement Instruction | Shows the Securities Movement Type of the selected Failing Settlement Instruction. (i.e. fulfilled automatically with the Movement Type of the Settlement instruction chosen as T2S Reference of Failing Settlement Instruction).

If no Settlement Instruction has been chosen/selected, it must be blank |
| **Buttons** | |
| Submit | This function enables you to complete the Re-allocation Request of the penalty. Upon clicking on the submit button you will be asked to enter your PIN for digital signature purposes (NRO). With the entry of the PIN, T2S attaches a digital signature to the modification request entered by the T2S actor.

When this button is clicked the pop up is closed and the Penalty – details screen is displayed again as follows:

☐ Either displayed updated (i.e. status "REMO", reason code "RALO" and the Re-allocated to/from penalty fulfilled with the common ID of the new Penalty) if the Re-allocation Re- |

	quest is confirmed and executed (the action was triggered in Two-eyes);
	☐ Or not updated if the Re-allocation Request is Validated and Awaiting for Approval (the action was triggered in Four-eyes and the Penalty - details screen shows the ID for the action awaiting for approval).
	When the Re-allocation Request is rejected (i.e. a reason for rejection is provided) the pop up is closed and the Penalty – details screen shows the reason for rejecting the action.
	Next screen:

Illustration 67: Penalty - switch screen

Field Description

Penalty Switch	
Individual ID	Shows the individual unique reference assigned to the penalty by T2S. This attribute is passed from previous screen.
Description	A free text box to insert a description text. This box must be fulfilled.

Buttons

Submit	This function enables you to complete the Switch Request of the penalty. Upon clicking on the submit button you will be asked to enter your PIN for digital signature purposes (NRO). With the entry of the PIN, T2S attaches a digital signature to the modification request entered by the T2S actor.
	When the button is clicked, the pop up is closed and the Penalty – details screen is displayed again as follows:
	☐ Either displayed updated (i.e. status ACTV, reason code SWIC, the description provided by the user, the "Credit/Debit" changed to Credit and the To be recalculated flag set to YES and updated the new Calculation Method when necessary) if the Switch Request is confirmed and executed (the action was triggered in Two-eyes);

	☐ Or not updated if the Switch Request is Validated and Awaiting for Approval (the action was triggered in Four-eyes and the Penalty - details screen shows the ID for the action awaiting for approval). When the Switch Request is rejected (i.e. a reason for rejection is provided) and the pop up is closed and the Penalty – details screen shows the reason for rejecting the action. Next screen: ☐ Penalty - Details Screen [▶ 290] References for error messages: ☐ PMMO010 ☐ PMMO016 ☐ PMMO036
Cancel	This function enables you to back to the previous screen without switching the penalty. When Penalty – details screen is displayed again, it should be displayed with the old values. Next screen: ☐ Penalty - Details Screen [▶ 290]

2.3 Cash

2.3.1 Cash Account

2.3.1.1 Cash Forecasts - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for cash forecasts for T2S dedicated cash account owners, i.e. a party which is a payment bank or central bank. The search results will be dis-

played in a list, which is sorted by the values of the 'Party BIC' column in ascending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

The cash forecast takes into account the cash needs and proceeds of a party on all its T2S dedicated cash accounts related to the pending instructions to be settled during the current or the following business day, as well as the liquidity that can be obtained through auto-collateralisation.

When exporting the content of this screen, you receive the list and the corresponding details for each data record.

During the Start of Day, when the CRDM data is being replicated in the Settlement domain, only the cash forecast data available at the End-of-Day of the previous business day is displayed at the screen. The cash forecast data for the new business day is available as of the end of the CRDM data replication.

During night-time, the cash forecast can only be displayed in-between night-time settlement sequences.

There is no usage restriction for this screen.

Field Description

Cash Forecast – Search Criteria	
Party BIC*	Select the BIC of the party owning the T2S dedicated cash account(s) from the drop-down menu or search via the *magnifier* icon. References for error messages [▷ 1211]: ☐ QMPC032 ☐ QMPC084
Parent BIC*	Select the parent BIC of the party owning the T2S dedicated cash account(s) from the drop-down menu. References for error messages [▷ 1211]: ☐ QMPC048 ☐ QMPC084
Currency	Select the currency of the T2S dedicated cash account(s) from the drop-down menu. The default value is 'all'. Reference for error message [▷ 1211]: ☐ QMPC054
Intended Settlement Date*	Enter the intended settlement date which is used for the calculation of the cash forecast or use the *calendar* icon. Required format is: YYYY-MM-DD The default value is the current business day. This date must be a valid business date equal to or later than the current business date. Reference for error message [▷ 1211]: ☐ QMPC017
Cash Forecast - List	
Party	
Party BIC	Shows the BIC of the party owning the T2S dedicated cash account(s). References for error messages [▷ 1211]: ☐ QMPC032 ☐ QMPC084
Parent BIC	Shows the parent BIC of the party owning the T2S dedicated cash account(s). References for error messages [▷ 1211]: ☐ QMPC048

Cash Forecast – Search Criteria	
	☐ QMPC084
Party Short Name	Shows the short name of the party owning the T2S dedicated cash account(s).
Currency	Shows the currency of the T2S dedicated cash account(s). Reference for error message [▶ 1211]: ☐ QMPC054
Date	Shows the intended settlement date which is used for the calculation of the cash forecast. Displayed format is: YYYY-MM-DD
Cash Balances	
Actual	Shows the sum of the cash balance of the T2S dedicated cash account(s). Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Impacted –To be debited (LT)	Shows the sum of the debiting liquidity transfer orders which debit a T2S dedicated cash account of the party and which would be effective during the date used for the calculation of the cash forecast. Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Impacted - To be credited (SI)	Shows the sum of settlement instructions eligible for cash forecast [4] which credit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast. Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.

---

4   Eligible for cash forecast refers to settlement instructions that are accepted, matched, not cancelled and not finally settled. This definition includes instructions on hold, under intraday restriction.

Cash Forecast – Search Criteria	
Impacted - To be debited (SI)	Shows the sum of settlement instructions eligible for cash forecast which debit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast.
	The pending reverse collateral movements are excluded from this sum.
	Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Impacted - To be credited (SI) – Corporate Actions, On hold	Shows the sum of the settlement instructions related to corporate actions which are eligible for cash forecast, on hold [5], credit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast.
	Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Impacted –To be credited (SI) – Corporate Actions, Released	Shows the sum of the settlement instructions related to corporate actions which are eligible for cash forecast, released [6], credit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast.
	Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Impacted –To be credited (SI) – Non Corporate Actions, On hold	Shows the sum of the settlement instructions not related to corporate actions which are eligible for cash forecast, on hold [7], credit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast.

---

5   'On Hold' includes CSD Hold, Party Hold, CSD Validation Hold, CoSD Hold, and the non-released part of Partially Released instructions.

6   'Released' includes also the released portion of a Partially Released instruction

7   'On Hold' includes CSD Hold, Party Hold, CSD Validation Hold, CoSD Hold, and the non-released part of Partially Released instructions.

Cash Forecast – Search Criteria	
	Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Impacted - To be credited (SI) – Non Corporate Actions, Released	Shows the sum of the settlement instructions not related to corporate actions which are eligible for cash forecast, released [8], credit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast.
	Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Impacted –To be debited (SI) – Corporate Actions, On hold	Shows the sum of the settlement instructions related to corporate actions which are eligible for cash forecast, on hold, debit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast.
	The pending reverse collateral movements are excluded from this sum.
	Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Impacted - To be debited (SI) – Corporate Actions, Released	Shows the sum of the settlement instructions related to corporate actions which are eligible for cash forecast, released, debit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast.
	The pending reverse collateral movements are excluded from this sum.
	Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.

---

8   'Released' includes also the released portion of a Partially Released instruction.

Cash Forecast – Search Criteria	
Impacted –To be debited (SI) – Non Corporate Actions, On hold	Shows the sum of the settlement instructions not related to corporate actions which are eligible for cash forecast, on hold, debit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast. The pending reverse collateral movements are excluded from this sum. Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Impacted – To be debited (SI) – Non Corporate Actions, Released	Shows the sum of the settlement instructions not related to corporate actions which are eligible for cash forecast, released [9], debit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast. The pending reverse collateral movements are excluded from this sum. Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Impacted - To be reimbursed	Shows the sum of the pending reverse collateral movements which debit a T2S dedicated cash account of the party. Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Projected [10]	Shows the projected cash balance. The figure consists of the Actual cash balance + To be credited (SI) – To be debited (SI) – To be debited (LT) – To be reimbursed.

---

9   'Released' includes also the released portion of a Partially Released instruction.

10   In UHB and T2S GUI, "projected balance" means the sum of cash balance and pending LTs and SIs and outstanding intraday credit from auto-collateralisation. In T2S UDFS and MyStandards, "projected balance" means the sum of cash balance and pending LTs and SIs (outstanding intraday credit from auto-collateralisation is not part of the calculation, i.e. is not subtracted).

Cash Forecast – Search Criteria	
	Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Available Auto-Collateralisation	Shows the available auto-collateralisation value of the party. The figure consists of the minimum value between: ☐ The available collateral value that the party holds on the securities account(s) linked to its T2S dedicated cash account(s) ☐ The auto-collateralisation limit headroom of the party Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Cash Forecast	Shows the sum of the projected cash balance and the available auto-collateralisation. Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.

2.3.1.2 Cash Forecast - Details Screen

Context of Usage

This screen displays detailed information on the cash forecast for a T2S dedicated cash account owner, i.e. a party which is a payment bank or central bank. The global cash forecast is displayed for the previously selected business date and currency. The cash forecast per T2S dedicated cash account of the party for the previously selected business date and currency is displayed in a list on the same screen. You can check the data and proceed further by clicking on the buttons below.

The cash forecast takes into account the cash needs and proceeds of a party on all its T2S dedicated cash accounts related to the pending instructions to be settled during the current or the following business day, as well as the liquidity that can be obtained through auto-collateralisation.

During the Start of Day, when the CRDM data is being replicated in the Settlement domain, only the cash forecast data available at the End-of-Day of the previous business day is displayed at the screen. The cash forecast data for the new business day is available as of the end of the CRDM data replication.

During night-time, the cash forecast can only be displayed in-between night-time settlement sequences.

There is no usage restriction for this screen.

	The figure consists of the minimum value between:

---

11   Eligible for cash forecast refers to settlement instructions that are accepted, matched, not cancelled and not finally settled. This definition includes instructions on hold or under intraday restriction.

12   In UHB and T2S GUI, "projected balance" means the sum of cash balance and pending LTs and SIs and outstanding intraday credit from auto-collateralisation. In T2S UDFS and MyStandards, "projected balance" means the sum of cash balance and pending LTs and SIs (outstanding intraday credit from auto-collateralisation is not part of the calculation, i.e. is not subtracted).

Global Cash Forecast	
	☐ The available collateral value that the selected party holds on the securities account(s) linked to its T2S dedicated cash account(s) in the selected currency. ☐ The auto-collateralisation limit headroom of the T2S dedicated cash account(s) of the selected party in the selected currency. Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Cash Forecast	Shows the sum of the projected cash balance and the available auto-collateralisation of the selected party and currency. Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Cash Forecast per T2S Dedicated Cash Account	
T2S Dedicated Cash Account Number	Shows the number of the T2S dedicated cash account of the selected party with a cash balance and/or pending cash movement(s) in the selected currency.
Currency	Shows the currency of the T2S dedicated cash account.
Cash Balances	
Actual	Shows the cash balance of the T2S dedicated cash account.
Impacted –To be debited (LT)	Shows the sum of the debiting liquidity transfer orders which debit the T2S dedicated cash account and which would be effective during the date used for the calculation of the cash forecast.
Impacted –To be debited (SI)	Shows the sum of settlement instructions eligible for cash forecast which debit the T2S dedicated cash account and have an intended settlement date earlier than or equal to the date used for the calculation of the cash forecast. The pending reverse collateral movements are excluded from this sum.
Impacted –To be credited (SI)	Shows the sum of settlement instructions eligible for cash forecast which credit the T2S dedicated cash account and have an intended settlement date earlier than or equal to the date used for the calculation of the cash forecast.

Global Cash Forecast	
Impacted – To be credited (SI) – Corporate Actions, On hold	Shows the sum of the settlement instructions related to corporate actions which are eligible for cash forecast, on hold [13], credit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast.
Impacted –To be credited (SI) – Corporate Actions, Released	Shows the sum of the settlement instructions related to corporate actions which are eligible for cash forecast, released [14], credit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast.
Impacted –To be credited (SI) – Non Corporate Actions, On hold	Shows the sum of the settlement instructions not related to non corporate actions which are eligible for cash forecast, on hold, credit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast.
Impacted –To be credited (SI) – Non Corporate Actions, Released	Shows the sum of the settlement instructions not related to corporate actions which are eligible for cash forecast, released, credit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast.
Impacted –To be debited (SI) – Corporate Actions, On hold	Shows the sum of the settlement instructions related to corporate actions which eligible for cash forecast, on hold, debit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast. The pending reverse collateral movements are excluded from this sum.
Impacted –To be debited (SI) – Corporate Actions, Released	Shows the sum of the settlement instructions related to corporate actions which are eligible for cash forecast, released, debit a T2S dedicated cash account of the party

---

[13]   'On Hold' includes CSD Hold, Party Hold, CSD Validation Hold, CoSD Hold, and the non-released part of Partially Released instructions.

[14]   'Released' includes also the released portion of a Partially Released instruction.

Global Cash Forecast	
	and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast. The pending reverse collateral movements are excluded from this sum.
Impacted –To be debited (SI) – Non Corporate Actions, On hold	Shows the sum of the settlement instructions not related to non corporate actions which are eligible for cash forecast, on hold, debit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast. The pending reverse collateral movements are excluded from this sum.
Impacted –To be debited (SI) – Non Corporate Actions, Released	Shows the sum of the settlement instructions not related to corporate actions which are eligible for cash forecast, released, debit a T2S dedicated cash account of the party and have an intended settlement date earlier than or equal to the intended settlement date used for the calculation of the cash forecast. The pending reverse collateral movements are excluded from this sum.
Impacted – To be Reimbursed	Shows the sum of the pending reverse collateral movements which debit the T2S dedicated cash account.
Projected [15]	Shows the projected cash balance. The figure consists of the sum Actual cash balance + To be credited (SI) - To be debited (SI) - To be debited (LT) - To be reimbursed + impacted collateral movements to be reimbursed
Available Auto-Collateralisation	Shows the available auto-collateralisation. The figure consists of the minimum value between: ☐ The available collateral value that the selected party holds on the securities account(s) linked to the T2S dedicated cash account.

---

15   In UHB and T2S GUI, "projected balance" means the sum of cash balance and pending LTs and SIs and outstanding intraday credit from auto-collateralisation. In T2S UDFS and MyStandards, "projected balance" means the sum of cash balance and pending LTs and SIs (outstanding intraday credit from auto-collateralisation is not part of the calculation, i.e. is not subtracted).

Global Cash Forecast	
	☐ The auto-collateralisation limit headroom of the T2S dedicated cash account.
Cash Forecast	Shows the sum of the projected balance and the available auto-collateralisation for the T2S dedicated cash account.

2.3.1.3 Cash Restriction Details - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for cash restrictions which are sub-balances blocked or reserved for specific purpose. The search results will be displayed in a list, which is sorted by the values of the 'T2S Dedicated Cash Account Number' column in ascending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

During the Start of Day, when the CRDM data is being replicated in the Settlement domain, only the cash restriction details data available at the End-of-Day of the previous business day is displayed at the screen. The cash restriction details data for the new business day is available as of the end of the CRDM data replication.

During night-time, the cash restriction details can only be displayed in-between night-time settlement sequences.

There is no usage restriction for this screen.

2.3.1.5 Collateral Values per T2S Dedicated Cash Account and Security - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for the collateral value for a party and any or all of its T2S dedicated cash accounts. The search results will be displayed in a list, which is sorted by the values of the (1) 'T2S Dedicated Cash Account Number' (2) Owner of the Securities Account Parent BIC (3) Owner of the Securities Account Party BIC (4) Security-ISIN columns in ascending order (default setting).

During the Start of Day, when the CRDM data is being replicated in the Settlement domain, only the collateral value per T2S dedicated cash account data available at the End-of-Day of the previous business day is displayed at the screen. The collateral value per T2S dedicated cash account data for the new business day is available as of the end of the CRDM data replication.

During night-time, the collateral value per T2S dedicated cash account and security can only be displayed in-between night-time settlement sequences.

There is no usage restriction for this screen.

Screen Access

☐ `Cash >> Cash Account >> Collateral Values (T2S DCA and Sec.)`

☐ `Cash >> Cash Account >> Total Collateral Values (T2S DCA)`

2.3.1.12 T2S DCA Postings - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for cash postings which are the individual debits and credits impacting the selected cash balance. The search results will be displayed in a list, which is sorted either by the values of the 'T2S Dedicated Account Number', 'Restriction Type', 'Date', 'Debit/Credit', 'Currency', 'Amount', 'Instruction Type', 'Internal Reference', 'Restriction Reference' or 'Date and Time' columns in ascending order (default setting).

After selecting an entry, you can proceed further by clicking on the buttons below.

During night-time, the T2S DCA postings can only be displayed in-between night-time settlement sequences.

This screen is not relevant for CSD or CSD participant users.

Screen Access

☐ `Cash >> Cash Account >> Cash Account Postings`

☐ `Cash >> Cash Account >> Cash Account Balances >>` *T2S DCA balances – search/list* screen >> Click on the *search* and/or *details* button >> *T2S DCA balance – details* screen >> Click on the *postings* button

Privileges   To use this screen, you need the following privilege [▷ 1150]:

☐ T2S dedicated cash account posting query

References   **User Instructions Part**

This screen is part of the following business scenario:

☐ View cash balances details and related postings [▷ 673]

Business Functionality Document

This screen corresponds to the following business functions:

☐ Query T2S dedicated cash account postings (T2S.GUI. LMSE.CSH.0030)

☐ Display T2S dedicated cash account postings (T2S.GUI.LMSE.CSH.0040)

Field Description

Cash Postings - Search Criteria	

Actor Reference	You can choose to enter one of the following references depending on whether you are querying on cash move-ments related to a settlement instruction or a liquidity transfer:
	
	☐ For a settlement instruction:
	
	  ☐ Account Owner Reference
	
	  ☐ Account Servicer Reference
	
	  ☐ T2S Reference
	
	  ☐ Third Party Reference
	
	☐ For a liquidity transfer:
	
	  ☐ End to End Identification

Cash Postings - Search Criteria	
	☐ Technical Identifier of LT
	If you fill in the Actor Reference, only Liquidity transfers or Settlement instructions related to this reference are returned,
	When the Actor reference is not found in SI or LT, the message "No record found" is displayed.
Party BIC*	You can choose to either enter the BIC of the party owning the cash account or to select it from the suggested items in the drop-down menu.
	If you have accessed this screen via the T2S DCA balance – details screen, this field is already filled in.
	References for error messages [▷ 1367]:
	☐ QMPC032
	☐ QMPC072
NCB Parent BIC*	You can choose to either enter the BIC of the CB where the above party holds the cash account or to select it from the suggested items in the drop-down menu. If you have accessed this screen via the T2S DCA balance – details screen, this field is already filled in.
	Reference for error message [▷ 1367]:
	☐ QMPC072
T2S Dedicated Cash Account Number	Select the number of the T2S dedicated cash account from the drop-down menu. The default value is 'All'.
	If there is only one possible cash account, this field is read-only.
	If you have accessed this screen via the T2S DCA balance – details screen, this field is already filled in.
	Reference for error message [▷ 1367]:
	☐ QMPC072
Restriction Type	You can choose to either enter the restriction type of the cash posting or to select it from the suggested items in the drop-down menu.
	If you select the value 'All', the postings of all restriction types are displayed in the list.

Cash Postings - Search Criteria	
	If you have accessed this screen via the T2S DCA balance – details screen, this field is already filled in. Reference for error message [▷ 1367]: ☐ QMPC091
Currency	Select the currency of the T2S dedicated cash account from the drop-down menu. The default value is 'All'. If you have accessed this screen via the T2S DCA balance – details screen, this field is already filled in. References for error messages [▷ 1367]: ☐ QMPC054 ☐ QMPC072
Date*	Enter the date of the cash postings or use the *calendar* icon. The default value is the current business day. Required format is: YYYY-MM-DD The 'Date' must be a valid business date earlier than or equal to the current business date. If you have accessed this screen via the T2S DCA balance – details screen, this field is already filled in. References for error messages [▷ 1367]: ☐ QMPC016 ☐ QMPC073
Date and Time from	Enter the starting date and time of the cash postings or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm The 'Date and Time from' must be a valid business date earlier than or equal to the current business date and time. Reference for error message [▷ 1367]: ☐ QMPC073
Date and Time to	Enter the ending date and time of the cash postings or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm

Cash Postings - Search Criteria	
	The 'Date and Time to' must be a valid business date earlier than or equal to the current business date and time. The date and time must be equal to or later than the 'Date and Time from'.
Cash Postings - List	
T2S Dedicated Cash Account Number	Shows the number of the T2S dedicated cash account of the cash posting. Reference for error message [⯈ 1367]: ☐ QMPC072
Restriction Type	Shows the restriction type of the cash posting. Reference for error message [⯈ 1367]: ☐ QMPC091
Date	Shows the date of the cash posting. Displayed format is: YYYY-MM-DD References for error messages [⯈ 1367]: ☐ QMPC016 ☐ QMPC073
Impacted Amount	
Debit/Credit Indicator	Shows the debit/credit indicator related to the cash posting from the possible values: ☐ D (for debit) ☐ C (for credit)
Currency	Shows the currency of the T2S dedicated cash account. References for error messages [⯈ 1367]: ☐ QMPC054 ☐ QMPC072
Amount	Shows the amount of the cash posting.
Instruction	
Account Owner Reference	Shows the Account Owner Transaction Identification of the instruction related to the cash posting.
T2S Reference	Shows the Market Infrastructure Transaction Identification of the instruction related to the cash posting.
Account Servicer Reference	Shows the Account Servicer Transaction Identification of the instruction related to the cash posting

Cash Postings - Search Criteria	
Third Party Reference	Shows the Processing Identification of the instruction related to the cash posting.
End to End Id	Shows the End to End Identification of the Liquidity Transfer related to the cash posting.
Technical Id	Shows the Technical Identifier of the Liquidity Transfer related to the cash posting.
Type	Shows the type of instruction related to the cash posting from the possible values:
	☐ LT (for liquidity transfer)
	☐ SI (for settlement instruction)
	☐ SR (for settlement restriction)
Internal Reference	Shows the T2S internal reference of the instruction related to the cash posting.
Restriction Reference	Shows the restriction reference related to the cash posting.
Date and Time	Shows the date and time of the cash posting.
	Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs

Buttons

Search	This function enables you to start a search according to the criteria entered. The results are displayed in a list on the same screen.

2.3.1.13 Total Collateral Values per T2S Dedicated Cash Account - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for the total collateral value of securities on stock which are eligible for auto-collateralisation for those T2S dedicated cash accounts that match the specified selection criteria. The search results will be displayed in a list, which is sorted by the values of the 'Party BIC' column in ascending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

During the Start of Day, when the CRDM data is being replicated in the Settlement domain, only the total collateral value per T2S dedicated cash account data available at the End-of-Day of the previous business day is displayed at the screen. The total collateral value per T2S dedicated cash account data for the new business day is available as of the end of the CRDM data replication.

The screen can be used in the following contexts:

☐ CB users (CB as credit provider) can view the total collateral value of securities associated to the T2S dedicated cash accounts of their payment banks. This is the collateral value that payments banks can use as a guarantee for central bank collateralisation.

☐ Payment bank users (payment bank as credit consumer) can view the total collateral value of their own securities associated to their T2S dedicated cash accounts. This is the collateral value that the payment bank can use as a guarantee for central bank collateralisation.

☐ Payment bank users (payment bank as credit provider) can view the total collateral value of the clients' securities associated to the payment bank's T2S dedicated cash accounts. This is the collateral value that the payment bank's clients can use as a guarantee for client collateralisation.

☐ Payment bank client users (payment bank client as credit consumer) can view the total collateral value of their securities associated to the T2S dedicated cash account of their payment bank. This is the collateral value that the payment bank's client can use as a guarantee for client collateralisation.

There is no usage restriction for this screen.

Screen Access

☐ `Cash` >> `Cash Account` >> `Total Collateral Values (T2S DCA)`

☐ `Securities` >> `Securities Account` >> `Total Collateral Values (T2S DCA)`

Privileges

To use this screen, you need the following privilege [▶ 1151]:

☐ Total collateral value per T2S dedicated cash account query

References

User Instructions Part

This screen is not part of a business scenario.

Business Functionality Document

This screen corresponds to the following business functions:

☐ Query total current collateral value (per T2S dedicated cash account) (T2S.GUI.LMSE.CSH.0090)

☐ Display total current collateral value (per T2S dedicated cash account) (T2S.GUI.LMSE.CSD.0100)

Illustration 79: Immediate liquidity transfer orders - search/list screen

Field Description

Immediate Liquidity Transfer Orders – Search Criteria	
Party	
Parent BIC	Select the parent BIC of the party.
	References for error messages [▶ 1235]:
	☐ QMPC072
	☐ QMPC084
Party BIC	Select the BIC of the party.
	References for error messages [▶ 1235]:
	☐ QMPC032
	☐ QMPC072
	☐ QMPC084
Other Search Criteria	
T2S Dedicated Cash Account Number	Select the T2S dedicated cash account which has been debited or credited from the drop-down menu. The default value is 'All'.
	References for error messages [▶ 1235]:
	☐ QMPC031
	☐ QMPC072

Immediate Liquidity Transfer Orders – Search Criteria	
	If you have the privilege for only one T2S dedicated cash account, this field is already filled in.
Debit/Credit Indicator*	Select the credit/debit code from the possible values: ☐ Credit ☐ Credit and Debit (default value) ☐ Debit Select credit if you want to search for liquidity transfer orders which have credited a T2S dedicated cash account. Select debit if you want to search for liquidity transfer orders which have debited a T2S dedicated cash account.
Currency	Select the currency assigned to the T2S dedicated cash account from the drop-down menu. The default value is 'all'. References for error messages [▷ 1235]: ☐ QPMC054 ☐ QPMC072 If you have first selected the 'T2S Dedicated Cash Account Number', this field is already filled in.
Settlement Date and Time - from	Enter the date and time from which the liquidity transfer is settled or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss References for error messages [▷ 1235]: ☐ QMPC015 ☐ QMPC016 The 'Settlement Date and Time – from' cannot be earlier than 90 days before the current business day and must be earlier than or equal to the 'Settlement Date and Time – to'.
Settlement Date and Time - to	Enter the date and time until which the liquidity transfer is settled or use the *calendar* icon. Required format is: YYYY-MM-DD hh:mm:ss References for error messages [▷ 1235]: ☐ QMPC015 ☐ QMPC016

Immediate Liquidity Transfer Orders – Search Criteria	
	☐ QMPC097 The 'Settlement Date and Time - to' cannot be earlier than 90 days before the current business day and must be earlier than or equal to the current business day.
Value Date	Enter the value date of the liquidity transfer or use the *calendar* icon. Required format is: YYYY-MM-DD The 'Value Date' cannot be earlier than 90 days before the current business day or later than the current business day. If you do not select a date, this field is filled in with the current business day.
Sending Time - from	Enter the time from which the outbound liquidity transfer was sent to the RTGS. Required format is: hh:mm:ss
Sending Time - to	Enter the time until which the outbound liquidity transfer was sent to the RTGS. Required format is: hh:mm:ss
External RTGS Status*	Select the external RTGS status from the possible values: ☐ Not executed ☐ Not applicable (default value) ☐ RTGS rejection ☐ RTGS confirmation ☐ Rebooking
Sort by	Select the category by which you want to sort the list from the possible values: ☐ T2S DCA No. (default value if you have searched via 'Parent BIC' or 'Party BIC') ☐ Party BIC ☐ Currency ☐ Settlement status ☐ External RTGS status

Immediate Liquidity Transfer Orders – Search Criteria	
	☐ Unsorted (Default value if you have searched via the other search parameters. Unsorted means that the list is sorted by the values of the 'Settlement Date and Time' column.)
Immediate Liquidity Transfer Orders - List [16]	
T2S Dedicated Cash Account Number	Shows the T2S dedicated cash account which has been debited or credited. References for error messages [▷ 1235]: ☐ QMPC031 ☐ QMPC072 If you sort the list by that value, the screen is divided into different sections grouped by T2S dedicated cash account numbers.
Party BIC	Shows the BIC of the party. References for error messages [▷ 1235]: ☐ QMPC032 ☐ QMPC072 ☐ QMPC084 If you sort the list by that value, the screen is divided into different sections grouped by party.
Currency	Shows the currency of the amount to be transferred. References for error messages [▷ 1235]: ☐ QPMC054 ☐ QPMC072 If you sort the list by that value, the screen is divided into different sections grouped by currency.
Settlement Status	Shows the settlement status of liquidity transfers. If the liquidity transfer is internal or outbound, it shows the settlement status from the possible values: ☐ Not executed (SNXE) ☐ Unsettled (SUNS) ☐ Partially settled (SPAS) ☐ Settled (SSET)

---

16   Please note that the described functionality won´t be available before CSLD go-live.

Immediate Liquidity Transfer Orders – Search Criteria	
	If the liquidity transfer is inbound, it shows the settlement status from the possible values: □ Not executed □ Settled If you sort the list by that value, the screen is divided into different sections grouped by settlement status.
External RTGS Status	Shows the external RTGS status of the liquidity transfer from the possible values: □ Not executed (RNXE) □ Not applicable (RNAP) □ RTGS rejection (RREJ) □ RTGS confirmation (RCON) If the liquidity transfer is internal, this field is always filled in with 'not applicable'. If you sort the list by that value, the screen is divided into different sections grouped by settlement status.
T2S Reference	Shows the unique identification assigned by T2S to the respective immediate liquidity transfer.
Settlement Date and Time	Shows the date and time when the immediate liquidity transfer was settled. Displayed format is: YYYY-MM-DD hh:mm:ss References for error messages [▷ 1235]: □ QMPC015 □ QMPC016 □ QMPC097
Parent BIC	Shows the BIC of the CB that operates the T2S dedicated cash account. References for error messages [▷ 1235]: □ QMPC072 □ QMPC084
T2S Dedicated Cash Account Number Debit	Shows the cash account to be debited. If the liquidity transfer is internal or outbound, the cash account is a T2S dedicated cash account.

Immediate Liquidity Transfer Orders – Search Criteria	
	If the liquidity transfer is inbound, the cash account is an External RTGS account, Main Cash Account, RTGS DCA, CLM CB Account, RTGS CB Account or TIPS Account
	If you sort the list by that value, the screen is divided into different sections grouped by debit cash account numbers.
T2S Dedicated Cash Account Number Credit	Shows the cash account to be credited.
	If the liquidity transfer is internal or inbound, the cash account is a T2S dedicated cash account.
	If the liquidity transfer is outbound, the cash account is an External RTGS account, Main Cash Account, RTGS DCA, CLM CB Account, RTGS CB Account or TIPS Account.
	If you sort the list by that value, the screen is divided into different sections grouped by credit cash account numbers.
Amount	Shows the amount in respect of the settlement status.
	If the settlement status is set to 'Not executed' or 'Unsettled', the instructed amount is displayed.
	If the settlement status is set to 'Partially settled' or 'Settled', the transferred amount is displayed.
Interface Sending Date and Time	Shows the time when the outbound liquidity transfer was sent to the RTGS.
	Displayed format is: hh:mm:ss
Value Date	Shows the value date of the liquidity transfer.
	Displayed format is: YYYY-MM-DD

Illustration 80: Immediate liquidity transfer - details screen

Field Description

General Information	
Instructed Settlement Amount	Shows the amount originally stated in the settlement instruction.
Transferred Settlement Amount	Shows the total amount settled.
Currency	Shows the currency assigned to the T2S dedicated cash account.
Settlement Date and Time	Shows the date and time of the settlement. Displayed format is: YYYY-MM-DD hh:mm:ss
T2S Dedicated Cash Account Number Debit	Shows the T2S dedicated cash account to be debited.

General Information	
T2S Dedicated Cash Account Number Credit	Shows the T2S dedicated cash account to be credited.
Value Date	Shows the value date of the immediate liquidity transfer. Displayed format is: YYYY-MM-DD
Sending Time	Shows the time when the liquidity transfer was sent to the middleware. Displayed format is: hh:mm:ss If the liquidity transfer is internal, this field is not filled.
Technical Information	
T2S Reference	Shows the identification of the liquidity transfer assigned by T2S.
User Reference	Shows the identification of the liquidity transfer assigned by the T2S actor.
T2S generated	Shows whether a liquidity transfer was generated by T2S from the possible values: ☐ No (i.e. immediate liquidity transfer) ☐ Yes (i.e. standing or predefined order) If the value is set to 'Yes', this field also contains the standing or predefined order identification.
Party Information	
Parent BIC	Shows the parent BIC of the party.
Party BIC	Shows the BIC of the party.
Party Short Name	Shows the short name of the party.
Current Status Information	
Settlement Status	Shows the current settlement status of internal, inbound and outbound liquidity transfers from the possible values: ☐ Settled (for inbound liquidity transfers this is the only possible value) ☐ Partially settled ☐ Unsettled ☐ Not executed
Settlement Date and Time	Shows the date and time of the respective settlement status.

General Information	
	Displayed format is: YYYY-MM-DD hh:mm:ss
External RTGS Status	Shows the current RTGS status of the instruction from the possible values: ☐ RTGS rejection ☐ RTGS confirmation ☐ Not executed ☐ Not applicable ☐ Rebooking If the liquidity transfer is internal, this field is always filled in with 'Not applicable'.
External RTGS Status Date and Time	Shows the date and time of the respective RTGS status. Displayed format is: YYYY-MM-DD hh:mm:ss
Status History Information	
Date and Time	Shows the date and time when the status was stored. Displayed format is: YYYY-MM-DD hh:mm:ss
Status Type	Shows all status types in a chronological order from the possible values: ☐ Settlement Status ☐ RTGS Status ☐ Approval Status Each row represents one status.
Status Value	Shows for each status type all status values in a chronological order. If the status type is set to 'SETT' for internal and outbound liquidity transfers, this field shows the possible values: ☐ Settled ☐ Partially settled ☐ Unsettled ☐ Not executed If the status type is set to 'SETT' for inbound liquidity transfers, this field always shows the status 'Settled'. If the status type is set to 'RTGS' for outbound liquidity transfers, this field shows the possible values:

General Information	
	☐ RTGS rejection
	☐ RTGS confirmation
	☐ Not executed
	If the status type is set to 'APPR' for internal and outbound liquidity transfers, this field shows the possible values:
	☐ Awaiting approval
	☐ Approved
	☐ Revoked
	☐ Rejected
	☐ Not applicable
	Each row represents one status.
User Identification	Shows the user identification of those users who changed the status type 'Approval Status', if the liquidity transfer was sent via U2A and in 4-eyes mode.
	Each row represents one status.
Rejection Reasons	
Date and Time	Shows the date and time of the rejection.
	Displayed format is: YYYY-MM-DD hh:mm:ss
	This field is only available if the liquidity transfer was rejected.
Rejection Code	Shows the rejection code in respect of the rejection.
	This field is only available if the liquidity transfer was rejected.
Rejection Description	Shows the error description according to reference data and business rules.
	This field is only available if the liquidity transfer was rejected.

2.3.2.6 Outstanding Auto-Collateralisation Credits - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for the global and detailed outstanding auto-collateralisation credits for parties which are credit consumers, either as a payment bank obtaining credit from a central bank or as a client of a payment bank obtaining credit from its payment bank. The search results for the global outstanding auto-collateralisation credits for the selected party will be displayed on the same screen. Below this, the detailed search results for the outstanding auto-collateralisation credits per T2S dedicated cash account will be displayed in a list, which is sorted by the values of the 'T2S Dedicated Cash Account Number' column in ascending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

The amount of outstanding auto-collateralisation refers to the limit utilisation of an auto-collateralisation limit. Payment bank users can see the outstanding auto-collateralisation credit obtained from their central bank on their T2S dedicated cash account, while clients of a payment bank can see the outstanding auto-collateralisation credit obtained from their payment bank related to the T2S dedicated cash account of their payment bank.

During the Start of Day, when the CRDM data is being replicated in the Settlement domain, only the outstanding auto-collateralisation credits data available at the End-of-Day of the previous business day is displayed at the screen. The outstanding auto-collateralisation credits data for the new business day is available as of the end of the CRDM data replication.

During night-time, the outstanding auto-collateralisation credits can only be displayed in-between night-time settlement sequences.

Screen Access

☐ `Cash >> Liquidity >> Outstanding Auto-Coll. Credit`

Privileges

To use this screen, you need the following privilege [▷ 1139]:

☐ Outstanding auto-collateralisation credit query

References

User Instructions Part

This screen is not part of a business scenario.

Business Functionality Document

This screen corresponds to the following business functions:

☐ Query outstanding auto/client collateralisation credit (T2S.GUI.LMSE.CSH.0150)

☐ Display outstanding auto/client collateralisation credit (T2S.GUI.LMSE.CSH.0160)

Screenshot

Illustration 82: Outstanding auto-collateralisation credits – search/list screen

Field Descriptions

Outstanding Auto-collateralisation Credit – Search Criteria	
Credit Consumer	
Party BIC*	Select the party BIC of the credit consumer from the drop-down menu or search via the *magnifier* icon. Reference for error message [▸ 1291]: ☐ QMPC084
Parent BIC*	Select the parent BIC of the credit consumer from the drop-down menu or search via the *magnifier* icon. If the credit consumer is a payment bank, this is the BIC of its CB. If the credit consumer is a client of a payment bank, this is the BIC of its CSD. Reference for error message [▸ 1291]: ☐ QMPC084
T2S Dedicated Cash Account Number	Select the number of the T2S dedicated cash account from the drop-down menu.

Outstanding Auto-collateralisation Credit – Search Criteria	
	The content of the drop-down menu depends on your access rights and privileges:
	☐ If there is only one possible account, this field is read-only.
	☐ If the credit consumer is a payment bank, possible values are its T2S dedicated cash account(s).
	☐ If the credit consumer is the client of a payment bank, possible values are the T2S dedicated cash account(s) of its payment bank with which the client obtains auto-collateralisation credit.
	Required format is: max. 34 characters (SWIFT-x)
	If you leave this field blank, the privileges and access rights of the requesting party are applied.
	At least one search criterion among 'T2S Dedicated Cash Account Number' and 'Currency' must be specified.
	Reference for error message [▷ 1291]:
	☐ QMPC031
Currency	Select the currency of the outstanding auto-collateralisation credit from the drop-down menu. The default value is 'all'.
	At least one search criterion among 'T2S Dedicated Cash Account Number' and 'Currency' must be specified. If a T2S dedicated cash account is selected, the query disregards the currency.
Outstanding Auto-collateralisation Credit - Global	
Credit Consumer	
Party BIC	Shows the BIC of the credit consumer party.
	Reference for error message [▷ 1291]:
	☐ QMPC084
Parent BIC	Shows the parent BIC of the credit consumer party.
	Reference for error message [▷ 1291]:
	☐ QMPC084
Party Short Name	Shows the short name of the credit consumer party.
Limits	
Currency	Shows the currency of the auto-collateralisation credit.

Outstanding Auto-collateralisation Credit – Search Criteria	
Total Limit	Shows the sum of the auto-collateralisation limits associated to the selected party and the selected T2S dedicated cash account.
	Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Total Outstanding Limit	Shows the sum of the auto-collateralisation limit utilisations associated to the selected party and the selected T2S dedicated cash account.
	Provision of '99999...99' in case oversizing occurs in the integer part. Truncation of decimals in case oversizing occurs in the decimal part.
Outstanding Auto-collateralisation Credit - List	
T2S Dedicated Cash Account Number	Shows the T2S dedicated cash account that the party can use.
	Reference for error message [▷ 1291]:
	☐ QMPC031
Currency	Shows the currency of the T2S dedicated cash account.
Limits	
Limit Amount	Shows the auto-collateralisation limit associated to the T2S dedicated cash account.
Outstanding Limit	Shows the utilisation of the auto-collateralisation limit associated to the T2S dedicated cash account.

Buttons

Search	This function enables you to start a search according to the criteria entered. The results are displayed in a list on the same screen.

Field Description

Amendment Instruction	
Referenced Instruction	
Instruction Type	Shows the type of instruction referenced by the amendment cash instruction. The only possible value is 'Intra-Balance Movement'.
Actor Reference	Shows the identification assigned by the T2S actor to the settlement restriction on cash.
T2S Reference	Shows the identification given for a settlement restriction on cash by T2S.
T2S Dedicated Cash Account Number	Shows the number of the cash account used by the settlement restriction on cash.
General	
Instructing Party BIC	Shows the BIC of the instructing party.
Instructing Party Parent BIC	Shows the parent BIC of the instructing party.
User Identification	Shows user identification of the sending party.

Amendment Instruction	
Entry Date and Time	Shows the date and time when the amendment instruction has entered in T2S. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Execution Date and Time	Shows the date and time when the amendment instruction has been executed. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Cancellation Status	Shows the cancellation status of the amendment instruction from the possible values: ☐ DEND (for 'Denied') ☐ NDEN: (for 'Not denied') If the field 'Reason Code' is informed, the cancellation status is set to 'DEND'.
Reason Code	Shows the reason code that informs the reasoning why the amendment instruction has been denied.
Reason Code Description	Shows the description of the reasoning why the amendment instruction has been denied.
Execution Status	Shows the execution status of the amendment instruction from the possible values: ☐ EXCD (for 'Executed') ☐ NEXD: (for 'Not executed')
Amendment Type	Shows the amendment instruction type from the possible values: ☐ Priority ☐ Linkages If the value is set to 'Priority', the 'Priority' frame is displayed. If the value is set to 'Linkages', the 'Links' frame is displayed.
Priority	
Priority	Shows the value of the priority assigned by the amendment instruction from the possible values: ☐ Normal ☐ High ☐ Reserved

Amendment Instruction	
	This frame is only available if the amendment type is set to 'Priority'.
Links	
Link	Shows the type of the link action indicated in the amendment instruction from the possible values: ☐ Link ☐ Unlink This frame is only available if the amendment type is set to 'Linkages'.
Link Type	Shows the processing position indicated in the amendment instruction from the possible values: ☐ After ☐ Before ☐ With This frame is only available if the amendment type is set to 'Linkages'.
Reference Type	Shows the reference type of the instruction to be linked/unlinked to from the possible values: ☐ Account owner settlement instruction reference ☐ Account owner intra balance movement reference ☐ Account owner intra position movement reference ☐ Account servicer reference ☐ Third party reference ☐ T2S reference This frame is only available if the amendment type is set to 'Linkages'.
Reference	Shows the identification of the instruction to be linked/unlinked to. This frame is only available if the amendment type is set to 'Linkages'.
Reference Owner	Shows the BIC of the instructing party of the instruction to be linked/unlinked to. This field is only filled in if the 'Reference Type' field is set to any value different than 'T2S Reference'.

Amendment Instruction	
	This frame is only available if the amendment type is set to 'Linkages'.

2.3.3.3 Cancellation Cash Instruction - Details Screen

Context of Usage

This screen displays detailed information on the selected cancellation cash instruction. You can check the data and proceed further by clicking on the buttons below.

This screen is not relevant for CSD users.

Screen Access

☐ `Cash >> Settlement >> Maintenance Cash Instructions >>` *Maintenance cash instructions – search/list* screen >> Click on the *search* button >> *Maintenance cash instructions – search/list* screen >> Click on the *details* button

Privileges

To use this screen, you need the following privilege [▷ 1123]:

☐ Cancellation instruction for intra-balance movement audit trail details query

References

User Instructions Part

This screen is part of the following business scenario:

☐ View cancellation instruction for a settlement restriction on cash details [▷ 778]

Business Functionality Document

This screen corresponds to the following business function:

☐ Display instruction details (T2S.GUI.SESE.INX.0030)

Screenshot
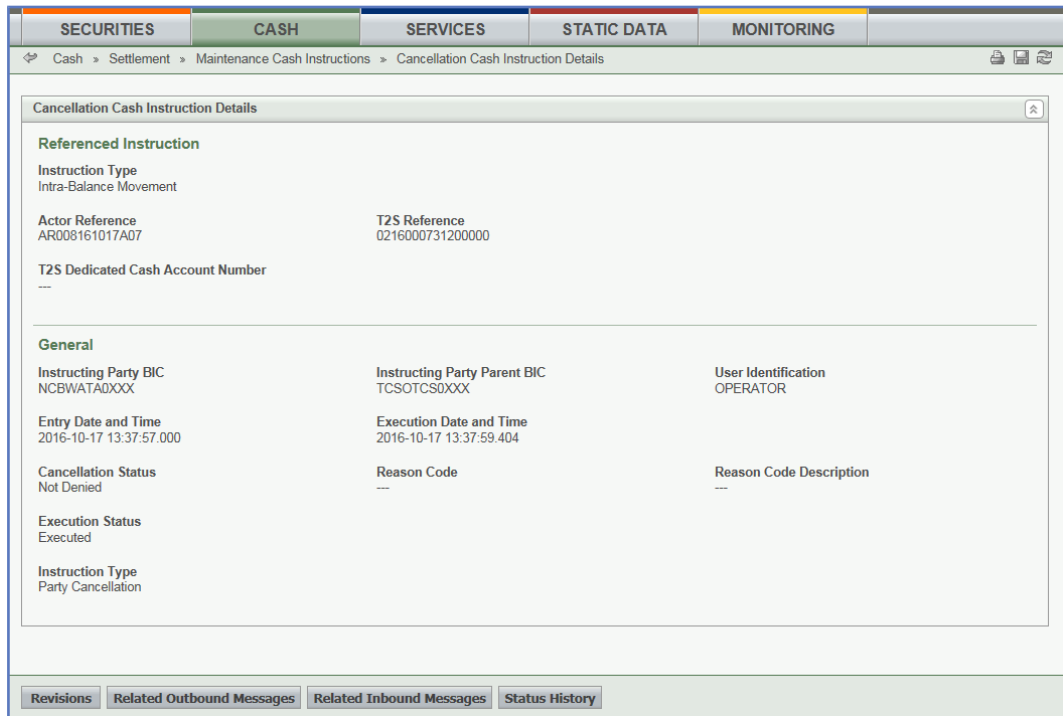

Illustration 87: Cancellation cash instruction - details screen

Field Description

Cancellation Instruction	
Referenced Instruction	
Instruction Type	Shows the type of instruction referenced by the cancellation cash instruction. The only possible value is 'Intra-Balance Movement'.
Actor Reference	Shows the reference assigned by the T2S actor to the settlement restriction on cash.
T2S Reference	Shows the identification of the reference assigned for a settlement restriction on cash by T2S.
T2S Dedicated Cash Account Number	Shows the unique reference for the cash account used by the settlement restriction on cash.
General	
Instructing Party BIC	Shows the BIC of the instructing party.
Instructing Party Parent BIC	Shows the parent BIC of the instructing party.
User Identification	Shows user identification of the sending party.
Entry Date and Time	Shows the date and time when the cancellation instruction has entered in T2S. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs

Cancellation Instruction	
Execution Date and Time	Shows the date and time when the cancellation instruction has been executed. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Cancellation Status	Shows the cancellation status of the cancellation instruction from the possible values: ☐ Denied ☐ Not denied If the 'Reason Code' field is filled in, the cancellation status is set to 'Denied'.
Reason Code	Shows the reason code that informs the reasoning why the cancellation instruction has been denied.
Reason Code Description	Shows the description of the reasoning why the cancellation instruction has been denied.
Execution Status	Shows the execution status of the cancellation instruction from the possible values: ☐ Executed ☐ Not executed
Instruction Type	Shows the cancellation instruction type of the cancellation instruction.

Buttons		
Revisions	This function enables you to display the revisions of the selected cancellation instruction. Next screen: ☐ *Revisions/audit trail – list* screen [▶ 661]
Related Outbound Messages	This function enables you to display the outbound messages related to the cancellation instruction. In case the cancellation instruction is linked to more than one outbound message, the *outbound messages - search/list* screen is displayed. In case the query returns only one valid message, the *outbound message – details* screen is displayed directly. Next screens: ☐ *Outbound messages – search/list* screen [▶ 645] ☐ *Outbound message – details* screen [▶ 653]

Related Inbound Messages	This function enables you to display the inbound message related to the cancellation instruction. Field Description

Intra-Balance Movement	
T2S Dedicated Cash Account Owner Reference	Shows the identification of the settlement restriction assigned by the instructing party.
	Only one field among 'T2S Dedicated Cash Account Owner Reference', 'Account Servicer Reference' or 'Third Party Reference' is filled in.
Account Servicer Reference	Shows the identification of the settlement restriction assigned by the CB.

Intra-Balance Movement	
	Only one field among 'T2S Dedicated Cash Account Owner Reference', 'Account Servicer Reference' or 'Third Party Reference' is filled in.
Third Party Reference	Shows the identification of the settlement restriction assigned by a third party.
	Only one field among 'T2S Dedicated Cash Account Owner Reference', 'Account Servicer Reference' or 'Third Party Reference' is filled in.
Reference	Shows the identification of the settlement restriction assigned by T2S.
Instructing Party BIC	Shows the BIC of the instructing party.
Instructing Party Parent BIC	Shows the parent BIC of the instructing party.
User Identification	Shows the user identification of the sending party.
Entry Date and Time	Shows the timestamp when the instruction is entered in T2S. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Intended Settlement Date	Shows the date when the instruction is eligible for settlement. Displayed format is: YYYY-MM-DD
Final Settlement Date and Time	Shows the business date and the calendar time when the settlement restriction is settled totally. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Actual Settlement Date and Time	Shows the business date and the calendar time when the last settlement occurred (partially or totally). Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Priority	Shows the priority of the settlement restriction from the possible values: ☐ Normal ☐ High ☐ Reserved
Balance and Cash Details	
T2S Dedicated Cash Account Owner BIC	Shows the BIC of the owner of the securities account.

Intra-Balance Movement	
T2S Dedicated Cash Account Number	Shows the T2S dedicated cash account used in the settlement restriction.
Original Settlement Amount	Shows the original amount stated in the settlement restriction.
Settled Settlement Amount	Shows the settled amount of the settlement restriction.
Balance from	
Restriction Type	Shows the code defined in reference data to identify the restriction from which the cash have to be restricted/unrestricted.
Restriction Processing Type	Shows the type of processing T2S shall apply for the restriction from the possible values: ☐ Rejection ☐ Reservation ☐ Blocking ☐ Earmarking for auto-collateralisation ☐ Deliverable ☐ CoSD blocking
Balance to	
Restriction Type	Shows the code defined in reference data to identify the restriction to which the cash have to be restricted/unrestricted.
Restriction Processing Type	Shows the type of processing T2S shall apply for the restriction from the possible values: ☐ Rejection ☐ Reservation ☐ Blocking ☐ Earmarking for auto-collateralisation ☐ Deliverable ☐ CoSD blocking
Restriction Reference	Shows the unique identification of the restricted cash balance. Upon the settlement of the restriction, the 'Restriction Reference' is updated.
Status Information	

Intra-Balance Movement	
Status Information	
Cancellation Status	Shows the current cancellation status of the settlement restriction from the possible values: ☐ Cancelled ☐ Not cancelled
Settlement Status	Shows the current settlement status of the settlement restriction from the possible values: ☐ Settled ☐ Unsettled ☐ Partially settled
ISO Settlement Status	Shows the current ISO settlement status of the settlement restriction from the possible values: ☐ Pending ☐ Failing
Link	
Link Type	Shows the type of link of the instruction, the restriction is linked with from the possible values: ☐ After ☐ Before ☐ With ☐ Info
Reference Type	Shows the reference type of the instruction to be linked/ unlinked to from the possible values: ☐ Account Owner Settlement Instruction Reference ☐ Account Owner Settlement Instruction Reference ☐ Account Owner Intra Balance Movement Reference ☐ Account Owner Intra Position Movement Reference ☐ Account Servicer Reference ☐ Third Party reference ☐ T2S reference
Reference	Shows the identification of the instruction to be linked/unlinked to.
Reference Owner	Shows the BIC of the instructing party of the instruction to be linked/unlinked to.

Intra-Balance Movement	
	This field is only filled in if the If the 'Reference Type' is set to any value different than 'T2S reference'.
Pool Instruction Reference	Shows the collective reference identifying a set of messages.
Pool Instruction Counter	Shows the maximum number of instructions included in the pool.
Pool Reference Owner BIC	Shows the BIC of the owner of the Pool Instruction Reference

Links	This function enables you to display all the links data preventing settlement at the moment when the request is performed. This button is not available in the following cases: ☐ Cancellation Status = "cancelled" ☐ Settlement Status = "settled" Next screen: ☐ Links Preventing Settlement - screen [▶ 276]

2.3.3.7 Intra-Balance Movement - New Screen

Context of Usage

This screen contains a number of fields regarding settlement restrictions on cash (intra-balance movements). You can enter new data. Afterwards you can proceed further by clicking on the buttons below.

You can use this screen either in 2-eyes or in 4-eyes mode.

This screen is not relevant for CSD users.

Screen Access

☐ `Cash >> Settlement >> Intra-Balance Movements >>` *Intra-balance movements with current and historical status – search* screen >> Click on the *new* button

☐ `Cash >> Settlement >> Intra-Balance Movements >>` *Intra-balance movements with current and historical status – search* screen >> Click on the *search* button >> *Intra-balance movements – list* screen >> Click on the *details* button >> *Intra-balance movement – details* screen >> Click on the *copy* button

☐ `Cash >> Cash Account >> Cash Account Balances >>` *T2S DCA balances – search/list* screen >> Click on the *create intra balance movement* button

Privileges

To use this screen, you need the following privileges [▷ 1133]:

☐ Send new settlement restriction on cash on a dedicated cash account

☐ Link to an instruction/pool reference belonging to a specific party

☐ Unblock CoSD cash blocking related to cancelled CoSD settlement instructions on behalf of the relevant CSD in T2S

☐ Send new instruction using a specific instructing party

References

User Instructions Part

This screen is part of the following business scenarios:

☐ Enter a settlement restriction on cash [▷ 751]

☐ Copy a settlement restriction on cash [▷ 753]

Business Functionality Document

This screen corresponds to the following business function:

☐ Add settlement instruction or settlement restriction (T2S.GUI.SESE.INX.0070)

2.4.1.3 Available Report - Current Settlement Day Cash Information (Following Settlement Day Cash Forecast) Report - Details Screen

Context of Usage

This screen displays detailed information on the current settlement day cash in-formation report (or on the selected settlement day cash information report for the following settlement day). These reports are similar and therefore described to-gether.

The report projects the liquidity position at the end-of-day under consideration of settlement instructions, liquidity transfer orders and the calculated amount of out-standing credits in the system, at the moment of the report creation, which are valid for the current (or the following) business day.

The report displayed in this screen has to be already created in accordance with its report configuration.

This screen is not relevant for CSD, external CSD and CSD participant users.

Field Description

General Information	
Report Name	Shows the name of the report.
Delta Mode	Shows the delta mode of the report, which is always 'No'.

General Information	
Statement Number	Shows the statement number of the report composed of the business date and report type (2-letter abbreviation depending on report type and delta/full-Flag) and the sequential number, which is unique in T2S. The number increases for each report.
Report Number	Shows the sequential number of the report which is specific for a report receiving party. This number will only be displayed if the sending user belongs to a report receiving party.
Scheduled	Shows the name of the business event or time triggering the report creation.
Covered Period from	Shows the date and time from which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Covered Period to	Shows the date and time until which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Report Owner BIC	Shows the BIC of the party whose data is reported on.
Report Owner Parent BIC	Shows the parent BIC of the party whose data is reported on.
System Entity Wide Report	Shows whether the report is a community report (covering all information referring to a system entity) or a party based report (covering all information referring to a party) from the possible values: ☐ Yes ☐ No
Forecast Date	Shows the date of the current (or following) settlement day. Displayed format is: YYYY-MM-DD
Statement	
Repetitive Block For Each Reported Dedicated Cash Account	
T2S Dedicated Cash Account Number	Shows the dedicated cash account number for which the report is created.
Currency	Shows the currency code.
T2S Dedicated Cash Account Owner BIC	Shows the BIC of the party owning the T2S dedicated cash account.

Screen Reference Part

Services

Available Report - Current Settlement Day Cash Information (Following Settlement Day Cash Forecast) Report - Details Screen

General Information	
T2S Dedicated Cash Account Owner Name	Shows the name of the party that owns the dedicated cash account.
T2S Dedicated Cash Account Servicer BIC	Shows the BIC of the party operating the T2S dedicated cash account.
Balance	
Repetitive Block For Each Reported Dedicated Cash Account	
Balance Type	Shows the type of the balance from the possible values:
	□ Actual cash balance ('Sum of cash balance on the T2S dedicated cash account')
	□ Sum of Actual cash balance and pending liquidity transfers and settlement instructions eligible for cash forecast ('Projected sum of cash balance, liquidity transfer orders and settlement instructions')
	□ Outstanding intraday credit from auto-collateralisation
	□ Projected balance [18], i.e. Sum of cash balance and pending LTs and SI and Amount of Outstanding intraday credit from auto-collateralisation ('Sum projected cash balance')
Forecast Date	Shows the current date or the date of the next settlement day.
	Displayed format is: YYYY-MM-DD
Debit Credit Indicator	Shows if an operation is a credit or a debit from the possible values:
	□ + (for 'Credit')
	□ - (for 'Debit')
Balance	Shows the balance of the dedicated cash account.
	There will be always one cash balance per balance type.
Expected Postings	
Repetitive Block For Each Reported Dedicated Cash Account	

---

18   In UHB and T2S GUI, "projected balance" means the sum of cash balance and pending LTs and SIs and outstanding intraday credit from auto-collateralisation. In T2S UDFS and MyStandards, "projected balance" means the sum of cash balance and pending LTs and SIs (outstanding intraday credit from auto-collateralisation is not part of the calculation, i.e. is not subtracted).

General Information	
Posting Type	Shows the type of posting to be settled until end of day (or to be effective for the forecast day) from the possible values:
	☐ Debiting valid and eligible settlement instructions (i.e. matched and ready for settlement)
	☐ Debiting Settlement instructions, thereof non CORP released
	☐ Debiting Settlement instructions, thereof non CORP on hold
	☐ Debiting Settlement instructions, thereof CORP released
	☐ Debiting Settlement instructions, thereof CORP on hold
	☐ Crediting valid and eligible settlement instructions (i.e. matched and ready for settlement)
	☐ Crediting Settlement instructions, thereof non CORP released
	☐ Crediting Settlement instructions, thereof non CORP on hold
	☐ Crediting Settlement instructions, thereof CORP released
	☐ Crediting Settlement instructions, thereof CORP on hold
	☐ Debiting liquidity transfer orders
Number of Expected Postings	Shows the number of expected postings.
Debit Credit Indicator	Shows if an operation is a credit or a debit from the possible values:
	☐ + (for 'Credit')
	☐ - (for 'Debit')
Expected postings	Shows the total amount (including currency) expected for all postings of the same posting type, to be settled until end of day.

2.4.1.4 Available Report - Statement of Accounts - Details Screen

Context of Usage

This screen displays detailed information on the selected statement of accounts. No new report will be created by entering this screen. The report will be displayed in a new window. The report displayed in this screen has to be already created in accordance with its report configuration.

For large reports the user has the option to view them in portions of up to 500 transactions. Only the current portion of the report will be available for a down-load or print.

This screen is not relevant for CSD, external CSD and CSD participant users.

Field Description

General Statement Information	
Statement of Accounts	
Report Name	Shows the name of the report.
Delta Mode	Shows the delta mode of the report, which is always 'No'.

General Statement Information	
Statement Number	Shows the statement number of the report composed of the business date and report type (2-letter abbreviation depending on report type and Delta/Full-Flag) and the sequential number, which is unique in T2S. The number increases for each report.
Report Number	Shows the sequential number of the report which is specific for a report receiving party. This number will only be displayed if the sending user belongs to a report receiving party.
Scheduled	Shows the name of the business event or time triggering the report creation.
Covered Period from	Shows the date and time from which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Covered Period to	Shows the date and time until which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Report Owner BIC	Shows the BIC of the statement of accounts owning party.
Report Owner Parent BIC	Shows the parent BIC of the party whose statement of accounts is reported.
System Entity Wide Report	Shows whether the report is a community report (covering all information referring to a system entity) or a party based report (covering all information referring to a party) possible values: ☐ True ☐ False
Statement	
Repetitive Block For Each Reported Dedicated Cash Account	
T2S Dedicated Cash Account Number	Shows the T2S dedicated cash account number for which the report is created.
Currency	Shows the currency code.
T2S Cash Account Owner BIC	Shows the BIC of the party that owns the T2S dedicated cash account.
T2S Cash Account Servicer BIC	Shows the BIC of the party that operates the T2S dedicated cash account.
Balance	

General Statement Information	
Repetitive Block For Each Balance Type (Opening/ Closing) Within Every Statement Block	
Date	Shows the date of the balance. Displayed format is: YYYY-MM-DD
Debit Credit Indicator	Shows if an operation is a credit or a debit from the possible values: ☐ + (for 'Credit') ☐ - (for 'Debit')
Opening Balance at Start of Day/Closing Balance	Shows the balance of the T2S dedicated cash account.
Currency	Shows the currency code.
Postings	
Repetitive Block For Each Reported Dedicated Cash Account	
Date and Time of the Posting	Shows the date and the time when a booking took place. Displayed format is: YYYY-MM-DD hh:mm:ss
Posting Identifier	Shows the unique identification of a posting in T2S.
Debit Credit Indicator	Shows if an operation is a credit or a debit from the possible values: ☐ + (for 'Credit') ☐ - (for 'Debit')
Reversal Indicator	Indicates whether or not the entry is the result of a reversal. [19]
Amount	Shows the amount of money.
Currency	Shows the currency code.
Transaction Type	Shows the proprietary bank transaction code related to the underlying transaction type.
Instructing Party Reference	Shows the unique identification assigned by the instructing party of the underlying transaction.
Transaction Reference	Shows the unique identification assigned by the underlying clearing system.
Account Servicer Reference	Shows the account servicer reference of the settlement instruction.

---

19   Please note that the described functionality won´t be available before CSLD go-live.

General Statement Information	
	This field is only filled in, if the underlying instruction is a settlement instruction.
Account Owner Reference	Shows the account owner reference of the settlement instruction.
	This field is only filled in, if the underlying instruction is a settlement instruction.
Market Infrastructure Reference	Shows the identification of the settlement instruction as assigned by the T2S.
	This field is only filled in, if the underlying instruction is a settlement instruction.
Securities Account Owner BIC	Shows the BIC of the party owning the securities account.
	This field is only filled in, if the underlying instruction is a settlement instruction.
Securities Account Owner Parent BIC	Shows the parent BIC of the T2S party owning the securities account.
	This field is only filled in, if the underlying instruction is a settlement instruction.
Securities Account Number	Shows the number of the securities account to which the Dedicated Cash Account that this report refers to is linked and which was booked with the respective securities quantity
ISIN	Shows the ISIN of the security booked
Settled Quantity	Shows the quantity of securities that settled with this booking
Corporate Action Event Id	Shows the Corporate Action Event Id in case the Settlement Instruction is belonging to a Corporate Action
Corporate Action Event Type	Shows the value "OTHR", in case the Corporate Action Event Id is filled

Field Description

General Statement Information	
Report Name	Shows the name of the report.
Delta Mode	Shows if the report is a delta report or not. Possible values are: ☐ Yes

General Statement Information	
	☐ No
Statement Number	Shows the statement number of the report composed of the business date and report type (2-letter abbreviation depending on report type and Delta/Full-Flag) and the sequential number, which is unique in T2S. The number increases for each report.
Report Number	Shows the sequential number of the report which is specific for a report receiving party. This number will only be displayed if the sending user belongs to a report receiving party.
Frequency	Shows the frequency of the report, which is always 'DAILY'.
Scheduled	Shows the name of the business event or time triggering the report creation.
Activity Indicator	Shows whether the report displays activities or only lists information from the possible values: ☐ True ☐ False
Covered Period from	Shows the date and time from which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Covered Period to	Shows the date and time until which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Report Owner BIC	Shows the BIC of the party whose data are reported.
Report Owner Parent BIC	Shows the parent BIC of the party whose data are reported.
System Entity Wide Report	Shows whether the report is a community report (covering all information referring to a system entity) or a party based report (covering all information referring to a party) from the possible values: ☐ True ☐ False
General Information Repetitive block for each cancellation instruction for Intra-Balance Movement	

General Statement Information	
T2S Dedicated Cash Account Owner BIC	Shows the BIC of the party owning the T2S dedicated cash account.
T2S Dedicated Cash Account Owner Parent BIC	Shows the parent BIC of the party owning the dedicated cash account.
T2S Dedicated Cash Account Number	Shows the dedicated cash account number for which the report is created.
Request Reference	Shows the reference number of the request
Cancellation Status	Shows the status of the instruction from the possible values: ☐ DEND (for denied) ☐ NDEN (for not denied)
Reason Code	Shows the code of the reason why the instruction has a certain settlement status according to ISO20022.
Reason Code Description	Shows the detailed description of the reason code.
Execution Status	Shows the execution status of the instruction from the possible values: ☐ EXCD (for executed) ☐ NEXD (for not executed)
Reason Code	Shows the code of the reason why the instruction has a certain settlement status according to ISO 20022.
Reason Code Description	Shows the detailed description of the reason code.
Last Update of Status	Shows the date and time of the last status update. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Referenced Instruction	
References	
Account Owner Reference	Shows the identification of the instruction assigned by the T2S delivering/receiving party.
Account Servicer Reference	Shows the identification of the instruction assigned by the account servicer.
Third Party Reference	Shows the identification of the instruction assigned by a third party.

General Statement Information	
Intra-Balance Movement Reference	Shows the identification of the intra-balance movement.
Instruction Details	
Intended Settlement Date	Shows the date when the instruction is forwarded to settlement for the first time. Displayed format is: YYYY-MM-DD
Priority	Shows the priority of the payment instruction assigned by the originator of the instruction from the possible values: ☐ High ☐ Normal ☐ Reserved ☐ Top
Settlement Amount	Shows the amount as stated in the settlement instruction.
Currency	Shows the currency code.
Restriction Reference	Shows the identification of the restriction assigned by T2S.
Balance from Type	Shows the code to identify the restriction type for the balance from.
Issuer	Shows the entity assigning the identification. The fixed value is 'T2S'.
Scheme Name	Shows the name of the scheme.
Balance to Type	Shows the code to identify the restriction type for the balance to.
Issuer	Shows the entity assigning the identification. The fixed value is 'T2S'.
Scheme Name	Shows the name of the scheme.

General Statement Information	
Report Name	Shows the name of the report.
Delta Mode	Shows if the report is a delta report or not. Possible values are: ☐ Yes

General Statement Information	
	☐ No
Statement Number	Shows the statement number of the report composed of the business date and report type (2-letter abbreviation depending on report type and Delta/Full-Flag) and the sequential number, which is unique in T2S. The number increases for each report.
Report Number	Shows the sequential number of the report which is specific for a report receiving party. This number will only be displayed if the sending user belongs to a report receiving party.
Frequency	Shows the frequency of the report from the possible value: ☐ DAILY (for reports created on a daily basis)
Scheduled	Shows the name of the business event or time triggering the report creation.
Activity Indicator	Shows whether the report displays activities or only lists information from the possible values: ☐ True ☐ False
Statement Basis	Shows the basis of the statement from the possible value: ☐ SETT (for settled) The statement basis is a mandatory field in the message. The ISO message allows several possible values, but T2S allows only 'SETT'.
Sub Account Indicator	Shows if the statement reports holdings at subsafekeeping account level.
Covered Period from	Shows the date and time from which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Covered Period to	Shows the date and time until which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Report Owner BIC	Shows the BIC of the party whose data are reported.
Report Owner Parent BIC	Shows the parent BIC of the party whose data are reported.

General Statement Information	
System Entity Wide Report	Shows whether the report is a community report (covering all information referring to a system entity) or a party based report (covering all information referring to a party) from one of the possible values: ☐ True ☐ False
Securities Account Information	
Securities Account Information	
Securities Account Number	Shows the number of the securities account on which the report is based.
Securities Account Owner BIC	Shows the BIC of the party owning the securities account.
Securities Account Servicer BIC	Shows the BIC of the party operating the securities account.
Information on the Positions of the Account	
Total Position of a ISIN	
ISIN	Shows the ISIN of the security.
Position Type	Shows the position of the ISIN from the possible values: ☐ LONG (positive balance) ☐ SHOR (negative balance)
Settlement Type	Shows the type of settlement from the possible values: ☐ UNIT (Units) ☐ FAMT (Face Amount)
Total Quantity	Shows the total quantity of the respective security. Provision of '99999...99' in case oversizing occurs in the integer portion. Truncation of decimals in case oversizing occurs in the decimal portion.
Availability	
Settlement Type	Shows the type of settlement from the possible values: ☐ UNIT (Units) ☐ FAMT (Face Amount)
Available Balance	Shows the total quantity the security that is available.

General Statement Information	
	Provision of '99999...99' in case oversizing occurs in the integer portion. Truncation of decimals in case oversizing occurs in the decimal portion.
Settlement Type	Shows the type of settlement from the possible values: ☐ UNIT (Units) ☐ FAMT (Face Amount)
Not Available Balance	Shows the total quantity of the security that is not available. Provision of '99999...99' in case oversizing occurs in the integer portion. Truncation of decimals in case oversizing occurs in the decimal portion.
Balance Breakdown per Restriction Processing Type	
Restriction Processing Type	Shows the type of restriction processing.
Settlement Type	Shows the type of settlement from the possible values: ☐ UNIT (Units) ☐ FAMT (Face Amount)
Quantity	Shows the quantity of securities in the sub-balance for the market-specific restriction processing type. Provision of '99999...99' in case oversizing occurs in the integer portion. Truncation of decimals in case oversizing occurs in the decimal portion.
Balance Breakdown per Restriction Type	
Restriction Type	Shows the identification and description of a restriction.
Settlement Type	Shows the type of settlement from the possible values: ☐ UNIT (Units) ☐ FAMT (Face Amount)
Quantity	Shows the quantity of securities in the sub-balance for the market-specific restriction type. Provision of '99999...99' in case oversizing occurs in the integer portion. Truncation of decimals in case oversizing occurs in the decimal portion.
Quantity Breakdown per Restriction	
Restriction Reference	Shows the identification of the restriction assigned to a restricted securities position by T2S.

General Statement Information	
Settlement Type	Shows the type of settlement from the possible values: ☐ UNIT (Units) ☐ FAMT (Face Amount)
Quantity	Shows the remaining quantity of a securities position. Provision of '99999...99' in case oversizing occurs in the integer portion. Truncation of decimals in case oversizing occurs in the decimal portion.

This subframe is optional and only available for amendment instructions	
Link Type	Shows the link type of the instruction from the possible values: ☐ AFTE (Instruction has to be settled after or at the same time as the linked instruction) ☐ BEFO (Instruction has to be settled before or at the same time as the linked instruction) ☐ WITH (Instruction has to be settled at the same time as the linked instruction)
Linked Instruction T2S Technical Identifier	Shows the identification of the linked instruction assigned by T2S.
Linked Instruction Reference of Party	Shows the T2S actor reference of the LCMM instruction with which the relevant LCMM instruction is linked. If there is more than 1 link between LCMM instructions, the settlement link indicator is shown.
Received Account Owner BIC	Shows the BIC of the party who owns the identification of the instruction/pool to which this instruction is linked.
System Entity Reference Owner	Shows the identification of the system entity of the T2S party owner.
Message Number	Shows the identification of the message referenced in the linkage sequence.

General Statement Information
Pool Instruction Reference	Shows the identification of the pool groups.
Intra-Position Movement Information This subframe is optional and only available for intra-position movement information
ISIN	Shows the ISIN of the security.
Original Settlement Quantity	Shows the quantity of securities to be settled.
Settlement Type	Shows the type of settlement from the possible values: ☐ UNIT (Units) ☐ FAMT (Face amount)
Intended Settlement Date	Shows the date when the instruction is forwarded to settlement for the first time. Displayed format is: YYYY-MM-DD
Restriction Type Balance From	Shows a restriction type code of the position of a securities account which is debited.
Restriction Type Balance To	Shows a restriction type code of the position of a securities account which is credited.
Restriction Reference	Shows the identification of the restriction assigned by T2S.
Priority	Shows the priority of the payment instruction assigned by the originator of the instruction from the possible values: ☐ High ☐ Normal ☐ Reserved ☐ Top
Intra-Position Movement Technical Identifier	Shows the unique technical identification of the intra-position movement assigned by T2S.
Account Owner Reference	Shows the identification of the instruction assigned by the delivering/receiving party.
Account Servicer Reference	Shows the identification of the transaction assigned by the CSD.
Third Party Reference	Shows the identification of the instruction assigned by a third party.

General Statement Information	
Settlement Instruction Information **This subframe is optional and only available for settlement instruction information**	
Settlement Instruction Technical Identifier	Shows the unique identification of the settlement instruction assigned by T2S.
Account Owner Reference	Shows the identification of the settlement instruction assigned by the delivering/receiving party.
Account Servicer Reference	Shows the identification of the settlement instruction assigned by the CSD.
Third Party Reference	Shows the identification of the settlement instruction assigned by the third party.
ISIN	Shows the ISIN of the security.
Original Settlement Quantity	Shows the quantity of securities to be settled.
Settlement Type	Shows the type of settlement from the possible values: ☐ UNIT (Units) ☐ FAMT (Face amount)
Original Settlement Amount	Shows the amount as stated in the settlement instruction.
Settlement Currency	Shows the unique code of the currency.
Debit Credit Indicator	Shows if an operation is a credit or a debit from the possible values: ☐ CRDT (for credit) ☐ DBIT (for debit)
Intended Settlement Date	Shows the date when the instruction is forwarded to settlement for the first time. Displayed format is: YYYY-MM-DD
Trade Date	Shows the date when the contract was made. Displayed format is: YYYY-MM-DD
Settlement Parties This subframe is optional and only available for settlement instruction information

Settlement Instructions - Details Screen

General Statement Information	
Party BIC	Shows the BIC of the delivering depository.
Delivering CSD Participant	
Party BIC	Shows the BIC of the CSD participant delivering the securities.
Processing Identification	Shows the unambiguous identification of the transaction as assigned by the delivering party.
Client of the Delivering CSD Participant **Specifying the party only via party BIC or its name or the triplet of identification, issuer and scheme name.**	
Party BIC	Shows the BIC of the client of delivering CSD participant.
Identification	Shows the proprietary identification of the pre-mentioned party BIC.
Issuer	Shows the entity assigning the identification.
Scheme Name	Shows the name of the scheme.
Name	Shows the name of the client of delivering CSD participant.
Delivering Party 3 **Specifying the party only via party BIC or its name or the triplet of identification, issuer and scheme name.**	
Party BIC	Shows the BIC of delivering party 3.
Identification	Shows the proprietary identification of the pre-mentioned party BIC.
Issuer	Shows the entity assigning the identification.
Scheme Name	Shows the name of the scheme.
Name	Shows the BIC of delivering party 3.
Delivering Party 4 **Specifying the party only via party BIC or its name or the triplet of identification, issuer and scheme name.**	
Party BIC	Shows the BIC of delivering party 4.
Identification	Shows the proprietary identification of the pre-mentioned party BIC.
Issuer	Shows the entity assigning the identification.
Scheme Name	Shows the name of the scheme.
Name	Shows the name of delivering party 4.

General Statement Information	
Delivering Party 5	
Specifying the party only via party BIC or its name or the triplet of identification, issuer and scheme name.	
Party BIC	Shows the BIC of delivering party 5.
Identification	Shows the proprietary identification of the pre-mentioned party BIC.
Issuer	Shows the entity assigning the identification. The fixed value is 'T2S'.
Scheme Name	Shows the name of the scheme.
Name	Shows the name of delivering party 5.
Receiving Settlement Parties	
Receiving Depository	
Party BIC	Shows the BIC of the receiving depository.
Receiving CSD Participant	
Party BIC	Shows the BIC of the CSD receiving the securities.
Processing Identification	Shows the unambiguous identification of the transaction as assigned by the receiving party.
Client of the Receiving CSD Participant	
Specifying the party only via party BIC or its name or the triplet of identification, issuer and scheme name.	
Party BIC	Shows the BIC of the client of receiving CSD participant.
Identification	Shows the proprietary identification of the pre-mentioned party BIC.
Issuer	Shows the entity assigning the identification.
Scheme Name	Shows the name of the scheme.
Name	Shows the name of the client of receiving CSD participant.
Receiving Party 3	
Specifying the party only via party BIC or its name or the triplet of identification, issuer and scheme name.	
Party BIC	Shows the BIC of receiving party 3.
Identification	Shows the proprietary identification of the pre-mentioned party BIC.
Issuer	Shows the entity assigning the identification.
Scheme Name	Shows the name of the scheme.

General Statement Information	
Name	Shows the Name of receiving party 3.
Receiving Party 4 **Specifying the party only via party BIC or its name or the triplet of identific-** **ation, issuer and scheme name.**	
Party BIC	Shows the BIC of receiving party 4.
Identification	Shows the proprietary identification of the pre-mentioned party BIC.
Issuer	Shows the entity assigning the identification.
Scheme Name	Shows the name of the scheme.
Name	Shows the Name of receiving party 4.
Receiving Party 5 **Specifying the party only via party BIC or its name or the triplet of identific-** **ation, issuer and scheme name.**	
Party BIC	Shows the BIC of receiving party 5.
Identification	Shows the proprietary identification of the pre-mentioned party BIC.
Issuer	Shows the entity assigning the identification.
Scheme Name	Shows the name of the scheme.
Name	Shows the Name of receiving party 5.
Status Information Repetitive Block For Each Hold/Release Instruction Or Amendment Instruction	
Cancellation Status Reason Code	Shows the reason code of the cancellation status.

Field Description

General Statement Information	
Report Name	Shows the name of the report.
Delta Mode	Shows if the report is a delta report or not. Possible values are:
	☐ Yes
	☐ No
Statement Number	Shows the sequential number of the report assigned by the account servicer.
	The number increases for each report.
Report Number	Shows the sequential number of the report which is specific for a report receiving party.

General Statement Information	
	This number will only be displayed it the sending user belongs to a report receiving party.
Frequency	Shows the frequency of the report, which is always 'DAILY'.
Scheduled	Shows the name of the business event or time triggering the report creation.
Activity Indicator	Shows whether the report displays activities or only lists information from the possible values: ☐ True ☐ False
Covered Period from	Shows the date and time from which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Covered Period to	Shows the date and time until which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Report Owner BIC	Shows the BIC of the party whose data are reported.
Report Owner Parent BIC	Shows the parent BIC of the party whose data are reported.
System Entity Wide Report	Shows whether the report is a community report (covering all information referring to a system entity) or a party based report (covering all information referring to a party). from the possible values: ☐ Yes ☐ No
T2S Dedicated Cash Account Information	
Repetitive Block For Each Cancellation Instruction For Intra-Balance Movements	
T2S Dedicated Cash Account Owner BIC	Shows the BIC of the party owning the T2S dedicated cash account owner.
T2S Dedicated Cash Account Owner Parent BIC	Shows the parent BIC of the party owning the dedicated cash account.
T2S Dedicated Cash Account Number	Shows the T2S dedicated cash account for which the report is created.

General Statement Information	
Cancellation Status	Shows the status of the instruction from the possible values: ☐ DEND (for denied) ☐ NDEN (for not denied)
Reason Code	Shows code of the reason why the instruction has a certain settlement status according to ISO20022.
Reason Code Description	Shows the detailed description of the reason code.
Execution Status	Shows the execution status of the instruction from the possible values: ☐ EXCD (for executed) ☐ NEXD (for not executed)
Reason Code	Shows the code of the reason why the instruction has a certain settlement status according to ISO20022.
Reason Code Description	Shows the detailed description of the reason code.
Request Reference	Shows the Inbound LCMM Message Reference
Last Update of Status	Shows the date and time of the last status update. Displayed format is: YYYY-MM-DD hh:mm:ss
Referenced Instruction	
Repetitive Block For Each Cancellation Instruction For Intra-Balance Movements	
References	
Account Owner Reference	Shows the identification of the instruction assigned by the T2S delivering/receiving party.
Account Servicer Reference	Shows the identification of the instruction assigned by the account servicer.
Third Party Reference	Shows the identification of the instruction assigned by a third party.
Intra-Balance Movement Reference	Shows the unique identification of the intra-balance movement assigned by T2S.
Instruction Details	
Intended Settlement Date	Shows the date when the instruction is forwarded to settlement for the first time. Displayed format is: YYYY-MM-DD

General Statement Information	
Priority	Shows the priority of the payment instruction assigned by the originator of the instruction from the possible values: ☐ High ☐ Normal ☐ Reserved ☐ Top
Settlement Amount	Shows the amount as stated in the settlement instruction.
Currency	Shows the currency code.
Restriction Reference	Shows the identification of the restriction assigned by T2S.
Balance from Type	Shows a code to identify the restriction.
Issuer	Shows the entity that assigns the identification.
Scheme Name	Shows the description of the scheme.
Balance to Type	Shows a code to identify the restriction.
Issuer	Shows the entity that assigns the identification.
Scheme Name	Shows the description of the scheme.

Field Description

General Statement Information	
Report Name	Shows the name of the report.
Delta Mode	Shows if the report is a delta report or not. Possible values are: ☐ Yes ☐ No
Statement Number	Shows the statement number of the report composed of the business date and report type (2-letter abbreviation depending on report type and delta/full-flag) and the sequential number, which is unique in T2S. The number increases for each report.
Report Number	Shows the sequential number of the report which is specific for a report receiving party. This number will only be displayed it the sending user belongs to a report receiving party.
Scheduled	Shows the name of the business event or time triggering the report creation.
Frequency	Shows the frequency of the report from the possible value: ☐ DAILY (for reports created on a daily basis)

General Statement Information	
Activity Indicator	Shows whether the report displays activities or only lists information from the possible values: ☐ True ☐ False
Covered Period from	Shows the date and time from which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Covered Period to	Shows the date and time until which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Report Owner BIC	Shows the BIC of the party whose data are reported.
Report Owner Parent BIC	Shows the parent BIC of the party whose data are reported.
System Entity Wide Report	Shows whether the report is a community report (covering all information referring to a system entity) or a party based report (covering all information referring to a party) from the possible values: ☐ Yes ☐ No
Cancellation Instruction Information	
Actor Reference	Shows the reference assigned for a cancellation instruction by the T2S actor.
Securities Account Information	
Securities Account Number	Shows the number of the securities account.
Securities Account Owner BIC	Shows the BIC of the securities account.
Securities Account Servicer BIC	Shows the BIC of the party operating the securities account.
Processing Status of the Cancellation Instruction	
Execution Status	Shows the execution status of the instruction from the possible values: ☐ EXCD (for executed) ☐ NEXD (for not executed)

General Statement Information	
Execution Status Reason Code	Shows the ISO 20022 reason code why the related instruction is cancelled or the related cancellation request is executed.
Execution Status Additional Information	Shows additional information about the execution status.
Cancellation Status	Shows the status of the instruction from the possible values: ☐ DEND (for denied) ☐ NDEN (for not denied)
Cancellation Status Reason Code	Shows the reason code for the cancellation.
Cancellation Status Additional Information	Shows additional information on the cancellation status.
Acknowledged Accepted	Shows whether the instruction passed all business validations within T2S from the possible values: ☐ True ☐ False
Pending Cancellation	Shows whether the cancellation instruction is pending from the possible values: ☐ True ☐ False
Pending Cancellation Reason Code	Shows the reason code why the cancellation instruction is pending.
Last Update of Status	Shows the date and time of the last status update. Displayed format is: YYYY-MM-DD hh:mm:ss
References of Underlying Instruction	
Account Owner Reference	Shows the reference of an instruction which is assigned by the T2S delivering/receiving party.
Account Servicer Reference	Shows the identification of the transaction assigned by the CSD.
Third Party Reference	Shows the identification of the instruction assigned by a third party.

Field Description

General Statement Information	
Report Name	Shows the name of the report.
Delta Mode	Shows if the report is a delta report or not. Possible values are:
	☐ Yes

General Statement Information	
	☐ No
Statement Number	Shows the statement number of the report composed of the business date and report type (2-letter abbreviation depending on report type and delta/full-flag) and the sequential number, which is unique in T2S. The number increases for each report.
Report Number	Shows the sequential number of the report which is specific for a report receiving party. This number will only be displayed if the sending user belongs to a report receiving party.
Frequency	Shows the frequency of the report from the possible value: ☐ DAILY (for reports created on a daily basis)
Scheduled	Shows the name of the business event or time triggering the report creation.
Activity Indicator	Shows whether the report displays activities or only lists information from the possible values: ☐ True ☐ False
Covered Period from	Shows the date and time from which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Covered Period to	Shows the date and time until which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Report Owner BIC	Shows the BIC of the party whose data are reported.
Report Owner Parent BIC	Shows the parent BIC of the party whose data are reported.
System Entity Wide Report	Shows whether the report is a community report (covering all information referring to a system entity) or a party based report (covering all information referring to a party) from the possible values: ☐ Yes ☐ No
Securities Account Information	

General Statement Information	
Securities Account Number	Shows the number of the securities account on which the report is based.
Securities Account Owner BIC	Shows the BIC of the party owning the securities account.
Securities Account Servicer BIC	Shows the BIC of the party operating the securities account.
Transaction	
Repetitive Block For Each Pending Settlement Instruction	
Statement - Instruction References	
Account Owner Reference	Shows the identification of the instruction assigned by the delivering/receiving party.
Account Servicer Reference	Shows the identification of an instruction as assigned by the CSD.
Third Party Reference	Shows the identification of the instruction assigned by a third party.
Settlement Instruction Technical Identifier	Shows the identification of a settlement instruction as assigned by T2S.
Pool Instruction Reference	Shows the identification of a pool of settlement instructions or settlement restrictions.
Common Reference	Shows the identification the 2 trade counterparties agreed in order to identify the trade. This field is optional.
Statement - Trade Timeline	
Trade Date	Shows the date when the contract was made. Displayed format is: YYYY-MM-DD
Intended Settlement Date	Shows the date when the instruction is forwarded to settlement for the first time. Displayed format is: YYYY-MM-DD
Statement - Trade Information	
Movement Type Code	Shows the movement on a securities account from the possible values: ☐ Delivery ☐ Receive
Payment Type	Shows the type of the payment from the possible values: ☐ APMT (for against payment settlement)

General Statement Information	
	☐ FREE (for separate settlement)
ISIN	Shows the ISIN of the security.
Name	Shows the name of the party whose data are reported.
Remaining Quantity	Shows the quantity of securities to be settled. It shows the result of original settlement quantity deducting the settled settlement quantity.
Settlement Type	Shows the type of settlement from the possible values: ☐ UNIT (Units) ☐ FAMT (Face Amount)
Remaining Amount	Shows the amount to be settled. It shows the result of original/matched settlement amount deducting the settled settlement amount.
Debit Credit Indicator	Shows if an operation is a credit or a debit from the possible values: ☐ CRDT (for credit) ☐ DBIT (for debit)
Settlement Currency	Shows the currency of the settlement.
Place of Trade Market Identifier Code	Shows the identification of a financial market, as stipulated in the norm ISO 10383:2012 "Codes for exchanges and market identifications".
Place of Trade Description	Shows the description of the market when no Market Identifier Code is available.
Place of Trade Market Type Code	Shows the market type expressed as an ISO 20022 code.
Place of Trade Market Type Proprietary Identification	Shows the proprietary information, often a code, issued by the data source scheme issuer.
Place of Trade Market Type Proprietary Issuer	Shows the entity that assigns the identification.
Place of Trade Market Type Proprietary Scheme Name	Shows a short textual description of the scheme.
Place of Clearing	Shows the BIC code of the Clearing House involved in the settlement (if any).

General Statement Information	
Transaction Activity Code	Specifies the type of activity to which this instruction relates: ☐ BOLE: Borrowing and Lending Activity; ☐ CLAI: Market Claim; ☐ COLL: Collateral Activity; ☐ CORP: Corporate Action Activity; ☐ SETT: Settlement and Clearing Activity
Settlement Parties	
Delivering Settlement Parties This subframe is optional and only available for settlement instruction information	
Delivering Depository	
Party BIC	Shows the BIC of the delivering depository.
Processing Identification	Shows the unambiguous identification of the transaction as assigned by the delivering depository.
Settlement Instruction Information – Settlement Parties – Delivering Settlement Parties – Delivering CSD Participant	
Party BIC	Shows the BIC of the CSD participant delivering the securities.
Securities Account Number	Shows the securities account number of the delivering CSD participant.
Processing Identification	Shows the unambiguous identification of the transaction as assigned by the delivering CSD participant.
Client of the Delivering CSD Participant **Specifying the party only via party BIC or its name or the triplet of identification, issuer and scheme name.**	
Party BIC	Shows the BIC of the client of delivering CSD participant.
Identification	Shows the proprietary identification of the pre-mentioned party BIC.
Issuer	Shows the entity assigning the identification.
Scheme Name	Shows the name of the scheme.
Name	Shows the name of the client of delivering CSD participant.
Processing Identification	Shows the unambiguous identification of the transaction as assigned by the client of delivering CSD participant.

General Statement Information	
Receiving Settlement Parties This subframe is optional and only available for settlement instruction information	
Receiving Depository	
Party BIC	Shows the BIC of the receiving depository.
Processing Identification	Shows the unambiguous identification of the transaction as assigned by the receiving depository.
Receiving CSD Participant	
Party BIC	Shows the BIC of the CSD receiving the securities.
Securities Account Number	Shows the securities account number of the receiving CSD participant.
Processing Identification	Shows the unambiguous identification of the transaction as assigned by the receiving CSD participant.
Client of the Receiving CSD Participant **Specifying the party only via party BIC or its name or the triplet of identification, issuer and scheme name.**	
Party BIC	Shows the BIC of the client of receiving CSD participant.
Identification	Shows the proprietary identification of the pre-mentioned party BIC.
Issuer	Shows the entity assigning the identification.
Scheme Name	Shows the name of the scheme.
Name	Shows the name of the client of receiving CSD participant.
Process Identification	Shows the unambiguous identification of the transaction as assigned by the client of receiving CSD participant.
Statement - Further Information	
ISO Transaction Code	Shows the transaction code as defined in ISO20022
Settlement Transaction Condition Indicator	Shows the Settlement Transaction Condition Indicator. This field can show multiple Settlement Transaction Condition Indicators.
Partial Settlement Indicator	Shows if the settlement instruction is allowed to be subject to partial settlement from the possible values: ☐ NPAR (for no partial settlement allowed) ☐ PART (for partial settlement allowed without restrictions)

General Statement Information	
	☐ PARC (for partial settlement allowed but the settlement amount must not be below the threshold)
	☐ PARQ (for partial settlement allowed but the quantity must not be below the threshold)
Corporate Action Event Identification	Shows the identification of the instruction assigned by the account servicer to identify a corporate action event.
CSD Hold Status	Shows the hold status as set by the CSD from the possible values: ☐ Yes ☐ No (default value)
CoSD Hold Status	Shows whether the settlement instruction fulfills 1 CoSD rule configured in reference data from the possible values: ☐ Yes ☐ No (default value)
CoSD Rule Identific-ation	Shows the identification of the respective CoSD rule.
CSD Validation Hold Status	Shows whether the settlement instruction fulfills 1 market-specific restriction configured in reference data from the possible values: ☐ Yes ☐ No
Party Hold Status	Shows the hold status as set by the T2S party from the possible values: ☐ Yes ☐ No
Status Information	
Matching status	Shows the matching status of the (cancellation) instruction from the possible values: ☐ MACH (matched) ☐ NMAT (unmatched)
Accepted Timestamp (SF1)	Shows the accepted timestamp of the settlement instruc-tion. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Matched Timestamp (SF2)	Shows the matched timestamp of the settlement instruc-tion.

General Statement Information	
	In case the settlement instruction is unmatched no timestamp will be shown. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Settlement Status	Shows the status of the settlement instruction from the possible values: ☐ USET (for unsettled) ☐ PSET (for partially settled)
ISO Settlement Status	Shows the ISO settlement status of the settlement instruction from the possible values: ☐ Pending ☐ Failing
Settlement Status Reason Code	Shows the reason code why an instruction has a certain settlement status.
Settlement Status Reason Code Additional Information	Shows additional information on the reason code.
Cancellation Requested	Shows whether a cancellation was requested from the counterparty for this transaction from the possible values: ☐ Yes ☐ No
Acknowledged Accepted	Shows whether the account servicer acknowledged the instruction from the possible values: ☐ Yes ☐ No
Cancellation Status	Shows the current cancellation status of the instruction from the possible values: ☐ Cancelled ☐ Not cancelled
Pending Cancellation Status	Shows the status of the instruction from the possible values: ☐ CANC (for cancelled) ☐ NCAN (for not cancelled)
Pending Cancellation Status Reason Code	Shows the reason for the pending status.

General Statement Information	
Pending Cancellation Status – Reason Code Additional Information	Shows additional information on the reason code.

2.4.1.15 Available Report - Statement of Pending Intra-Balance Movements - Details Screen

Context of Usage

This screen displays detailed information on pending intra-balance movements.

The report displayed in this screen has to be already created in accordance with its report configuration.

This screen is not relevant for CSD, external CSD and CSD participant users.

Illustration 107: Available report – statement of pending intra-balance movements – details screen

Field Description

General Statement Information	
Report Name	Shows the name of the report.
Delta Mode	Shows if the report is a delta report or not. Possible values are: ☐ Yes ☐ No
Statement Number	Shows the statement number of the report composed of the business date and report type (2-letter abbreviation depending on report type and Delta/Full-Flag) and the sequential number, which is unique in T2S. The number increases for each report.
Report Number	Shows the sequential number of the report which is specific for a report receiving party. This number will only be displayed if the sending user belongs to a report receiving party.
Frequency	Shows the frequency of the report, which is always 'DAILY'.
Scheduled	Shows the name of the business event or time triggering the report creation.

General Statement Information	
Activity Indicator	Shows whether the report displays activities or only lists information from the possible values: ☐ True ☐ False
Covered Period From	Shows the date and time from which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Covered Period To	Shows the date and time until which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Report Owner BIC	Shows the BIC of the party whose data are reported.
Report Owner Parent BIC	Shows the parent BIC of the party whose data are reported.
System Entity Wide Report	Shows whether the report is a community report (covering all information referring to a system entity) or a party based report (covering all information referring to a party). from the possible values: ☐ Yes ☐ No
Cash Account Information	
T2S Dedicated Cash Account Owner BIC	Shows the BIC of the party owning the T2S dedicated cash account.
T2S Dedicated Cash Account Owner Parent BIC	Shows the parent BIC of the party owning the dedicated cash account.
T2S Dedicated Cash Account Number	Shows the T2S dedicated cash account for which the report is created.
Intra-Balance Movement Information Repetitive Block For Each Intra-Balance Movement	
Intra-Balance Movement Information	
Settlement Status	Shows the settlement status of the instruction from the possible values: ☐ USET (for unsettled) (default value) ☐ SETT (for settled) ☐ PSET (for partially settled)

General Statement Information	
ISO Settlement Status	Shows the ISO settlement status of the settlement restriction from the possible values: ☐ Pending ☐ Failing
Settlement Status Reason Code	Shows the reason code why an instruction has a certain settlement status.
Settlement Status Reason Information	Shows additional settlement status information.
Cancellation Status	Shows the status of the instruction from the possible values: ☐ DEND (for denied) ☐ NDEN (for not denied)
Cancellation Status Reason Code	Shows the reason code for the cancellation.
Cancellation Status Additional Information	Shows additional information on the cancellation status.
Last Update of Status	Shows the date and time of the last status update. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
References	
Intra-Balance Movement Technical Identifier	Shows the unique technical identification of the intra-balance movement assigned by T2S.
Account Owner Reference	Shows the reference of the instruction which is assigned by the T2S delivering/receiving party.
Account Servicer Reference	Shows the reference of the instruction assigned by the account referencer.
Third Party Reference	Shows the identification of the instruction assigned by a third party.
Pool Instruction Reference	Shows the identification of a pool of settlement instructions or settlement restrictions.
Restriction Reference	Shows the identification of the restriction assigned by T2S.
Settlement Information	

General Statement Information	
Restriction Type Balance from	Shows the restriction type code of a balance of a T2S dedicated cash account which is debited.
Restriction Type Balance to	Shows the restriction type code of a balance of a T2S dedicated cash account which is credited.
Currency	Shows the currency code.
Original Settlement Amount	Shows the amount as stated in the settlement instruction.
Intended Settlement Date	Shows the date when the instruction is forwarded to settlement for the first time. Displayed format is: YYYY-MM-DD
Priority	Shows the priority of the payment instruction assigned by the originator of the instruction from the possible values: ☐ High ☐ Normal ☐ Reserved ☐ Top
Instruction Link Information	
Link Type	Shows the link type of the instruction from the possible values: ☐ Afte (Instruction has to be settled after or at the same time as the linked instruction) ☐ Befo (Instruction has to be settled before or at the same time as the linked instruction) ☐ With (Instruction has to be settled at the same time as the linked instruction) ☐ Info (Specifies that the instructions are linked for information purposes only)
Message Number	Shows the identification of the message referenced in the linked sequence.
Linked Instruction Reference of a Party	Shows the T2S actor reference of the LCMM instruction linked to the relevant LCMM instruction. In case a link between 2 or more LCMM instructions exists, the ISO settlement link indicators ☐ After ☐ Before

General Statement Information	
	☐ All-or-none
	☐ are used.
Linked Instruction T2S Technical Identifier	Shows the technical identification of the linked instruction.
Received Account Owner BIC	BIC of the T2S party owner of the reference of the instruction/pool which this instruction is linked to.
Pool Instruction Reference	Shows the identification of a pool of settlement instructions or settlement restrictions.
Instructing Party	
Instructing Party BIC	Shows the BIC of the instructing party.
Instructing Party Parent BIC	Shows the parent BIC of the instructing party.
Entry Date and Time	Shows the entry date and time of an instruction. Displayed format: YYYY-MM-DD hh:mm:ss

Field Description

General Statement Information	
Report Name	Shows the name of the report.
Delta Mode	Shows if the report is a delta report or not. Possible values are: ☐ Yes ☐ No
Statement Number	Shows the statement number of the report composed of the business date and report type (2-letter abbreviation depending on report type and delta/full-flag) and the sequential number, which is unique in T2S. The number increases for each report.
Report Number	Shows the sequential number of the report which is specific for a report receiving party. This number will only be displayed if the sending user belongs to a report receiving party.
Scheduled	Shows the name of the business event or time triggering the report creation.
Frequency	Shows the frequency of the report from the possible value: ☐ DAILY (for reports created on a daily basis)
Activity Indicator	Shows whether the report displays activities or only lists information from the possible values: ☐ True

General Statement Information	
	☐ False
Covered Period from	Shows the date and time from which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Covered Period to	Shows the date and time until which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Report Owner BIC	Shows the BIC of the party whose data are reported.
Report Owner Parent BIC	Shows the parent BIC of the party whose data are reported.
System Entity Wide Report	Shows whether the report is a community report (covering all information referring to a system entity) or a party based report (covering all information referring to a party) from the possible values: ☐ Yes ☐ No
General Information	
Securities Account Number	Shows the number of the securities account.
Account Owner BIC	Shows the BIC of the party which owns the securities account.
Account Owner Parent BIC	Shows the parent BIC of the party.
Intra-Position Movement Information	
Repetitive Block For Each Intra-Position Movement	
Intra-Position Movement References	
Account Owner Reference	Shows the identification of the instruction assigned by the T2S delivering/receiving party.
Account Servicer Reference	Shows the identification of the transaction assigned by the CSD.
Third Party Reference	Shows the identification of the instruction assigned by a third party.
Intra-Position Movement Reference	Shows the identification of the instruction assigned by the T2S system.
Pool Identification	Shows the grouped LCMM instructions.

General Statement Information
Intra-Position Movement Details

Instructing Party BIC	Shows the BIC of the instructing party.
Instructing Party Parent BIC	Shows the parent BIC of the instructing party.
Entry Date and Time	Shows the date and time when the instruction entered T2S. Displayed format is: YYYY-MM-DD hh:mm:ss
Intended Settlement Date	Shows the date when the instruction is forwarded to settlement for the first time. Displayed format is: YYYY-MM-DD
Priority	Shows the priority of the payment instruction assigned by the originator of the instruction from the possible values: ☐ High ☐ Normal ☐ Reserved ☐ Top
ISIN	Shows the ISIN of the security.
Settlement Type	Shows the type of settlement from the possible values: ☐ UNIT (Units) ☐ FAMT (Face Amount)
Original Settlement Quantity	Shows the quantity of securities to be settled.
Restriction Type Balance from	Shows the restriction type code of a position of a debited securities account.
Issuer	Shows the entity assigning the identification. The fixed value is 'T2S'.
Scheme Name	Shows the name of the scheme.
Restriction Type Balance to	Shows the securities position to be credited.
Issuer	Shows the entity assigning the identification. The fixed value is 'T2S'.
Scheme Name	Shows the name of the scheme.

General Statement Information	
Restriction Reference	Shows the identification of the restriction assigned by T2S.
Status Information	
Last Update of Status	Shows the date and time of the last status update. Displayed format is: YYYY-MM-DD hh:mm:ss
Accepted Timestamp (SF1)	Shows the accepted timestamp of the settlement restriction. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Settlement Status	Shows the settlement status of the instruction from the possible values: ☐ USET (for unsettled) ☐ SETT (for settled) ☐ PSET (for partially settled)
ISO Settlement Status	Shows the ISO settlement status of the settlement restriction from the possible values: ☐ Pending ☐ Failing
Reason Code	Shows the code of the reason why the instruction has a certain settlement status according to ISO20022.
Reason Code Description	Shows the detailed description of the reason code.
Cancellation Status	Shows the status of the instruction from the possible values: ☐ Cancelled ☐ Not Cancelled
Reason Code	Shows the code of the reason why the related instruction has a certain settlement status according to ISO20022.
Reason Code Description	Shows the detailed description of the reason code.
Link Information	
Link Type	Shows the link type of the instruction from the possible values: ☐ Afte (instruction has to be settled after or at the same time as the linked instruction)

General Statement Information	
	☐ Befo (instruction has to be settled before or at the same time as the linked instruction)
	☐ With (instruction has to be settled at the same time as the linked instruction)
	☐ Info (specifies that the instructions are linked for information purposes only)
Message Number	Shows the identification of the message referenced in the linked sequence.
T2S Instruction Reference	Shows the T2S technical identification of the linked instructions.
T2S Actor Instruction Reference	Shows the identification of the instruction assigned by the T2S actor.
Pool Identification	Shows the grouped LCMM instructions.
Received Account Owner BIC	Shows the BIC of the T2S party owner of the referenced instruction/pool which the instruction is linked to.

Field Description

General Statement Information	
Report Name	Shows the name of the report.
Delta Mode	Shows if the report is a delta report or not. Possible values are:
	☐ Yes
	☐ No
Statement Number	Shows the statement number of the report composed of the business date and report type (2-letter abbreviation depending on report type and Delta/Full-Flag) and the sequential number, which is unique in T2S.
	The number increases for each report.
Report Number	Shows the sequential number of the report which is specific for a report receiving party.
	This number will only be displayed if the sending user belongs to a report receiving party.
Scheduled	Shows the name of the business event or time triggering the report creation.
Frequency	Shows the frequency of the report, which is always 'DAILY'.
Activity Indicator	Shows whether the report displays activities or only lists information from the possible values:
	☐ True

General Statement Information	
	☐ False
Covered Period From	Shows the date and time from which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Covered Period to	Shows the date and time until which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Report Owner BIC	Shows the BIC of the party whose data are reported.
Report Owner Parent BIC	Shows the parent BIC of the party whose data are reported.
System Entity Wide Report	Shows whether the report is a community report (covering all information referring to a system entity) or a party based report (covering all information referring to a party). from the possible values: ☐ Yes ☐ No
Intra-Balance Movement Information	
Repetitive Block for each Intra-Balance Movement	
Cash Account Information	
T2S Dedicated Cash Account Number	Shows the T2S dedicated cash account for which the report is created.
T2S Dedicated Cash Account Owner BIC	Shows the BIC of the party owning the T2S dedicated cash account.
T2S Dedicated Cash Account Owner Parent BIC	Shows the parent BIC of the party owning the dedicated cash account.
Intra-Balance Movement - References	
Intra-Balance Movement Technical Identifier	Shows the unique technical identification of the intra-balance movement assigned by T2S.
Actor Reference	Shows the identification of the instruction assigned by the T2S actor.

General Statement Information	
Account Owner Reference	Shows the identification of the instruction assigned by the T2S delivering/receiving party.
Account Servicer Reference	Shows the identification of the instruction assigned by the account servicer.
Third Party Reference	Shows the identification of the instruction assigned by a third party.
Pool Instruction Reference	Shows the identification of a pool of settlement instructions or settlement restrictions.
Restriction Reference	Shows the identification of the restriction assigned by T2S.
Intra-Balance Movement – Settlement Information	
Currency	Shows the currency code.
Settled Settlement Amount in the last status update	Shows the amount which was settled in the last status update.
Settled Settlement Amount	Shows the total settled amount.
Remaining Settlement Amount	Shows the settlement amount remaining still to be settled.
Actual Settlement Date	Shows the date of the settlement. Displayed format is: YYYY-MM-DD
Last Update of Status	Shows the date and time of the last status update. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Restriction Type Balance from	Shows the restriction type code of a balance of a T2S dedicated cash account which is debited.
Restriction Type Balance to	Shows the restriction type code of a balance of a T2S dedicated cash account which is credited.
Priority	Shows the priority of the payment instruction assigned by the originator of the instruction from the possible values: ☐ High ☐ Normal ☐ Reserved ☐ Top
Intra-Balance Movement – Instructing Party	

General Statement Information	
Instructing Party BIC	Shows the BIC of the instructing party.
Instructing Party Parent BIC	Shows the parent BIC of the instructing party.
Entry Date and Time	Shows the date and time when the instructions entered in T2S. Displayed format is: YYYY-MM-DD hh:mm:ss
Intra-Balance Movement - Status	
Settlement Status	Shows the settlement status of the instruction from the possible values: ☐ SETT (for settled) ☐ PSET (for partially settled)
Intra-Balance Movement – Instruction Link Information	
Repetitive Block for each Intra-Balance Movement with Link Information	
Link Type	Shows the link type of the instruction from the possible values: ☐ Afte (Instruction has to be settled after or at the same time as the linked instruction) ☐ Befo (Instruction has to be settled before or at the same time as the linked instruction) ☐ With (Instruction has to be settled at the same time as the linked instruction) ☐ Info (Specifies that the instructions are linked for information purposes only)
Message Number	Shows the identification of the message referenced in the linked sequence.
Linked Instruction Reference of Party	Shows the T2S actor reference of the LCMM instruction linked to the relevant LCMM instruction. In case a link between 2 or more LCMM instructions exists, the ISO settlement link indicators are shown from the possible values: ☐ After ☐ Before ☐ All-or-none

General Statement Information	
Linked Instruction T2S Technical Identifier	Shows the technical identification of the linked instruction.
Pool Instruction Reference	Shows the identification of a pool of settlement instructions or settlement restrictions.
Received Account Owner BIC	Shows the BIC of the T2S party owner of the reference of the instruction/pool which this instruction is linked to.

Covered Period from	Shows the date and time from which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Covered Period to	Shows the date and time until which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
System Entity Wide Report	Shows whether the report is a community report (covering all information referring to a system entity) or a party based report (covering all information referring to a party) from the possible values: ☐ True ☐ False
Report Owner BIC	Shows the party BIC of the report owner.
Report Owner Parent BIC	Shows the parent BIC of the report owner.
Allegement Details	

General Statement Information	
Instruction References	
Account Owner Reference	Shows the identification of the transaction that could potentially match with the notified allegement.
Account Servicer Reference	Shows the identification of the transaction assigned by the CSD. This field is optional.
Allegement Technical Identifier	Shows the identification of the transaction assigned by T2S.
Third Party Reference	Shows the identification of the instruction assigned by a third party. This field is optional.
Trade Identification	Shows the identification of the trade assigned by the investor or the trading party. This reference is used throughout the trade life cycle to access or update the trade details. This field is optional and repetitive.
Common Reference	Shows the identification the 2 trade counterparties agreed in order to identify the trade. This field is optional.
Allegement Status	
Allegement Status	Shows the status of the allegement from the possible values: ☐ Sent (default value) ☐ Removed ☐ Cancelled
Trade Timeline	
Trade Date	Shows the date when the contract was made. Displayed format is: YYYY-MM-DD
Settlement Date	Shows the date when the securities are to be delivered or received. Displayed format is: YYYY-MM-DD
Trade Information	
Securities Movement Type Code	Shows the movement on a securities account from the possible values: ☐ DELI (for delivery)

General Statement Information	
	☐ RECE (for receive)
Payment Type	Shows the type of the payment from the possible values: ☐ APMT (for against payment settlement) ☐ FREE (for separate settlement)
Beneficial Owner-ship	Shows if there is a change of beneficial ownership ☐ No ☐ Yes
Place of Trade Identifier	Shows the identification of the place of trade via the market identifier code. Either this field or the description of the place of trade is available.
Place of Clearing	Shows the BIC code of the Clearing House involved in the settlement (if any).
Description	Shows the description of the place of trade. Either this field or the MIC Id is available.
Type Code	Shows the market type code from the possible values: ☐ EXCH (for stock exchange) ☐ OTCO (for over the counter) ☐ PRIM (for primary market) ☐ SECM (for secondary market) ☐ VARI (for various) Either this field or the proprietary identification of the place of trade in addition to the issuer and scheme name is available.
Proprietary Identification	Shows the proprietary identification of the allegement assigned by the issuer of the data source scheme. Either this field in addition to the issuer and scheme name or the code of the place of trade is available.
Issuer	Shows the issuer of the proprietary identification. Either this field in addition to the proprietary identification and scheme name or the code of the place of trade is available.
Scheme Name	Shows the description of the data source scheme.

General Statement Information	
	Either this field in addition to the proprietary identification and the issuer or the code of the place of trade is available.
ISIN	Shows the ISIN of the security.
Securities Name	Shows the name of the security.
Deal Price - Yielded	Shows whether the price is expressed as a yield from the possible values:
	☐ Yes
	☐ No
	This field is optional.
Deal Price – Value Type	Shows the type of the value in which the price is expressed.
	This field is optional and only filled in if the deal price is not expressed as a yield.
Deal Price – Rate %	Shows the price expressed as a rate.
	This field is optional.
Deal Price - Amount	Shows price expressed as the value of the security.
	This field is optional.
Deal Price - Currency	Shows the currency of the security.
	This field is optional.
Number of Days Accrued	Shows the number of days on which the interest rate accrues.
	This field is optional.
Settlement Quantity	
Settlement Quantity	Shows the quantity of the security to be settled.
Settlement Type	Shows the type of settlement from the possible values:
	☐ UNIT (Units)
	☐ FAMT (Face Amount)
Settlement Amount	
Debit Credit Indicator	Shows if an operation is a credit or a debit from the possible values:
	☐ CRDT (for credit)
	☐ DBIT (for debit)

General Statement Information	
Settlement Amount	Shows the amount to be paid or received in exchange for the securities.
Settlement Currency	Shows the currency of the settlement.
Original Ordered Amount	Shows the posting or settlement amount in its original currency. This field is only available, if a conversion from/into another currency has occurred.
Original Ordered Currency	Shows the currency of the original ordered amount. This field is only available, if a conversion from/into another currency has occurred.
Unit Currency	Shows the currency in which the rate of exchange is expressed in a currency exchange. This field is optional.
Quoted Currency	Shows the currency into which the base currency is converted in a currency exchange. This field is optional.
Exchange Rate	Shows the factor used for the conversion of an amount from 1 currency into another reflecting the price at which the currency was bought with another currency. This field is optional.
Resulting Amount	Shows the value and currency after a currency conversion. This field is optional.
Settlement Parameters	
CUM/EX Indicator	Shows if a security is traded with or without coupon from the possible values: ☐ CUM (for cum coupon) ☐ EX (for ex coupon)
ISO Transaction Type Code	Shows the ISO 20022 code of the securities transaction type. For details please see UDFS chapter 4.2.1.
Opt-Out ISO Settlement Transaction Condition Indicator	Shows the conditions under which the order/trade is to be settled.
Partial Settlement Indicator	Shows if the settlement instruction is allowed to be subject to partial settlement from the possible values: ☐ NPAR (for no partial settlement allowed)

General Statement Information	
	☐ PART (for partial settlement allowed without restrictions)
	☐ PARC (for partial settlement allowed but the settlement amount must not be below the threshold)
	☐ PARQ (for partial settlement allowed but the quantity must not be below the threshold)
Market Client Side	Shows the market or client side information as an ISO 20022 code from the possible values:
	☐ CLNT (for client side)
	☐ MAKT (for market side)
Settlement Parties	
Delivering Parties	
Delivering Depository	
Party BIC	Shows the BIC of the CSD delivering the securities.
Processing Identification	Shows the reference of the instruction assigned by the delivering depository. This field is optional.
Delivering CSD Participant	
Party BIC	Shows the BIC of the delivering CSD participant.
Securities Account Number	Shows the securities account number of the delivering CSD participant. This field is optional.
Processing Identification	Shows the reference of the instruction assigned by the delivering CSD participant. This field is optional.
Contact Details	Shows the contact details of the delivering CSD participant. This field is optional.
Declaration Details	Provides declaration details narrative relative to the party.
Client of the Delivering CSD Participant	
Party BIC	Shows the client of the delivering CSD participant BIC. This field is optional.
Identification	Shows the unique and unambiguous identifier, as assigned to a financial institution using a proprietary identification scheme.

General Statement Information	
	This field is optional.
Issuer	Shows the name of the issuer of the proprietary identifier.
	This field is optional.
Scheme Name	Shows the name of the scheme.
	This field is optional.
Name	Shows the name and address of the client.
	This field is optional.
Processing Identific-ation	Shows the unambiguous identification of the transaction for the party identified.
	This field is optional.
Contact Details	Shows the contact details of the client.
	This field is optional.
Safekeeping Ac-count	Account to or from which a securities entry is made.
Delivering Party 3	
Party BIC	Shows the BIC of the delivering party 3.
	This field is conditional.
Identification	Shows the identification of the processing provided by the party.
	This field is conditional.
Issuer	Shows the entity that assigns the identification.
	This field is conditional.
Scheme Name	Shows the name of the scheme.
	This field is conditional.
Name	Shows the name of the delivering party 3.
	This field is conditional.
Identification	Shows the unambiguous identification of the transaction for the delivering party 3 identified.
	This field is optional.
Contact Details	Shows the contact details of the delivering party 3.
	This field is optional.
Safekeeping Ac-count	Account to or from which a securities entry is made.

General Statement Information	
Delivering Party 4	
Party BIC	Shows the BIC of the delivering party 4. This field is conditional.
Identification	Shows the identification of the processing provided by the party. This field is conditional.
Issuer	Shows the entity that assigns the identification. This field is conditional.
Scheme Name	Shows the name of the scheme. This field is conditional.
Name	Shows the name of the delivering party 4. This field is conditional.
Identification	Shows the unambiguous identification of the transaction for the delivering party 4 identified. This field is optional.
Contact Details	Shows the contact details of the delivering party 4. This field is optional.
Delivering Party 5	
Party BIC	Shows the BIC of the delivering party 5. This field is conditional.
Identification	Shows the identification of the processing provided by the party. This field is conditional.
Issuer	Shows the entity that assigns the identification. This field is conditional.
Scheme Name	Shows the name of the scheme. This field is conditional.
Name	Shows the name of the delivering party 5. This field is conditional.
Identification	Shows the unambiguous identification of the transaction for the delivering party 5 identified. This field is optional.
Contact Details	Shows the contact details of the delivering party 5.

General Statement Information	
	This field is optional.
Settlement Parties	
Receiving Parties	
Receiving Depository	
Party BIC	Shows the BIC of the CSD receiving the securities.
Processing Identification	Shows the reference of the instruction assigned by the receiving depository. This field is optional.
Receiving CSD Participant	
Party BIC	Shows the BIC of the receiving CSD participant.
Securities Account Number	Shows the securities account number of the receiving CSD participant. This field is optional.
Processing Identification	Shows the reference of the instruction assigned by the receiving CSD participant. This field is optional.
Contact Details	Shows the contact details of the receiving CSD participant. This field is optional.
Declaration Details	Provides declaration details narrative relative to the party.
Client of the Receiving CSD Participant	
Party BIC	Shows the client of the receiving CSD participant BIC. This field is optional.
Identification	Shows the unique and unambiguous identifier, as assigned to a financial institution using a proprietary identification scheme. This field is optional.
Issuer	Shows the name of the issuer of the proprietary identifier. This field is optional.
Scheme Name	Shows the name of the scheme. This field is optional.
Name	Shows the name and address of the client. This field is optional.
Processing Identification	Shows the unambiguous identification of the transaction for the party identified.

General Statement Information	
	This field is optional.
Contact Details	Shows the contact details of the client.
	This field is optional.
Safekeeping Account	Account to or from which a securities entry is made.
Receiving Party 3	
Party BIC	Shows the BIC of the receiving party 3.
	This field is conditional.
Identification	Shows the identification of the processing provided by the party.
	This field is conditional.
Issuer	Shows the entity that assigns the identification.
	This field is conditional.
Scheme Name	Shows the name of the scheme.
	This field is conditional.
Name	Shows the name of the receiving party 3.
	This field is conditional.
Identification	Shows the unambiguous identification of the transaction for the receiving party 3 identified.
	This field is optional.
Contact Details	Shows the contact details of the receiving party 3.
	This field is optional.
Safekeeping Account	Account to or from which a securities entry is made.
Receiving Party 4	
Party BIC	Shows the BIC of the receiving party 4.
	This field is conditional.
Identification	Shows the identification of the processing provided by the party.
	This field is conditional.
Issuer	Shows the entity that assigns the identification.
	This field is conditional.
Scheme Name	Shows the name of the scheme.

General Statement Information	
	This field is conditional.
Name	Shows the name of the receiving party 4.
	This field is conditional.
Identification	Shows the unambiguous identification of the transaction for the receiving party 4 identified.
	This field is optional.
Contact Details	Shows the contact details of the receiving party 4.
	This field is optional.
Receiving Party 5	
Party BIC	Shows the BIC of the receiving party 5.
	This field is conditional.
Identification	Shows the identification of the processing provided by the party.
	This field is conditional.
Issuer	Shows the entity that assigns the identification.
	This field is conditional.
Scheme Name	Shows the name of the scheme.
	This field is conditional.
Name	Shows the name of the receiving party 5.
	This field is conditional.
Identification	Shows the unambiguous identification of the transaction for the receiving party 5 identified.
	This field is optional.
Contact Details	Shows the contact details of the receiving party 5.
	This field is optional.

2.4.1.20 Available Report - Statement of Transactions - Details Screen

Context of Usage   This screen displays detailed information on the selected statement of transactions. No new report will be created by entering this screen. The report will be shown in a new window. The report displayed in this screen has to be already created in accordance with its report configuration.

For large reports the user has the option to view them in portions of up to 500 transactions. Only the current portion of the report will be available for a download or print.

This screen is not relevant for CB and payment bank/settlement bank users.

Screen Access

☐ `Services >> Additional Services >> Reports >>` *Available reports – search/list* screen >> Click on the *search* and/or *details* button >> *Available report – details* screen >> Click on the *details* button

Privileges

To use this screen, you need the following privilege [▶ 1121]:

☐ Report details query

References

User Instructions Part

This screen is part of the following business scenario:

☐ View available reports

Business Functionality Document

This screen corresponds to the following business function:

☐ Display generated report details (T2S.GUI.INSE.RPT.0090)

Screenshot
Illustration 112: Available report - statement of transactions - details screen

Field Descriptions

General Statement Information	
Report Name	Shows the name of the report.
Delta Mode	Shows if the report is a delta report or not. Possible values are: ☐ Yes

General Statement Information	
	☐ No
Statement Number	Shows the statement number of the report composed of the business date and report type (2-letter abbreviation depending on report type and Delta/Full-Flag) and the sequential number, which is unique in T2S. The number increases for each report.
Report Number	Shows the sequential number of the report which is specific for a report receiving party. This number will only be displayed if the sending user belongs to a report receiving party.
Scheduled	Shows the name of the business event or time triggering the report creation.
Frequency	Shows the frequency of the report, which is always 'DAILY'.
Statement Basis	Shows the basis of the statement from the possible value: ☐ SETT (for settled) The statement basis is a mandatory field in the message. The ISO message allows several possible values, but T2S allows only 'SETT'.
Activity Indicator	Shows whether the report displays activities or only lists information from the possible values: ☐ True ☐ False
Covered Period from	Shows the date and time from which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Covered Period to	Shows the date and time until which the data are covered in the report. Displayed format is: YYYY-MM-DD hh:mm:ss
Report Owner BIC	Shows the BIC whose data is reported on
Report Owner Parent BIC	Shows the Parent BIC whose data is reported on
System Entity Wide Report	Shows whether the report is a community report (covering all information referring to a system entity) or a party based report (covering all information referring to a party) from the possible values:

General Statement Information	
	☐ Yes
	☐ No
Securities Account Information	
Securities Account Number	Shows the number of the securities account on which the report is based.
Securities Account Owner BIC	Shows the BIC of the party owning the securities account.
Securities account Servicer BIC	Shows the BIC of the party operating the securities account.
Transaction	
Statement - Instruction References and Priority	
Account Owner Reference	Shows the identification of the instruction assigned by the T2S delivering/receiving party.
Account Servicer Reference	Shows the identification of the transaction assigned by the CSD.
Third Party Reference	Shows the identification of the instruction assigned by a third party.
Settlement Instruction Technical Identifier	Shows the identification of the instruction assigned by T2S.
Pool Instruction Reference	Shows the identification of a pool of settlement instructions or settlement restrictions.
Common Reference	Shows the identification the 2 trade counterparties agreed in order to identify the trade. This field is optional.
Statement - Trade Timeline	
Trade Date	Shows the date when the contract was made. Displayed format is: YYYY-MM-DD
Intended Settlement Date	Shows the date when the instruction is forwarded to settlement for the first time. Displayed format is: YYYY-MM-DD
Actual Settlement Date	Shows the date of the settlement. Displayed format is: YY-MM-DD
Accepted Timestamp (SF1)	Shows the accepted timestamp of the settlement instruction. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs

General Statement Information	
Matched Timestamp (SF2)	Shows the matched timestamp of the settlement instruction. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Statement - Trade Information	
Movement Type Code	Shows the type of the movement on a securities account from the possible values: ☐ DELI (for delivery) ☐ RECE (for receive)
Payment Type	Shows the type of the payment from the possible values: ☐ APMT (for against payment settlement) ☐ FREE (for separate settlement)
ISIN	Shows the ISIN of the security.
Securities Name	Shows the name of the security.
Settled Settlement Quantity	Shows the settled settlement quantity which was settled on the current business day/during the reporting period.
Settlement Type	Shows the type of settlement from the possible values: ☐ UNIT (Units) ☐ FAMT (Face Amount)
Settled Settlement Amount	Shows the settled settlement amount which was settled on the current business day/during the reporting period.
Debit Credit Indicator	Shows if an operation is a credit or a debit from the possible values: ☐ CRDT (for credit) ☐ DBIT (for debit)
Currency	Shows the currency code.
Place of Trade Market Identifier Code	Shows the identification of a financial market, as stipulated in the norm ISO 10383:2012 "Codes for exchanges and market identifications".
Place of Trade Description	Shows the description of the market when no Market Identifier Code is available.
Place of Trade Market Type Code	Shows the market type expressed as an ISO 20022 code.
Place of Trade Market Type Proprietary Identification	Shows the proprietary information, often a code, issued by the data source scheme issuer.

General Statement Information	
Place of Trade Market Type Proprietary Issuer	Shows the entity that assigns the identification.
Place of Trade Market Type Proprietary Scheme Name	Shows a short textual description of the scheme.
Place of Clearing	Shows the BIC code of the Clearing House involved in the settlement (if any).
Beneficial Ownership	Shows if there is a change of beneficial ownership ☐ Yes ☐ No
Transaction Activity Code	Specifies the type of activity to which this instruction relates: ☐ BOLE: Borrowing and Lending Activity; ☐ CLAI: Market Claim; ☐ COLL: Collateral Activity; ☐ CORP: Corporate Action Activity; ☐ SETT: Settlement and Clearing Activity
Settlement Parties	
Delivering Parties	
Delivering Depository	
Party BIC	Shows the BIC of the CSD delivering the securities.
Delivering CSD Participant	
Party BIC	Shows the BIC of the delivering CSD participant.
Securities Account Number	Shows the securities account number of the delivering CSD participant. This field is optional.
Processing Identification	Shows the reference of the instruction assigned by the delivering CSD participant. This field is optional.
Client of the Delivering CSD Participant	
Party BIC	Shows the client of the delivering CSD participant BIC. This field is optional.

General Statement Information	
Identification	Shows the unique and unambiguous identifier, as assigned to a financial institution using a proprietary identification scheme. This field is optional.
Issuer	Shows the name of the issuer of the proprietary identifier. This field is optional.
Scheme Name	Shows the name of the scheme. This field is optional.
Name	Shows the name and address of the client. This field is optional.
Delivering Party 3	
Party BIC	Shows the BIC of the delivering party 3. This field is conditional.
Identification	Shows the identification of the processing provided by the party. This field is conditional.
Issuer	Shows the entity that assigns the identification. This field is conditional.
Scheme Name	Shows the name of the scheme. This field is conditional.
Name	Shows the name of the delivering party 3. This field is conditional.
Delivering Party 4	
Party BIC	Shows the BIC of the delivering party 4. This field is conditional.
Identification	Shows the identification of the processing provided by the party. This field is conditional.
Issuer	Shows the entity that assigns the identification. This field is conditional.
Scheme Name	Shows the name of the scheme. This field is conditional.
Name	Shows the name of the delivering party 4.

General Statement Information	
	This field is conditional.
Delivering Party 5	
Party BIC	Shows the BIC of the delivering party 5.
	This field is conditional.
Identification	Shows the identification of the processing provided by the party.
	This field is conditional.
Issuer	Shows the entity that assigns the identification.
	This field is conditional.
Scheme Name	Shows the name of the scheme.
	This field is conditional.
Name	Shows the name of the delivering party 5.
	This field is conditional.
Settlement Parties	
Receiving Parties	
Receiving Depository	
Party BIC	Shows the BIC of the CSD receiving the securities.
Receiving CSD Participant	
Party BIC	Shows the BIC of the receiving CSD participant.
Securities Account Number	Shows the securities account number of the receiving CSD participant.
	This field is optional.
Client of the Receiving CSD Participant	
Party BIC	Shows the client of the receiving CSD participant BIC.
	This field is optional.
Identification	Shows the unique and unambiguous identifier, as assigned to a financial institution using a proprietary identification scheme.
	This field is optional.
Issuer	Shows the name of the issuer of the proprietary identifier.
	This field is optional.
Scheme Name	Shows the name of the scheme.
	This field is optional.

General Statement Information	
Name	Shows the name and address of the client. This field is optional.
Receiving Party 3	
Party BIC	Shows the BIC of the receiving party 3. This field is conditional.
Identification	Shows the identification of the processing provided by the party. This field is conditional.
Issuer	Shows the entity that assigns the identification. This field is conditional.
Scheme Name	Shows the name of the scheme. This field is conditional.
Name	Shows the name of the receiving party 3. This field is conditional.
Receiving Party 4	
Party BIC	Shows the BIC of the receiving party 4. This field is conditional.
Identification	Shows the identification of the processing provided by the party. This field is conditional.
Issuer	Shows the entity that assigns the identification. This field is conditional.
Scheme Name	Shows the name of the scheme. This field is conditional.
Name	Shows the name of the receiving party 4. This field is conditional.
Receiving Party 5	
Party BIC	Shows the BIC of the receiving party 5. This field is conditional.
Identification	Shows the identification of the processing provided by the party. This field is conditional.
Issuer	Shows the entity that assigns the identification.

General Statement Information	
	This field is conditional.
Scheme Name	Shows the name of the scheme.
	This field is conditional.
Name	Shows the name of the receiving party 5.
	This field is conditional.
Statement - Further Information	
ISO Transaction Code	Shows the code of the transaction code as defined in ISO 20022.
Settlement Transaction Condition Indicator	Shows the Settlement Transaction Condition Indicator.
	This field can show multiple Settlement Transaction Condition Indicators.
Partial Settlement Indicator	Shows if the settlement instruction is allowed to be subject to partial settlement from the possible values:
	☐ NPAR (for no partial settlement allowed)
	☐ PART (for partial settlement allowed without restrictions)
	☐ PARC (for partial settlement allowed but the settlement amount must not be below the threshold)
	☐ PARQ (for partial settlement allowed but the quantity must not be below the threshold)
Corporate Action Event Identification	Shows the identification of the instruction assigned by the account servicer to identify a corporate action event.

2.4.1.21 Available Report – Daily Penalty List – Details Screen

Context of Usage

This screen displays detailed information on the Daily Penalty List report. The report displayed in this screen has to be already created in accordance with its report configuration. Hence, no new report will be created by entering this screen.

For large reports the user has the option to view them in portions of up to 200 penalties. Only the current portion of the report will be available for downloading or for printing.

This screen is only available for CSD authorised users and T2S Operator user.

Screen Access	☐ `Services >> Additional Services >> Reports >> ` *Available reports – search/list* screen >> Click on the *search* and/or *details* button >> *Available report – details* screen >> Click on the *details* button

Screenshot	

Illustration 113: Available report – daily penalty list – details screen

Field Description

Report General Details	
Report	Shows the name of the report.
Report Identification	Shows the penalty number of the report composed of
	the business date and report types, sent in pull and push mode by T2S, and the sequential number, which is unique in T2S.
	The number increases for each report.
Report Period/Date	Shows the date reported by the report.

Report General Details	
Frequency	Indicates the frequency of the generation of the report. The unique possible value is: ☐ DAIL
Penalty List Type	Shows the new or updated/removed detected penalties. The unique possible value is: ☐ FWIS this code is used to report a Daily Penalty List created for the first time.
Activity Indicator	Shows if the message contains records or not. The possible values are: ☐ True ☐ False
Report Owning Party BIC	Shows the Party BIC whose data is reported on.
Report Owning Party Parent BIC	Shows the Party Parent BIC whose data is reported on.
Account Servicer	
BIC of the CSD	Shows the CSD of the participant whose new penalties (i.e. the one detected on the previous business day) are reported in this message.
Currency, Date and Party	
Currency	Shows the currency of the penalties reported.
Date	Shows the detection date of the penalties.
Party BIC	Shows the BIC of the Party that manages the account on behalf of the party account owner.
Party Type	Shows the Party Type of the Party according to Reference Data. The possible values are:

Report General Details	
	☐ NCSD is provided when the CSD itself is the failing or non failing party of the penalty/claim. This is used to differentiate between the CSD and the CSD as participant of itself. It is needed because the AccountServicer/Depository of the party provided in the message is the BIC of the CSD of the party, not the parent BIC of the party. Consequently, without this additional identification, it wouldn't be possible to distinguish between a CSD and the CSD as participant of itself.
	☐ CCPA is provided when the failing or non failing party of the penalty/claim is a CCP; i.e.: in T2S this is done by checking if the party has a BIC in the Cash Penalties CCP List (list of BICs).
	☐ CSDP is provided when the failing or non failing party of the penalty/claim is neither a CSD nor a CCP and its party type is CSD Participant.
	☐ EXTE is provided when the failing or non failing party of the penalty/claim is neither a CSD nor a CCP and its party type is an external CSD in T2S.
Counterparty	
BIC of the CSD of the counterparty	Shows the CSD of the counterparty of the penalties reported in this block of the message
Counterparty BIC	Shows the BIC of the Party that manages the account on behalf of the counterparty account owner.

Report General Details	
Counterparty Type	Shows the BIC of the Party that manages the account on behalf of the counterparty account owner. The possible values are: ☐ NCSD ☐ CCPA ☐ CSDP ☐ EXTE
Aggregated Amount	Shows the net amount of all the newly detected penalties reported for the given business day in the related currency for the relevant party and counterparty.
Credit/Debit	Shows whether the Daily Aggregated Net Amount is due or to be received by the participant. The possible values are: ☐ DBIT(Debit) ☐ CRDT(Credit) If no value is retrieve, it will show "---"
Penalty	
Common ID	Shows the reference assigned by T2S to the penalty that is common for both the failing and the non-failing participant.
Individual ID	Shows the reference assigned by T2S to the penalty that is the individual identification of the penalty for the relevant account owner.
Type	Shows the type of the penalty. The possible values are: ☐ SEFP ☐ LMFP
Status	Shows the status of the penalty. The unique possible value is:

Report General Details	
	☐ ACTV
Amount of the Penalty	Shows the amount computed for the penalty and its corresponding currency.
Credit/Debit Indicator	Shows whether the amount of the penalty is due or to be received by the participant. The possible values are: ☐ DBIT(Debit) ☐ CRDT(Credit)
Calculation Method	Shows the calculation method used to calculate the penalty. The possible values are: ☐ SECU - The Penalty is based on the quantity of securities failed to be delivered and security penalty rate of the relevant Asset type. ☐ MIXE - The Penalty is based on the quantity of securities failed to be delivered and penalty rate is the discount rate of the relevant currency. ☐ CASH - Penalty is based on the amount of cash failed to be delivered and the penalty rate is the discount rate of the relevant currency. ☐ BOTH - Penalty is the sum of "SECU" and "CASH".
Number of Days	Shows the number of business days the penalty is applicable to.
Calculation Data	
Date	Shows the business day of each sub-amount that forms a penalty.
Missing Reference Data	This information is only provided for penalties where there is missing reference data needed for their calculation. The possible values are:

Report General Details	
	☐ TRUE – There is missing reference data on the applicable business day. ☐ FALSE – There is no missing reference data on the applicable business day. If not provided, it means the penalty could be calculated and no reference was missing.
ISIN	Shows the ISIN code of the security.
Security Subject to Penalties	Shows whether the security is subject to penalties on this business day or not. The possible values are: ☐ TRUE - The security is subject to penalties. ☐ FALSE - The security is not subject to penalties. When not informed, it will mean "TRUE".
Financial Instrument Type	Shows the type of the financial instrument. The possible values are: ☐ SHRS ☐ SOVR ☐ DEBT ☐ SECU ☐ ETFS ☐ UCIT ☐ MMKT ☐ EMAL ☐ OTHR If no value is retrieve, it will show "---"
Liquidity	Binary classification of securities which indicates whether the underlying instrument is liquid or illiquid.

Report General Details	
	Only provided if: ☐ The Security is Subject to penalties ☐ The Financial Instrument Type of the security (Classification type) is "SHRS", and ☐ The Calculation method code is "SECU" or "BOTH". The possible values are: ☐ Empty ("---"), it is not relevant for the calculation of the penalty or for information purposes whether the instrument is liquid or illiquid. ☐ TRUE, the underlying instrument is liquid. ☐ FALSE, the underlying instrument is illiquid.
Exchange Rate	Shows the value of one currency expressed in relation to another currency (i.e. ExchangeRate expresses the ratio between UnitCurrency and QuotedCurrency). If no value is retrieve, it will show "---"
Unit Currency	Shows the currency in which the rate of exchange is expressed in a currency exchange. It is always EUR. If no value is retrieve, it will show "---"
Quoted Currency	Shows the currency into which the base currency is converted, in a currency exchange. Possible values are: For first FX: The quoted currency is either the currency of the price when the security is in Units, or the currency of the security if the security is in FAMT. If no value is retrieve, it will show "---"

Report General Details	
Exchange Rate	Shows the second value of one currency expressed in relation to another currency (i.e. ExchangeRate expresses the ratio between UnitCurrency and QuotedCurrency), if any.
Unit Currency	Shows the currency in which the rate of exchange is expressed in a currency exchange. It is always EUR.
Quoted Currency	Shows the currency into which the base currency is converted, in a currency exchange. For second FX: The quoted currency is the currency of the penalty: For the time being, it is always DKK.
Place of Trade Market Identifier Code	Shows the identifier Code of the market in which a trade transaction has been executed. Informed only if Security is subject to penalties, Calculation method code is SECU or BOTH and the two underlying matched settlement instructions have the same MIC in their Place of Trade. If MIC differs, the value informed will be "empty".
SME Growth Market	Shows whether the instructions were traded in a SME Growth Market or not. Only provided if: ☐ The Security is Subject to penalties ☐ The Financial Instrument Type of the security (Classification type) is different from SOVR, and ☐ The Calculation method code is "SECU" or "BOTH". The possible values are:

Report General Details	
	☐ Empty ("---"), it is not relevant for the calculation of the penalty or for information purposes whether the instructions were traded on a SME Growth Market or not ☐ TRUE, the instructions were traded on a SME Growth Market. ☐ FALSE, the instructions were not traded on a SME Growth Market.
Security Penalty Rate	Shows the Securities Penalty Rate applicable for the Asset Type, used when the calculation method code of the penalty is "SECU" or "BOTH".
Cash Discount Penalty Rate	Shows the discount rate of the relevant currency for the business date. It is provided if the Security is subject to penalties and if the Calculation Method code is "CASH", "MIXE" or "BOTH".
Sub-amount Securities	Shows the amount of the penalty for this business day. It is only provided if the number of days is higher than one (i.e. when it is a LMFP and the block calculation details could have more than one instance) or if the calculation method is "BOTH" (in this case also Sub-amount cash is provided)
Sub-amount Cash	Shows the amount of the penalty for this business day. It is only provided if the number of business days is higher than one (i.e. when it is a LMFP and the block calculation details could have more than one instance) or if the calculation method is "BOTH" (in this case also Sub-amount securities is provided)
Related Transaction	
References	

Report General Details	
Account Owner Reference	Shows the reference of an instruction as assigned by the T2S Delivering/Receiving Party.
Account Servicer Reference	Shows the reference of an instruction as assigned by the CSD.
Market Infrastructure Reference	Shows the T2S settlement instruction identification.
Third Party Reference	Shows the reference assigned by the Third Party, if any.
Common Reference	Shows the reference of the Settlement Instruction this Settlement Instruction is matched with.
Corporate Action Event Identification	Shows the identification assigned by the account servicer to unambiguously identify a corporate action event
T2S Matching Reference	Shows the reference provided by T2S when the instruction is matched.
Reference Owner BIC	Shows the BIC of the instructing party of the settlement instruction.
Other details	
Securities Transaction Type	Shows the securities transaction type expressed as an ISO 20022 code from the possible values:
	☐ AUTO (for auto-collateralisation)
	☐ BSBK (for buy sell back)
	☐ BYIY (for buy-in)
	☐ CLAI (for market claim)
	☐ CNCB (for central bank collateral operation)
	☐ COLI (for collateral in)
	☐ COLO (for collateral out)
	☐ CONV (for depository receipt conversion)
	☐ CORP (for corporate action)
	☐ ETFT (for exchange traded funds)

Report General Details	
	☐ FCTA (for factor update)
	☐ INSP (for move of stock)
	☐ ISSU (for depository receipt issue)
	☐ MKDW (for mark down)
	☐ MKUP (for mark up)
	☐ NETT (for netting)
	☐ NSYN (for non syndicated)
	☐ OWNE (for external account transfer)
	☐ OWNI (for internal account transfer)
	☐ PAIR (for pair off)
	☐ PLAC (for placement)
	☐ PORT (for portfolio move)
	☐ REAL (for realignment)
	☐ REBL (Rebalancing
	☐ REDI (for withdrawal)
	☐ REDM (for redemption)
	☐ RELE (for depository receipt release cancellation)
	☐ REPU (for repo)
	☐ RODE (for return delivery without matching)
	☐ RVPO (for reverse repo)
	☐ SBBK (for sell buy back)
	☐ SBRE (for borrowing reallocation)
	☐ SECB (for securities borrowing)
	☐ SECL (for securities lending)
	☐ SLRE (for lending reallocation)
	☐ SUBS (for subscription)
	☐ SWIF (Switch From)
	☐ SWIT (Switch To)
	☐ SYND (for syndicate underwriters)
	☐ TBAC (for TBA closing)

Report General Details	
	☐ TRAD (for trade)
	☐ TRPO (for triparty repo)
	☐ TRVO (for triparty reverse repo)
	☐ TURN (for turnaround)
Intended Settlement Date	Shows the date at which the instruction becomes eligible to be submitted to settlement.
Securities Account Number	Shows the identification of the Securities Account of the Settlement Instruction.
Account Owner BIC	Shows the actual value for the party code owner of the Securities Account.
Securities Movement Type	Shows whether the movement on a securities account results from a deliver or a receive instruction. The possible values are: ☐ DELI – Delivery ☐ RECE – Receipt
Payment type code	Shows how the transaction is to be settled. The possible values are: ☐ APMT – Against payment settlement ☐ FREE – Separate settlement
Unit Quantity	Shows the unit quantity of securities failed to be delivered.
FAMT Quantity	Shows the FAMT quantity of securities failed to be delivered.
DCA Owner BIC	Shows the BIC of the T2S party owning the Dedicated Cash Account. Only in case of settlement instructions against payment.
Amount	Cash amount failed to be delivered, and its corresponding currency.

Report General Details	
	In case the instruction was partially settled at the moment of the end of cut-off processing used for the calculation of the SEFP, it is the remaining amount at that point in time. For LMFPs it is the matched amount.
Credit/Debit	It must be present when the Original Settlement Amount has a value. The possible values are: ☐ DBIT(Debit) ☐ CRDT(Credit)
Acknowledged Status TS	Shows the Calendar Date when the acceptance (SF1) of the settlement instruction has occurred
Matched Status Timestamp	Shows the Calendar Date when the matching (SF2) of the settlement instruction has occurred
Failed Reason	T2S sends this status when the Settlement Instruction has not been completely settled and the settlement is not possible at the Intended Settlement Date. It is only provided in case of 'SEFP'
Additional Reason	Shows the combination of the associated business rule and reason code reference, It is only provided in case of 'SEFP'
BD Event Identification	Shows the code identifying the event (i.e. Cut-off- Code identifying the event) It is only provided in case of 'SEFP'
Scheme Name	Shows the name of the scheme. Fixed content to 'EVTP' It is only provided in case of 'SEFP'
Issuer	Shows the entity assigning the identification. Fixed content to 'T2S'

Report General Details	
	It is only provided in case of 'SEFP'
Scheduled Time	Shows the effective time for the schedule of the cut-off
	It is only provided in case of 'SEFP'
Start Time	Shows the effective time for the trigger of the cut-off
	It is only provided in case of 'SEFP'
End Time	Shows the effective time for the closure of the Cut-off
	It is only provided in case of 'SEFP'

2.4.1.22 Available Report – List of Modified Penalties - Details Screen

Context of Usage

This screen displays detailed information on the List of Modified Penalties report. The report displayed in this screen has to be already created in accordance with its report configuration. Hence, no new report will be created by entering this screen.

For large reports the user has the option to view them in portions of up to 200 penalties. Only the current portion of the report will be available for downloading or for printing.

This screen is only available for CSD authorised users and T2S Operator user.

Illustration 114: Available report – list of modified penalties – details screen

Field Description

Report General Details	
Report	Shows the name of the report.
Report Identification	Shows the penalty number of the report composed of
	the business date and report types, sent in pull and push mode by T2S, and the sequential number, which is unique in T2S.
	The number increases for each report.
Reporte Period/FromData	Shows the start date of the range.
Report Period/ToDate	Shows the end date of the range.
Frequency	Indicates the frequency of the generation of the report.
	The unique possible value is:
	☐ DAIL
Penalty List Type	Shows the new or updated/removed detected penalties.
	The unique possible value is:
	☐ FWAM this code is used to report a penalty list that has been amended.
Activity Indicator	Shows if the message contains records or not.

Report General Details	
	The possible values are: ☐ True ☐ False
Report Owning Party BIC	Shows the Party BIC whose data is reported on.
Report Owning Party Parent BIC	Shows the Party Parent BIC whose data is reported on.
Account Servicer	
BIC of the CSD	Shows the CSD of the participant whose modified penalties are reported in this message.
Currency, Date and Party	
Currency	Shows the currency of the modifed penalties reported.
Date	Shows the detection date of the penalties.
Party BIC	Shows the BIC of the Party that manages the account on behalf of the party account owner.
Party Type	Shows the Party Type of the Party according to Reference Data. The possible values are: ☐ NCSD is provided when the CSD itself is the failing or the non failing party of the penalty/claim. This is used to differentiate between the CSD and the CSD as participant of itself. It is needed because the AccountServicer/Depository of the party provided in the message is the BIC of the CSD of the party, not the parent BIC of the party. Consequently, without this additional identification, it wouldn't be possible to distinguish between a CSD and the CSD as participant of itself.

Report General Details	
	☐ CCPA is provided when the failing or non failing party of the penalty/ claim is a CCP; i.e. In T2S this is done by checking if the party has a BIC in the Cash Penalties CCP List (list of BICs).
	☐ CSDP is provided when the failing or non failing party of the penalty/ claim is neither a CSD nor a CCP and its party type is CSD Participant.
	☐ EXTE is provided when the failing or non failing party of the penalty/claim is neither a CSD nor a CCP and its party type is an external CSD in T2S.
Counterparty	
BIC of the CSD of the counterparty	Shows the CSD of the counterparty of the penalties reported in this block of the message.
Counterparty BIC	Shows the BIC of the Party that manages the account on behalf of the counterparty account owner.
Counterparty Type	Shows the BIC of the Party that manages the account on behalf of the counterparty account owner. The possible values are: ☐ NCSD ☐ CCPA ☐ CSDP ☐ EXTE
Aggregated Amount	Shows the net amount of all the penalties reported for the given business day in the related currency for the relevant party and counterparty.

Report General Details	
Credit/Debit	Shows whether the Daily Modified Aggregated Net Amount is due or to be received by the participant.
	The possible values are:
	☐ DBIT(Debit)
	☐ CRDT(Credit)
	If no value is retrieve, it will show "---"
Penalty	
Common ID	Shows the reference assigned by T2S to the penalty and that is common for both the failing and the non-failing participant.
Individual ID	Shows the reference assigned by T2S to the penalty and that is the individual identification of the penalty for the relevant account owner.
Reallocation ID	Shows the Common Reference of either the penalty from which the reported penalty was re-allocated or the penalty to which the reported penalty has been re-allocated.
Type	Shows the type of the penalty.
	The possible values are:
	☐ SEFP
	☐ LMFP
Status	Shows the status of the penalty.
	The possible values are:
	☐ ACTV
	☐ REMO
	Note: If the status of the penalty is REMO, the attributes of "Calculation Details" are not visible.
Reason	Shows the reason of the status.
	The possible values are:

Report General Details	
	□ UPDT - Active penalty that has been updated.
	□ NEWP (New penalty resulting from the insertion of a Security Subject to Penalties with Valid From in the past, or from a contingency scenario)
	□ RALO - Active or Removed penalty has been re-allocated.
	□ SWIC - Active penalty has been switched (the failing and the non-failing participant have been swaped by the CSD).
	□ INSO - Penalty was removed because insolvency proceedings are opened against the failing participant.
	□ SESU - Penalty was removed because of ISIN suspension from settlement due to a reconciliation issue under.
	□ SUSP - Penalty was removed because of ISIN suspension from trading
	□ SEMP - Penalty removed because of settlement on multiple platforms.
	□ TECH - Penalty was removed because there were technical impossibilities at the CSD level that prevent settlement.
	□ OTHR - Removed Penalty due to a non-standard reason by the CSD.
Additional Status Reason	Shows the additional description of the reason why the penalty has been Removed with Reason OTHR or Switched.
Amount of the Penalty	Shows the amount of the modified penalty and its corresponding currency.

Report General Details	
Credit/Debit Indicator	Shows whether the penalty is due or to be received by the participant. The possible values are: ☐ DBIT ☐ CRDT
Calculation Method	Shows the calculation method used to calculate the penalty. The possible values are: ☐ SECU - The Penalty is based on the quantity of securities failed to be delivered and security penalty rate of the relevant Asset type. ☐ MIXE - The Penalty is based on the quantity of securities failed to be delivered and penalty rate is the discount rate of the relevant currency. ☐ CASH - Penalty is based on the amount of cash failed to be delivered and the penalty rate is the discount rate of the relevant currency ☐ BOTH - Penalty is the sum of "SECU" and "CASH".
Number of Days	Shows the number of business days the penalty is applicable to.
Calculation Data	
Date	Shows the business day of each sub-amount that forms a penalty.
Missing Reference Data	This information is only provided for penalties where there is missing reference data needed for the penalty calculation. The possible values are: ☐ TRUE – There is missing reference data on the applicable business day.

Report General Details	
	☐ FALSE – There is no missing reference data on the applicable business day. If not provided, it means the penalty could be calculated and no reference was missing.
ISIN	Shows the ISIN code of the security.
Security Subject to Penalties	Shows whether the security is subject to penalties on this business day or not. The possible values are: ☐ TRUE - The security is subject to penalties. ☐ FALSE - The security is not subject to penalties. When not informed, it will mean "TRUE".
Financial Instrument Type	Shows the type of the financial instrument. The possible values are: ☐ SHRS ☐ SOVR ☐ DEBT ☐ SECU ☐ ETFS ☐ UCIT ☐ MMKT ☐ EMAL ☐ OTHR If no value is retrieve, it will show "---"
Liquidity	Binary classification of securities which indicates whether the underlying instrument is liquid or illiquid. Only provided if: ☐ The Security is Subject to penalties

Report General Details	
	☐ The Financial Instrument Type of the security (Classification type) is "SHRS", and ☐ The Calculation method code is "SECU" or "BOTH". The possible values are: ☐ Empty ("---"), it is not relevant for the calculation of the penalty or for information purposes whether the instrument is liquid or illiquid. ☐ TRUE, the underlying instrument is liquid. ☐ FALSE, the underlying instrument is illiquid.
Exchange Rate	Shows the value of one currency expressed in relation to another currency (i.e. ExchangeRate expresses the ratio between UnitCurrency and QuotedCurrency). If no value is retrieve, it will show "---"
Unit Currency	Shows the currency in which the rate of exchange is expressed in a currency exchange. It is always EUR. If no value is retrieve, it will show "---"
Quoted Currency	Shows the currency into which the base currency is converted, in a currency exchange. The possible values are: For first FX: The quoted currency is either the currency of the price when the security is in Units, or the currency of the security if the security is in FAMT. If no value is retrieve, it will show "---"

Report General Details	
Exchange Rate	Shows the second value of one currency expressed in relation to another currency (i.e. ExchangeRate expresses the ratio between UnitCurrency and QuotedCurrency, if any.
Unit Currency	Shows the currency in which the rate of exchange is expressed in a currency exchange. It is always EUR.
Quoted Currency	Shows the currency into which the base currency is converted, in a currency exchange. For second FX: The quoted currency is the currency of the penalty: For the time being, it is always DKK.
Place of Trade Market Identifier Code	Shows the identifier Code of the market in which a trade transaction has been executed. Informed only if Security is subject to penalties, Calculation method code is SECU or BOTH and the two underlying matched settlement instructions have the same MIC in their Place of Trade. If MIC differs, the value informed will be "empty".
SME Growth Market	Shows whether the instructions were traded in a SME Growth Market or not. Only provided if: ☐ The Security is Subject to penalties ☐ The Financial Instrument Type of the security (Classification type) is different from SOVR, and ☐ The Calculation method code is "SECU" or "BOTH". The possible values are:

Report General Details	
	□ Empty ("---"), it is not relevant for the calculation of the penalty or for information purposes whether the instructions were traded on a SME Growth Market or not □ TRUE, the instructions were traded on a SME Growth Market. □ FALSE, the instructions were not traded on a SME Growth Market.
Security Penalty Rate	Shows the Securities Penalty Rate applicable for the Asset Type, used when the calculation method code of the penalty is "SECU" or "BOTH".
Cash Discount Penalty Rate	Shows the discount rate of the relevant currency for the business date. It is provided if the Security is subject to penalties and if the Calculation Method code is "CASH", "MIXE" or "BOTH".
Sub-amount Securities	Shows the amount of the penalty for this business day. It is only provided if the number of days is higher than one (i.e. when it is a LMFP and the block calculation details could have more than one instance) or if the calculation method is "BOTH" (in this case also Sub-amount cash is provided)
Sub-amount Cash	Shows the amount of the penalty for this business day. It is only provided if the number of days is higher than one (i.e. when it is a LMFP and the block calculation details could have more than one instance) or if the calculation method is "BOTH" (in this case also Sub-amount securities is provided)
Related Transactions	
References	

Report General Details	
Account Owner Reference	Shows the reference of an instruction as assigned by the T2S Delivering/Receiving Party.
Account Servicer Reference	Shows the reference of an instruction as assigned by the CSD.
Market Infrastructure Reference	Shows the T2S settlement instruction identification.
Third Party Reference	Shows the reference assigned by the Third Party, if any.
Common Reference	Shows the reference which indicates the Settlement Instruction this Settlement Instruction is matched with.
Corporate Action Event Identification	Shows the identification assigned by the account servicer to unambiguously identify a corporate action event
T2S Matching Reference	Shows the reference provided by T2S when the instruction is matched.
Reference Owner BIC	Shows the BIC for the instructing party of the settlement instruction.
Other details (displayed only for Penalties with Reason "NEWP")	
Securities Transaction Type	Shows the securities transaction type expressed as an ISO 20022 code from the possible values:
	☐ AUTO (for auto-collateralisation)
	☐ BSBK (for buy sell back)
	☐ BYIY (for buy-in)
	☐ CLAI (for market claim)
	☐ CNCB (for central bank collateral operation)
	☐ COLI (for collateral in)
	☐ COLO (for collateral out)
	☐ CONV (for depository receipt conversion)
	☐ CORP (for corporate action)
	☐ ETFT (for exchange traded funds)

Report General Details
☐ FCTA (for factor update)
☐ INSP (for move of stock)
☐ ISSU (for depository receipt issue)
☐ MKDW (for mark down)
☐ MKUP (for mark up)
☐ NETT (for netting)
☐ NSYN (for non syndicated)
☐ OWNE (for external account transfer)
☐ OWNI (for internal account transfer)
☐ PAIR (for pair off)
☐ PLAC (for placement)
☐ PORT (for portfolio move)
☐ REAL (for realignment)
☐ REBL (Rebalancing
☐ REDI (for withdrawal)
☐ REDM (for redemption)
☐ RELE (for depository receipt release cancellation)
☐ REPU (for repo)
☐ RODE (for return delivery without matching)
☐ RVPO (for reverse repo)
☐ SBBK (for sell buy back)
☐ SBRE (for borrowing reallocation)
☐ SECB (for securities borrowing)
☐ SECL (for securities lending)
☐ SLRE (for lending reallocation)
☐ SUBS (for subscription)
☐ SWIF (Switch From)
☐ SWIT (Switch To)
☐ SYND (for syndicate underwriters)
☐ TBAC (for TBA closing)

Report General Details	
	☐ TRAD (for trade)
	☐ TRPO (for triparty repo)
	☐ TRVO (for triparty reverse repo)
	☐ TURN (for turnaround)
Intended Settlement Date	Shows the date at which the instruction becomes eligible to be submitted to settlement.
Securities Account Number	Shows the identification of the Securities Account of the Settlement Instruction.
Account Owner BIC	Shows the actual value for the party code owner of the Securities Account.
Securities Movement Type	Shows whether the movement on a securities account results from a deliver or a receive instruction. The possible values are: ☐ DELI – Delivery ☐ RECE – Receipt
Payment type code	Shows how the transaction is to be settled. The possible values are: ☐ APMT – Against payment settlement ☐ FREE – Separate settlement
Unit Quantity	Shows the unit quantity of securities failed to be delivered.
FAMT Quantity	Shows the FAMT quantity of securities failed to be delivered.
Dedicated Cash Account Number	Shows the Dedicated Cash Account as per SF1 (if APTM)
DCA Owner BIC	Shows the BIC of the T2S party owning the Dedicated Cash Account. Only in case of settlement instructions against payment.

Report General Details	
Amount	Cash amount failed to be delivered, and its corresponding currency.
	In case the instruction was partially settled at the moment of the end of cut-off processing used for the calculation of the SEFP, it is the remaining amount at that point in time.
	For LMFPs it is the matched amount.
Credit/Debit	It must be present when the Original Settlement Amount has a value.
	The possible values are:
	☐ DBIT (Debit)
	☐ CRDT (Credit)
Acknowledged Status TS	Shows the Calendar Date when the acceptance (SF1) of the settlement instruction has occurred
Matched Status Timestamp	Shows the Calendar Date when the matching (SF2) of the settlement instruction has occurred
Failed Reason	T2S sends this status when the Settlement Instruction has not been completely settled and the settlement is not possible at the Intended Settlement Date.
	It is only provided in case of 'SEFP'
Additional Reason	Shows the combination of the associated business rule and reason code reference,
	It is only provided in case of 'SEFP'
BD Event Identification	Shows the code identifying the event (i.e. Cut-off- Code identifying the event)
	It is only provided in case of 'SEFP'
Scheme Name	Shows the name of the scheme.
	Fixed content to 'EVTP'
	It is only provided in case of 'SEFP'

Report General Details	
Issuer	Shows the entity assigning the identification. Fixed content to 'T2S' It is only provided in case of 'SEFP'
Scheduled Time	Shows the effective time for the schedule of the cut-off It is only provided in case of 'SEFP'
Start Time	Shows the effective time for the trigger of the cut-off It is only provided in case of 'SEFP'
End Time	Shows the effective time for the closure of the Cut-off It is only provided in case of 'SEFP'

Field Description

Report General Details	
Report	Shows the name of the report.
Report Identification	Shows the penalty number of the report composed of the business date and report types, sent in pull and push mode by T2S, and the sequential number, which is unique in T2S. The number increases for each report.
Report Period/Month	Shows the month reported (whose penalties
Frequency	Indicates the frequency of the genera-tion of the report. The unique possible value is: ☐ MNTH
Activity Indicator	Shows if the message contains records or not. The possible values are: ☐ True

Report General Details	
	☐ False
Report Owning Party BIC	Shows the Party BIC whose data is reported on.
Report Owning Party Parent BIC	Shows the Party Parent BIC whose data is reported on.
Account Servicer	
BIC of the CSD	Shows the CSD of the participant whose penalties are reported in this message.
Currency and Party	
Currency	Shows the currency of the penalties reported.
Party BIC	Shows the BIC of the Party that manages the account on behalf of the party account owner.
Party Type	Shows the Party Type of the Party according to T2S Reference Data. The possible values are: ☐ NCSD is provided when the CSD itself is the failing or non failing party of the penalty/claim. This is used to differentiate between the CSD and the CSD as participant of itself. It is needed because the AccountServicer/Depository of the party provided in the message is the BIC of the CSD of the party, not the parent BIC of the party. Consequently, without this additional identification, it won't be possible to distinguish between a CSD and the CSD as participant of itself. ☐ CCPA is provided when the failing or non failing party of the penalty/claim is a CCP; i.e. In T2S this is done by checking if the party has a BIC in the Cash Penalties CCP List (list of BICs).

Report General Details	
	☐ CSDP is provided when the failing or non failing party of the penalty/claim is neither a CSD nor a CCP and its party type is CSD Participant.
	☐ EXTE is provided when the failing or non failing party of the penalty/claim is neither a CSD nor a CCP and its party type is an external CSD in T2S.
Counterparty	
BIC of the CSD of the counterparty	Shows the CSD of the counterparty of the penalties reported in this block of the message.
Counterparty BIC	Shows the BIC of the Party that manages the account on behalf of the counterparty account owner.
Counterparty Type	Shows the BIC of the Party that manages the account on behalf of the counterparty account owner. The possible values are: ☐ NCSD ☐ CCPA ☐ CSDP ☐ EXTE
Aggregated Amount	Shows the monthly aggregated net amount of all the penalties computed for the business days of the previous month, in the related currency for the relevant party and counterparty.
Credit/Debit	Shows whether the Monthly Aggregated Net Amount is due or to be received by the participant. The possible values are: ☐ DBIT(Debit) ☐ CRDT(Credit)

Report General Details	
	If no value is retrieve, it will show "---"
Penalty	
Common ID	Shows the reference assigned by T2S to the penalty that is common for both the failing and the non-failing participant.
Individual ID	Shows the reference assigned by T2S to the penalty that is the individual identification of the penalty for the relevant account owner.
Reallocation ID	Shows the Common Reference of either the penalty from which the reported penalty was re-allocated or the penalty to which the reported penalty has been re-allocated.
Type	Shows the type of the penalty. The possible values are: ☐ SEFP ☐ LMFP
Amount of the Penalty	Shows the amount computed for the penalty and its corresponding currency.
Credit/Debit Indicator	Shows whether the penalty is due or to be received by the participant. The possible values are: ☐ DBIT(Debit) ☐ CRDT(Credit)
Calculation Method	Shows the calculation method used to calculate the penalty. The possible values are: ☐ SECU - The Penalty is based on the quantity of securities failed to be delivered and security penalty rate of the relevant Asset type.

Report General Details	
	☐ MIXE - The Penalty is based on the quantity of securities failed to be delivered and penalty rate is the discount rate of the relevant currency.
	☐ CASH - Penalty is based on the amount of cash failed to be delivered and the penalty rate is the discount rate of the relevant currency
	☐ BOTH - Penalty is the sum of "SECU" and "CASH".
Number of Days	Shows the number of business days the penalty is applicable to.

2.4.1.24 Data Changes - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for all static and dynamic data changes which were initiated in 4-eyes mode. You can use this screen to search for items which are waiting for approval, select those and approve or revoke them.

The search results will be displayed in a list, which is sorted by the values of the column 'Update Date and Time' in descending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

This function is only available in U2A mode.

Screen Access

☐ `Services >> Additional Services >> Data Changes`

☐ `Securities >> Settlement >> Data Changes`

☐ `Cash >> Liquidity >> Data Changes`

Privileges

To use this screen you need the following privileges [▶ 1127]:

☐ Data changes of a business object list query

☐ Data changes of a business object details query

References

User Instructions Part

This screen is part of the following business scenarios:

☐ Initiate an action in 4-eyes mode

☐ Approve an action in 4-eyes mode

Business Functionality Document

This screen corresponds to the following business functions:

☐ Query data change approval requests (T2S.GUI.OSSE.APR.0010)

☐ Display data changes approval request list (T2S.GUI.OSSE.APR.0020)

Screenshot
Illustration 116: Data changes – search/list screen

Field Description

Data Changes – Search Criteria	
Action Type	Select the type of action initiated by the first user for a dedicated static or dynamic data object from the possible values: ☐ All ☐ Each of the actions that can be done in 4-eyes-mode
Users Reference	Enter the identification the first user added to his request. Required format is: max. 35 characters (SWIFT-x)
4-Eyes Identification	Enter the identification of the data change, automatically assigned by T2S to an operation that has to be authorised by a second user. Required format is: max. 35 characters (SWIFT-x)
Object Identifier	Enter the object identifier of the added / changed / deleted object. It is the technical identifier of an object unless a business identifier is available for this object. Required format is: max. 35 characters (SWIFT-x)
Instructing Party	
Parent BIC	Enter the parent BIC of the instructing party.

Data Changes – Search Criteria	
	Required format is: max. 11 characters (SWIFT-x) If the 'Party BIC' field is filled in, this field is mandatory. This field is only filled for requests to 'Life Cycle Management and Matching' in 4-eyes mode.
Party BIC	Enter the BIC of the instructing party. Required format is: max. 11 characters (SWIFT-x) If the 'Parent BIC' field is filled in, this field is mandatory. This field is only filled for requests to 'Life Cycle Management and Matching' in 4-eyes mode.
Date of Update	
Date of Update - from	Enter the lower bound of the date from which the data change was requested. Required format is: YYYY-MM-DD The default value is the current calendar date. References for error messages [▷ 1213]: ☐ QMPC015 ☐ QMPC016
Date of Update - to	Enter the upper bound of the date until which the data change was requested. Required format is: YYYY-MM-DD The default value is the current calendar date. Reference for error message [▷ 1213]: ☐ QMPC015
T2S System User	
User	Enter the name of the last user who entered, edited or deleted the static or dynamic data.
Party BIC	Enter the BIC of the party which the last user belongs to. Required format is: max. 11 characters (SWIFT-x) If the 'Parent BIC' field is filled in, this field is mandatory.
Parent BIC	Enter the parent BIC of the party which the last user belongs to. Required format is: max. 11 characters (SWIFT-x) If the 'Party BIC' field is filled in, this field is mandatory.

Data Changes – Search Criteria	
Status	Select the processing status of the data change from the possible values: ☐ All (Default value) ☐ Awaiting approval ☐ Queued ☐ Approved ☐ Rejected ☐ Revoked
Data Changes - List	
Action Type	Shows the type of action, from all the actions that can be done in 4-eyes-mode, initiated by the first user for a dedicated static or dynamic data object.
Users Reference	Shows the identification by the first user added to his request.
4-Eyes Identification	Shows the identification of the change automatically assigned by T2S to an operation that has to be authorised by a second user.
Object Identifier	Shows the object identification returned by the subsequent module after successful business validation. This information will not be displayed for all records.
T2S System User	Shows the name of the last user who entered, edited or deleted the static or dynamic data.
T2S System User Party	Shows the BIC of the party which the last user belongs to.
Update Date and Time	Shows the timestamp when the first user entered, edited or deleted the static or dynamic data. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Status	Shows the status of the data change from the possible values: ☐ Awaiting approval ☐ Queued ☐ Approved ☐ Rejected ☐ Revoked

Buttons

Search	This function enables you to start a search according to the criteria entered. The results are displayed in a list on the same screen. If the search retrieves only only record, the *details* screen is displayed directly. Next screens: ☐ *Data changes – search/list* screen ☐ *Data change – details* screen [▷ 611] References for error messages [▷ 1213]: ☐ QMPC015 ☐ QMPC016
Reset	This function enables you to set default search criteria and blanks out all optional criteria. Next screen: ☐ *Data changes – search/list* screen
Details	This function enables you to display the details of the selected data change. Next screen: ☐ *Data change – details* screen [▷ 611]

2.4.1.25 Data Change - Details Screen

Context of Usage

This screen displays detailed information on the selected static or dynamic data changes, changes are highlighted in red. You can check the data and proceed further by clicking on the buttons below.

You can use this screen for approving/revoking static and dynamic data changes and to see details of already approved/revoked items.

This function is only available in U2A mode.

Illustration 117: Data change – details screen

Field Description

Selected Data Change	
Action Type	Shows the type of action initiated by the first user.
Users Reference	Shows the identification the first user added to his request.
4-Eyes Identification	Shows the identification assigned by T2S to an operation that has to be approved by a second user.

Selected Data Change	
Object Identifier	Shows the object identification of the static or dynamic data object returned by the subsequent module after a successful business validation. The object identifier includes the technical identification of the added, changed or deleted object.
	The object identification is not available for 'Life Cycle Management and Matching' data changes.
Instructing Party	
Instructing Party BIC	Shows the BIC of the instructing party.
	This field is only filled for requests to 'Life Cycle Management and Matching' in 4-eyes mode.
Parent BIC	Shows the parent BIC of the instructing party.
	This field is only filled for requests to 'Life Cycle Management and Matching' in 4-eyes mode.
Date and Time	Shows the timestamp when the user has entered the data.
	Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
T2S System User – First User	
User	Shows the name of the first user who entered, edited or deleted the static or dynamic data.
User Party BIC	Shows the BIC of the party which the first user belongs to.
Parent BIC	Shows the parent BIC of the party which the first user belongs to.
T2S System User – Second User	
User	Shows the name of the second user who entered, edited or deleted the static or dynamic data.
User Party BIC	Shows the BIC of the party which the second user belongs to.
Parent Party	Shows the parent BIC of the party which the second user belongs to.
Status	Shows the processing status of the data change from the possible values:
	☐ Awaiting approval
	☐ Queued
	☐ Approved
	☐ Rejected

Selected Data Change
☐   Revoked
Details of Selected Data Change
Shows a preview of the *details* screen of the object you are e.g. creating or editing. If the action type is set to 'New Data', this frame shows the new values which will be active after the second user approves the change. If the action type is set to 'Edit Data', this frame shows the newly changed values marked in a different colour. If the action type is set to 'Delete Data', this frame shows the currently active values which will be deleted after the second user approves the change.

Immediate Liquidity Transfer (example)	
Debit Cash Account	
Account Number*	Shows the T2S dedicated cash account to be debited.
Account Owner*	Shows the name of the account owner.
Liquidity Transfer	
User Reference*	Shows the identification of the liquidity transfer assigned by the T2S actor.
Amount*	Shows the amount of the initiated Immediate Liquidity Transfer.
Credit Cash Account	
Outbound Liquidity Transfer	Shows that the immediate liquidity transfer is an outbound liquidity transfer, if the radio button is checked.
Internal Liquidity Transfer	Shows that the immediate liquidity transfer is an internal liquidity transfer, if the radio button is checked.
RTGS Account*	Shows the cash account to be credited for the outbound liquidity transfer. If the immediate liquidity transfer is an 'Internal Liquidity Transfer', this field is not filled and greyed out.
Account Number*	Shows the cash account to be credited for the internal liquidity transfer. If the immediate liquidity transfer is an 'Outbound Liquidity Transfer', this field is not filled and greyed out.
List of Modifications	
The List of Modifications may contain several entries	

Selected Data Change	
Field Name	Name of the field, where the first user has changed data, entered new data or deleted data.
Old value	The old value is the currently active value of the field before the second user approves the changes.
New value	The new value is the pending value of the field which will be active, after the second user approved the changes.

Buttons

Approve	This function enables you to approve the action initiated by the first user. In case non-repudiation of origin is required: Upon clicking on the *approve* button you will be asked to enter your PIN for digital signature purposes (NRO). With the entry of the PIN, T2S attaches a digital signature to the instruction entered by the T2S actor.
	Next screen:
	☐ *Data changes – search/list* screen [▷ 607]
	This function is only available if the processing status of the data change is set to 'Awaiting Approval' and the T2S system user has the necessary privileges.
Revoke	This function enables you to revoke the action initiated by the first user. In case non-repudiation of origin is required: Upon clicking on the *revoke* button you will be asked to enter your PIN for digital signature purposes (NRO). With the entry of the PIN, T2S attaches a digital signature to the instruction entered by the T2S actor.
	Next screen:
	☐ *Data changes – search/list* screen [▷ 607]
	This function is only available if the processing status of the data change is set to 'Awaiting Approval' and the T2S system user has the necessary privileges.
Copy	This function enables you to copy fields to create a new data change with the same attributes.

	Next screen:
	□ *Respective new/edit* screen (filled with the values formerly entered by the first user.)
	This function is only available if the processing status of the data change is set to 'Revoked' or 'Rejected'.
Cancel	This function enables you to cancel the process and return to the previous screen.
	Next screen:
	□ *Data changes – search/list* screen [▶ 607]

2.4.2 Communication

2.4.2.1 Broadcast - Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for sent and received broadcasts. The search result will be displayed in a list, which is sorted by the values of the 'Creation Date and Time' column in descending order (default setting). After selecting an entry, you can proceed further by clicking on the buttons below.

When exporting the content of this screen, you receive the list and the corresponding details for each data record.

This function is only available in U2A mode.

There is no usage restriction for this screen.

🛈 **Hint**

A user may only view broadcasts until their validity elapses. The respective expiration date is automatically set to the current business date of creation + three business days.

Screen Access

□ `Services >> Communication >> Broadcasts`

Privileges

To use this screen, you need the following privilege [▶ 1123]:

□ Broadcast query

□ New broadcast

References

User Instructions Part

This screen is part of the following business scenarios:

□ Create a new broadcast [▶ 665]

☐ View a broadcast [▶ 666]

Business Functionality Document

This screen corresponds to no business function.

Screenshot
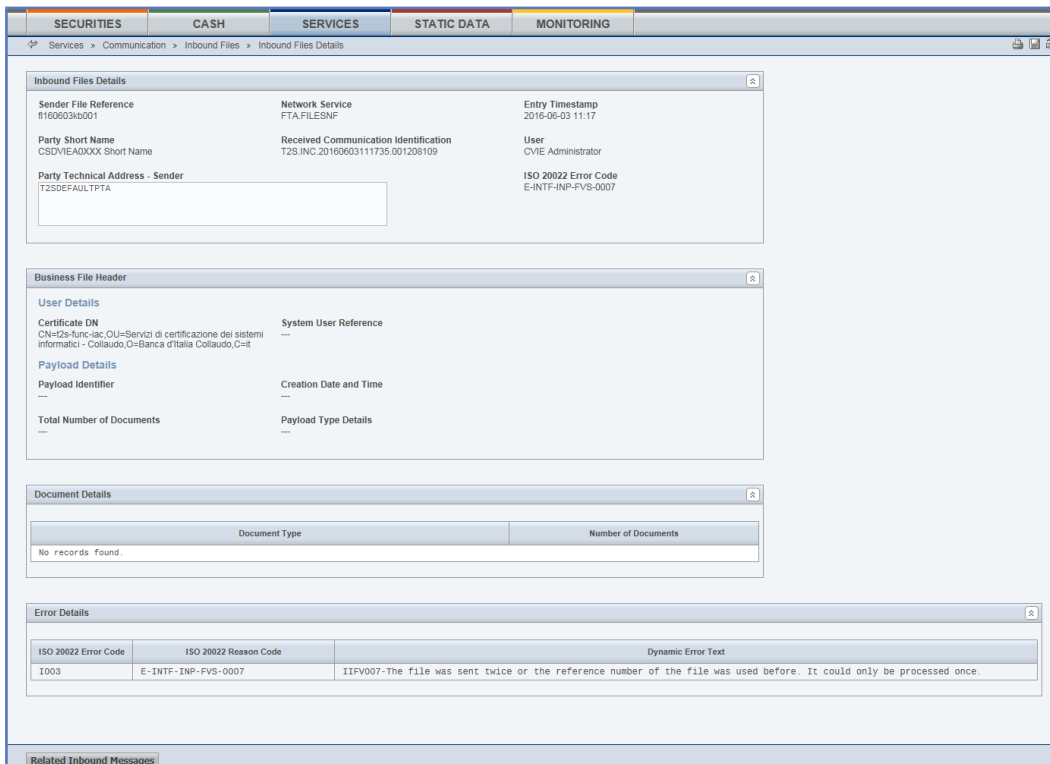

Illustration 122: Inbound file - details screen

Field Description

Inbound Files Details Information	
Sender File Reference	Shows the identification of the original file containing the messages.

Inbound Files Details Information	
Network Service	Shows the name of the network service.
Entry Date and Time	Shows the calendar date and time when the file entered T2S. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Sending Party Short Name	Shows the short name of the business sending party.
Received Communication	Shows the identification for the inbound communication assigned by T2S.
User	Shows the user who initiated the communication.
Party Technical Address	Shows the technical address (i.e. distinguished name) of the party.
ISO 20022 Error Code	Shows the ISO 20022 error code.
Business File Header	
User Information	
Certificate Distinguished Name	Shows the user information which was extracted from the signature tag in the file header.
System User Reference	Shows the identification of the system user which was extracted from the file header.
Payload Details	
Payload Identifier	Shows the identification of the file which was assigned by the sender of the file.
Creation Date and Time	Shows the date and time when the file was created by the sender. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Total Number of Documents	Shows the total number of messages within the file.
Payload Type Details	Shows the identification of the payload type and the declaration of the payload content.
Document Details **(Repetitive block for each business object of an inbound file)**	
Document Type	Shows the type of the document as specified in the ISO 20022 message type catalogue.
Number of Documents	Shows the number of messages for each declared type.

Inbound Files Details Information	
Error Details	
(Repetitive block for each message of an inbound file)	
ISO 20022 Error Code	Shows the error code for the rejection.
ISO 20022 Reason Code	Shows the reason code for the rejection.
Dynamic Error Text	Shows a detailed error text explaining why the file was rejected.

Buttons

Related Inbound Messages	This function enables you to display the inbound messages related to the selected inbound file.

Next screens:

Privileges   To use this screen, you need the following privilege [▷ 1131]:

☐ Inbound message details query

References   **User Instructions Part**

This screen is part of the following business scenario:

☐ View inbound communication [▷ 668]

Business Functionality Document

This screen corresponds to the following business function:

☐ Display message details (T2S.GUI.CCSE.MSG.0030)

Screenshot
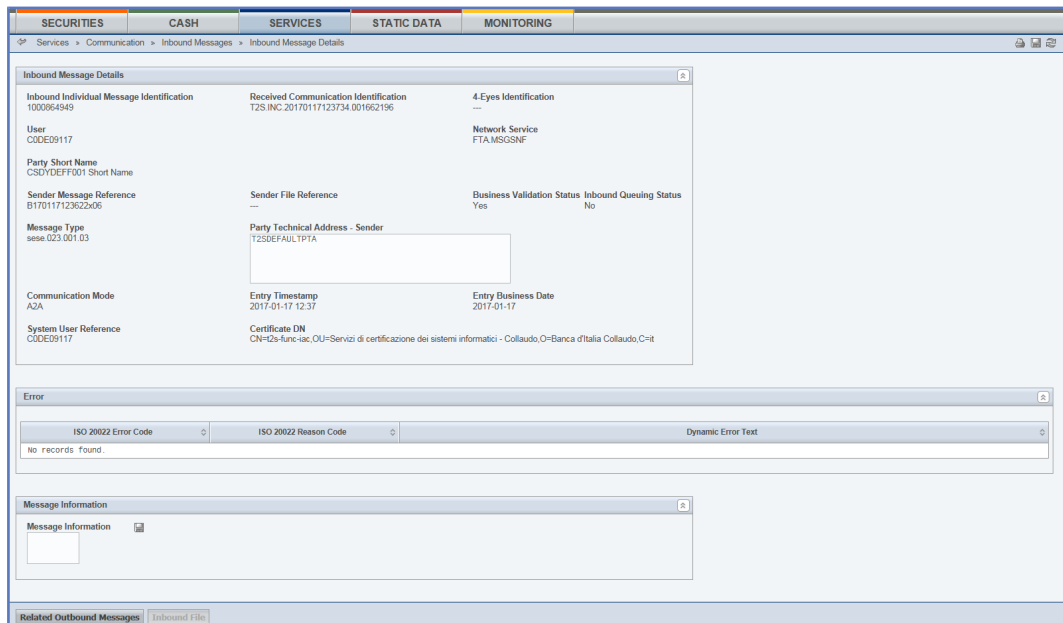

Illustration 124: Inbound message - details screen

Field Description

Inbound Message Details Information	
Entry Date and Time	Shows the calendar date and time when the inbound message entered T2S. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Communication Mode	Shows the mode of communication from the possible values: ☐ U2A ☐ A2A
Inbound Individual Message	Shows the identification of the individual message.

Inbound Message Details Information	
Received Communication	Shows the internal generated identification for the inbound communication.
4-Eyes Identification	Shows the identification of the 4-eyes mode which is only used in case of an approval request in 4-eyes mode.
Sender Message Reference	Shows the identification of the original message sent in the business application header.
Sender File Reference	Shows the identification of the original file containing the message.
Business Validation Status	Shows the business validation status from the possible values: ☐ True (business validation successful) ☐ False (business validation finished with error)
Inbound Queuing Status	Shows the inbound queuing status from the possible values: ☐ True (request is currently queued) ☐ False (request is not queued)
Message Type	Shows the message type according to the ISO 20022 standard.
Entry Business Date	Shows the business date when T2S received the message. Displayed format is: YYYY-MM-DD
User	Shows the user who initiated the communication.
Network Service	Shows the name of the network service.
Sending Party Short Name	Shows the short name of the business sending party.
Party Technical Address - Sender	Shows the technical address (i.e. distinguished name) of the sender. Displayed format is: max. 256 characters in UTF-8 except '<';'>'; '&'
ISO 20022 Error Code	Shows the error code for the rejection.
Certificate Distinguished Name	Shows the user information which was extracted from the signature tag in the file header.
System User Reference	Shows the identification of the system user as extracted from the business application header.

Inbound Message Details Information	
Repetitive block for each error	
ISO 20022 Error Code	Shows the error code for the rejection.
ISO 20022 Reason Code	Shows the reason code for the rejection.
Dynamic Error Text	Shows a detailed error text explaining why the file was rejected.
Message Information	
Message Information	Shows the detailed information of the U2A or A2A communication.
	The content of A2A message/U2A request is only displayed in case of small A2A messages/U2A requests. Bigger A2A messages/U2A requests can be displayed via the separate message *export* icon.
	Please note that for the U2A request the communication is the representation of the related http request.
	Pressing this icon exports the message based on the xml document. In addition root elements are present at the beginning and the end of the exported document. On top of the export additional information about 'Time', 'User' and 'T2S Screen of export' is available for documentation purpose.

Buttons

Illustration 128: Outbound message - details screen

Field Description

Outbound Message Details Information	
Delivery Date and Time	Shows the calendar date and time when the outbound message was delivered in T2S. Displayed format is: YYYY-MM-DD hh:mm:ss:µsµsµsµsµs
Outbound Individual Message Identification	Shows the identification of the outbound individual message.

Outbound Message Details Information	
Inbound Individual Message Identification	Shows the identification of the inbound individual message.
Outbound Message Sequence Number	Shows the counter for the external message sequence which is available once per party technical address.
Sender Message Reference	Shows the identification of the outbound message as assigned by the message sender.
Sender File Reference	Shows the identification of the original file containing the message(s).
Outbound Queuing Status	Shows the outbound queuing status of the message from the possible values: ☐ Yes ☐ No
Message Type	Shows the ISO 20022 request type of the message.
Delivery Business Date	Shows the business date when T2S started the delivery of the message. Displayed format is: YYYY-MM-DD
Network Service	Shows the name of the network service.
Receiving Party Short Name	Shows the short name of the receiving party.
Party Technical Address	Shows the technical address (i.e. distinguished name) of the receiving party. Reference for error message [▶ 1290]: ☐ IICR001
Message Information	
Message Information	Shows detailed information of the U2A or A2A request. The content of A2A message/U2A request is only displayed in case of small A2A messages/U2A requests. Bigger A2A messages/U2A requests can be displayed via the separate message *export* icon. Pressing this icon exports the message based on the xml document. In addition root elements are present at the beginning and the end of the exported document. On top of the export additional information about 'Time', 'User' and 'T2S Screen of export' is available for documentation purpose.

Buttons

Related Inbound Messages	This function enables you to display the inbound messages related to the selected outbound message. Next screen: □ *Inbound message – details* screen [▷ 635]
Resend	This function enables you to resend the selected outbound message. Next screen: □ *Outbound message – details* screen References for error messages [▷ 1290]: □ IICR001 □ IICR002
Outbound File	This function enables you to display the outbound file related to the selected outbound message. Next screen: □ *Outbound file – details* screen [▷ 643]

2.4.2.12 Resend Communication Screen

Context of Usage

This screen contains a number of fields regarding resend communication. You may select already sent outbound messages by entering:

□ a single sequence,

□ a range of sequences with explicitly mentioned values for

    □ 'Sequence – from' and 'Sequence – to' or

    □ 'Sequence – from' and open end or

    □ 'Sequence – to' and open start

□ a combination of a range of sequences and an additional single sequence

□ a T2S sender message reference.

You may also resend outbound files by entering a sender file reference. Afterwards you can proceed further by clicking on the buttons below.

You can use this screen either in 2-eyes or in 4-eyes mode.

There is no usage restriction for this screen.

Screen Access

□ `Services >> Communication >> Resend Communication`

Privileges

To use this screen, you need the following privilege [▷ 1141]:

☐　Resend communication

3 User Instructions Part

3.1 General

The user instructions part comprises scenarios adapted from typical user workflows. They are grouped into related activities, called business packages, which are further grouped into categories.

Furthermore, you can find business scenarios dedicated only to the T2S operator are highlighted by the adding 'T2S operator only' in the title.

Categories

The categories are a structural element and do not contain any information.

Business Packages

The business packages define an overall task. They include an overview and a list of the business scenarios. In detail, each business package description has the same structure and contains the following elements.

Overview	The overview describes the aim and the background of the business package. It also explains the interrelation of the business scenarios.
List of Business Scenarios	This section contains a list of all business scenarios belonging to the business package.
	The list is unordered if the business scenarios represent alternative ways to achieve the aim of the business package. It is ordered if the business scenarios have to be carried out sequentially. Sequential business scenarios do not necessarily have to be carried out directly after each other. The sequence only implies that 1 business scenario is a prerequisite for the following ones.

Business Scenarios

Each business scenario represents a single workflow and consists of single action steps, intermediate results and a final result. In detail, each business scenario description has the same structure and contains the following elements.

Context of Usage	The context of usage describes the aim of the business scenario and indicates whether this business scenario is mandatory or optional in order to fulfill the overall business package. It also contains the usage restrictions and the pre-requisites (excluding the privileges), if available.
Privileges	In this section, all the necessary privileges to access and use the involved screens are listed. First the privileges to access the first screen are mentioned, followed by the privileges necessary to proceed with the business scenario. Afterwards, the privileges for the following screens are mentioned in the same order.
Reference	This section lists all references to the screens involved, in order of their appearance in the business scenario.

Instructions   Each workflow is described from the start to the end, beginning with the access to the starting screen. The instructions involve a number of separate steps which lead you through a series of screens and actions. Each action step is focused on 1 single action. Intermediate results are included and the instructions end with a final result. Possible alternatives and repetitions are highlighted with a notice sign.

> **Example**
>
> 1. Action step 1
>
> 2. Action step 2
>
> ➡ Intermediate result
>
> 3. Action step 3
>
> ➡ Result

3.2 Communication

3.2.1 Usage of Broadcasts

Overview   This business package describes the creation of a new broadcast and how to view existing broadcasts.

To handle broadcasts, carry out the business scenario relevant to you from the list below.

Business Scenarios
- ☐ Create a new broadcast [▶ 665]
- ☐ View a broadcast [▶ 666]

3.2.1.1 Create a New Broadcast

Context of Usage   This business scenario describes the creation of a new broadcast in T2S. A broadcast is an information message simultaneously available to a selected group of T2S participants. It can either be a general notification or an operational notification of a planned event in the T2S system. A broadcast can be sent to all parties linked to a system entity.

Privileges   To carry out this business scenario, you need the following privileges:
- ☐ Broadcast query
- ☐ New broadcast

References   Further information on screens involved can be found in the screen reference part:
- ☐ *Broadcasts – search/list* screen [▶ 616]

□ *Broadcast – new* screen [▶ 621]

Instructions

1. Go to the *broadcasts – search/list* screen:

   `Services >> Communication >> Broadcasts`

2. Click on the *new* button.

   ⇨ The *broadcast – new* screen is displayed.

3. Enter all mandatory information on the screen.

Alternatives

To set all field to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

4. Click on the *submit* button.

2. Enter your PIN for digital signature purposes (NRO).

➡ A new broadcast has been created.

3.2.1.2 View a Broadcast

Context of Usage

This business scenario describes how to search for broadcasts and to view detailed information on a broadcast.

Hint

A user may only view broadcasts until their validity elapses. The respective expiration date is automatically set to the current business date of creation + three business days.

Privileges

To carry out this business scenario, you need the following privilege:

□ Broadcast query

References

Further information on screens involved can be found in the screen reference part:

□ *Broadcasts – search/list* screen [▶ 616]

□ *Broadcast – details* screen [▶ 619]

Instructions

1. Go to the *broadcasts –search/list* screen:

   `Services >> Communication >> Broadcasts`

2. Enter the relevant search criteria known to you (e.g. date, subject etc.).

3. Click on the *search* button.

   ⇨ The search result is displayed in a list on the same screen.

⇨ If the search retrieves only one record, the *broadcast – details* screen is displayed directly.

Alternative

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

---

4. Select the broadcast you would like to view in detail by clicking on an entry in the list.

5. Click on the *details* button.

➡ The *broadcasts – details* screen is displayed for the selected record.

3.2.2 Monitoring of Communication

Overview

This business package describes the monitoring of incoming and outgoing files or messages.

It enables you to resend outgoing communication or to check the incoming and outgoing files or messages (e.g. hold/release instructions, settlement instructions, amendment cash instructions) to/from T2S.

To monitor your communication, carry out the business scenarios relevant to you from the list below:

Business Scenarios

☐ Resend communication [▷ 667]

☐ View inbound communication [▷ 668]

☐ View outbound communication [▷ 669]

3.2.2.1 Resend Communication

Context of Usage

This business scenario describes how to resend communication in case you de-tect a gap. You can send already sent outbound messages by using a T2S mes-sage reference, a message sequence or a range of message sequences again. You may also resend outbound files by entering a sender file reference. This might be necessary if an outbound message or outbound file was lost.

Resending communication is one option for the monitoring of communication.

In order to resend messages or files the same privileges are required as for the initial message or file.

Privileges

To carry out this business scenario, you need the following privilege:

☐ Resend communication

Reference

Further information on screens involved can be found in the screen reference part:

Instructions

    ☐ *Resend communication* screen [▶ 657]

1. Go to the *resend communication* screen:

   `Services >> Communication >> Resend Communication`

2. Enter all mandatory information about the message or file you want to resend in the 'Resend Communication' frame.

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

---

3. Click on the *submit* button.

➡ You have resent one or more outbound messages or files.

3.2.2.2 View Inbound Communication

Context of Usage

This business scenario describes how to search for inbound messages and files and to view detailed information on these business items.

Viewing inbound communication is one option for the monitoring of communication.

This business scenario is not relevant for CSD participant and payment bank users.

Privileges

To carry out this business scenario, you need the following privileges:

    ☐ Inbound message list query

    ☐ Inbound message details query

    ☐ Inbound files list query

    ☐ Inbound files details query

Reference

Further information on screens involved can be found in the screen reference part:

    ☐ *Inbound messages – search/list* screen [▶ 628]

    ☐ *Inbound message – details* screen [▶ 635]

    ☐ *Inbound files – search/list* screen [▶ 622]

    ☐ *Inbound file – details* screen [▶ 625]

Instructions

1. Go to the *inbound messages – search/list* screen:

   `Services >> Communication >> Inbound Messages`

2. Enter all search criteria known to you about the inbound message you want to view.

3. Click on the *search* button.

    ⇨ The *inbound messages – list* screen is displayed.

⇨ If the search retrieves only one inbound message, the *inbound message – details* screen is displayed directly.

🛈 **Alternative**

You can also search for inbound files:

1. Go to the *inbound files – search/list* screen:
   `Services >> Communication >> Inbound Files`

2. Enter all search criteria known to you about the inbound file you want to view. According to your privileges, the party and other search criteria are already filled in.

3. Click on the *search* button.

   ➡ The *inbound files – list* screen is displayed.

   ➡ If the search retrieves only one inbound file, the *inbound file – details* screen is displayed directly.

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

4. Select the inbound message/file you are looking for by clicking on the entry in the list.

5. Click on the *details* button.

   ⇨ The *inbound message – details* screen/*inbound file – details* screen is displayed.

➡ You have viewed the details of the selected inbound message or file.

🛈 **Hint**

With the *inbound file* button on the *inbound message – details* screen and *related inbound messages* button on the *inbound file – details* screen you can directly access the related inbound file or message to your displayed business item.

3.2.2.3 View Outbound Communication

Context of Usage

This business scenario describes how to search for outbound messages and files and to view detailed information on these business items.

Viewing outbound communication is one option for the monitoring of communication.

This business scenario is not relevant for CSD participant and payment bank users.

Privileges   To carry out this business scenario, you need the following privileges:

☐ Outbound message list query

☐ Outbound message details query

☐ Outbound files list query

☐ Outbound files details query

Reference   Further information on screens involved can be found in the screen reference part:

☐ *Outbound messages – search/list* screen

☐ *Outbound message – details* screen

☐ *Outbound files – search/list* screen

☐ *Outbound file – details* screen

Instructions   1. Go to the *outbound messages – search/list* screen:

`Services >> Communication >> Outbound Messages`

2. Enter all search criteria known to you about the outbound message you want to view.

3. Click on the *search* button.

⇨ The *outbound messages – list* screen is displayed.

⇨ If the search retrieves only one outbound message, the *outbound message – details* screen is displayed directly.

🛈   **Alternative**

You can also search for outbound files:

1. Go to the *Outbound files – search/list* screen:

`Services >> Communication >> Outbound Files`

2. Enter all search criteria known to you about the outbound file you want to view. According to your privileges, the party and other search criteria are already filled in.

3. Click on the *search* button.

➡ The *outbound files – list* screen is displayed.

➡ If the search retrieves only one outbound file, the *outbound file – details* screen is displayed directly.

! **Alternative**

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

4. Select the outbound message/file you are looking for by clicking on the entry in the list.

5. Click on the *details* button.

   ⇨ The *outbound message – details* screen/*outbound file – details* screen is displayed.

➡ You have viewed the details of the selected outbound message or file.

! **Hint**

With the *outbound file* button on the *outbound message – details* screen and *re-lated outbound messages* button on the *outbound file – details* screen you can directly access the related outbound file or message to your displayed business item.

3.3 Liquidity Transfers

3.3.1 Creation of a New Immediate Liquidity Transfer Order

Overview

This business package describes the creation of a new liquidity transfer order, in order to transfer liquidity between two T2S dedicated cash accounts or from a T2S dedicated cash account to an external RTGS account.

To create a new liquidity transfer order, carry out the business scenario relevant to you from the list below.

Business Scenarios

☐ Create a new immediate liquidity transfer order

☐ Copy an immediate liquidity transfer order

3.3.1.1 Copy an Immediate Liquidity Transfer Order

Context of Usage

This business scenario describes how to create a new immediate liquidity trans-fer order which can be an internal liquidity transfer (between T2S dedicated cash accounts) or an outbound liquidity transfer (from a T2S dedicated cash account to an external RTGS account) based on the data of an already executed immediate liquidity transfer.

Copying a new immediate liquidity transfer order is one option for the creation of a new liquidity transfer order.

Before you create a new immediate liquidity transfer order, check whether the account to be debited exists in T2S. In the case of an internal liquidity transfer, check also whether the account to be credited exists in T2S. In the case of an outbound liquidity transfer, check whether the account to be credited is known to T2S.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Immediate liquidity transfer order list query

☐ Send new liquidity transfer

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Immediate liquidity transfer orders – search/list* screen

☐ *Immediate liquidity transfer order – new* screen [▷ 386]

Instructions

1. Go to the *immediate liquidity transfer orders – search/list* screen:

   `Cash >> Liquidity >> Immediate Liquidity Transfers`

2. Enter all search criteria known to you about the immediate liquidity transfer order you want to copy.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

4. Select the immediate liquidity transfer order you want to copy by clicking on an entry in the list.

5. Click on the *copy* button.

   ⇨ The *immediate liquidity transfer order – new* screen is displayed including all the information except for the user reference of the selected liquidity transfer.

6. Check all values of the immediate liquidity transfer and edit them if necessary.

🛈 **Alternatives**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

---

7. Click on the *submit* button.

8. Enter your PIN for digital signature purposes (NRO).

➡ A new immediate liquidity transfer order has been created.

3.4 Cash and Settlement Monitoring

3.4.1 Monitoring of Cash, Collateral and Limits Situation

Overview

This business package describes the monitoring of the cash, collateral and limits situation. The aim of this business package is to support your business monitoring. To monitor your cash, collateral and limits situation, carry out the business scenario relevant to you from the list below.

Business Scenarios

☐ View cash balances details and related postings [▶ 673]

☐ View cash balances details and related restrictions [▶ 674]

☐ View immediate liquidity transfer details [▶ 675]

☐ View standing/predefined liquidity transfer order details

☐ View overall liquidity [▶ 677]

☐ Change the limit of a payment bank

☐ Reimburse an outstanding intraday credit [▶ 679]

3.4.1.1 View Cash Balances Details and Related Postings

Context of Usage

This business scenario describes how to view the cash balance details and related postings allowing you to monitor and manage your balances, for instruction investigations, through queries.

It also allows you to view the instructions impacting particular cash balances during investigation and reconciliation procedures. In order to monitor the cash balances, you can query balances for a given CB or payment bank and then switch to the detailed view for a breakdown by restriction type or postings for a list of relevant instructions. To perform these queries and use these screens you must consult a party with existing T2S dedicated cash accounts.

Viewing cash balances details and related postings is one option for the monitoring of the cash, collateral and limits situation.

Privileges

To carry out this business scenario, you need the following privileges:

☐ T2S dedicated cash account balance query

☐ T2S dedicated cash account posting query

Reference

Further information on screens involved can be found in the screen reference part:

☐ *T2S DCA balances - search/list* screen [▶ 357]

☐ *T2S DCA balance - details* screen [▶ 361]

☐ *T2S DCA postings - search/list* screen [▶ 363]

Instructions

1. Go to the *T2S DCA balances – search/list* screen:
   `Cash >> Cash Account >> Cash Account Balances`

2. Enter all search criteria known to you about the relevant cash balances you want to view.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one cash balance, the *T2S DCA balance - details* screen is displayed directly.

4. Select the cash balance for which you want to view additional details by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *T2S DCA balance - details* screen is displayed.

6. To display the postings related to a particular cash balance detail, select the relevant restriction type by clicking on an entry in the list.

7. Click on the *postings* button.

   ⇨ The *T2S DCA postings - search/list* screen is displayed, containing a list of postings including the instruction type and references along with the timestamp.

➡ You have viewed the cash balances details and related postings.

3.4.1.2 View Cash Balances Details and Related Restrictions

Context of Usage

This business scenario describes how to view the cash balance details and related restrictions allowing you to monitor and manage your balances, for restriction use, through queries.

It is relevant for any T2S actors within payments banks, CBs or CSDs who wish to ensure that sufficient funds are present within a particular cash balance before any potential utilisation. It also allows you to view the restriction references available for use within future instructions. In order to monitor the cash balances, you can query balances for a given CB or payment bank and then switch to the detailed view for a breakdown by restriction type or reference. To perform these queries and use these screens you must consult a party with existing T2S dedicated cash accounts.

Viewing cash balances details and related restrictions is one option for the monitoring of the cash, collateral and limits situation.

Privileges

To carry out this business scenario, you need the following privileges:

☐ T2S dedicated cash account balance query

□ T2S dedicated cash account balance detailed restrictions query

Reference   Further information on screens involved can be found in the screen reference part:

□ *T2S DCA balances - search/list* screen [▷ 357]

□ *T2S DCA balance - details* screen [▷ 361]

□ *Cash restriction details - search/list* screen [▷ 337]

Instructions   1. Go to the *T2S DCA balances – search/list* screen:

`Cash >> Cash Account >> Cash Account Balances`

⇨ The *T2S DCA balances - search/list* screen is displayed.

2. Enter all known search criteria known to you about the relevant cash balances you wish to view.

3. Click on the *search* button.

⇨ A list containing the search results is displayed on the screen.

⇨ If the search retrieves only one cash balance, the *T2S DCA balance - details* screen is displayed directly.

4. Select the cash balance for which you want to view additional details by clicking on an entry in the list.

5. Click on the *details* button.

⇨ The *T2S DCA balance – details* screen is displayed.

6. To display the restrictions related to a particular cash balance detail, select the relevant restriction type by clicking on an entry in the list.

7. Click on the *restriction references* button.

⇨ The *cash restriction details - search/list* screen is displayed, containing a list of the related restriction references and remaining, used and to be preempted amounts.

➡ You have viewed the cash balances details and related restrictions.

3.4.1.3 View Immediate Liquidity Transfer Order Details

Context of Usage   This business scenario describes how to monitor your immediate liquidity transfer orders which can be internal liquidity transfers (between T2S dedicated cash accounts), inbound liquidity transfers (from an external RTGS account to a T2S dedicated cash account) or outbound liquidity transfers (from a T2S dedicated cash account to an external RTGS account). Furthermore, you can obtain detailed information on a specific immediate liquidity transfer order including general, technical, party and status information.

Viewing immediate liquidity transfer order details is one option for the monitoring of cash, collateral and limits situation.

Privileges   To carry out this business scenario, you need the following privileges:

☐ Immediate liquidity transfer order list query

☐ Immediate liquidity transfer order detail query

Reference   Further information on screens involved can be found in the screen reference part:

☐ *Immediate liquidity transfer orders – search/list* screen [▶ 373]

☐ *Immediate liquidity transfer order – details* screen [▶ 381]

Instructions   1. Go to the *immediate liquidity transfer orders – search/list* screen:
`Cash >> Liquidity >> Immediate Liquidity Transfers`

2. Enter all search criteria known to you about the immediate liquidity transfer order you want to view. According to your privileges, the party and other search criteria are already filled in. If you have privileges for many accounts, select the search criteria taking into account the intended result.

3. Click on the *search* button.

⇨ A list containing the search results is displayed on the screen.

⇨ If the search retrieves only one immediate liquidity transfer order, the *immediate liquidity transfer order – details* screen is displayed directly.

4. Select any of the 'Sort By' criteria of the immediate liquidity transfer order to sort the list. In order to rearrange the sorted list, you can select another 'Sort By' criterion at any time.

⇨ The screen is split into different sections according to the selected sorting criterion (e.g. per T2S dedicated account number there will be a section which contains a table with the information of the immediate liquidity transfer orders belonging to one T2S dedicated cash account number).

5. Select the immediate liquidity transfer for which you want to view the details by clicking on an entry in the list.

6. Click on the *details* button.

⇨ The *immediate liquidity transfer order – details* screen is displayed.

➡ You have viewed the details of the selected immediate liquidity transfer order.

3.4.1.4 View Overall Liquidity

Context of Usage

This business scenario describes how to view the overall liquidity if you wish to monitor cash through queries. This is mainly relevant for treasurers of credit providers or credit consumers, but also for T2S actors within payments banks, CBs or CSDs enquiring about cash balances and limits.

In order to monitor the cash situation, you can view the overall liquidity for a given CB or payment bank and then switch to the detailed view to view the components of the available liquidity. You then have the option to view the limit utilisation for the same credit consumer(s) to identify the collateral limits which are soon reached and those which are unused. You can also view the cash forecast for the same credit consumer(s) to identify any potential lack of cash. You may then react to the overall liquidity by any necessary increases or decreases to your cash balances or limits.

To perform these queries and use these screens you must be a user of a party which is a credit consumer or credit provider with existing T2S dedicated cash accounts and their associated limits.

Privileges

To carry out this business scenario, you need the following privileges:

☐ T2S overall liquidity query

☐ Limit utilisation query

☐ Limit utilisation journal query

☐ Cash forecast query

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Overall liquidity – search/list* screen [▶ 396]

☐ *Limit utilisation – search/list* screen [▶ 348]

☐ *Limit utilisation journal – search/list* screen [▶ 352]

☐ *Cash forecast – search/list* screen [▶ 323]

☐ *Cash forecast – details* screen [▶ 331]

Instructions

1. Go to the *overall liquidity – search/list* screen:

   ```
   Cash >> Liquidity >> T2S Overall Liquidity
   ```

2. Enter the relevant party and parent BIC for which you want to view liquidity information.

❗ Hint

If you are a CB user, you can restrict the view to one payment bank by entering its party BIC.

❗ Alternative

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

3. Click on the *search* button.

   ⇨ An overview list containing the the limit, its utilisation and available liquidity per party is displayed on the screen.

4. To display all the components of the available liquidity, those related to collateral as well as those related to cash balances, click on the *detailed list* button.

   ⇨ A detailed list is displayed on the screen, containing the collateral value, available cash, blocked cash and reserved cash. The available liquidity of the previous screen is calculated as the sum of the cash balances and the minimum of the auto-collateralisation headroom (difference between the auto-collateralisation limit and its utilisation) and the collateral value.

5. To focus on the components related to collateral, go to the *limit utilisation – search/list* screen:
   ```
   Cash >> Cash Accounts >> Limit Utilisations
   ```

6. Enter the same party and parent BIC as in step 2.

7. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen showing the credit consumers' limit, utilisation and headroom for each credit provider and T2S dedicated cash account.

8. To display the journal of the collateral usage, select the relevant account by clicking on an entry in the list.

9. Click on the *journal of limit utilisation* button.

   ⇨ The *limit utilisation journal – search/list* screen is displayed, showing the impact of each instruction on the limit utilisation and headroom.

10. To focus on the components related to the cash balances, go to the *cash forecasts – search/list* screen:
    ```
    Cash >> Cash Accounts >> Cash Forecasts
    ```

11. Enter the same party and parent BIC as in step 2 as well as all other mandatory information.

12. Click on the *search* button.

    ⇨ A list containing the search results is displayed, containing the cash forecast reflecting the sum of the projected cash balance and outstanding collateral for each party.

13. To display the details of the cash forecast, select the relevatn cash forecast by clicking on an entry in the list.

14. Click on the *details* button.

⇨ The *cash forcast – details* screen is displayed, showing the global cash forecast and the details for each T2S dedicated cash account.

➡ You have obtained an overview of the different cash components allowing you to monitor the overall liquidity of your cash situation. You may then react to this overall situation by adapting your buy sell strategies, injecting cash or making limit adjustments.

3.4.1.5 Reimburse an Outstanding Intraday Credit

Context of Usage
This business scenario describes how to reimburse an outstanding intraday credit. This is done by first finding all reverse collateral instructions generated by T2S during auto-collateralisation that are still on party hold. Once identified, these reverse collateral instructions are released by changing the party hold status to false. Finding and releasing these instructions is necessary to enable their settlement. Settlement instructions put on party hold are not eligible for settlement until they are released. The settlement of these instructions results in the reimbursement of the related intraday credit.

A settlement instruction is eligible to be released for party hold if it is not cancelled, settled nor already released for party hold. You can check the status of your settlement instruction before creating the release instruction through the details screen as described in the business scenario view settlement instruction details [▶ 701].

Reimbursing an outstanding intraday credit is one option for the monitoring of cash, collateral and limits situation.

This business scenario is not relevant for CB users.

Privileges
To carry out this business scenario, you need the following privileges:

☐ Settlement instruction query

☐ Settlement instruction current status query

☐ Settlement instruction status audit trail query

☐ Release party hold settlement instruction on a securities account or on behalf of an external CSD

☐ Send new instruction using a specific instructing party

Reference
Further information on screens involved can be found in the screen reference part:

☐ *Settlement instructions – search/list* screen

☐ *Settlement instruction – details* screen

☐ *Hold/release instruction - new* screen [▶ 125]

Instructions

1. Go to the *settlement instructions - search/list* screen:

   `Securities >> Settlement >> Settlement Instructions`

2. Enter all mandatory search criteria enabling you to find all the reverse collateral instructions generated by T2S for auto-collateralisation that are currently on party hold. This includes all instructions where the security transaction type is either COLI or COLO and the party hold status is 'YES'.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one settlement instruction, the *settlement instruction - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction on party hold you want to release by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *settlement instruction – details* screen is displayed.

6. Check the details of the settlement instruction and click on the *hold/release* button.

   ⇨ The *hold/release instruction – new* screen is displayed.

7. Enter all mandatory information in the 'General' subframe.

8. Select the 'Party Release' check box in the 'Hold/Release' subframe.

Hold/Release		
Current Hold Status	**Hold Types**	**Release Types**
Party Hold Status Hold	Party Hold ☐	Party Release ☐
CSD Hold Status Released	CSD Hold ☐	CSD Release ☐
CSD Validation Hold Status Released		CSD Validation Release ☐
CoSD Hold Status Released		CoSD Release ☐
		CoSD Rule Identification * [ ]

9. Click on the *submit* button.

➡ A new release instruction for party hold has been created relating to the T2S generated settlement instruction for the reimbursement of intraday credit.

3.4.2 Monitoring of Securities Positions

Overview

This business package describes the monitoring of securities positions.

To monitor your securities positions, carry out the business scenario relevant to you from the list below.

Business Scenarios

☐ View current securities positions and related postings [▶ 681]

☐ View current securities positions and related restrictions [▶ 682]

☐ View historic securities positions for a specific period [▶ 684]

☐ View historic securities positions on a specific date [▶ 683]

3.4.2.1 View Current Securities Positions and Related Postings

Context of Usage

This business scenario describes how to view the details of securities positions and related postings allowing you to monitor and manage your positions. For reconciliation purpose, you may have to retrieve the instructions impacting particular securities positions. To achieve this, you query positions for a given CSD or settlement bank and then switch to the detailed breakdown by postings for a list of the relevant instructions.

Viewing current securities positions and related postings is one option for the monitoring of securities positions.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Securities account position query

☐ Securities posting query

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Securities positions - search/list* screen [▶ 168]

☐ *Securities position – details* screen [▶ 173]

☐ *Securities postings - search/list* screen [▶ 81]

Instructions

1. Go to the *securities positions – search/list* screen:

   `Securities >> Securities Account >> Securities Positions`

2. Enter all search criteria known to you about the securities positions you want to view.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen, showing the securities account, ISIN, restriction type, date, currency and total quantity.

   ⇨ If the search retrieves a single securities position, the *securities positions – details* screen is displayed directly. Proceed with step 6.

4. Select the securities position for which you want to view additional details by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *securities position – details* screen is displayed, showing the details of the securities position by restriction type including the quantity to be pre-empted in the case of reservations.

6. To view the postings related to a particular securities position detail, select the relevant restriction type by clicking on an entry in the list.

7. Click on the *postings* button.

   ⇨ The *securities postings – search/list* screen is displayed, showing a list of postings for the selected securities position including the instruction type and references along with the timestamp.

➡ You have viewed your securities positions and related postings.

3.4.2.2 View Current Securities Positions and Related Restrictions

Context of Usage

This business scenario describes how to view the details of securities positions and related restrictions allowing you to monitor and manage your positions. You can investigate your securities positions to ensure that sufficient securities are present within a particular blocked, reserved or earmarked position before any potential utilisation. You can also view the restriction references available for use within future instructions. To achieve this, you query positions for a given CSD or settlement bank and then switch to the detailed view for a breakdown by restriction type and reference.

Viewing current securities positions and related restrictions is one option for the monitoring of securities positions.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Securities account position query

☐ Securities position detailed restriction details query

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Securities positions - search/list* screen [▷ 168]

☐ *Securities position – details* screen [▷ 173]

☐ *Securities restriction detail – search/list* screen [▷ 85].

Instructions

1. Go to the *securities positions – search/list* screen:

   `Securities >> Securities Account >> Securities Positions`

   ⇨ The *securities positions search/list* screen is displayed.

2. Enter all search criteria known to you about the securities positions you want to view.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen, showing the securities account, ISIN, restriction type, date, currency and total quantity.

   ⇨ If the search retrieves a single securities position, the *securities positions – details* screen is displayed directly. Proceed with step 6.

4. Select the securities position for which you want to view additional details by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *securities positions – details* screen is displayed, showing the details of the securities position by restriction type including the quantity to be pre-empted in the case of reservations.

6. To view the restrictions related to a particular securities position detail, select the relevant restriction type by clicking on an entry in the list.

7. Click on the *restriction references* button.

   ⇨ The *securities restriction detail – search/list* screen is displayed, showing a list of the detailed securities restrictions for the selected securities position including the related restriction reference and remaining, used and to-be pre-empted quantities.

➡ You have viewed your securities positions and related restrictions.

3.4.2.3 View Historic Securities Positions for a Specific Date

Context of Usage This business scenario describes how to view the details of securities positions for a specific date allowing you to monitor and manage your positions. You can enquire about securities positions or perform investigations and reconciliations on particular positions. In order to monitor the securities positions, you can query positions for a given CSD or settlement bank and then switch to the detailed view for a breakdown by restriction type.

Viewing historic securities positions is one option for the monitoring of securities positions.

Privileges To carry out this business scenario, you need the following privilege:

☐ Securities account position query

Reference Further information on screens involved can be found in the screen reference part:

☐ *Securities positions - search/list* screen [▷ 168]

☐ *Securities position – details* screen [▷ 173]

Instructions

1. Go to the *securities positions – search/list* screen:
   `Securities >> Securities Account >> Securities Positions`

2. Enter all search criteria about the securities positions you want to view, including the same relevant past date in both the 'Date From' and 'Date To' fields.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen, showing the securities account, ISIN, restriction type, date, currency and total quantity.

   ⇨ If the search retrieves a single securities position, the *securities position – details* screen is displayed directly.

4. Select the securities position for which you want to view additional details by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *securities positions – details* screen is displayed, showing the details of the securities position by restriction type including the quantity to be pre-empted in the case of reservations.

➡ You have viewed your historic securities positions details.

3.4.2.4 View Historic Securities Positions for a Specific Period

Context of Usage

This business scenario describes how to view the details of securities positions for a specific period allowing you to monitor and manage your positions. Using queries, you can enquire about the evolution of securities positions over a given time period while performing investigations and reconciliations on particular positions. In order to monitor the securities positions, you can query positions for a given CSD or settlement bank and then switch to the detailed view for a breakdown by restriction type.

Viewing historic securities positions for a specific period is one option for the monitoring of securities positions.

Privileges

To carry out this business scenario, you need the following privilege:

☐ Securities account position query

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Securities positions - search/list* screen [▷ 168]

☐ *Securities position – details* screen [▷ 173]

Instructions

1. Go to the *securities positions – search/list* screen:
   `Securities >> Securities Account >> Securities Positions`

2. Enter all search criteria about the securities positions you want to view, including the relevant period by specifying different past dates in the 'Date From' and 'Date To' fields.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen, showing the securities account, ISIN, restriction type, date, currency and total quantity.

   ⇨ If the search retrieves a single securities position, the *securities position – details* screen is displayed directly.

4. Select the securities position for which you want to view additional details by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *securities positions - details* screen is displayed, showing the details of the securities position by restriction type including the quantity to be pre-empted in the case of reservations.

➡ You have viewed your historic securities positions for a specific period.

3.5 Settlement Instructions

3.5.1 Creation of a New Settlement Instruction

Overview This business package describes the creation of a new settlement instruction.

You can create a new settlement instruction either introducing all the necessary information, copying it from an already existing settlement instruction or responding an allegement instruction. Once the instruction has been created, you can also check its lifecycle in T2S.

To create a new settlement instruction, carry out the business scenarios in the predefined order and choose the business scenario relevant to you whenever options are given.

Business Scenarios

1. Create a new settlement instruction

   ☐ Enter a settlement instruction [▶ 686]

   ☐ Copy a settlement instruction [▶ 690]

   ☐ Respond to an allegement instruction [▶ 696]

2. View instruction details

   ☐ View settlement instruction details [▶ 701]

   ☐ View allegement settlement instruction details [▶ 702]

3.5.1.1 Enter a Settlement Instruction

Context of Usage

This business scenario describes how to create a new settlement instruction.

Entering a new settlement instruction is one option for the creation of a new settlement instruction [▶ 685].

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

- ☐ Settlement instruction query
- ☐ Settlement instruction current status query
- ☐ Settlement instruction status audit trail query
- ☐ Send new settlement instruction/settlement restriction on securities either on a securities account or on behalf of an external CSD
- ☐ Send new instruction using a specific instructing party
- ☐ Send settlement instruction with non-modifiable flag activated
- ☐ Link to an instruction/pool reference belonging to a specific party
- ☐ Use ISO transaction code AUTO (auto-collateralisation)
- ☐ Use ISO transaction code BYIY (buy-in)
- ☐ Use ISO transaction code BSBK (buy sell back)
- ☐ Use ISO transaction code CLAI (market claim)
- ☐ Use ISO transaction code CNCB (central bank collateral operation)
- ☐ Use ISO transaction code COLI (collateral in)
- ☐ Use ISO transaction code COLO (collateral out)
- ☐ Use ISO transaction code CONV (depository receipt conversion)
- ☐ Use ISO transaction code CORP (corporate action)
- ☐ Use ISO transaction code ETFT (exchange traded funds)
- ☐ Use ISO transaction code FCTA (factor update)
- ☐ Use ISO transaction code INSP (move of stock)
- ☐ Use ISO transaction code ISSU (issuance)
- ☐ Use ISO transaction code MKDW (mark down)
- ☐ Use ISO transaction code MKUP (mark up)
- ☐ Use ISO transaction code NETT (netting)
- ☐ Use ISO transaction code NSYN (non syndicated)
- ☐ Use ISO transaction code OWNE (external account transfer)
- ☐ Use ISO transaction code OWNI (internal account transfer)

☐ Use ISO transaction code PAIR (pair off)

☐ Use ISO transaction code PLAC (placement)

☐ Use ISO transaction code PORT (portfolio move)

☐ Use ISO transaction code REAL (realignment)

☐ Use ISO transaction code REDI (withdrawal)

☐ Use ISO transaction code REDM (redemption)

☐ Use ISO transaction code RELE (depository receipt release cancellation)

☐ Use ISO transaction code REPU (repo)

☐ Use ISO transaction code RODE (return delivery without matching)

☐ Use ISO transaction code RVPO (reverse repurchase agreement)

☐ Use ISO transaction code SBBK (sell buy back)

☐ Use ISO transaction code SBRE (borrowing reallocation)

☐ Use ISO transaction code SECB (securities borrowing)

☐ Use ISO transaction code SECL (securities lending)

☐ Use ISO transaction code SLRE (lending reallocation)

☐ Use ISO transaction code SUBS (subscription)

☐ Use ISO transaction code SWIF (switch from)

☐ Use ISO transaction code SWIT (switch to)

☐ Use ISO transaction code SYND (syndicate underwriters)

☐ Use ISO transaction code TBAC (TBA closing)

☐ Use ISO transaction code TRAD (trade)

☐ Use ISO transaction code TRPO (triparty repo)

☐ Use ISO transaction code TRVO (triparty reverse repo)

☐ Use ISO transaction code TURN (turnaround)

☐ Party hold settlement instruction on a securities account or on behalf of an external CSD

☐ CSD hold settlement instruction either on a securities account or on behalf of the CSD in T2S

Reference Further information on screens involved can be found in the screen reference parts:

☐ *Settlement instructions– search/list* screen

☐ *Settlement instruction - new* screen [▶ 210]

Instructions 1. Go to the *settlement instructions– search/list* screen:

`Securities >> Settlement >> Settlement Instructions`

2. Click on the *new* button.

⇨ The *settlement instruction - new* screen is displayed.

3. Enter all mandatory information about the settlement instruction you want to create in the 'General Information', and the 'Detailed Information' frame.

4. Optionally, you can enter additional information about the settlement instruction into the optional fields in all the available frames.

5. To link your settlement instruction to another instruction, click on the *add row* button to add a new link.

6. Select and add all the requested information to identify the instruction you want your settlement instruction to be linked with. Once all the information is introduced click on the *submit changes* icon in the 'Options' column.

⇨ The link has been added to the list.

7. If you want to add your settlement restriction on securities to a pool, enter the 'Pool Identification' field, 'Pool Instruction Counter' and the 'Pool Reference Owner BIC' field instead.

ⓘ Repetition

To add more links, repeat steps 5 to 6.

8. To remove a link from the list of links to be added to the settlement instruction, click on the *delete row* icon in the 'Options' column.

⇨ The link has been deleted from the list of links.

9. To add a restriction, click on the *add row* icon to add a new restriction reference.

10. Enter the restriction reference you want to make use of and click on the *submit changes* icon in the 'Options' column.

⇨ A new restriction reference has been added to the list.

🛈 **Repetition**

To add more restrictions, repeat steps 9 and 10.

11. To remove a restriction reference from the list of restriction references to be added to the settlement instruction, click on the *delete row* icon in the 'Options' column.

⇨ The restriction reference has been deleted from the list of restriction references.

12. To enter additional data related to the parties involved in the settlement instruction, click on the *add row* icon in the 'Additional Receiving Parties' and/or 'Additional Delivering Parties' frames and enter all relevant information.

13. To add additional information, select the value from the 'Level 1' drop-down menu in the 'Additional Information' frame.

14. Continue this selection within the interdependent menus from the 'Level 2' drop-down menu till the 'Level 6' drop-down menu.
Each level is dependent on the next level in a successive order. The content of the select boxes varies through the different levels.

15. Once you have selected all the relevant levels, introduce the value and click on the *add row* icon.

⇨ The additional information has been added to the list.

🛇 **Repetition**

To add more additional information paths, repeat steps 14 to 15.

---

16. To remove an entry from the list of additional information to be added to the settlement instruction, click on the *delete row* icon in the 'Options' column.

⇨ The entry has been deleted from the list of additional information.

🛇 **Alternatives**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

---

17. Click on the *submit* button.

18. Enter your PIN for digital signature purposes (NRO).

➡ The new settlement instruction has been created.

3.5.1.2 Copy a Settlement Instruction

Context of Usage

This business scenario describes how to copy a settlement instruction based on an existing T2S settlement instruction in order to deliver or receive securities and/or cash between your own accounts or between one of your accounts and a counterpart`s account, based on already executed settlement.

Copying an existing settlement instruction is one option for the creation of a new settlement instruction.

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Settlement instruction query

☐ Settlement instruction current status query

☐ Settlement instruction status audit trail query

☐ Send new settlement instruction/settlement restriction on securities either on a securities account or on behalf of an external CSD

☐ Send new instruction using a specific instructing party

☐ Send settlement instruction with non-modifiable flag activated

☐ Link to an instruction/pool reference belonging to a specific party

☐ Use ISO transaction code AUTO (Auto-Collateralisation)

☐ Use ISO transaction code BSBK (Buy Sell Back)

☐ Use ISO transaction code CLAI (Market Claim)

☐ Use ISO transaction code CNCB (Central Bank Collateral Operation)

☐ Use ISO transaction code COLI (Collateral In)

☐ Use ISO transaction code COLO (Collateral Out)

☐ Use ISO transaction code CONV (Depository Receipt Conversion)

☐ Use ISO transaction code CORP (Corporate Action)

☐ Use ISO transaction code ETFT (Exchange Traded Funds)

☐ Use ISO transaction code FCTA (Factor Update)

☐ Use ISO transaction code INSP (Move Of Stock)

☐ Use ISO transaction code ISSU (Issuance)

☐ Use ISO transaction code MKDW (Mark Down)

☐ Use ISO transaction code MKUP (Mark Up)

☐ Use ISO transaction code NETT (Netting)

☐ Use ISO transaction code NSYN (Non Syndicated)

☐ Use ISO transaction code OWNE (External Account Transfer)

☐ Use ISO transaction code OWNI (Internal Account Transfer)

☐ Use ISO transaction code PAIR (Pair Off)

☐ Use ISO transaction code PLAC (Placement)

☐ Use ISO transaction code PORT (Portfolio Move)

☐ Use ISO transaction code REAL (Realignment)

☐ Use ISO transaction code REDI (Withdrawal)

☐ Use ISO transaction code REDM (Redemption)

☐ Use ISO transaction code RELE (Depository Receipt Release Cancellation)

☐ Use ISO transaction code REPU (Repo)

☐ Use ISO transaction code RODE (Return Delivery Without Matching)

☐ Use ISO transaction code RVPO (Reverse Repo)

☐ Use ISO transaction code SBBK (Sell Buy Back)

☐ Use ISO transaction code SBRE (Borrowing Reallocation)

☐ Use ISO transaction code SECB (Securities Borrowing)

☐ Use ISO transaction code SECL (Securities Lending)

☐ Use ISO transaction code SLRE (Lending Reallocation)

☐ Use ISO transaction code SUBS (Subscription)

☐ Use ISO transaction code SYND (Syndicate Underwriters)

☐ Use ISO transaction code TBAC (TBA Closing)

☐ Use ISO transaction code TRAD (Trade)

☐ Use ISO transaction code TRPO (Triparty Repo)

☐ Use ISO transaction code TRVO (Triparty Reverse Repo)

☐ Use ISO transaction code TURN (Turnaround)

☐ Party hold settlement instruction on a securities account or on behalf of an external CSD

☐ CSD hold settlement instruction either on a securities account or on behalf of the CSD in T2S

Reference   Further information on screens involved can be found in the screen reference part:

☐ *Settlement instructions – search/list* screen

☐ *Settlement instruction - details* screen

☐ *Settlement instruction - new* screen [▷ 210]

Instructions   1. Go to the *settlement instructions – search/list* screen:

`Securities >> Settlement >> Settlement Instructions`

2. Enter the information known to you about the settlement instruction you want to copy. At least one field of the general criteria frame has to be specified to perform the search.

3. Click on the *search* button.

⇨ The *settlement instructions – search/list* screen is displayed. A list containing the search results is displayed on the screen.

⇨ If the search retrieves a single settlement instruction, the *settlement instruction - details* screen is displayed directly, proceed with step 6.

4. Select the settlement instruction you want to copy by clicking on an entry in the list.

5. Click on the *details* button.

⇨ The *settlement instruction - details* screen is displayed.

6. Click on the *copy row* icon.

⇨ The *settlement instruction - new* screen is displayed taking by default the following fields from the original instruction: instructing party BIC, instructing party parent BIC, intended settlement date, trade date, priority, allowed modification flag, partial settlement indicator, threshold type, ISIN, securities description, securities account number, settlement quantity, settlement type, payment type code, credit/debit code, dedicated cash account, settlement amount, currency, delivering depository, delivering CSD participant information, client of the delivering CSD participant, receiving depository, receiving CSD participant, client of the receiving CSD participant.

7. Check if all the default values that have been copied from the settlement instruction in all the available frames are right for the new settlement instruction or modify them if needed.

8. Check that all mandatory information in the mandatory fields of the 'General Information' and the 'Detailed Information' frame is filled in. If not, enter all mandatory information.

9. Optionally, you can enter additional information about the settlement instruction into the optional fields in all the available frames.

10. To link your settlement instruction to another instruction, click on the *add row* icon to add a new link.

Link					
Rows per page: 10 ▼	◄ ◄◄	page 1 of 1 - lines 0 to 0 of 0	►► ►◄		
Link Type * ⇕	Reference Type * ⇕		Reference * ⇕	Reference Owner ⇕	Options

Pool Instruction Reference		Pool Instruction Counter		Pool Reference Owner BIC	

⇨ The link has been added to the list.

12. If you want to add your settlement restriction on securities to a pool, enter the 'Pool Identification' field, 'Pool Instruction Counter' field and the 'Pool Reference Owner BIC' field instead.

ⓘ Repetition

To add more links, repeat steps 10 to 11.

13. To remove a link from the list of links to be added to the settlement instruction, click on the *delete row* icon in the 'Options' column.

   ⇨ The link has been deleted from the list of links.

14. To add a restriction, click on the *add row* icon to add a new restriction reference.

15. Enter the restriction reference you want to make use of and click on the s*ubmit changes* icon in the 'Options' column.

   ⇨ A new restriction reference has been added to the list.

ⓘ Repetition

To add more restrictions, repeat steps 14 and 15.

16. To remove a restriction reference from the list of restriction references to be added to the settlement instruction, click on the *delete row* icon in the 'Options' column.

   ⇨ The restriction reference has been deleted from the list of restriction references.

17. To enter additional data related to the parties involved in the settlement in-struction, click on the *add row* icon in the 'Additional Receiving Parties' and/or 'Additional Delivering Parties' frames and enter all relevant information.

18. To add additional information, select the value from the 'Level 1' drop-down menu in the 'Additional Information' frame.

19. Continue this selection within the interdependent menus from the 'Level 2' drop-down menu till the 'Level 6' drop-down menu.
Each level depends on the next in a successive order. The content of the se-lect boxes varies through the different levels.

20. Once you have selected all the relevant levels, fill in the value and click on the *add row* icon.

⇨ The additional information has been added to the list.

Repetition

To add more additional information paths, repeat steps 19 to 20.

21. To remove an entry from the list of additional information to be added to the settlement instruction, click on the *delete row* icon in the 'Options' column.

⇨ The entry has been deleted from the list of additional information.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.
To cancel the process and return to the previous screen, click on the *cancel* but-ton.

22. Click on the *submit* button.

23. Enter your PIN for digital signature purposes (NRO).

➡ The new settlement instruction has been created based on a copied settlement instruction.

3.5.1.3 Respond to an Allegement Instruction

Context of Usage

This business scenario describes how to create a new settlement instruction based on the information provided by an allegement instruction. When receiving an allegement instruction, T2S indicates you that there is a settlement instruction alleged against you. To confirm it, you need to respond to the allegement by creating your settlement instruction.

Responding to an allegement instruction is one option for the creation of a new settlement instruction.

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Allegement query

☐ Send new settlement instruction/settlement restriction on securities either on a securities account or on behalf of an external CSD

☐ Send new instruction using a specific instructing party

☐ Send settlement instruction with non-modifiable flag activated

☐ Link to an instruction/pool reference belonging to a specific party

☐ Use ISO transaction code AUTO (auto-collateralisation)

☐ Use ISO transaction code BSBK (buy sell back)

☐ Use ISO transaction code CLAI (market claim)

☐ Use ISO transaction code CNCB (central bank collateral operation)

☐ Use ISO transaction code COLI (collateral in)

☐ Use ISO transaction code COLO (collateral out)

☐ Use ISO transaction code CONV (depository receipt conversion)

☐ Use ISO transaction code CORP (corporate action)

☐ Use ISO transaction code ETFT (exchange traded funds)

☐ Use ISO transaction code FCTA (factor update)

☐ Use ISO transaction code INSP (move of stock)

☐ Use ISO transaction code ISSU (issuance)

☐ Use ISO transaction code MKDW (mark down)

☐ Use ISO transaction code MKUP (mark up)

- ☐ Use ISO transaction code NETT (netting)

- ☐ Use ISO transaction code NSYN (non syndicated)

- ☐ Use ISO transaction code OWNE (external account transfer)

- ☐ Use ISO transaction code OWNI (internal account transfer)

- ☐ Use ISO transaction code PAIR (pair off)

- ☐ Use ISO transaction code PLAC (placement)

- ☐ Use ISO transaction code PORT (portfolio move)

- ☐ Use ISO transaction code REAL (realignment)

- ☐ Use ISO transaction code REDI (withdrawal)

- ☐ Use ISO transaction code REDM (redemption)

- ☐ Use ISO transaction code RELE (depository receipt release cancellation)

- ☐ Use ISO transaction code REPU (repo)

- ☐ Use ISO transaction code RODE (return delivery without matching)

- ☐ Use ISO transaction code RVPO (reverse repo)

- ☐ Use ISO transaction code SBBK (sell buy back)

- ☐ Use ISO transaction code SBRE (borrowing reallocation)

- ☐ Use ISO transaction code SECB (securities borrowing)

- ☐ Use ISO transaction code SECL (securities lending)

- ☐ Use ISO transaction code SLRE (lending reallocation)

- ☐ Use ISO transaction code SUBS (subscription)

- ☐ Use ISO transaction code SYND (syndicate underwriters)

- ☐ Use ISO transaction code TBAC (TBA closing)

- ☐ Use ISO transaction code TRAD (trade)

- ☐ Use ISO transaction code TRPO (triparty repo)

- ☐ Use ISO transaction code TRVO (triparty reverse repo)

- ☐ Use ISO transaction code TURN (turnaround)

- ☐ Party hold settlement instruction on a securities account or on behalf of an external CSD

- ☐ CSD hold settlement instruction either on a securities account or on behalf of the CSD in T2S

Reference   Further information on screens involved can be found in the screen reference part:

- ☐ *Allegement instructions – search/list* screen [▷ 89]

- ☐ *Allegement instruction – details* screen [▷ 93]

☐ *Settlement instruction – new* screen [▶ 210]

Instructions   1. Go to the *allegement instructions – search/list* screen:

```
Securities >> Settlement >> Settlement Instruction Al-
legements
```

2. Enter all search criteria known to you about the allegement instruction you want to respond to.

3. Click on the *search* button.

⇨ A list containing the search results is displayed on the screen.

⇨ If the search retrieves only one allegement instruction, the *allegement instruction - details* screen is displayed directly. Proceed with step 6.

4. Select the allegement instruction you want to respond to by clicking on an entry in the list.

5. Click on the *details* button.

⇨ The *allegement instruction - details* screen is displayed.

6. Click on the *new settlement instruction* button.

⇨ The *settlement instruction - new* screen is displayed, taking by default the following fields from the original instruction: trade date, intended settlement date, cash amount, currency, securities quantity, ISIN, partial settlement indicator, securities transaction type.

7. Check if the copied default values are right for the new settlement instruction or modify them if needed.

8. Check that all mandatory fields of the 'General Information' and the 'Detailed Information' frames are filled in. If not, enter all mandatory information.

9. Optionally, you can enter additional information about the settlement instruction into the optional fields in all the available frames.

10. To link your settlement instruction to another instruction, click on the *add row* icon to add a new link.
11. Select and add all the requested information to identify the instruction you want your settlement instruction to be linked with. Once all the information is filled in click on the *submit changes* icon in the 'Options' column.

⇨ The link has been added to the list.

12. If you want to add your settlement instruction to a pool, enter the pool identification and the pool instruction counter instead.

🛈 **Repetition**

To add more links, repeat steps 10 to 11.

---

13. To remove a link from the list of links to be added to the settlement instruction, click on the *delete row* icon in the 'Options' column.

⇨ The link has been deleted from the list of links.

14. To add a restriction, click on the *add row* icon to add a new restriction reference.

15. Enter the restriction reference you want to make use of and click on the *submit changes* icon in the 'Options' column.

⇨ A new restriction reference has been added to the list.

🛈 **Repetition**

To add more restrictions, repeat steps 14 and 15.

---

16. To remove a restriction reference from the list of restriction references to be added to the settlement instruction, click on the *delete row* icon in the 'Options' column.

⇨ The restriction reference has been deleted from the list of restriction references.

17. To enter additional data related to the parties involved in the settlement instruction, click on the *add row* icon in the 'Additional Receiving Parties' and/or 'Additional Delivering Parties' frames and enter all relevant information.

18. To add additional information, select the value from the 'Level 1' drop-down menu in the 'Additional Information' frame.

19. Continue this selection within the interdependent menus from the 'Level 2' drop-down menu till the 'Level 6' drop-down menu.
Each level depends on the next in a successive order. The content of the drop-down menu varies through the different levels.

20. Once you have selected all the relevant levels, enter the value and click on the *add row* icon.

⇨ The additional information has been added to the list.

🛈 **Repetition**

To add more additional information paths, repeat steps 19 to 20.

---

21. To remove an entry from the list of additional information to be added to the settlement instruction, click on the *delete row* icon in the 'Options' column.

⇨ The entry has been deleted from the list of additional information.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

22. Click on the *submit* button.

23. Enter your PIN for digital signature purposes (NRO).

➡ The new settlement instruction has been created.

3.5.1.4 View Settlement Instruction Details

Context of Usage

This business scenario describes how to view the details of a settlement instruction.

Once a settlement instruction is created in T2S it might be necessary for you to check its details to be aware of updates during the lifecycle of the settlement instruction.

Viewing settlement instruction details is optional for the creation of a new settlement instruction.

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Settlement instruction query

☐ Settlement instruction current status query

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Settlement instructions – search/list* screen

☐ *Settlement instruction – details* screen

Instructions

1. Go to the *settlement instructions – search/list* screen:

   `Securities >> Settlement >> Settlement Instructions`

2. Enter at least one general search criterion known to you about the settlement instruction for which you want to view the details.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one settlement instruction, the *settlement instruction – details* screen is displayed directly.

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

4. Select the settlement instruction for which you want to view the details by clicking on the entry in the list.

5. Click on the *details* button.

⇨ The *settlement instruction – details* screen is displayed.

➡ You have viewed the settlement instruction details.

3.5.1.5 View Allegement Settlement Instruction Details

Context of Usage

This business scenario describes how to view the details of an allegement instruction. Once the allegement instruction is created in T2S it might be necessary for you to check its status.

Viewing allegement settlement instruction details is optional for the creation of a new settlement instruction.

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privilege:

☐ Allegement query

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Allegement instructions – search/list* screen [▸ 89]

☐ *Allegement instruction - details* screen [▸ 93]

Instructions

1. Go to the *allegement instructions – search/list* screen:

   `Securities >> Settlement >> Settlement Instruction Al-`
   `legements`

2. Enter all search criteria known to you about the allegement instruction for which you want to view the details.

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

3. Click on the *search* button.

⇨ A list containing the search results is displayed on the screen.

⇨ If the search retrieves only one allegement instruction, the *allegement instruction - details* screen is displayed directly.

4. Select the allegement instruction for which you want to view the details by clicking on an entry in the list.

5. Click on the *details* button.

⇨ The *allegement instruction - details* screen is displayed.

➜ You have viewed the allegement settlement instruction details.

3.5.2 Creation of a New Amendment Instruction for a Settlement Instruction

Overview

This business package describes the creation of a new amendment instruction for a settlement instruction.

You can create a new amendment instruction for a settlement instruction and afterwards, you can also check the information of the amendment instruction in T2S.

To create a new amendment instruction for a settlement instruction, carry out the business scenarios in the predefined order and choose the business scenario relevant to you whenever options are given.

Business Scenarios

1. Create a new amendment instruction for a settlement instruction

    ☐ Add a link for a settlement instruction [▷ 703]

    ☐ Amend the partial settlement indicator for a settlement instruction [▷ 706]

    ☐ Amend the priority for a settlement instruction [▷ 707]

    ☐ Remove a link for a settlement instruction [▷ 709]

2. View amendment instruction for a settlement instruction details [▷ 711]

3.5.2.1 Add a Link for a Settlement Instruction

Context of Usage

This business scenario describes how to link a settlement instruction in order to settle it at the same time, after or before another settlement instruction or settlement restriction.

Adding a link for a settlement instruction is one option for the creation of an amendment instruction for a settlement instruction.

Before you add a link for your settlement instruction, check whether the settlement instruction is neither cancelled, partially settled, settled nor on CoSD hold.

You can check the status of your settlement instruction before creating the amendment instruction through the details screen as described in the business scenario view settlement instruction details [▷ 701].

The number of links that can be added per amendment instruction is unbounded.

This business scenario is not relevant for NCB users.

Privileges   To carry out this business scenario, you need the following privileges:

☐   Settlement instruction query

☐   Settlement instruction current status query

☐   Settlement instruction status audit trail query

☐   Send new instruction using a specific instructing party

☐   Link to an instruction/pool reference belonging to a specific party

☐   Amend process indicator of a settlement instruction / settlement restriction on securities either on a securities account or on behalf of the CSD in T2S or on behalf of an external CSD

☐   Amend process indicator of a non-modifiable settlement instruction on behalf of the instructing party of the underlying instruction

Reference   Further information on screens involved can be found in the screen reference part:

☐   *Settlement instructions – search/list* screen

☐   *Settlement instruction - details* screen

☐   *Amendment securities instruction - new* screen [▷ 102]

Instructions   1. Go to the *settlement instructions – search/list* screen:

   `Securities >> Settlement >> Settlement Instructions`

2. Enter the relevant information about the settlement instruction you want to link.

3. Click on the *search* button.

   ⇨ The *settlement instructions – search/list* screen is displayed.

   ⇨ If the search retrieves a single settlement instruction, the *settlement instruction - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction you want to amend by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *settlement instruction - details* screen is displayed.

6. Click on the *amendment instruction* button in the button bar.

   ⇨ The *amendment securities instruction - new* screen is displayed.

7. Enter all mandatory information in the 'General' frame.

8. Select the *linkage information* radio button, located on the lower center side of the *amendment securities instruction - new* screen.

Amendment Type

○ Priority ◉ Linkage Information ○ Partial Settlement Indicator

⇨ The 'Linkage Information' and the 'Link' frames are displayed.

9. Select the *link* radio button to add a link.

Linkage Information ⬆

◉ LINK ○ UNLINK

10. Click on the *add row* icon in the 'Link' frame to display the links related input fields.

⇨ The link has been added to the list.

12. To remove an entry from the list of links to be added, click on the *delete row* icon in the 'Options' column.

⇨ The link has been deleted from the list.

🛈 **Repetition**

To add more links, repeat steps 10 to 11.

You can add as many links as you like.

🛈 **Alternatives**

To set default criteria and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

---

13. Click on the *submit* button.

14. Enter your PIN for digital signature purposes (NRO).

➡ A new amendment instruction to add a link for a settlement instruction has been created.

3.5.2.2 Amend the Partial Settlement Indicator for a Settlement Instruction

Context of Usage

This business scenario describes how to amend the partial settlement indicator for a settlement instruction. You can create a new amendment instruction for your settlement instruction to change its partial settlement indicator and threshold type.

Amending the partial settlement indicator is one option for the creation of an amendment instruction for a settlement instruction.

Before you amend the partial settlement indicator for your settlement instruction, check whether it is neither cancelled nor settled nor on CoSD hold. In addition, partial settlement is not possible for linked settlement instructions. You can check the status of your settlement instruction before creating the amendment instruction through the details screen as described in the business scenario view settlement instruction details [▶ 701].

Privileges

To carry out this business scenario, you need the following privileges:

☐ Settlement instruction query

☐ Settlement instruction current status query

☐ Settlement instruction status audit trail query

☐ Send new instruction using a specific instructing party

☐ Link to an instruction/pool reference belonging to a specific party

☐ Amend process indicator of a settlement instruction / settlement restriction on securities either on a securities account or on behalf of the CSD in T2S or on behalf of an external CSD

☐ Amend process indicator of a non-modifiable settlement instruction on behalf of the instruction party of the underlying instruction

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Settlement instructions – search/list* screen

☐ *Settlement instruction – details* screen

☐ *Amendment securities instruction – new* screen [▶ 102]

Instructions

1. Go to the *settlement instructions – search/list* screen:

   `Securities >> Settlement >> Settlement Instructions`

2. Enter at least one general search criterion known to you about the settlement instruction for which you want to amend the partial settlement indicator.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the *settlement instructions – search/list* screen.

⇨ If the search retrieves a single settlement instruction, the *settlement instruction – details* screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction you want to amend by clicking on an entry in the list.

5. Click on the *details* button.

⇨ The *settlement instruction – details* screen is displayed.

6. Click on the *amendment instruction* button, located on the lower lefthand side of the *settlement instruction – details* screen.

⇨ The *amendment securities instruction – new* screen is displayed.

7. Click on the *partial settlement indicator* radio button, located on the lower right hand side of the *amendment securities instruction - new* screen.

⇨ The *partial settlement indicator* frame is displayed.

8. Select the new partial settlement indicator from the drop-down menu.

🛈 **Alternatives**

To set all fields to default criteria and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

---

9. Click on the *submit* button.

10. Enter your PIN for digital signature purposes (NRO).

➡ A new amendment instruction to change the partial settlement indicator has been created.

3.5.2.3 Amend the Priority for a Settlement Instruction

Context of Usage

This business scenario describes how to amend the priority for a settlement instruction. You can create a new amendment instruction to amend the priority for your settlement instruction to prioritise or delay its settlement.

Amending the priority for a settlement instruction is one option for the creation of an amendment instruction for a settlement instruction.

Before you amend the priority for a settlement instruction, check whether it is neither cancelled nor settled nor on CoSD Hold. You can check the status of your settlement instruction before creating the amendment instruction, through the *details* screen as described in the business scenario view settlement instruction details [▷ 701].

This business scenario is not relevant for CB users.

Privileges   To carry out this business scenario, you need the following privileges:

☐ Link to an instruction/pool reference belonging to a specific party

☐ Settlement instruction query

☐ Settlement instruction current status query

☐ Settlement instruction audit trail query

☐ Send new instruction using a specific instructing party

☐ Amend process indicator of a settlement instruction/settlement restriction on securities either on a securities account or on behalf of the CSD in T2S or on behalf of an external CSD

☐ Amend process indicator of a non-modifiable settlement instruction on behalf of the instructing party of the underlying instruction

Reference   Further information on screens involved can be found in the screen reference part:

☐ *Settlement instructions – search/list* screen

☐ *Settlement instruction – details* screen

☐ *Amendment securities instruction - new* screen [▷ 102]

Instructions   1. Go to the *settlement instructions – search/list* screen:

    `Securities >> Settlement >> Settlement Instructions`

2. Enter all search criteria known to you about the settlement instruction for which you want to amend the priority.

3. Click on the *search* button.

    ⇨ A list containing the search results is displayed on the screen.

    ⇨ If the search retrieves only one settlement instruction, the *settlement instruction – details* screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction for which you want to amend the priority by clicking on an entry in the list.

5. Click on the *details* button.

    ⇨ The *settlement instruction – details* screen is displayed.

6. Check the current priority value and click on the *amendment instruction* button.

⇨ The *amendment securities instruction – new* screen is displayed.

7. Click on the *priority* radio button, located on the lower left-hand side of the screen.

⇨ The 'Priority' frame is displayed.

8. Select the new priority from the drop-down menu.

🛈 **Alternatives**

To set default criteria and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

---

9. Click on the *submit* button.

10. Enter your PIN for digital signature purposes (NRO).

➡ A new amendment instruction to change the priority has been created.

3.5.2.4 Remove a Link for a Settlement Instruction

Context of Usage

This business scenario describes how to remove an existing link in a settlement instruction.

Removing a link for a settlement instruction is one option for the creation of a new amendment instruction for a settlement instruction.

Before you remove a link for your settlement instruction, check whether it is neither settled nor cancelled. You can check the status of your settlement instruction before creating the amendment instruction through the details screen as described in the business scenario view settlement instruction details [▶ 701].

The number of links that can be removed per amendment instruction is limited to the number of existing linkages in the settlement instruction.

If you want to modify an already existing link in your settlement instruction, you have first to remove the existing link and then add a new link to your settlement instruction.

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Settlement instruction query

☐ Settlement instruction current status query

☐ Settlement instruction status audit trail query

☐ Link to an instruction/pool reference belonging to a specific party

☐ Amend process indicator of a settlement instruction/settlement restriction on securities either on a securities account or on behalf of the CSD in T2S or on behalf of an external CSD

☐ Amend process indicator of a non-modifiable settlement instruction on behalf of the instructing party of the underlying instruction

☐ Send new instruction using a specific instructing party

Reference Further information on screens involved can be found in the screen reference part:

☐ *Settlement instructions – search/list* screen

☐ *Settlement instruction – details* screen

☐ *Amendment securities instruction – new* screen [▶ 102]

Instructions 1. Go to the *settlement instructions – search/list* screen:

```
Securities >> Settlement >> Settlement Instructions
```

2. Enter all search criteria known to you about the settlement instruction you want to amend.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one settlement instruction, the *settlement instructions – details* screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction you want to amend by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *settlement instruction – details* screen is displayed.

6. Click on the *amendment instruction* button, located on the lower left-hand side of the screen.

   ⇨ The *amendment securities instruction – new* screen is displayed.

7. Enter all mandatory information in the 'General' subframe.

8. Click on the *linkage information* radio button, located on the lower center side of the *amendment securities instruction - new* screen.

Amendment Type

◯ Priority   ◉ Linkage Information   ◯ Partial Settlement Indicator

   ⇨ The 'Linkage Information' and 'Link' frames are displayed.

9. Select the *unlink* radio button.

⇨ The existing links of the referenced settlement instruction are displayed in the 'Link' frame below.

10. Select the link(s) to be removed from the list.

🛈 **Alternatives**

To set default criteria and blank out all optional fields, click on the *reset* button. To cancel the process and return to the previous screen, click on the *cancel* button.

---

11. Click on the *submit* button.

12. Enter your PIN for digital signature purposes (NRO).

➡ A new amendment instruction to remove a link for a settlement instruction has been created.

3.5.2.5 View Amendment Instruction for a Settlement Instruction Details

Context of Usage

This business scenario describes how to view the details of an amendment instruction for a settlement instruction. Once an amendment instruction for a settlement instruction has been created in T2S it might be necessary for you to check its details to be aware of updates during the lifecycle of the amendment instruction.

Viewing an amendment instruction for a settlement instruction is optional for the creation of a new amendment instruction for a settlement instruction.

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Maintenance for intra-position movements and settlement instructions query

☐ Amendment instruction query for intra-position movements and settlement instructions

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Maintenance securities instructions – search/list* screen [▸ 163]

☐ *Amendment securities instruction – details* screen [▸ 97]

Instructions

1. Go to the *maintenance securities instructions – search/list* screen:

   ```
   Securities >> Settlement >> Maintenance Securities In-
   structions
   ```

2. Enter all search criteria known to you about the amendment instruction for a settlement instruction for which you want to view the details.

3. Select the value 'Settlement Instruction' in the 'Instruction Type' field.

4. Select the value 'Amendment Instruction' in the 'Maintenance Instruction Type' field.

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

5. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one amendment instruction for a settlement instruction, the *amendment securities instruction – details* screen is displayed directly.

6. Select the amendment instruction for a settlement instruction for which you want to view the details by clicking on an entry in the list.

7. Click on the *details* button.

   ⇨ The *amendment securities instruction – details* screen is displayed.

➡ You have viewed the details of an amendment instruction for a settlement instruction.

3.5.3 Creation of a New Hold/Release Instruction for a Settlement Instruction

Overview

This business package describes the creation of a new hold/release instruction for a settlement instruction.

You can create a new hold/release instruction and afterwards check the information of the hold/release instruction in T2S.

To create a new hold/release instruction for a settlement instruction, carry out the business scenarios in the predefined order and choose the business scenario relevant to you whenever options are given:

Business Scenarios

1. Create a new hold instruction
   - ☐ Put a settlement instruction on party hold [▷ 713]
   - ☐ Put a settlement instruction on CSD hold [▷ 715]

2. Create a new release instruction
   - ☐ Release a settlement instruction from party hold [▷ 717]
   - ☐ Release a settlement instruction from CSD hold [▷ 720]
   - ☐ Release a settlement instruction from CoSD hold [▷ 722]
   - ☐ Release a settlement instruction from CSD validation hold [▷ 724]

3. View hold/release instruction details [▷ 725]

3.5.3.1 Put a Settlement Instruction on Party Hold

Context of Usage

This business scenario describes how to put a settlement instruction on party hold through the creation of a hold instruction. Settlement instructions put on party hold are not eligible for settlement until they are released. This is necessary if you want to prevent the settlement instruction to be settled.

Putting a settlement instruction on party hold is one option for the creation of a new hold/release instruction for a settlement instruction.

Before you create a new hold instruction for party hold, check whether the settlement instruction is eligible for party hold. A settlement instruction is eligible to be put on party hold if it is not cancelled, settled, already put on party hold nor identified as CoSD. You can check the status of your settlement instruction before creating the hold instruction through the details screen as described in the business scenario view settlement instruction details [▷ 701].

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

- ☐ Settlement instruction query
- ☐ Settlement instruction current status query

☐ Settlement instruction status audit trail query

☐ Party hold settlement instruction on a securities account or on behalf of an external CSD

☐ Send new instruction using a specific instructing party

Reference Further information on screens involved can be found in the screen reference part:

☐ *Settlement instructions – search/list* screen

☐ *Settlement instruction – details* screen

☐ *Hold/release instruction - new* screen [▶ 125]

Instructions 1. Go to the *settlement instructions – search/list* screen:

```
Securities >> Settlement >> Settlement Instructions
```

2. Enter at least one general search criterion known to you about the settlement instruction you want to put on party hold.

3. Click on the *search* button.

⇨ A list containing the search results is displayed on the screen.

⇨ If the search retrieves only one settlement instruction, the *settlement instruction – details* screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction you want to put on party hold by clicking on an entry in the list.

5. Click on the *details* button.

⇨ The *settlement instruction – details* screen is displayed.

6. Check the details of the settlement instruction and click on the *hold/release* button.

⇨ The *hold/release instruction – new* screen is displayed.

7. Enter all mandatory information in the 'General' subframe.

8. Select the 'Party Hold' check box in the 'Hold/Release' subframe.

> ❗ **Alternative**
>
> To set all fields to default value and blank out all optional fields, click on the *reset* button.
>
> To cancel the process and return to the previous screen, click on the *cancel* button.

9. Click on the *submit* button.

10. Enter your PIN for digital signature purposes (NRO).

➡ A new hold instruction for party hold has been created.

3.5.3.2 Put a Settlement Instruction on CSD Hold

Context of Usage

This business scenario describes how to put a settlement instruction on CSD hold through the creation of a hold instruction. This is necessary if you want to prevent the settlement instruction to be settled. Settlement instructions put on CSD hold are not eligible for settlement until they are released.

Putting a settlement instruction on CSD hold is one option for the creation of a new hold/release instruction for a settlement instruction.

Before you create a new hold instruction for CSD hold, check whether the settlement instruction is eligible for CSD hold. A settlement instruction is eligible to be put on CSD hold if it is not cancelled, settled, already put on CSD hold nor identified as CoSD. You can check the status of your settlement instruction before creating the hold instruction through the details screen as described in the business scenario view settlement instruction details [▶ 701].

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Settlement instruction query

☐ Settlement instruction current status query

☐ Settlement instruction status audit trail query

☐ CSD hold settlement instruction either on a securities account or on behalf of the CSD in T2S

☐ Send new instruction using a specific instructing party

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Settlement instructions - search/list* screen

☐ *Settlement instruction - details* screen

☐ *Hold/release instruction - new* screen [▶ 125]

Instructions

1. Go to the *settlement instructions –search/list* screen:

   `Securities >> Settlement >> Settlement Instructions`

2. Enter at least one general search criterion known to you about the settlement instruction you want to put on CSD hold.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one settlement instruction, the *settlement instruction - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction you want to put on CSD hold by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *settlement instruction – details* screen is displayed.

6. Check the details of the settlement instruction and click on the *hold/release* button.

   ⇨ The *hold/release instruction – new* screen is displayed.

7. Enter all mandatory information in the 'General' subframe.

8. Select the 'CSD Hold' check box in the 'Hold/Release' subframe.

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

9. Click on the *submit* button.

10. Enter your PIN for digital signature purposes (NRO).

➡ A new hold instruction for CSD hold has been created.

3.5.3.3 Release a Settlement Instruction from Party Hold

Context of Usage

This business scenario describes how to release a settlement instruction from party hold. This is necessary if you want to release a settlement instruction that was previously put on party hold, in order to settle it. Settlement instructions put on party hold are not eligible for settlement until they are released.

Releasing a settlement instruction for party hold is one option for the creation of a new hold/release instruction for a settlement instruction.

Before you create a new release instruction for party hold, check whether the settlement instruction is eligible for the release from party hold. A settlement instruction is eligible to be released for party hold if it is not cancelled, settled nor already released for party hold. You can check the status of your settlement instruction before creating the release instruction through the details screen as described in the business scenario view settlement instruction details [▶ 701].

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Settlement instruction query

☐ Settlement instruction current status query

☐ Settlement instruction status audit trail query

☐ Release party hold settlement instruction on a securities account or on behalf of an external CSD

☐ Release party hold auto-collateralisation instruction on a securities account

☐ Send new instruction using a specific instructing party

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Settlement instructions – search/list* screen

☐ *Settlement instruction – details* screen

☐ *Hold/release instruction - new* screen [▶ 125]

Instructions

1. Go to the *settlement instructions – search/list* screen:
   ```
   Securities >> Settlement >> Settlement Instructions
   ```

2. Enter at least one general search criterion known to you about the settlement instruction you want to release from party hold.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one settlement instruction, the *settlement instruction - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction you want to release for a party hold by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *settlement instruction – details* screen is displayed.

6. Check the details of the settlement instruction and click on the *hold/release* button.

   ⇨ The *hold/release instruction – new* screen is displayed.

7. Enter all mandatory information in the 'General' subframe.

8. Select the 'Party Release' check box in the 'Hold/Release' subframe.

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

---

9. Click on the *submit* button.

10. Enter your PIN for digital signature purposes (NRO).

➡ A new release instruction for party hold has been created.

3.5.3.4 Partially Release a Settlement Instruction from Party Hold

Context of Usage

This business scenario describes how to partially release a settlement instruction from party hold. This is necessary if you want to partially release a settlement instruction that was previously put on party hold, in order to partially settle it. Settlement instructions put on party hold are not eligible for partial settlement until they are released or partially released.

Before you create a new partial release instruction for party hold, check whether the settlement instruction is eligible for the release from party hold. A business settlement instruction is eligible to be partially released for party hold if it is the delivering leg of the transaction, it is matched, its ISD has been reached, it is not cancelled, settled, already released for party hold and no other hold applies to the transaction. You can check the status of your settlement instruction before creating the partial release instruction through the details screen as described in the business scenario View Settlement Instruction Details [▶ 701].

This business scenario is not relevant for CB users.

Privileges   To carry out this business scenario, you need the following privileges:

☐ Settlement instruction query

☐ Settlement instruction current status query

☐ Settlement instruction status audit trail query

☐ Release party hold settlement instruction on a securities account or on behalf of an external CSD

☐ Release party hold auto-collateralisation instruction on a securities account

☐ Send new instruction using a specific instructing party

Reference   Further information on screens involved can be found in the screen reference part:

☐ Settlement Instructions - Search/List Screen [▶ 176]

☐ Settlement Instruction - Details Screen [▶ 191]

☐ Hold/Release Instruction - New Screen [▶ 125]

Instructions   1. Go to the settlement instructions – search/list screen: Securities >> Settlement >> Settlement Instructions

2. Enter at least one general search criterion known to you about the settlement instruction you want to release from party hold.

3. Click on the search button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one settlement instruction, the settlement instruction - details screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction you want to release for a party hold by clicking on an entry in the list.

5. Click on the details button.

   ⇨ The settlement instruction – details screen is displayed.

6. Check the details of the settlement instruction and click on the hold/release button.

    ⇨ The hold/release instruction – new screen is displayed.

   7. Enter all mandatory information in the 'General' subframe.

   8. Select the 'Party Release' check box in the 'Hold/Release' subframe.

   9. Insert the quantity to be released in the 'Released quantity' field.

Alternative

To set all fields to default value and blank out all optional fields, click on the reset button.

To cancel the process and return to the previous screen, click on the cancel button.

  10. Click on the submit button.

  11. Enter your PIN for digital signature purposes (NRO).

  ➡ A new partial release instruction for party hold has been created.

3.5.3.5 Release a Settlement Instruction from CSD Hold

Context of Usage

This business scenario describes how to release a settlement instruction from CSD hold. Settlement instructions put on CSD hold are not eligible for settlement until they are released. This is necessary if you want to release a settlement instruction that was previously put on CSD hold, in order to settle it.

Releasing a settlement instruction for CSD hold is one option for the creation of a new hold/release instruction for a settlement instruction.

Before you create a new release instruction for CSD hold, check whether the settlement instruction is eligible for the release from CSD hold. A settlement instruction is eligible for CSD hold release if it is not cancelled, settled, or already released from CSD hold. You can check the status of your settlement instruction before creating the release instruction through the details screen as described in the business scenario view settlement instruction details [▶ 701].

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Settlement instruction query

☐ Settlement instruction current status query

☐ Settlement instruction status audit trail query

☐ Release CSD hold settlement instruction either on a securities account or on behalf of the CSD in T2S

☐ Send new instruction using a specific instructing party

Reference   Further information on screens involved can be found in the screen reference part:

□   *Settlement instructions – search/list* screen

□   *Settlement instruction – details* screen

□   *Hold/release instruction - new* screen [▷ 125]

Instructions   1. Go to the *settlement instructions – search/list* screen:

```
Securities >> Settlement >> Settlement Instructions
```

2. Enter at least one general search criterion known to you about the settlement instruction you want to release from CSD hold.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one settlement instruction, the *settlement instruction – details* screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction you want to release from CSD hold by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *settlement instruction – details* screen is displayed.

6. Check the details of the settlement instruction and click on the *hold/release* button.

   ⇨ The *hold/release instruction – new* screen is displayed.

7. Enter all mandatory information in the 'General' subframe.

8. Select the 'CSD Release' check box in the 'Hold/Release' subframe.

Hold/Release

9. Click on the *submit* button.

10. Enter your PIN for digital signature purposes (NRO).

➡ A new release instruction for CSD hold has been created.

3.5.3.6 Release a Settlement Instruction from CoSD Hold

Context of Usage

This business scenario describes how to release a settlement instruction from CoSD hold. This process is necessary if you want to release a settlement instruction that was previously put on CoSD hold, in order to settle it. Settlement instructions put on CoSD hold are not eligible for settlement until they are released.

Releasing a settlement instruction for CoSD hold is one option for the creation of a new hold/release instruction for a settlement instruction.

Before you create a new release instruction for CoSD hold, check whether the settlement instruction is eligible for the release of CoSD hold. A settlement instruction is eligible to be released from CoSD hold if it is not cancelled, settled, already released for CoSD hold or if the settlement restrictions of the type CoSD blocking related to the CoSD process have not been settled yet. You can check the status of your settlement instruction before creating the release instruction through the details screen as described in the business scenario view settlement instruction details [▶ 701].

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Settlement instruction query

☐ Settlement instruction current status query

☐ Settlement instruction status audit trail query

☐ Release CoSD rule of settlement instruction on behalf of administering party

☐ Send new instruction using a specific instructing party

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Settlement instructions – search/list* screen

☐ *Settlement instruction – details* screen

☐ *Hold/release instruction - new* screen [▶ 125]

Instructions

1. Go to the *settlement instructions – search/list* screen:

   `Securities >> Settlement >> Settlement Instructions`

2. Enter at least one general search criterion known to you about the settlement instruction you want to release from CoSD hold.

3. Click on the *search* button.

⇨ A list containing the search results is displayed on the screen.

⇨ If the search retrieves only one settlement instruction, the *settlement instruction - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction you want to release from CoSD hold by clicking on an entry in the list.

5. Click on the *details* button.

⇨ The *settlement instruction – details* screen is displayed.

6. Check the details of the settlement instruction and click on the *hold/release* button.

⇨ The *hold/release instruction – new* screen is displayed.

7. Enter all mandatory information in the 'General' subframe.

8. Select the 'CoSD Release' check box and enter the reference of the relevant CoSD rule to be released in the 'Hold/Release' subframe.

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

9. Click on the *submit* button.

10. Enter your PIN for digital signature purposes (NRO).

➡ A new release instruction for CoSD hold has been created.

3.5.3.7 Release a Settlement Instruction from CSD Validation Hold

Context of Usage

This business scenario describes how to release a settlement instruction from CSD validation hold. This is necessary if you want to release a settlement instruction that was previously put on CSD validation hold in order to settle it. Settlement instructions put on CSD validation hold are not eligible for settlement until they are released.

Releasing a settlement instruction for CSD validation hold is one option for the creation of a new hold/release instruction for a settlement instruction.

Before you create a new release instruction for CSD validation hold, check whether the settlement instruction is eligible for the release from CSD validation hold. A settlement instruction is eligible to be released for a CSD validation hold if it is not cancelled, settled nor already released for CSD validation hold. You can check the status of your settlement instruction before creating the release instruction through the details screen as described in the business scenario view settlement instruction details [▶ 701].

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Settlement instruction query

☐ Settlement instruction current status query

☐ Settlement instruction status audit trail query

☐ Release CSD validation hold settlement instruction either on a securities account or on behalf of the CSD in T2S

☐ Send new instruction using a specific instructing party

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Settlement instructions – search/list* screen

☐ *Settlement instruction – details* screen

☐ *Hold/release instruction - new* screen [▶ 125]

Instructions

1. Go to the *settlement instructions – search/list* screen:

   `Securities >> Settlement >> Settlement Instructions`

2. Enter at least one general search criterion known to you about the settlement instruction you want to release from CSD validation hold.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one settlement instruction, the *settlement instruction - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction you want to release CSD validation hold by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *settlement instruction – details* screen is displayed.

6. Check the details of the settlement instruction and click on the *hold/release* button.

   ⇨ The *hold/release instruction – new* screen is displayed.

7. Enter all mandatory information in the 'General' subframe.

8. Select the 'CSD Validation Release' check box in the 'Hold/Release' sub-frame.

Hold/Release

Current Hold Status	Hold Types	Release Types
Party Hold Status Released	Party Hold ☐	Party Release ☐
CSD Hold Status Released	CSD Hold ☐	CSD Release ☐
CSD Validation Hold Status On Hold		CSD Validation Release ☐
CoSD Hold Status Released		CoSD Release ☐
		CoSD Rule Identification

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

9. Click on the *submit* button.

10. Enter your PIN for digital signature purposes (NRO).

➡ A new release instruction for CSD validation hold has been created.

3.5.3.8 View Hold/Release Instruction Details

Context of Usage

This business scenario describes how to view the details of a hold/release instruction. Once the hold/release instruction is created in T2S it might be necessary for you to check its details to be aware of updates during the lifecycle of the hold/release instruction.

Viewing a hold/release instruction details is one option for the creation of a new hold/release instruction for a settlement instruction.

This business scenario is not relevant for CB users.

Privileges   To carry out this business scenario, you need the following privileges:

☐   Amendment instruction query for intra-position movements and settlement instructions

☐   Hold/release instruction audit trail list query

☐   Maintenance for intra-position movements and settlement instructions query

☐   Cancellation instruction query for intra-position movements and settlement instructions

Reference   Further information on screens involved can be found in the screen reference part:

☐   *Maintenance securities instructions – search/list* screen [▶ 163]

☐   *Hold/release instruction – details* screen [▶ 121]

Instructions   1. Go to *maintenance securities instructions – search/list* screen:

       `Securities >> Settlement >> Maintenance Securities In-structions`

2. Enter all search criteria known to you about the hold/release instruction for which you want to view the details.

3. Select the value 'Settlement Instruction' in the 'Instruction Type' field.

4. Select the value 'Hold/Release Instruction' in the 'Maintenance Instruction Type' field.

🛈   **Alternatives**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

5. Click on the *search* button.

⇨ A list containing the search results is displayed on the screen.

⇨ If the search retrieves only one hold/release instruction, the *hold/release instruction – details* screen is displayed directly.

6. Select the hold/release instruction for which you want to view the details.

7. Click on the *details* button.

⇨ The *hold/release instruction – details* screen is displayed.

➡ You have viewed the details of a hold/release instruction.

3.5.4 Creation of a New Cancellation Instruction for a Settlement Instruction

Overview

This business package describes the creation of a new cancellation instruction for a settlement instruction.

You can create a new cancellation instruction for a settlement instruction and afterwards you can check the information of the cancellation instruction in T2S.

To create a new cancellation instruction for a settlement instruction, carry out the following business scenarios in the predefined order.

Business Scenarios

1. Cancel a settlement instruction [▶ 727]

2. View cancellation instruction for a settlement instruction details [▶ 729]

3. View alleged cancellation instructions [▶ 730]

3.5.4.1 Cancel a Settlement Instruction

Context of Usage

This business scenario describes how to create a new cancellation instruction for a settlement instruction. This is necessary if you want to cancel a settlement instruction so it is not further processed in T2S.

Cancelling a settlement instruction is mandatory for the creation of a cancellation instruction for a settlement instruction.

Before you cancel a settlement instruction, check whether the settlement instruction is neither already cancelled, settled nor on CoSD hold. You can check the status of your settlement instruction before creating the cancellation instruction through the details screen as described in the business scenario view settlement instruction details [▶ 701].

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Settlement instruction query

☐ Settlement instruction current status query

☐ Settlement instruction status audit trail query

☐ Cancel settlement instruction / settlement restriction on securities either on a securities account or on behalf of the CSD in T2S, on behalf of an external CSD or on behalf of an administering party

☐ Cancel non-modifiable instructions on behalf of the instructing party of the underlying settlement instruction

☐ Send new instruction using a specific instructing party

Reference Further information on screens involved can be found in the screen reference part:

☐ *Settlement instructions – search/list* screen

☐ *Settlement instruction - details* screen

☐ *Cancellation securities instruction - new* screen [▶ 116]

Instructions 1. Go to the *settlement instructions – search/list* screen:

`Securities >> Settlement >> Settlement Instructions`

2. Enter at least one general search criterion known to you about the settlement instruction for which you want to view the details.

3. Click on the *search* button.

⇨ A list containing the search results is displayed on the *settlement instructions – search/list* screen.

⇨ If the search retrieves a single settlement instruction, the *settlement instruction - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction you want to cancel by clicking on an entry in the list.

5. Click on the *details* button.

⇨ The *settlement instruction - details* screen is displayed.

6. Click on the *cancellation instruction* button.

⇨ The *cancellation securities instruction - new* screen is displayed.

7. Enter all relevant information in the 'General' frame if needed.

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.
To cancel the process and return to the previous screen, click on the *cancel* button.

---

8. Click on the *submit* button.

9. Enter your PIN for digital signature purposes (NRO).

➡ A new cancellation instruction for a settlement instruction has been created.

3.5.4.2 View Cancellation Instruction for a Settlement Instruction Details

Context of Usage

This business scenario describes how to view the details of a cancellation instruction for a settlement instruction. Once the amendment instruction for a settlement instruction is created in T2S it might be necessary for you to check its details to be aware of updates during the lifecycle of the cancellation instruction.

Viewing a cancellation instruction for a settlement instruction details is optional for the creation of a new cancellation instruction for a settlement instruction.

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Amendment instruction query for intra-position movements and settlement instructions

☐ Maintenance for intra-position movements and settlement instructions query

☐ Cancellation instruction query for intra-position movements and settlement instructions

☐ Cancellation instruction for intra-position movement or settlement instruction audit trail details query

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Maintenance securities instructions – search/list* screen [▷ 163]

☐ *Cancellation securities instruction - details* screen [▷ 112]

Instructions

1. Go to the *maintenance securities instructions – search/list* screen:

   `Securities >> Settlement >> Maintenance Securities Instructions`

2. Enter all search criteria known to you about the cancellation instruction for a settlement instruction for which you want to view the details.

3. Select the value 'Settlement Instruction' in the 'Instruction Type' field.

4. Select the value 'Cancellation Instruction' in the 'Maintenance Instruction Type' field.

> **Alternative**
>
> To set all fields to default value and blank out all optional fields, click on the *reset* button.

5. Click on the *search* button.

    ⇨ A list containing the search results is displayed on the screen.

    ⇨ If the search retrieves only one cancellation instruction for a settlement instruction, the *cancellation securities instruction - details* screen is displayed directly.

6. Select the cancellation instruction for a settlement instruction for which you want to view the details.

7. Click on the *details* button.

    ⇨ The *cancellation securities instruction - details* screen is displayed.

➡ You have viewed the details of a cancellation instruction for a settlement instruction.

3.5.4.3 View Alleged Cancellation Instructions

Context of Usage

This business scenario describes how to check if there is any settlement instruction requested for cancellation by the counterparty of the transaction in T2S. Once a settlement instruction is created in T2S it might be necessary for you to check if it has been requested for cancellation by the counterparty to create your own cancellation instruction in order to cancel the transaction in T2S. Once a settlement instruction is matched in T2S with its counterpart, bilateral cancellation by the two legs of the transaction is required.

Viewing alleged cancellation instructions is one option for the creation of a new cancellation instruction for a settlement instruction.

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Settlement instruction query

☐ Settlement instruction current status query

☐ Settlement instruction status audit trail query

Reference Further information on screens involved can be found in the screen reference part:

☐ *Settlement instructions– search/list* screen

☐ *Settlement instruction - details* screen

Instructions 1. Go to the *settlement instructions– search/list* screen:

```
Securities >> Settlement >> Settlement Instructions
```

2. Enter at least one general search criterion known to you about the settlement instruction for which you want to check if it has been requested for cancellation.

3. Click on the *search* button.

⇨ The *settlement instructions – search/list* screen is displayed.

⇨ If the search retrieves only one settlement instruction, the *settlement instruction - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction you want to check if it has been requested for cancellation by its counterpart by clicking on an entry in the list.

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

5. Click on the *details* button.

⇨ The *settlement instruction - details* screen is displayed.

6. Check if the 'Cancellation Requested' field in the 'Status Information' frame has the value 'Yes'. If the value is 'Yes', the settlement instruction has been requested for cancellation by the counterparty. In order to execute the cancellation another cancellation instruction needs to be received in T2S for this leg.

🛈 **Hint**

If you want to send a cancellation instruction to complete the cancellation request, continue with step 6 of the 'Cancel a Settlement Instruction [▷ 727]' business scenario.

➡ You have viewed your alleged cancellation instructions.

3.5.5 Monitoring of the Lifecycle of a Settlement Instruction

Overview

This business package describes the monitoring of the lifecycle of a settlement instruction.

You can check the status updates during the lifecycle of a settlement instruction once it has been created in T2S.

To monitor the lifecycle of a settlement instruction, carry out the following business scenarios.

Business Scenarios

- ☐ View settlement instruction status history [▶ 732]
- ☐ View SF1/SF2 timestamps of Settlement Instructions in case of Insolvency situation [▶ 733]

3.5.5.1 View Settlement Instruction Status History

Context of Usage

This business scenario describes how to view the status history of a settlement instruction.

Once a settlement instruction is created in T2S it might be necessary for you to check its status history to be aware of its status changes during the lifecycle of the settlement instruction.

Viewing settlement instruction status history is mandatory for the monitoring of the lifecycle of a settlement instruction

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

- ☐ Settlement instruction query
- ☐ Settlement instruction current status query
- ☐ Settlement instruction status audit trail query
- ☐ Settlement instruction audit trail query

Reference

Further information on screens involved can be found in the screen reference part:

- ☐ *Settlement instructions – search/list* screen
- ☐ *Settlement instruction – details* screen
- ☐ *Status history – details* screen [▶ 266]

Instructions

1. Go to the *settlement instructions – search/list* screen:

   `Securities >> Settlement >> Settlement Instructions`

2. Enter at least one general search criterion known to you about the settlement instruction for which you want to view the details.

3. Click on the *search* button.

⇨ A list containing the search results is displayed on the screen.

⇨ If the search retrieves only one settlement instruction, the *settlement instruction – details* screen is displayed directly. Proceed with step 6.

Alternative

To set all fields to default value and blank out all optional fields, click on the *reset* button.

---

4. Select the settlement instruction for which you want to view the details.

5. Click on the *details* button.

   ⇨ The *settlement instruction – details* screen is displayed.

6. Click on the *status history* button.

   ⇨ The *status history - details* screen is displayed.

➡ You have viewed the settlement instruction status history.

3.5.5.2 View SF1/SF2 timestamps of Settlement Instructions in case of Insolvency situation

Context of Usage

This business scenario describes how to retrieve the SF1/SF2 timestamps of settlement instructions in case of insolvency situation.

Once a settlement instruction is created in T2S it might be necessary for you to retrieve the SF1/SF2 timestamps for insolvency proceedings during the lifecycle of the settlement instruction.

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privilege:

☐ Settlement instruction matched and accepted status query privilege

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Insolvency procedure settlement instructions – search/list* screen [▶ 269]

Instructions

1. Go to the *insolvency procedure settlement instructions – search/list* screen:
   ```
   Securities >> Settlement >> Insolvency procedure Settle-
   ment Instructions
   ```

2. Enter at least one insolvent object criterion known to you to retrieve SF1 and SF2 timestamps of settlement instructions under insolvency procedures.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

➡ You have retrieved SF1/SF2 timestamps of Settlement Instructions in case of Insolvency situation

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

3.5.6 View the list of links data preventing settlement of a settlement instruction

Context of Usage

This business scenario describes how to view the list of data preventing settlement of a selected settlement instruction.

When a linked settlement instruction is unsettled, it might be useful for you to check the list of the settlement instructions or settlement restrictions preventing its settlement with the associated constraints.

This business scenario is not relevant for the following cases:

☐ Settled, cancelled and not matched instructions

☐ Settlement instructions with an intended settlement date in the future

Privileges

To carry out this business scenario, you need the following privileges:

☐ Settlement instruction query

☐ Settlement instruction current status query

Reference

Further information on screens involved can be found in the screen reference part:

☐ Settlement instructions – search/list

☐ Settlement instruction – details

☐ Links preventing settlement – list

Instructions

1. Go to the settlement instructions – search/list screen:
   Securities >> Settlement >> Settlement Instructions

2. Enter at least one general search criterion known to you about the settlement instruction for which you want to view the links data preventing its settlement.

3. Click on the search button.

   ☐ A list containing the search results is displayed on the screen

   ☐ If the search retrieves only one settlement instruction, the settlement instruction – details screen is displayed directly. Proceed with step 6.

4. Select the settlement instruction for which you want to view the links data preventing settlement by clicking on an entry in the list.

5. Click on the details button.

 ☐ The settlement instructions – details screen is displayed.

6. Check the details of the settlement instruction and click on the links button.

 ☐ The links preventing settlement – list screen is displayed.

 ☐ You have viewed the list of the settlement instructions and/or settlement instructions preventing the settlement of the selected settlement instruction with the associated constraints.

3.5.7 Monitoring of Penalties

Overview

This business package describes the monitoring of the penalties computed by T2S for failing settlement instructions.

You can search for penalties computed by T2S, view the individual details of a penalty, modify existing penalties, view the list of penalties related to a settlement instruction and check the monthly net amounts of the penalties computed for the business days of a previous month.

To monitor penalties, the following business scenarios are available.

Business Scenarios

☐ View the individual penalty details

☐ Modification of existing penalties

☐ View list of penalties

☐ View the monthly net amount of penalties

3.5.7.1 View the Individual Penalty Details

Context of Usage

This business scenario describes how to retrieve the details of a penalty associated to a settlement instruction.

Once a penalty is computed for a given settlement instruction it might be necessary for you to retrieve its details.

This function will not be available either during the Maintenance Window or during the processing of penalties, i.e. between the Events "PMSS" (Penalty Mechanism- Stop Screens and penalty modification requests) and "PMRR" (Penalty Mechanism- Restart GUI and Restart processing penalty modification requests).

This business scenario is only available for CSD authorized users and T2S Operator user.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Penalty Details Query Privilege

□   Settlement Instruction Audit Trail Query

Reference   Further information on screens involved can be found in the screen reference part:

□   Penalty – search/list screen

□   Penalty – details screen

□   Settlement instruction – details screen

Instructions
1. Go to the Penalty – search/list screen:
   Securities >> Settlement >> Daily Penalties

2. Enter a valid combination of search criteria. For this, you can either choose:

   ⇒ To perform the query with a reference. For this you should specify at least one or a valid combination of the search criteria.
   This query cannot use the Additional Search Criteria for Penalty Query by ISIN Code Criteria, by T2S Party Criteria and System Entity Criteria.
   This query cannot be combined with any other query.

   ⇒ To perform the query by ISIN Code Criteria and/or by T2S Party Criteria. These two queries can be combined or used separately.
   If combined together, the parameters will be combined through AND logic, and the minimum search criteria of at least one of the two queries shall be respected.
   At least the minimum search criteria shall be specified. Additional search criteria can be used to limit the query results.

   ⇒ To perform a System Entity Criteria query. For this you should at least enter the minimum search criteria.
   Additional search criteria can be used to limit the query results.
   This query cannot be combined with any other query.

3. Click on the search button.

   ⇒ If the search retrieves more than one penalty a list containing the search results is displayed on the screen.

   ⇒ If the search retrieves only one penalty, the penalty – details screen is displayed directly.

   ⇒ You have viewed the individual penalty details.

ⓘ   **Alternative**

4. Select the penalty for which you want to view the details by clicking on the entry in the list.

5. Click on the details button.

⇨ The penalty – details screen is displayed.

⇨ You have viewed the individual penalty details.

! **Alternative**

---

6. In the Settlement Instruction – details screen >> Click on the associated penalties button.

⇨ If more than one penalty is retrieved by T2S, the penalty – search/list screen will be displayed.

⇨ If only one penalty is retrieved by T2S, the penalty – details screen will be displayed.

➡ You have viewed the individual penalty details

! **Alternative**

To set all fields to default value and blank out all optional fields, click on the reset button

3.5.7.2 Modification of existing penalties

Context of Usage

This business scenario describes how to remove, re-include, re-allocate or switch an existing penalty computed for a settlement instruction.

CSDs and T2S Operator will be able to request the removal of a penalty only when the penalty was imposed to one of its participants or to itself. To cater for mistakes in the removal of penalties, T2S allows CSDs and T2S Operator to re-include a penalty that the CSD has previously removed.

Also, when an already matched settlement instruction is sent late to T2S, CSDs and T2S Operator are able to re-allocate the penalty from the Instructing Party, initially assigned as failing and non-failing party, to the delivering party and the receiving party of the instruction. Finally, if T2S calculates and assigns the penalty to a party which, due to external conditions outside T2S, should not be the party penalised but entitled to receive the penalty, CSDs and T2S Operator will be able to switch the failing and non-failing party of the penalty.

You may remove, re-include, re-allocate or switch existing penalties anytime of the day except during the Maintenance Window or during the processing of penalties, i.e. between the Events "PMSS" (Penalty Mechanism- Stop Screens and penalty modification requests) and "PMRR" (Penalty Mechanism- Restart GUI and Restart processing penalty modification requests).

These functionalities are only available during the appeal period of the penalty.

Additionally:

☐ If the status of the penalty is not 'Active', the remove function will not be available.

☐ If the status of the penalty is not 'Removed', the re-include function will not be available.

☐ If either the status of the penalty is not 'Active', or the penalty is a SEFP, or if it is a LMFP but the underlying instruction was not sent as already matched to T2S, or the LMFP has already been re-allocated before, the re-allocate function will not be available.

☐ If the status of the penalty is not 'Active', the switch function will not be available.

☐ This business scenario is only available for CSD authorized users and T2S Operator user.

Privileges   To carry out this business scenario, you need the following privileges:

☐ Penalty Details Query Privilege

☐ Settlement Instruction Audit Trail Query

☐ Modification of Penalties Privilege

References   Further information on screens involved can be found in the screen reference part:

☐ Penalty – details screen

☐ Penalty removal screen

☐ Penalty re-inclusion screen

☐ Penalty re-allocacion screen

☐ Penalty switch screen

Instructions   1. Go to the Penalty – search/list screen:
Securities >> Settlement >> Daily Penalties

2. Enter a valid combination of search criteria. For this, you can either choose:

⇨ To perform the query with a reference. For this you should specify at least one or a valid combination of the search criteria.
This query cannot use the Additional Search Criteria for Penalty Query by ISIN Code Criteria, by T2S Party Criteria and System Entity Criteria.
This query cannot be combined with any other query.

⇨ To perform the query by ISIN Code Criteria and/or by T2S Party Criteria. These two queries can be combined or used separately.
If combined together, the parameters will be combined through AND logic, and the minimum search criteria of at least one of the two queries shall be

respected.

At least the minimum search criteria shall be specified. Additional search criteria can be used to limit the query results.

⇨ To perform a System Entity Criteria query. For this you should at least enter the minimum search criteria.

Additional search criteria can be used to limit the query results.

This query cannot be combined with any other query.

3. Click on the search button.

⇨ If the search retrieves more than one penalty a list containing the search results is displayed on the screen.

⇨ If the search retrieves only one penalty, the penalty – details screen is displayed directly.

🛈 **Alternative**

4. Select the penalty for which you want to view the details by clicking on the entry in the list.

5. Click on the details button.

⇨ The penalty – details screen is displayed.

6. To remove a penalty:

⇨ Click on the "Remove" button. This function will not be available if the status of the penalty is not 'Active'.

⇨ Penalty removal screen will pop up with the relevant information to create a Removal Request based on the Penalty of the screen.

⇨ Select the reason code, insert the Description text if the reason selected is OTHR, and click on the Submit button.

⇨ Enter your PIN for digital signature purposes (NRO).

➡ You have removed the penalty.

7. To re-include a penalty:

⇨ Click on the "Re-include" button. This function will not be available if the status of the penalty is not 'Removed'.

⇨ A confirmation prompt will pop-up. Hence, the action is triggered (i.e. the Re-inclusion Request is sent) and the Penalty - details screen is displayed again updated (i.e. Penalty with new status ACTV, (Active), new Reason Code UPDT (Updated) and description (if applies), the penalty amount

and Calculation details before the penalty was removed and the To be re-calculated flag set to YES) if the Re-inclusion Request is confirmed and executed (the action was triggered in Two-eyes).

⇨ Click on the Yes button.

⇨ Enter your PIN for digital signature purposes (NRO).

➡ You have re-included the penalty.

8. To re-allocate a penalty:

⇨ Click on the "Re-allocate" button. This function will not be available if either the status of the penalty is not 'Active', if the penalty is a SEFP or a LMFP but the underlying instruction was not sent as already matched to T2S, or if the LMFP has already been re-allocated before.

⇨ Penalty re-allocation screen will pop-up with the relevant information to create a Re-allocation Request based on the Penalty of the screen.

⇨ Select the New failing party and, only in case the two BIC's retrieved for the New failing Party BIC are the same, additionally select the T2S Reference of the Failing Settlement Instruction. Finally, click on the Submit button.

⇨ Enter your PIN for digital signature purposes (NRO).

➡ You have re-allocated the penalty

9. To switch a penalty:

⇨ Click on the "Switch" button. This function will not be available if the status of the penalty is not 'Active'.

⇨ Penalty switch screen will pop-up with the relevant information to create a Switch Request based on the Penalty of the screen.

⇨ Insert the Description text and click on the Submit button.

⇨ Enter your PIN for digital signature purposes (NRO).

➡ You have switched the penalty.

🛈 **Alternative**

---

10. In the Settlement Instruction – details screen >> Click on the associated penalties button.

⇨ If more than one penalty is retrieved by T2S, the penalty – search/list screen will be displayed.

⇨ If only one penalty is retrieved by T2S, the penalty – details screen will be displayed.

2. To remove a penalty:

⇨ Click on the "Remove" button. This function will not be available if the status of the penalty is not 'Active'.

⇨ Penalty removal screen will pop up with the relevant information to create a Removal Request based on the Penalty of the screen.

⇨ Select the reason code, insert the Description text if reason selected is OTHR, and click on the Submit button.

⇨ Enter your PIN for digital signature purposes (NRO).

➡ You have removed the penalty.

12. To re-include a penalty:

⇨ Click on the "Re-include" button. This function will not be available if the status of the penalty is not 'Removed'.

⇨ A confirmation prompt will pop-up. Hence, the action is triggered (i.e. the Re-inclusion Request is sent) and the Penalty - details screen is displayed again updated (i.e. Penalty with new status ACTV, (Active), new Reason Code UPDT (Updated) and description (if applies), the penalty amount and Calculation details before the penalty was removed and the flag To be recalculated set to YES) if the Re-inclusion Request is confirmed and executed (the action was triggered in Two-eyes).

⇨ Click on the Yes button.

⇨ Enter your PIN for digital signature purposes (NRO).

➡ You have re-included the penalty.

13. To re-allocate a penalty:

⇨ Click on the "Re-allocate" button. This function will not be available if either the status of the penalty is not 'Active', if the penalty is a SEFP or a LMFP but the underlying instruction was not sent as already matched to T2S, or if the LMFP has been re-allocated before.

⇨ Penalty re-allocation screen will pop-up with the relevant information to create a Re-allocation Request based on the Penalty of the screen.

⇨ Select the New failing party and only in case the two BIC's retrieved for the New failing Party BIC are the same, additionally select the T2S Reference of Failing Settlement Instruction. Finally, click on the Submit button.

⇨ Enter your PIN for digital signature purposes (NRO).

➡ You have re-allocated the penalty.

14. To switch a penalty:

⇨ Click on the "Switch" button. This function will not be available if the status of the penalty is not 'Active'.

⇨ Penalty switch screen will pop-up with the relevant information to create a Switch Request based on the Penalty of the screen.

⇨ Insert the Description text and click on the Submit button.

⇨ Enter your PIN for digital signature purposes (NRO).

➡ You have switched the penalty.

3.5.7.3 View List of Penalties

Context of Usage
This business scenario describes how to retrieve the list of penalties associated to a settlement instruction.

Once a given settlement instruction is subject to the calculation of penalties it might be necessary for you to retrieve them.

This function will not be available either during the Maintenance Window or during the processing of penalties, i.e. between the Events "PMSS" (Penalty Mechanism- Stop Screens and penalty modification requests) and "PMRR" (Penalty Mechanism- Restart GUI and Restart processing penalty modification requests).

This business scenario is only available for CSD authorized users and T2S Operator user.

Privileges
To carry out this business scenario, you need the following privileges:

☐ Penalty List Query Privilege

☐ Settlement Instruction Audit Trail Query

Reference
Further information on screens involved can be found in the screen reference part:

☐ Penalty – search/list screen

☐ Settlement instruction – details screen

Instructions
1. Go to the Penalty – search/list screen:
   Securities >> Settlement >> Daily Penalties

2. Enter a valid combination of search criteria. For this, you can either choose:

   ⇨ To perform the query with a reference. For this you should specify at least one or a valid combination of the search criteria.
   This query cannot use the Additional Search Criteria for Penalty Query by ISIN Code Criteria, by T2S Party Criteria and System Entity Criteria.
   This query cannot be combined with any other query.

   ⇨ To perform the query by ISIN Code Criteria and/or by T2S Party Criteria. These two queries can be combined or used separately.
   If combined together, the parameters will be combined through AND logic, and the minimum search criteria of at least one of the two queries shall be respected.
   At least the minimum search criteria shall be specified. Additional search criteria can be used to limit the query results.

⇨ To perform a System Entity Criteria query. For this you should at least enter the minimum search criteria.
Additional search criteria can be used to limit the query results.
This query cannot be combined with any other query.

3. Click on the search button.

⇨ If the search retrieves more than one penalty a list containing the search results is displayed on the screen.

⇨ You have viewed the list of penalties.

⇨ If the search retrieves only one penalty, the penalty – details screen is displayed directly.

🛇 **Alternative**

4. In the Settlement Instruction – details screen >> Click on the associated penalties button.

⇨ If more than one penalty is retrieved by T2S, the penalty – search/list screen will be displayed.

⇨ You have viewed the list of penalties.

⇨ If only one penalty is retrieved by T2S, the penalty – details screen will be displayed.

🛇 **Alternative**

To set all fields to default value and blank out all optional fields, click on the reset button.

3.5.7.4 View monthly aggregated net amounts of penalties

Context of Usage

This business scenario describes how to retrieve the monthly aggregated net amounts of the penalties computed by T2S for the business days of a previous month, for a given T2S Party and counterparty(ies) and per relevant currency.

Once the appeal period of the penalties of a given month has ended, you may need to retrieve the monthly net amounts for all the penalties computed by T2S to ease the penalty collection and distribution process.

This amount shall provide, per currency and party, the bilateral net amounts against each of the counterparties of the penalties computed, and will be equal to:

☐ The sum of all penalties of the relevant/previous month in the relevant currency that this party is entitled to receive (reported as credit) from the same counterparty (i.e. to be paid by this counterparty);

Minus

☐ The sum of all penalties of the relevant/previous month in the relevant currency, that were imposed to this party (reported as debit), and to be paid to a given counterparty.

The monthly net amounts of a particular month will be available only once T2S has produced the Monthly Aggregated Amounts report of that month.

Only the monthly net amounts for the past 3 months will be available.

This function will not be available during the Maintenance Window.

This business scenario is only available for CSD authorized users and T2S Operator user.

Privileges   To carry out this business scenario, you need the following privileges:

☐ Penalty Details Query Privilege

☐ Monthly Net Amount Query Privilege

Reference   Further information on screens involved can be found in the screen reference part:

☐ Monthly Net Penalty Amounts – search/list screen

Instructions   1. Go to the Penalty – search/list screen:
Securities >> Settlement >> Monthly Penalties

2. Enter at least the minimum search criteria.
Depending on the search criteria specified, one or more results can be displayed (i.e. depending on the currency or on the counterparty).

3. Click on the search button.

⇨ If the search retrieves more than one monthly net amount, a list containing the search results is displayed on the screen.

⇨ If the search retrieves only one monthly net amount, it will be displayed in the same format used by the list screen.

➡ You have viewed the monthly net amount.

3.6 Settlement Restrictions

3.6.1 Creation of a New Settlement Restriction on Securities

Overview
This business package describes the creation of a new settlement restriction on securities.

You can create a new settlement restriction on securities either by entering all the necessary information or by copying it from an already existing settlement restriction on securities. Once the settlement restriction on securities has been created, you can also check its lifecycle in T2S.

To create a new settlement restriction on securities, carry out the following business scenarios in the predefined order and choose the business scenario relevant to you whenever options are given.

Business Scenarios
1. Create a new settlement restriction on securities

   ☐ Enter a settlement restriction on securities [▶ 745]

   ☐ Copy a settlement restriction on securities [▶ 747]

2. View settlement restriction on securities details [▶ 750]

3.6.1.1 Enter a Settlement Restriction on Securities

Context of Usage
This business scenario describes how to create a new settlement restriction on securities. You can create a new settlement restriction on securities (intra-position movement) to move securities into a specific securities position of a securities account and make them available for a specific purpose (blocking, reservation or earmarking). Optionally, you can create your settlement restriction on securities including a link to another instruction or to a pool of instructions.

Entering a settlement restriction on securities is one option for the creation of a settlement restriction on securities.

This business scenario is not relevant for CB users.

Privileges
To carry out this business scenario, you need the following privileges:

☐ Send new settlement instruction/new settlement restriction on securities either on a securities account or on behalf of an external CSD

☐ Unblock CoSD securities blocking related to cancelled CoSD settlement instructions on behalf of the relevant CSD in T2S

☐ Link to an instruction/pool reference belonging to a specific party

☐ Intra-position movements query

☐ Send new instruction using a specific instructing party

**Reference**   Further information on screens involved can be found in the screen reference part:

☐ *Intra-position movements– search/list* screen [▷ 136]

☐ *Intra-position movement – new* screen [▷ 150]

Instructions   1. Go to the *intra-position movements– search/list* screen:

```
Securities >> Settlement >> Intra-Position Movements
```

2. Click on the *new* button.

   ⇨ The *intra-position movement - new* screen is displayed.

3. Enter all mandatory information about the settlement restriction you want to create in the 'Intra-Position Movement' frame.

4. Optionally, you can enter additional information about the settlement restriction on securities into the optional fields.

5. To link your settlement restriction on securities to another instruction, click on the *add row* icon to add a new link

6. Select and add all the requested information to identify the instruction you want your settlement restriction on securities to be linked with. Once all the information is introduced click on the *submit changes* icon in the 'Options' column.

   ⇨ The link has been added to the list.

7. If you want to add your settlement restriction on securities to a pool, enter the 'Pool Identification' field, 'Pool Instruction Counter' field and the 'Pool Reference Owner BIC' field instead.

🛈 **Repetition**

To add more links, repeat steps 5 to 6.

8. To remove a link from the list of links to be added to the settlement restriction on securities, click on the *Delete Row* icon in the 'Options' column.

   ⇨ The link has been deleted from the list of links

🛈 **Alternatives**

To set all fields to default value and blank out all optional fields, click on the *reset* button.
To cancel the process and return to the previous screen, click on the *cancel* button.

9. Click on the *submit* button.

10. Enter your PIN for digital signature purposes (NRO).

➡ The new settlement restriction on securities has been created.

3.6.1.2 Copy a Settlement Restriction on Securities

Context of Usage

This business scenario describes how to create a new settlement restriction on securities. You can create a new settlement restriction on securities (intra-position movement) to move securities into a specific securities position of a securities account, and make them available for a specific purpose.

Copying a settlement restriction on securities is 1 option for the creation of a settlement restriction on securities.

It allows you to use an already existing settlement restriction on securities as a template and modify the content as you need.

You can also create your settlement restriction on securities including a link to another instruction or to a pool of instructions.

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Send new settlement restriction on securities either on a securities account or on behalf of an external CSD

☐ Unblock CoSD securities blocking related to cancelled CoSD settlement in-
structions on behalf of the relevant CSD in T2S

☐ Link to an instruction/pool reference belonging to a specific party

☐ Intra-position movements query

☐ Send new instruction using a specific instructing party

Reference Further information on screens involved can be found in the screen reference
part:

☐ *Intra-position movements – search/list* screen [▸ 136]

☐ *Intra-position movement - details* screen

☐ *Intra-position movement - new* screen [▸ 150]

Instructions 1. Go to the *intra-position movements – search/list* screen:

`Securities >> Settlement >> Intra-Position Movements`

2. Enter all search criteria known to you about the settlement restriction on se-
curities you want to copy.

3. Click on the *search* button.

⇨ A list containing the search results is displayed on the screen.

⇨ If the search retrieves only one settlement restriction on securities, the *in-
tra position movement - details* screen is displayed directly. Proceed with
step 6.

4. Select the settlement restriction on securities you want to copy by clicking on
an entry in the list.

5. Click on the *details* button.

⇨ The *intra-position movement - details* screen is displayed.

6. Click on the *copy* button.

⇨ The *intra-position movement - new* screen is displayed taking by default
the following fields from the original settlement restriction: instructing party
BIC, instructing party parent BIC, intended settlement date, corporate ac-
tion event id, priority, movement type, securities account securities, ISIN,
quantity, balance from, balance to and restriction reference.

7. Check if all the default values that have been copied from the settlement re-
striction on securities are right for the new settlement restriction on securities
or edit them if needed.

8. You can enter additional information about the settlement restriction on se-
curities into the optional fields.

9. To link your settlement restriction on securities to another instruction, click on the *add row* icon to add a new link.

10. Select and add all the requested information to identify the instruction you want your settlement restriction on securities to be linked with.

11. Click on the *submit changes* icon in the 'Options' column.

⇨ The link has been added to the list.

12. If you want to add your settlement restriction on securities to a pool, enter the 'Pool Identification' field, 'Pool Instruction Counter' field and the 'Pool Reference Owner BIC' field instead.

🛈 **Repetition**

To add more links, repeat steps 9 to 10.

13. To remove a link from the list of links to be added to the settlement restriction on securities, click on the *delete row* icon in the 'Options' column.

⇨ The link has been deleted from the list of links.

Alternatives

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

14. Click on the *submit* button.

15. Enter your PIN for digital signature purposes (NRO).

➡ The new settlement restriction on securities has been created based on a copied settlement restriction on securities.

3.6.1.3 View Settlement Restriction on Securities Details

Context of Usage

This business scenario describes how to view the details of a settlement restriction on securities.

Once a settlement restriction on securities is created in T2S it might be necessary for you to check its details to be aware of updates during the lifecycle of the settlement restriction.

Viewing settlement restriction on securities details is optional for the creation of a new settlement restriction on securities.

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privilege:

☐ Intra-position movements query

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Intra-position movements – search/list* screen [▶ 136]

☐ *Intra-position movement – details* screen

Instructions

1. Go to the *intra-position movements – search/list* screen:

   `Securities >> Settlement >> Intra-Position Movements`

2. Enter all search criteria known to you about the settlement restriction on securities for which you want to view the details.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one settlement restriction on securities, the *intra-position movement – details* screen is displayed directly.

❗ Alternative

To set all fields to default value and blank out all optional fields, click on the *reset* button.

4. Select the settlement restriction on securities for which you want to view the details by clicking on the entry in the list.

5. Click on the *details* button.

➡ The *intra-position movement – details* screen is displayed and you have viewed the settlement restriction on securities details.

3.6.2 Creation of a New Settlement Restriction on Cash

Overview

This business package describes the creation of a new settlement restriction on cash. You can create a new settlement restriction on cash either by entering all the necessary information or by copying it from an already existing settlement restriction on cash. Once the settlement restriction on cash has been created, you can also check its lifecycle in T2S.

To create a new settlement restriction on cash, carry out the following business scenarios in the predefined order and choose the business scenario relevant to you whenever options are given.

Business Scenarios

1. Create a new settlement restriction on cash

   ☐ Enter a settlement restriction on cash [▶ 751]

   ☐ Copy a settlement restriction on cash [▶ 753]

2. View settlement restriction on cash details [▶ 756]

3.6.2.1 Enter a Settlement Restriction on Cash

Context of Usage

This business scenario describes how to create a new settlement restriction on cash (intra-balance movement). You can block or reserve cash sub-balances on a T2S dedicated cash account. You can also create a new settlement restriction on cash to increase or decrease the cash in an existing restricted cash sub-balance. Optionally, you can include a restriction reference, a link to another instruction or to a pool of instructions.

Entering a new settlement restriction on cash is one option for the creation of a settlement restriction on cash.

Before you create a new settlement restriction on cash to increase or decrease an existing cash sub-balance, check if the restricted balance has been created, and if the restriction reference exists.

This business scenario is not relevant for CSD users.

Privileges

To carry out this business scenario, you need the following privileges:

□ Send new settlement restriction on cash on a dedicated cash account

□ Unblock CoSD cash blocking related to cancelled CoSD settlement instructions on behalf of the relevant CSD in T2S

□ Link to an instruction/pool reference belonging to a specific party

□ Intra-balance movements query

□ Send new instruction using a specific instructing party

Reference Further information on screens involved can be found in the screen reference part:

□ *Intra-balance movements – search/list* screen [▶ 422]

□ *Intra-balance movement - new* screen [▶ 436]

Instructions 1. Go to the *intra-balance movements – search/list* screen:

`Cash >> Settlement >> Intra-balance movements`

2. Click on the *new* button.

⇨ The *intra-balance movement - new* screen is displayed.

3. Enter all mandatory information in the 'Intra-Balance Movement' frame.

4. Optionally, you can enter additional information about the settlement restriction on cash into the optional fields.

5. To link your settlement restriction on cash to another instruction, click on the *add row* icon to add a new link.
6. Select and add all the requested information to identify the instruction you want your settlement restriction on cash to be linked to. Once all the information are introduced click on the *submit changes* icon in the 'Options' column.

⇨ The link has been added to the list.

7. If you want to add your settlement restriction on securities to a pool, enter the 'Pool Identification' field, 'Pool Instruction Counter' field and the 'Pool Reference Owner BIC' field instead.

> ⓘ **Repetition**
>
> To add more links, repeat steps 5 to 6.

8. To remove a link from the list of links to be added to the settlement restriction on cash, click on the *delete row* icon in the 'Options' column.

   ⇨ The link has been deleted from the list of links

> ⓘ **Alternatives**
>
> To set all fields to default value and blank out all optional fields, click on the *reset* button.
>
> To cancel the process and return to the previous screen, click on the *cancel* button.

9. Click on the *submit* button.

10. Enter your PIN for digital signature purposes (NRO).

➡ The new settlement restriction on cash has been created.

3.6.2.2 Copy a Settlement Restriction on Cash

Context of Usage

This business scenario describes how to create a new settlement restriction on cash (intra-balance movement) based on an already existing settlement restriction on cash. You can block or reserve cash sub-balances on a T2S dedicated cash account. You can also create a new settlement restriction on cash to increase or decrease the cash in an existing restricted cash sub-balance. Optionally, you can include a restriction reference, a link to another instruction or to a pool of instructions.

This business scenario is relevant for all situations where you want to create a new settlement restriction on cash based on the information of an already existing one in T2S.

Copying an existing settlement restriction on cash is one option for the creation of a settlement restriction on cash.

Before you create a new settlement restriction on cash to increase or decrease an existing cash sub-balance, check whether if the restricted balance has been created and if the restriction reference exists.

This business scenario is not relevant for CSD users.

Privileges   To carry out this business scenario, you need the following privileges:

☐   Send new settlement restriction on cash on a dedicated cash account

☐   Unblock CoSD cash blocking related to cancelled CoSD settlement instructions on behalf of the relevant CSD in T2S

☐   Link to an instruction/pool reference belonging to a specific party

☐   Intra-balance movements query

☐   Intra-balance movement audit trail list query

☐   Send new instruction using a specific instructing party

Reference   Further information on screens involved can be found in the screen reference part:

☐   *Intra-balance movements – search/list* screen [▶ 422]

☐   *Intra-balance movement - details* screen

☐   *Intra-balance movement - new* screen [▶ 436]

Instructions   1. Go to the *intra-balance movements – search/list* screen:
   ```
   Cash >> Settlement >> Intra-Balance Movements
   ```

2. Enter all search criteria known to you about the settlement restriction on cash you want to copy.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one settlement restriction on cash, the *intra-balance movement - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement restriction on cash you want to copy by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *intra-balance movement - details* screen is displayed.

6. Click on the *copy* button.

   ⇨ The *intra-balance movement - new* screen is displayed taking by default values of the following fields from the original settlement restriction on cash: instructing party BIC, instructing party parent BIC, actor reference, intended settlement date, dedicated cash account, amount, balance from and balance to, restriction reference.

7. Check if the default values are correct or edit them if needed.

8. You can enter additional information about the settlement restriction on cash into the optional fields.

9. To link your settlement restriction on cash to another instruction, click on the *add row* icon to add a new link.

10. Select and add all the requested information (reference type, reference, reference owner) to identify the instruction you want your settlement restriction on cash to be linked with.

11. Click on the *submit changes* icon in the 'Options' column.

⇨ The link has been added to the list.

12. If you want to add your settlement restriction on securities to a pool, enter the 'Pool Identification' field, 'Pool Instruction Counter' field and the 'Pool Reference Owner BIC' field instead.

🛈 **Repetition**

To add more links, repeat steps 9 to 10.

13. To remove a link from the list of links to be added to the settlement restriction on cash, click on the *delete row* icon in the 'Options' column.

⇨ The link has been deleted from the list of links.

(!) **Alternatives**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

14. Click on the *submit* button.

15. Enter your PIN for digital signature purposes (NRO).

➡ The new settlement restriction on cash has been created based on a copied settlement restriction on cash.

3.6.2.3 View Settlement Restriction on Cash Details

Context of Usage

This business scenario describes how to view the details of a settlement restriction on cash. Once a settlement restriction on cash is created in T2S it might be necessary for you to check its details to be aware of updates during the lifecycle of the settlement restriction.

Viewing settlement restriction on cash details is optional for the creation of a new settlement restriction on cash.

This business scenario is not relevant for CSD users, external CSD users and CSD participants.

Privileges

To carry out this business scenario, you need the following privilege:

☐ Intra-balance movements query

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Intra-balance movements – search/list* screen [▷ 422]

☐ *Intra-balance movement – details* screen

Instructions

1. Go to the *intra-balance movements – search/list* screen:

   `Cash >> Settlement >> Intra-Balance Movements`

2. Enter all search criteria known to you about the settlement restriction on cash for which you want to view the details.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one settlement restriction on cash, the *intra-balance movement – details* screen is displayed directly.

! **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

4. Select the settlement restriction on cash for which you want to view the details by clicking on the entry in the list.

5. Click on the *details* button.

➡ The *intra-balance movement – details* screen is displayed and you have viewed your settlement restriction on cash details.

3.6.3 Creation of a New Amendment Instruction for a Settlement Restriction on Securities

Overview
This business package describes the creation of a new amendment instruction for a settlement restriction on securities.

You can create a new amendment instruction for a settlement restriction on securities and afterwards you can check the information of the amendment instruction in T2S.

To create a new amendment instruction for a settlement restriction on securities, carry out the business scenarios in the predefined order and choose the business scenario relevant to you whenever options are given.

Business Scenarios
1. Create a new amendment instruction for a settlement restriction on securities

  ☐ Add a link for a settlement restriction on securities [▷ 757]

  ☐ Amend the priority for a settlement restriction on securities [▷ 760]

  ☐ Remove a link for a settlement restriction on securities [▷ 762]

2. View amendment instruction for a settlement restriction on securities details [▷ 764]

3.6.3.1 Add a Link for a Settlement Restriction on Securities

Context of Usage
This business scenario describes how to link a settlement restriction on securities (intra-position movement). You can link your settlement restriction on securities in case you want to settle it at the same time, after or before the settlement of another settlement restriction or settlement instruction.

Adding a link for a settlement restriction on securities is 1 option for the creation of an amendment instruction for a settlement restriction on securities.

Before you add a link to your settlement restriction on securities, check whether it is neither cancelled nor partially settled nor settled. You can check the status of your settlement restriction on securities before creating the amendment instruction through the details screen as described in the business scenario view settlement restriction on securities details [▷ 750].

The number of links that can be added per amendment instruction is unbounded.

If you want to modify an already existing link in your settlement restriction on securities, you first have to remove the existing link and then add a new link to your settlement restriction on securities.

This business scenario is not relevant for CB users.

Privileges　To carry out this business scenario, you need the following privileges:

☐ Amend process indicator of a settlement instruction/settlement restriction on securities either on a securities account or on behalf of the CSD in T2S or on behalf of an external CSD

☐ Amend process indicator of a non-modifiable settlement instruction on behalf of the instruction party of the underlying instruction

☐ Link to an instruction/pool reference belonging to a specific party

☐ Intra-position movements query

☐ Intra-position movement audit trail query

☐ Send new instruction using a specific instructing party

Reference　Further information on screens involved can be found in the screen reference part:

☐ *Intra-position movements – search/list* screen [▷ 136]

☐ *Intra-position movement - details* screen

☐ *Amendment securities instruction - new* screen [▷ 102]

Instructions　1. Go to the *intra-position movements –search/list* screen:

```
Securities >> Settlement >> Intra-Position Movements
```

2. Enter all search criteria known to you about the settlement restriction on securities you want to link.

3. Click on the *search* button.

⇨ A list containing the search results is displayed on the screen.

⇨ If the search retrieves only 1 intra-position movement, the *intra-position movement - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement restriction on securities you want to amend by clicking on an entry in the list.

5. Click on the *details* button.

⇨ The *intra-position movement – details* screen is displayed.

6. Click on the *amendment instruction* button, located on the lower left side of the screen.

   ⇨ The *amendment securities instruction - new* screen is displayed.

7. Enter all mandatory information in the 'General' frame.

8. Click on the *linkage information* radio button, located on the lower center side of the amendment securities screen.

> **Amendment Type**
>
> ◯ Priority ◉ Linkage Information

⇨ The 'Linkage Information' and 'Link' frames are displayed.

9. Select the *link* radio button to add a link.

> **Linkage Information**
>
> ◉ LINK ◯ UNLINK

10. Click on the *add row* icon in the 'Link' frame to display the links related enter fields.

12. To remove an entry from the list of links to be added, click on the *cancel changes* icon in the 'Options' column.

   ⇨ The link has been deleted from the list.

🛈 **Repetition**

To add more links, repeat steps 10 to 11.
You can add as many links as you like.

> ⓘ **Alternative**
>
> To set all fields to default value and blank out all optional fields, click on the *re-set* button.
> To cancel the process and return to the previous screen, click on the *cancel* button.

13. Click on the *submit* button.

14. Enter your PIN for digital signature purposes (NRO).

➡ A new amendment instruction to add a link for a settlement restriction on securities has been created.

3.6.3.2 Amend the Priority for a Settlement Restriction on Securities

Context of Usage

This business scenario describes how to amend the priority for a settlement restriction on securities (intra-position movement). You can create a new amendment instruction to amend the priority for your settlement restriction on securities in case you want to prioritise or delay its settlement.

Amending the priority for a settlement restriction on securities is one option for the creation of an amendment instruction for a settlement restriction on securities.

Before you amend the priority for your settlement restriction on securities, check whether it is neither cancelled nor settled. You can check the status of your settlement restriction on securities before creating the amendment instruction through the details screen as described in the business scenario view settlement restriction on securities details [▶ 750].

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Amend process indication for a non-modifiable settlement instruction on behalf of the instruction party of the underlying instruction

☐ Amend process indicator of a settlement instruction/settlement restriction on securities either on a securities account or on behalf of the CSD in T2S or on behalf of an external CSD

☐ Send new instruction using a specific instructing party

☐ Intra-position movements query

☐ Intra-position movement audit trail list query

☐ Link to an instruction/pool reference belonging to a specific party

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Intra-position movements – search/list* screen [▶ 136]

☐ *Intra-position movement – details* screen

☐ *Amendment securities instruction - new* screen [▶ 102]

Instructions
1. Go to the *intra-position movements – search/list* screen:

   `Securities >> Settlement >> Intra-Position Movements`

2. Enter at least one general search criterion known to you about the settlement restriction on securities you want to amend.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one intra-position movement, the *intra-position movement - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement restriction on securities for which you want to amend the priority by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *intra-position movement – details* screen is displayed.

6. Check the current priority value and click on the *amendment instruction* button.

   ⇨ The *amendment securities instruction - new* screen is displayed.

7. Click on the *priority* radio button, located on the lower left-hand side of the screen.

   Amendment Type

   ◉ Priority ○ Linkage Information

   ⇨ The 'Priority' frame is displayed.

8. Select the new priority from drop-down menu.

   Priority   ⌃

   Priority Level *
   ┌──────────┐
   │ High   ▾ │
   ├──────────┤
   │ High   │
   │ Normal   │
   │ Reserved │
   └──────────┘

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

9. Click on *submit* button.

10. Enter your PIN for digital signature purposes (NRO).

➡ A new amendment instruction to change the priority of a settlement restriction on securities has been created.

3.6.3.3 Remove a Link for a Settlement Restriction on Securities

Context of Usage

This business scenario describes how to remove an existing link in a settlement restriction on securities (intra-position movement).

Removing a link for a settlement restriction on securities is 1 option for the creation of a new amendment instruction for a settlement restriction on securities.

Before you remove a link for your settlement restriction on securities, check if it is neither settled nor cancelled. You can check the status of your settlement restriction on securities before creating the amendment instruction through the details screen as described in the business scenario view settlement restriction on securities details [▶ 750].

The number of links that can be removed per amendment instruction is limited to the number of existing linkages in the settlement restriction.

If you want to modify an already existing link in your settlement restriction on securities, first you have to remove the existing link and then add a new link to your settlement restriction on securities.

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Intra-position movements query

☐ Link to an instruction/pool reference belonging to a specific party

☐ Amend process indicator of a settlement instruction/settlement restriction on securities either on a securities account or on behalf of the CSD in T2S or on behalf of an external CSD

☐ Send new instruction using a specific instructing party

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Intra-position movements– search/list* screen [▶ 136]

☐ *Intra-position movement – details* screen

☐ *Amendment securities instruction - new* screen [▶ 102]

Instructions

1. Go to the *intra-position movements– search/list* screen:

   `Securities >> Settlement >> Intra-Position Movements`

2. Enter all search criteria known to you about the settlement restriction on securities you want to amend.

3. Click on the *search* button.

⇨ A list containing the search results is displayed on the screen.

⇨ If the search retrieves only one settlement restriction on securities, the *intra-position movement – details* screen is displayed directly. Proceed with step 6.

4. Select the settlement restriction on securities you want to amend by clicking on an entry in the list.

5. Click on the *details* button.

⇨ The *intra-position movement – details* screen is displayed.

6. Click on the *amendment instruction* button, located on the lower left hand side of the screen.

⇨ The *amendment securities instruction - new* screen is displayed.

7. Enter all mandatory information in the 'General' frame.

8. Click on the *linkage information* radio button, located on the lower center side of the amendment securities screen.

3. Select the value 'Intra-Position Movement' in the 'Instruction Type' field.

4. Select the value 'Amendment Instruction' in the 'Maintenance Instruction Type' field.

(!) Alternative

To set all fields to default value and blank out all optional fields, click on the *re-set* button.

5. Click on the *search* button.

⇨ A list containing the search results is displayed on the screen.

⇨ If the search retrieves only one amendment instruction for a settlement restriction on securities, the *amendment securities instruction – details* screen is displayed directly.

6. Select the amendment instruction for a settlement restriction on securities for which you want to view the details by clicking on an entry in the list.

7. Click on the *details* button.

⇨ The *amendment securities instruction – details* screen is displayed.

➡ You have viewed the details of an amendment instruction for a settlement restriction on securities.

3.6.4 Creation of a New Amendment Instruction for a Settlement Restriction on Cash

Overview

This business package describes the creation of a new amendment instruction for a settlement restriction on cash.

You can create a new amendment instruction for a settlement restriction on cash and afterwards check if the amendment instruction has been successfully created or executed.

To create a new amendment instruction for a settlement restriction on cash, carry out the business scenarios in the predefined order and choose the business scenario relevant to you whenever options are given.

Business Scenarios

1. Create a new amendment instruction for a settlement restriction on cash

☐ Add a link for a settlement restriction on cash [▶ 766]

☐ Amend the priority for a settlement restriction on cash [▶ 768]

☐ Remove a link for a settlement restriction on cash [▶ 770]

2. View amendment instruction for a settlement restriction on cash details [▶ 772]

3.6.4.1 Add a Link for a Settlement Restriction on Cash

Context of Usage

This business scenario describes how to add a link for a settlement restriction on cash (intra-balance movement). You can link your settlement restriction on cash in case you want to settle it at the same time, after or before another settlement restriction or settlement instruction.

Adding a link for a settlement restriction on cash is one option for the creation of an amendment instruction for a settlement restriction on cash.

Before you add a link for a settlement restriction on cash, check whether it is neither cancelled nor partially settled nor settled. You can check the status of your settlement restriction on cash before creating the amendment instruction through the details screen as described in the business scenario view settlement restriction on cash details [▶ 756].

The number of links that can be added per amendment instruction is unbounded.

This business scenario is not relevant for CSD users.

Privileges

To carry out this business scenario, you need the following privileges:

- ☐ Link to an instruction/pool reference belonging to a specific party

- ☐ Amend process indicator settlement restriction on cash on a dedicated cash account

- ☐ Intra-balance movements query

- ☐ Intra-balance movement audit trail list query

- ☐ Send new instruction using a specific instructing party

Reference

Further information on screens involved can be found in the screen reference part:

- ☐ *Intra-balance movements - search/list* screen [▶ 422]

- ☐ *Intra-balance movement - details* screen

- ☐ *Amendment cash instruction - new* screen [▶ 409]

Instructions

1. Go to the *intra-balance movements – search/list* screen:

   `Cash >> Settlement >> Intra-Balance Movements`

2. Enter all search criteria known to you about the settlement restriction on cash you want to link.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only 1 intra-balance movement, the *intra-balance movement - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement restriction on cash you want to amend by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *intra-balance movement - details* screen is displayed.

6. Click on the *amendment instruction* button, located on the bottom of the screen.

   ⇨ The *amendment cash instruction - new* screen is displayed.

7. Enter all mandatory information in the 'General' frame.

8. Click on the *linkage information* radio button, located on the lower center side of the screen.

   ⇨ The 'Linkage Information' and 'Link' frames are displayed.

9. Select the *link* radio button to add a link.

10. Click on the *add row* icon in the 'Link' frame to display the links related enter fields.

11. Enter the relevant information to identify the instruction you want your instruction to be linked with in the 'Link' frame and click on the *submit changes* icon in the 'Options' column.

   ⇨ The link has been added to the list.

12. To remove an entry from the list of links to be added, click on the *cancel changes* icon in the 'Options' column.

   ⇨ The link has been deleted from the list.

⓵ **Repetition**

To add more links, repeat steps 10 to 11.

You can add as many links as you like.

⓵ **Alternatives**

To set default criteria and blank out all optional fields, click on the *reset* button. To cancel the process and return to the previous screen, click on the *cancel* button.

13. Click on the *submit* button.

14. Enter your PIN for digital signature purposes (NRO).

➥ A new amendment instruction to add a link for a settlement restriction on cash has been created.

3.6.4.2 Amend the Priority for a Settlement Restriction on Cash

Context of Usage

This business scenario describes how to amend the priority for a settlement restriction on cash (intra-balance movement). You can create a new amendment instruction to amend the priority for your settlement restriction on cash to prioritise or delay its settlement. In case the settlement restriction on cash was originally sent without a priority, you can set it or modify the existing one.

Amending the priority for a settlement restriction on cash is 1 option for the creation of an amendment instruction for a settlement restriction on cash.

Before you amend the priority for your settlement restriction on cash, check whether it is neither cancelled nor settled. You can check the status of your settlement restriction on cash before creating the amendment instruction through the details screen as described in the business scenario view settlement restriction on cash details [▶ 756].

This business scenario is not relevant for CSD users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Amend process indicator settlement restriction on cash on a dedicated cash account

☐ Link to an instruction/pool reference belonging to a specific party

☐ Send new instruction using a specific instructing party

☐ Intra-balance movements query

☐ Intra-balance movement audit trail list query

Reference   Further information on screens involved can be found in the screen reference part:

☐   *Intra-balance movements – search/list* screen [▶ 422]

☐   *Intra-balance movement – details* screen

☐   *Amendment cash instruction - new* screen [▶ 409]

Instructions   1. Go to the *intra-balance movements –search/list* screen:

`Cash >> Settlement >> Intra-Balance Movements`

2. Enter all search criteria known to you about the settlement restriction on cash for which you want to amend the priority.

3. Click on the *search* button.

⇨ A list containing the search results is displayed on the screen.

⇨ If the search retrieves only one intra-balance movement, the *intra-balance movement - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement restriction on cash you want to amend by clicking on an entry in the list.

5. Click on the *details* button.

⇨ The *intra-balance movement – details* screen is displayed.

6. Check the current priority value and click on the *amendment instruction* button.

⇨ The *amendment cash instruction – new* screen is displayed.

7. Click on the *priority* radio button, located on the lower center side of the screen.

⇨ The 'Priority' frame is displayed.

8. Select the new priority from the drop-down menu.

🛈   **Alternatives**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

To cancel the process and return to the previous screen, click on the *cancel* button.

9. Click on the *submit* button.

10. Enter your PIN for digital signature purposes (NRO).

➡ A new amendment instruction for a settlement restriction on cash has been created.

3.6.4.3 Remove a Link for a Settlement Restriction on Cash

Context of Usage

This business scenario describes how to remove an existing link in a settlement restriction on cash (intra-balance movement).

Removing a link for a settlement restriction on cash is one option for the creation of an amendment instruction for a settlement restriction on cash.

Before you remove a link for your settlement restriction on cash, check whether it is neither settled nor cancelled. You can check the status of your settlement restriction on cash before creating the amendment instruction through the details screen as described in the business scenario view settlement restriction on cash details [▷ 756].

The number of links that can be removed with one amendment instruction is limited to the number of existing linkages in the settlement restriction on cash.

If you want to modify an already existing link in your settlement restriction on cash, you have first to remove the existing link and then add a new link to your settlement restriction on cash.

This business scenario is not relevant for CSD users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Link to an instruction/pool reference belonging to a specific party

☐ Amend process indicator settlement restriction on cash on a dedicated cash account

☐ Send new instruction using a specific instructing party

☐ Intra balance movement query

Reference

Further information on screens involved can be found in the screen reference part:

3.6.4.4 View Amendment Instruction for a Settlement Restriction on Cash Details

Context of Usage

This business scenario describes how to view the details of an amendment instruction for a settlement restriction on cash. Once an amendment instruction for a settlement restriction on cash has been created in T2S it might be necessary for you to check its details to be aware of updates during the lifecycle of the amendment instruction.

Viewing an amendment instruction for a settlement restriction on cash details is optional for the creation of a new amendment instruction for a settlement restriction on cash.

This business scenario is not relevant for CSD users.

Privileges

To carry out this business scenario, you need the following privileges:

☐   Maintenance instruction for intra-balance movements query

☐   Amendment instruction query for intra-balance movements

Reference

Further information on screens involved can be found in the screen reference part:

☐   *Maintenance cash instructions – search/list* screen [▶ 447]

☐   *Amendment cash instruction - details* screen [▶ 404]

Instructions

1. Go to the *maintenance cash instructions – search/list* screen:

   `Cash >> Settlement >> Maintenance Cash Instructions`

2. Enter all search criteria known to you about the amendment instruction for a settlement restriction on cash for which you want to view the details.

3. Check that the value selected in the 'Maintenance Instruction Type' field is 'Amendment Instruction' (i.e. it is the default value for this field).

🛈   **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

4. Click on the *search* button.

   ⇨   A list containing the search results is displayed on the screen.

⇨ If the search retrieves only one amendment instruction for a settlement restriction on cash, the *amendment cash instruction - details* screen is displayed directly.

5. Select the amendment instruction for a settlement restriction on cash for which you want to view the details by clicking on an entry in the list.

6. Click on the *details* button.

⇨ The *amendment cash instruction – details* screen is displayed.

➡ You have viewed the details of an amendment instruction for a settlement restriction on cash.

3.6.5 Creation of a New Cancellation Instruction for a Settlement Restriction on Securities

Overview

This business package describes the creation of a new cancellation instruction for a settlement restriction on securities.

You can create a new cancellation instruction for a settlement restriction on securities and afterwards you can check the information of the cancellation instruction in T2S.

To create a new cancellation instruction for a settlement restriction on securities, carry out the following business scenarios in the predefined order.

Business Scenarios

1. Cancel a settlement restriction on securities [▶ 773]

2. View cancellation instruction for a settlement restriction on securities details [▶ 775]

3.6.5.1 Cancel a Settlement Restriction on Securities

Context of Usage

This business scenario describes how to create a new cancellation instruction for a settlement restriction on securities. This is necessary if you want to cancel a settlement restriction on securities so it is not processed further in T2S.

Cancelling a settlement restriction on securities is mandatory for the creation of a cancellation instruction for a settlement restriction on securities.

Before you create a new cancellation instruction for a settlement restriction on securities, check that it is not already cancelled nor settled. You can check the status of your settlement restriction on securities before creating the cancellation instruction through the details screen as described in the business scenario view settlement restriction on securities details [▶ 750].

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Intra-position movements query

☐ Intra-position movement audit trail list query

☐ Cancel non-modifiable instructions on behalf of the instruction party of the underlying settlement instruction

☐ Cancel settlement instruction/settlement restriction on securities either on a securities account or on behalf of the CSD in T2S, on behalf of an external CSD or on behalf of an administering party

☐ Send new instruction using a specific instructing party

Reference Further information on screens involved can be found in the screen reference part:

☐ *Intra-position movements – search/list* screen [▶ 136]

☐ *Intra-position movement - details* screen

☐ *Cancellation securities instruction - new* screen [▶ 116]

Instructions
1. Go to the *intra-position movements – search/list* screen:

   `Securities >> Settlement >> Intra-Position Movements`

2. Enter at least one general search criterion known to you about the settlement restriction on securities for which you want to view the details.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one settlement restriction on securities, the *intra-position movement - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement restriction on securities you want to cancel by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *intra-position movement - details* screen is displayed.

6. Click on the *cancellation instruction* button.

   ⇨ The *cancellation securities instruction - new* screen is displayed.

7. Enter all relevant information in the 'General' frame.

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.
To cancel the process and return to the previous screen, click on the *cancel* button.

---

8. Click on the *submit* button.

9. Enter your PIN for digital signature purposes (NRO).

➡ A new cancellation instruction for a settlement restriction on securities has been created.

3.6.5.2 View Cancellation Instruction for a Settlement Restriction on Securities Details

Context of Usage

This business scenario describes how to view the details of a cancellation instruction for a settlement restriction on securities. Once the cancellation instruction for a settlement restriction on securities is created in T2S it might be necessary for you to check its details to be aware of updates during the lifecycle of the cancellation instruction.

Viewing a cancellation instruction for a settlement restriction on securities details is optional for the creation of a new cancellation instruction for a settlement restriction on securities.

This business scenario is not relevant for CB users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Maintenance for intra position movements and settlement instructions query

☐ Cancellation instruction query for intra-position movements and settlement instructions

☐ Cancellation instruction for intra-position movement or settlement instruction audit trail details query

☐ Amendment instruction query for intra-position movements and settlement instructions

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Maintenance securities instructions – search/list* screen [▷ 163]

☐ *Cancellation securities instruction - details* screen [▷ 112]

Instructions

1. Go to the *maintenance securities instructions – search/list* screen:

   `Securities >> Settlement >> Maintenance Securities In-structions`

2. Enter all search criteria known to you about the cancellation instruction for a settlement restriction on securities for which you want to view the details.

3. Select the value 'Intra-Position Movement' in the 'Instruction Type*' field.

4. Select the value 'Cancellation Instruction' in the 'Maintenance Instruction Type' field.

5. Select the value 'Cancellation Instruction' from the 'Maintenance Instruction Type' field in the 'General Criteria' frame to search for a cancellation instruction. If the relevant value is not selected, the default value 'All' applies.

🛇 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

6. Click on the *search* button.

⇨ A list containing the search results is displayed on the screen.

⇨ If the search retrieves only one cancellation instruction for a settlement restriction on securities, the *cancellation securities instruction - details* screen is displayed directly.

7. Select the cancellation instruction for a settlement restriction on securities for which you want to view the details.

8. Click on the *details* button.

⇨ The *cancellation securities instruction – details* screen is displayed.

➡ You have viewed the details of a cancellation instruction for a settlement restriction on securities.

3.6.6 Creation of a New Cancellation Instruction for a Settlement Restriction on Cash

Overview

This business package describes the creation of a new cancellation instruction for a settlement restriction on cash.

You can create a new cancellation instruction for a settlement restriction on cash and afterwards you can check if the cancellation instruction has been successfully created or executed.

To create a new cancellation instruction for a settlement restriction on cash, carry out the following business scenarios in the predefined order.

Business Scenarios

1. Cancel a settlement restriction on cash [▶ 777]

2. View cancellation instruction for a settlement restriction on cash details [▶ 778]

3.6.6.1 Cancel a Settlement Restriction on Cash

Context of Usage

This business scenario describes how to create a new cancellation instruction for a settlement restriction on cash. This is necessary if you want to cancel a settlement restriction on cash so it is not further processed in T2S.

Cancelling a settlement restriction on cash is mandatory for the creation of a cancellation instruction for a settlement restriction on cash.

Before you create a new cancellation instruction for a settlement restriction on cash, check that it is neither already cancelled nor settled. You can check the status of your settlement restriction on cash before creating the cancellation instruction on the details screen as described in the business scenario view settlement restriction on cash details [▶ 756].

This business scenario is not relevant for CSD users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Intra-balance movements query

☐ Intra-balance movement audit trail list query

☐ Cancel settlement restriction on cash on a dedicated cash account

☐ Send new instruction using a specific instructing party

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Intra-balance movements – search/list* screen [▶ 422]

☐ *Intra-balance movement - details* screen

Instructions

☐ *Cancellation cash instruction - new* screen [▷ 419]

1. Go to the *intra-balance movements – search/list* screen:

   `Cash >> Settlement >> Intra-Balance Movements`

2. Enter at least one general search criterion known to you about the settlement restriction on cash for which you want to view the details.

3. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one settlement restriction on cash, the *intra-balance movement - details* screen is displayed directly. Proceed with step 6.

4. Select the settlement restriction on cash you want to cancel by clicking on an entry in the list.

5. Click on the *details* button.

   ⇨ The *intra-balance movement - details* screen is displayed.

6. Click on the *cancellation instruction* button.

   ⇨ The *cancellation cash instruction - new screen* is displayed.

7. Enter all relevant information in the 'General' frame.

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.
To cancel the process and return to the previous screen, click on the *cancel* button.

8. Click on the *submit* button.

9. Enter your PIN for digital signature purposes (NRO).

➡ A new cancellation instruction for a settlement restriction on cash has been created.

3.6.6.2 View Cancellation Instruction for a Settlement Restriction on Cash Details

Context of Usage

This business scenario describes how to view the details of a cancellation instruction for a settlement restriction on cash. Once a cancellation instruction is created in T2S it might be necessary for you to check its details to be aware of updates during the lifecycle of the cancellation instruction.

Viewing a cancellation instruction for a settlement restriction on cash details is one option for the creation of a new cancellation instruction for a settlement restriction on cash.

This business scenario is not relevant for CSD users.

Privileges

To carry out this business scenario, you need the following privileges:

☐ Cancellation instructions for intra-balance movements query

☐ Maintenance instructions for intra-balance movements query

☐ Cancellation instruction for intra-balance movement audit trail list query

☐ Amendment instruction query for intra-balance movements

☐ Amendment instruction for intra-balance movement audit trail list query

Reference

Further information on screens involved can be found in the screen reference part:

☐ *Maintenance cash instructions – search/list* screen [▷ 447]

☐ *Cancellation cash instruction - details* screen [▷ 416]

Instructions

1. Go to the *maintenance cash instructions – search/list* screen:

   `Cash >> Settlement >> Maintenance Cash Instructions`

2. Enter at least one general search criterion known to you about the cancellation instruction for a settlement restriction on cash for which you want to view the details.

3. Select the value 'Cancellation Instruction' in the 'Maintenance Instruction Type' field.

4. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

   ⇨ If the search retrieves only one cancellation instruction for a settlement restriction on cash, the *cancellation cash instruction - details* screen is displayed directly.

5. Select the cancellation instruction for a settlement restriction on cash for which you want to view the details.

🛈 **Alternative**

To set all fields to default value and blank out all optional fields, click on the *reset* button.

6. Click on the *details* button.

⇨ The *cancellation cash instruction - details* screen is displayed.

➡ You have viewed the details of a cancellation instruction for a settlement re-
striction on cash.

3.6.7 View the list of links data preventing settlement of a settlement restriction on securities

Context of Usage

This business scenario describes how to view the list of data preventing settle-
ment of a selected settlement restriction on securities.

When a linked settlement restriction on securities is unsettled, it might be useful
for you to check the list of the settlement instructions or settlement restrictions
preventing its settlement with the associated constraints.

This business scenario is not relevant for the following cases:

☐ Settled, cancelled settlement restrictions on securities

☐ Settlement restrictions on securities with an intended settlement date in the
future

Privileges

To carry out this business scenario, you need the following privileges:

☐ Intra-position movements query

Reference

Further information on screens involved can be found in the screen reference
part:

☐ Intra-position movements – search/list screen

☐ Intra-position movement – details screen

☐ Links preventing settlement – list screen

Instructions

1. Go to the intra-position movements – search/list screen:
   Securities Settlement Intra-position Movements

2. Enter at least one general search criterion known to you about the settlement
   restriction on securities for which you want to view the links data preventing
   its settlement.

3. Click on the search button.

   ☐ A list containing the search results is displayed on the screen

   ☐ If the search retrieves only one settlement restriction on securities, the in-
   tra-position movement – details screen is displayed directly. Proceed with
   step 6.

4. Select the settlement on securities for which you want to view the links data
   preventing settlement by clicking on an entry in the list.

5. Click on the details button.

   ☐ The intra-position movement – details screen is displayed.

6. Check the details of the settlement restriction on securities and click on the links button.

☐ The links preventing settlement – list screen is displayed.

☐ You have viewed the list of the settlement instructions and/or settlement instructions preventing the settlement of the selected settlement restriction on securities with the associated constraints.

3.6.8 View the list of links data preventing settlement of a settlement restriction on cash

Context of Usage

This business scenario describes how to view the list of data preventing settlement of a selected settlement restriction on cash.

When a linked settlement restriction on cash is unsettled, it might be useful for you to check the list of the settlement instructions or settlement restrictions preventing its settlement with the associated constraints.

This business scenario is not relevant for the following cases:

☐ Settled, cancelled settlement restrictions on cash

☐ Settlement restrictions on cash with an intended settlement date in the future

Privileges

To carry out this business scenario, you need the following privileges:

☐ Intra balance movement audit trail list query

Reference

Further information on screens involved can be found in the screen reference part:

☐ Intra-balance movements – search/list screen

☐ Intra-balance movement – details screen

☐ Links preventing settlement – list screen

Instructions

1. Go to the intra-balance-movements – search/list screen:
Cash Settlement Intra-balance Movements

2. Enter at least one general search criterion known to you about the settlement restriction on cash for which you want to view the links data preventing its settlement.

3. Click on the search button

☐ A list containing the search results is displayed on the screen

☐ If the search retrieves only one settlement restriction on cash, the intra-position movement – details screen is displayed directly. Proceed with step 6.

4. Select the settlement on cash for which you want to view the links data preventing settlement by clicking on an entry in the list.

5. Click on the details button.

☐ The intra-balance movement – details screen is displayed.

6. Check the details of the settlement restriction on cash and click on the links button.

☐ The links preventing settlement – list screen is displayed.

☐ You have viewed the list of the settlement instructions and/or settlement instructions preventing the settlement of the selected settlement restriction on cash with the associated constraints.

4 Trouble Management System Part

4.1 General

General

The Trouble Management System (TMS) part offers an overview of the TMS screens that are available in U2A mode. The aim of this section is to provide a guide which describes and explains the usage and the functionalities of the TMS external interface to the relevant users.

TMS is a tool and database which is used to track and follow-up on relevant communication between the T2S users and the T2S Service Desk for which a trouble case has been created.

The T2S Service Desk is responsible for opening a trouble case ticket whenever it is contacted by a T2S user who would like to raise a service request or who experiences problems (e. g. due to abnormal situations or reduced performance) with T2S. In TMS a trouble case is classified either as service request or incident.

A *service request* is a trouble case to track information requests or information on any specific issue that is part of standard operation.

An *incident* is a trouble case reporting any event which does not fall within standard operation and causes an interruption or reduction in quality of a T2S service.

Access to TMS

Please refer to ESMIG qualified configurations document annexed to the ESMIG UDFS.

Statuses in TMS

A status is assigned by the T2S Service Desk to every trouble case and will change during its life cycle. For a complete list of statuses see chapter 4.2.2 ('*Trouble Case – Details* Screen').

Priorities in TMS

The T2S Service Desk has to assign a priority to every trouble case created in TMS. There are four different priority types in TMS: '*Low*', '*Medium*', '*Urgent*', and '*Critical*'. '*Low*' is usually assigned to service requests and any incident which does not affect the T2S performance directly. '*Medium*' is the priority for trouble case incidents affecting the performance moderately but with no impact on the general availability of T2S services. '*Urgent*' is the priority assigned to incident cases which describe the unavailability of one or more services or a heavily impacted overall performance of the T2S system. A workaround has to be put in place within the defined time according to the T2S Service Level Agreement. In case of complete unavailability of the T2S System, the priority '*Critical*' is assigned to the TMS trouble case.

Screen Reference Part

The screen reference part offers a complete overview of all TMS screens that are available to the T2S users including a detailed description.

Context of Usage	The context of usage explains what a screen displays, the functions of the screen and which information you can get from it, e.g. the resolution progress of a trouble case. It also defines the different options of monitoring of a trouble case.
Screen Access	This part explains how to access the different available screens. Please note that with the exception of the main screen, all screens are pop-up screens which can be accessed directly from the main screen. Screen access explains how to open these pop-up screens.
Reference	This section lists all references to the business scenarios containing the respective screen (reference to the user instructions part).
Screenshot	The screenshot can help to ease orientation for the work in the UHB. Deviations between the screenshot and the description are possible in case of specific selections you have made. Values shown in the screenshot might deviate from the default values indicated in the description.
Field Description	The field description provides all the relevant information related to the respective field name.

It is structured in table format with a separate table for each frame. The following illustration explains the structure of a field description. |

Position No.	Element	Description
1	Frame Name	The frame name indicates the respective name of each screen frame.
2	Field Name	The field name indicates the respective name of each screen field.
3	Field description	The field description indicates the field type as well as possible and/or required content.
4	Additional Information	The additional information section indicates useful information regarding a field's or button's function.
5	Required/Displayed format	The required/displayed format indicates all field format requirements related to the fields. If there is more than 1 format requirement, they are separated with a comma.
		In read-only fields the displayed format is only mentioned, if the field content is ambiguous. This applies especially to date fields.
		The following keywords are used for the format requirements:
		☐ 'Digit' indicates numbers
		☐ 'Character' indicates a character from the SWIFT-x character set

User Instructions Part

The user instructions part comprises scenarios adapted from typical user workflows grouped in a business package.

List of Business Scenarios

This section contains a list of all business scenarios which represent individual workflows and consist of single action steps, intermediate results and a final result.

Instructions

The instructions section explains in detail which steps have to be taken e. g. to view a trouble case. This section lists all references to the screens involved, sorted by their appearance in the business scenario.

4.2 Screen Reference Part

4.2.1 Trouble Case – Search/List Screen

Context of Usage

This screen contains a number of search fields. By inputting the relevant data, you can search for trouble cases (incidents/requests and problems) related to your system entity, trouble cases opened by parties related to your system entity and in addition trouble cases of general importance visible to all parties (default). After selecting an entry, you can proceed further by clicking on the buttons below.

Screen Access

This screen is the main screen of the Trouble Management System (TMS) and appears directly when accessing the TMS.

References

User Instructions Part

This screen is part of the following business scenarios:

☐ View trouble case [▷ 805]

☐ Execute a report [▷ 805]

Screenshot
Illustration 131: Trouble case – list screen

Field Description

Trouble Case – Search/List	
Customer Type	
System Entity	Shows the system entity your user belongs to.
Parent BIC	Shows the parent BIC of your party.
Party BIC	Shows all the possible party BICs related to the parent BIC.
Search Criteria	

Trouble Case – Search/List	
Trouble Case ID	Enter a trouble case ID number of the T2S TMS for single search (available both for problems and incidents).
Status	Select the status of the trouble case.
	If the type of trouble case is set to 'Incident', select the status of the trouble case from the possible values:
	☐ Assigned
	☐ In Progress
	☐ Pending
	☐ Resolved
	☐ Closed
	☐ Cancelled
	☐ All Open
	☐ (Empty) (default value no filter will be applied)
	If the type of trouble case is set to 'Problem', select the status of the trouble case from the possible values:
	☐ Under Review
	☐ Request for Authorization
	☐ Assigned
	☐ Under Investigation
	☐ Pending
	☐ Completed
	☐ Rejected
	☐ Closed
	☐ Cancelled
	☐ All Open
	☐ (Empty) (default value no filter will be applied)
Environment	Select the environment of the trouble case.
	☐ Production
	☐ Customer
	☐ INTEG
	☐ Driving
	☐ Development
	☐ IAC

Trouble Case – Search/List	
	☐ EAC
	☐ MIG1
	☐ MIG2
	☐ UTEST
	☐ (Empty) (default value no filter will be applied)
Priority	Select the Priority of the trouble case.
	☐ 1 – Critical
	☐ 2 – Urgent
	☐ 3 – Medium
	☐ 4 – Low
	☐ (Empty) (default value no filter will be applied)
Type of Trouble Case*	Select the type of trouble case from the possible values:
	☐ Incident (default value)
	☐ Problem
	Note: Case type = Request is classified as type of trouble case = Incident (further distinction available in the 'Trouble Cases part').
From	Enter the lower bound of the search range for the date and time from which the trouble case is opened or use the *calendar* icon.
	Required format is: YYYY/MM/DD hh:mm:ss
	The 'From' date and time must be a valid date earlier than or equal to the current business and earlier than or equal to the 'To' date and time.
	Reference for error message [▶ 1369]:
	☐ ARERR10000
To	Enter the upper bound of the search range for the date and time until which the trouble case is opened or use the *calendar* icon.
	Required format is: YYYY/MM/DD hh:mm:ss
	The 'To' date and time must be a valid date later than or equal to the 'From' date and time.
	Reference for error message [▶ 1369]:
	☐ ARERR10000

Trouble Case – Search/List	
Costumer	Select the party BIC related to your system entity you want to include in your search result. You can select more than one related party BIC.
Trouble Cases	
Trouble Case ID	Shows the alphanumeric number of the trouble case assigned by the system. Note: In case of incidents and requests, the Trouble Case ID always starts with 'INC'. In case of problems the Trouble Case ID always starts with 'PBI'.
Environment	Shows the environment chosen for the ticket. Normally it is the environment where the issue was detected.
Priority	Shows the priority assigned to the ticket from the possible values: ☐ Critical ☐ Urgent ☐ Medium ☐ Low
Open Date	Shows the date and time the trouble case have been opened. Displayed format is: YYYY/MM/DD hh:mm:ss
Description	Shows the description of the trouble case.
Status	Shows the current status of the trouble case. If the type of trouble case is set to 'Incident', this field shows the status from the possible values: ☐ Assigned ☐ In Progress ☐ Pending ☐ Resolved ☐ Closed ☐ Cancelled ☐ All Open ☐ (Empty) (default value no filter will be applied) If the type of trouble case is set to 'Problem', this field shows the status from the possible values:

Trouble Case – Search/List	
	☐ Under Review
	☐ Request for Authorization
	☐ Assigned
	☐ Under Investigation
	☐ Pending
	☐ Completed
	☐ Rejected
	☐ Closed
	☐ Cancelled
	☐ All Open
	☐ (Empty) (default value no filter will be applied)
Status Reason	Shows the reason for the current status of the trouble case.
	If the status of the trouble case is set to 'Pending', this field shows the reason from the possible values:
	☐ Automated Resolution Reported
	☐ Client Hold
	☐ Client Action Required
	☐ Support Contact Hold
	☐ Local Site Action Required
	☐ Purchase Order Approval
	☐ Registration Approval
	☐ Supplier Delivery
	☐ Third Party Vendor Action Required
	☐ Infrastructure Change (only if Case Type is set to 'Problem')
	☐ Pending Original Problem (only if Case Type is set to 'Problem')
	☐ Request
	☐ Monitoring Incident
	☐ Monitoring Problem (only if Case Type is set to 'Problem')
	☐ Future Enhancement

Trouble Case – Search/List

| | If the status of the trouble case is set to 'Resolved', this field shows the reason from the possible values:

☐ Automated Resolution Reported
☐ Customer Follow-Up Required
☐ Temporary Corrective Action
☐ Future Enhancement
☐ Monitoring Incident
☐ No Further Action Required

If the status of the trouble case is set to 'Closed', this field shows the reason from the possible values:

☐ Successful
☐ Successful with Problem
☐ Unsuccessful
☐ (Empty)

If the status of the trouble case is set to 'Completed', this field shows the reason from the possible values:

☐ Known Error
☐ Solution Database
☐ Enhancement Request
☐ Unresolvable

If the status of the trouble case is set to 'Cancelled', this field shows the reason from the possible values:

☐ No longer a Causal CI (only in case of incident/request ticket)
☐ Duplicate Investigation (only if Case Type is set to 'Problem')
☐ Not a Defect (only in case of problem tickets)
☐ (Empty)

This field is only filled in if the status of the trouble case is equal to 'Pending', 'Resolved' or 'Completed' or if the status is equal to 'Closed' or 'Cancelled' and the status reason has been indicated during data acquisition. |
| Customer Trouble Case ID | Shows the internal identification reported by the Customer itself when opening the ticket. |

Trouble Case – Search/List	
Public Trouble Case	Shows whether the trouble is public from the possible values: ☐ Yes ☐ Broadcast
Party BIC	It shows the party BIC of the system entity for which the ticket was open.

Action Buttons

Select All	This function enables you to select all values from the related list.
DeSelect All	This function enables you to deselect all values from the related list.
Search	This function enables you to start a search according to the criteria entered. The results are displayed in a list on the same screen. Next screen: ☐ *Trouble case – search/list* screen Reference for error message [▶ 1369]: ☐ ARERR10000
Cancel	This function enables you to cancel the process and set all search fields to default value. Next screen: ☐ *Trouble case – search/list* screen
Export	This function enables you to export the search result with all the appropriately visible fields as a report. Next screen: ☐ *Trouble case - export* screen [▶ 798]
Details	This function enables you to display the details of the selected trouble case. Next screen: ☐ *Trouble case – details* screen [▶ 792]

4.2.2 Trouble Case - Details Screen

Context of Usage

This screen displays detailed information on a trouble case.

Closed Date	Shows the date and time of the closure of the trouble case. Displayed format is: YYYY/MM/DD hh:mm:ss
Work Log (Customer relevant information entered by the T2S operator are shown)	
Submit Date	Shows date and time when the information present in the Work log-Notes is entered. Displayed format is: YYYY/MM/DD hh:mm:ss
Notes	Shows the work log information added to the trouble case by the T2S operator. Each entry is displayed in a different row and can be selected for complete display in the bottom 'Notes' dedicated area.

Action Buttons

Close	This function enables you to close the *details* screen and return to the previous screen. Next screen: ☐ *Trouble case list* screen [▷ 786]

4.2.3 Trouble Case - Export Screen

Context of Usage

This screen enables you to export your trouble cases as a report (PDF, Power-Point, Word, PostScript or Excel) or to print a report.

Screen Access

☐ *Trouble case – list* `screen` >> Click on the *report* button

References

User Instructions Part

This screen is part of the following business scenario:

☐ Execute a report [▷ 805]

Screenshot

Illustration 133: Trouble case – export screen

**Field
Description**

Costumer Type	
System Entity	Shows the system entity your user belongs to.
Parent BIC	Shows the parent BIC of your party.
Party BIC	Shows all the possible party BIC related to the parent BIC.
Search Criteria	
Trouble Case ID	Field where it is possible to enter a trouble case ID number of the T2S TMS for single search (available both for problems and incidents).
Status	Select the status of the trouble case.
	If the type of trouble case is set to 'Incident', select the status of the trouble case from one of the possible values:
	☐ Assigned
	☐ In Progress
	☐ Pending
	☐ Resolved
	☐ Closed
	☐ Cancelled
	☐ All Open

Costumer Type
☐ (Empty) (default value no filter will be applied)
If the type of trouble case is set to 'Problem', select the status of the trouble case from one of the possible values:
☐ Under Review
☐ Request for Authorization
☐ Assigned
☐ Under Investigation
☐ Pending
☐ Completed
☐ Rejected
☐ Closed
☐ Cancelled
☐ All Open
☐ (Empty) (default value no filter will be applied)

Environment	Select the environment of the trouble case.
	☐ Production
	☐ Customer
	☐ INTEG
	☐ Driving
	☐ Development
	☐ IAC
	☐ EAC
	☐ MIG1
	☐ MIG2
	☐ UTEST
	☐ (Empty) (default value no filter will be applied)
Priority	Select the priority of the trouble case.
	☐ 1 – Critical
	☐ 2 – Urgent
	☐ 3 – Medium
	☐ 4 – Low
	☐ (Empty) (default value no filter will be applied)

Costumer Type	
Type of Trouble Case*	Select the type of trouble case from the possible values: ☐ Incident (default value) ☐ Problem Note: Case type = Request is classified as type of trouble case = Incident (further distinction available in the 'Trouble Cases part').
From	Enter the lower bound of the search range for the date and time from which the trouble case is opened or use the *calendar* icon. Required format is YYYY/MM/DD hh:mm:ss The 'From' date and time must be a valid date earlier than or equal to the current business and earlier than or equal to the 'To' date and time. Reference for error message: [▶ 1370] ☐ ARERR10000
To	Enter the upper bound of the search range for the date and time until which the trouble case is opened or use the *calendar* icon. Required format is: YYYY/MM/DD hh:mm:ss The 'To' date and time must be a valid date later than or equal to the 'From' date and time. Reference for error message: [▶ 1370] ☐ ARERR10000
Costumer	Select the party BIC related to your system entity you want to include in your search result. You can select more than one related party BIC.
Trouble Cases	
Trouble Case ID	Shows the alphanumeric number of the trouble case assigned by the system. Note: In case of incidents and requests, the trouble case ID always starts with 'INC'. In case of problems the trouble case ID always starts with 'PBI'.
Environment	Shows the environment chosen for the ticket. Normally it is the environment where the issue was detected.
Priority	Shows the priority assigned to the ticket.

Costumer Type	
Open Date	Shows the date and time the trouble case has been opened. Displayed format is: YYYY/MM/DD hh:mm:ss
Description	Shows the description of the trouble case.
Status	Shows the current status of the trouble case. If the type of trouble case is set to 'Incident', this field shows one of the possible values: ☐ Assigned ☐ In Progress ☐ Pending ☐ Resolved ☐ Closed ☐ Cancelled ☐ All Open ☐ (Empty) (default value no filter will be applied) If the type of trouble case is set to 'Problem', this field shows one of the possible values: ☐ Under Review ☐ Request for Authorization ☐ Assigned ☐ Under Investigation ☐ Pending ☐ Completed ☐ Rejected ☐ Closed ☐ Cancelled ☐ All Open ☐ (Empty) (default value no filter will be applied)
Status Reason	Shows the reason for the current status of the trouble case. If the status of the trouble case is set to 'Pending', this field shows the reason from the possible values: ☐ Automated Resolution Reported

Costumer Type
☐ Client Hold
☐ Client Action Required
☐ Support Contact Hold
☐ Local Site Action Required
☐ Purchase Order Approval
☐ Registration Approval
☐ Supplier Delivery
☐ Third Party Vendor Action Required
☐ Infrastructure Change (only if Case Type is set to 'Problem')
☐ Pending Original Problem (only if Case Type is set to 'Problem')
☐ Request
☐ Monitoring Incident
☐ Monitoring Problem (only if Case Type is set to 'Problem')
☐ Future Enhancement
If the status of the trouble case is set to 'Resolved', this field shows the reason from the possible value:
☐ Automated Resolution Reported
☐ Customer Follow-Up Required
☐ Temporary Corrective Action
☐ Future Enhancement
☐ Monitoring Incident
☐ No Further Action Required
If the status of the trouble case is set to 'Closed', this field shows the reason from the possible values:
☐ Successful
☐ Successful with Problem
☐ Unsuccessful
☐ (Empty)
If the status of the trouble case is set to 'Completed', this field shows the reason from the possible values:

Costumer Type	
	☐ Known Error
	☐ Solution Database
	☐ Enhancement Request
	☐ Unresolvable
	If the status of the trouble case is set to 'Cancelled', this field shows the reason from the possible values:
	☐ No longer a Causal CI (only in case of incident/request Ticket)
	☐ Duplicate Investigation (only if case type is set to 'Problem')
	☐ Not a Defect (only in case of problem tickets)
	☐ (Empty)
	This field is only filled in if the status of the trouble case is equal to 'Pending', 'Resolved' or 'Completed' or if the status is equal to 'Closed' or 'Cancelled' and the status reason has been indicated during data acquisition.
Customer Trouble Case ID	Shows the internal identifier reported by the Customer it-self when opening the ticket
Public Trouble Case	Shows whether the trouble case is public, i.e. only visible to the related system entity of the party BIC, or visible to all parties from the possible values:
	☐ Yes
	☐ Broadcast
Party BIC	It shows the party BIC of the system entity for which the ticket was opened.

Buttons   All available buttons in this screen are related to your browser used and therefore not described in this chapter.

4.3 User Instructions Part

4.3.1 Monitoring of a Trouble Case

Overview   This business package describes the monitoring of a trouble case. To monitor a trouble case, carry out the business scenarios relevant to you from the list below.

Business Scenarios
☐   View trouble case [▷ 805]

☐   Execute a report [▷ 805]

4.3.1.1 View Trouble Case

Context of Usage

This business scenario describes how to view trouble cases related to your system entity, trouble cases opened upon request of parties related to your system entity and in addition trouble cases of general importance visible to all parties. Viewing a trouble case is one option of monitoring of a trouble case.

References

Further information on screens involved can be found in the screen reference part:

- ☐ *Trouble case – search/list* screen [▷ 786]
- ☐ *Trouble case – details* screen [▷ 792]

Instructions

1. Go to the *trouble case – search/list* screen.

2. Depending on your system entity you will see a list of available parties (system entity and party BIC) to be included in your search. Select at least 1 of the displayed Party BICs.

3. Enter all search criteria known to you about the trouble case you want to view.

4. Click on the *search* button.

   ⇨ A list containing the search results is displayed on the screen.

5. Select the trouble case you would like to display in detail.

6. Click on the *details* button.

➡ The details of the selected ticket are displayed.

4.3.1.2 Execute a Report

Context of Usage

This business scenario describes how to execute and export or print a report on trouble cases related to your system entity, trouble cases opened by parties related to your system entity and in addition trouble cases broadcasted to all parties.

Executing a report is 1 option of monitoring of trouble cases.

Privileges

To carry out this business scenario, you need the following privilege:

- ☐ TMS Access

References

Further information on screens involved can be found in the screen reference part:

- ☐ *Trouble case – search/list* screen [▷ 786]
- ☐ *Trouble case – export* screen [▷ 798]

Instructions

1. Go to the *trouble case – search/list* screen.

2. Click on the *search* button.

🛈 **Hint**

You can also restrict your search results by inputting the relevant search parameters.

⇨ A list containing the search results is displayed on the bottom part of the screen.

3. Select the trouble cases to be included in your report (clicking on each of the 'column name fields' allows ordering the list in ascending or descending order for the selected column).

🛈 **Alternative action**

Click on the *select all* button to include all trouble cases from the list.

4. Click on the *export* button.

⇨ The *trouble case - export* screen is displayed.

🛈 **Note**

Depending on your browser used and local settings the buttons to be used to export or print a report and the further steps may differ. In the following example Mozilla Firefox has been used.

5. Click on the *export report* button.

⇨ The export report window of your browser is opened.

6. Select the export format and in case of need the pages of the report to be exported. Possible format are: PDF, Power Point, Word, Post Script and Excel.
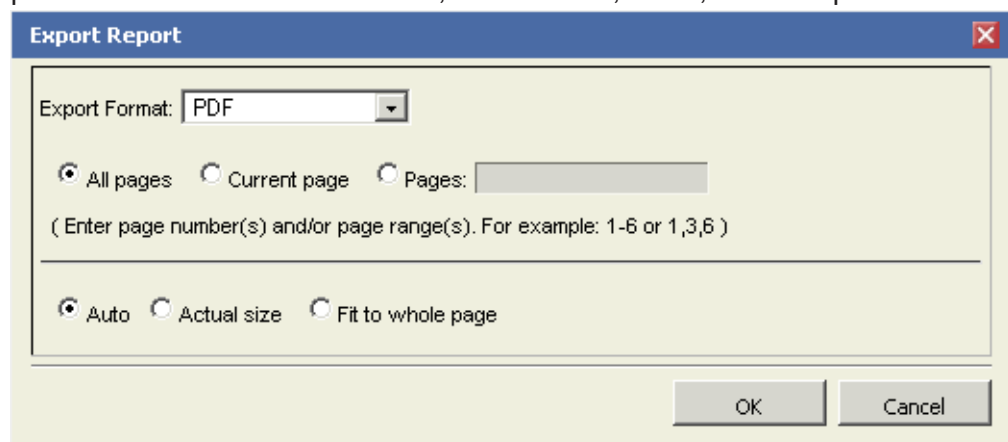

7. Click on the *ok* button.

⇨ The standard download window of you browser is opened.
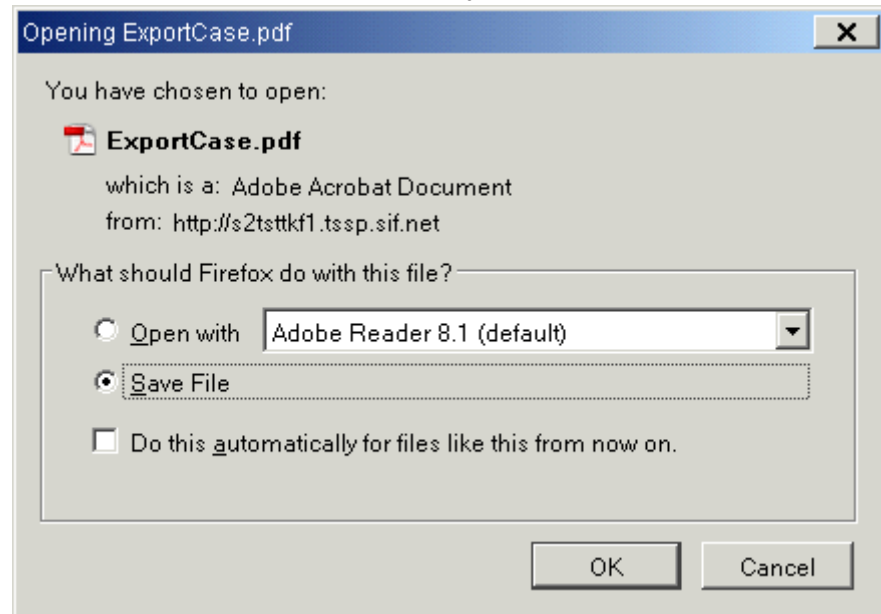

8. Click on the *OK* button.

➡ The report is downloaded and saved in the standard download folder of your browser.

5 Statistical Information Part

5.1 Introduction

5.1.1 Purpose of the document

Aim

The Data Warehouse (DWH) User Handbook, hereinafter referred to as UHB, aims to facilitate the use of the Data Warehouse Graphical User Interface. It is addressed to all DWH users, regardless of the parties and describes the full range of functionalities available in user-to-application (U2A) mode. The UHB provides detailed reference information on all GUI functionalities and step-by-step descriptions. Thus the DWH UHB provides helpful information on the use of the DWH GUI.

Actors

There is only one handbook for DWH addressing all actors: Central Banks (CB), Payment Banks (PB) and Ancillary Systems (AS). Specific chapters for CB users with advanced user's profile (see chapter Overview) are marked with the annex "for advanced user" in the title of the chapter. All other chapters are relevant for each reader. [20]**{Split book apporach}**

5.1.1.1 UHB Methodology

To ease orientation and help you to find your desired information quickly several symbols and methodological elements are used throughout the DWH UHB.

Page

Every page of the UHB has a similar page layout. You can find the following elements:

- ☐ **The header, which shows the chapter and the sub-chapter title,**
- ☐ **The text, which contains the main information, tables and screenshots**
- ☐ **The footer, which shows page number and the amount of pages of the document**

Links

Links are illustrated throughout the UHB with a little triangle followed by a page number within squared brackets. These links help you to jump to related sections by clicking on them or turning to the relevant page.

Example: [▶ 209]

---

[20] **This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.{Split book approach}**

Tables

Tables are used to present information in a clearly arranged format. They consist of a table head and a table body. The body is divided into a left and a right column. The left column contains keywords, for example field names, which are explained in the right column. Subsections within a table are preceded by a heading. The order of the description follows the appearance on the screens from left to right and from top to bottom.

Action steps

Step-by-step descriptions are divided into single action steps. These steps are numbered sequentially. Intermediate results are described where appropriate.

Screenshots

Screenshots are used to illustrate the corresponding text. Note that there might be minor deviations be-tween the screenshot and your screen appearance, according to your access rights or a specific selection you have made. In addition, some functions are mutually exclusive and cannot be represented in a single screen-shot. In these cases, the screenshot illustrates the more relevant use of the screen.

Values shown on a screenshot might also deviate from the default values indicated in the description. In these cases, the description is valid rather than the screenshot. {Split book approach}

5.1.1.2 UHB Structure

The UHB is divided in eight chapters:

Chapter 1	**The chapter Introduction explains the aim, the content and the approach of both the UHB and the DWH GUI. While the first section explains how to use the UHB, the second section focuses on technical requirements.**
Chapter 2	**The chapter Introduction to the Data Warehouse provides background information about the Data Warehouse itself and also about the software tool used as GUI.**
Chapter 3	**The chapter First steps & basics provides the reader with basic elements and the structure of the DWH GUI.**
Chapter 4	**The chapter Working with reports explains the reader how to**
	☐ **copy and save a report (see chapter Copy, save and export)**
	☐ **run a report (see chapter Running reports)**
	☐ **schedule a report (see chapter Scheduling reports)**
Chapter 5	**The chapter Predefined reports provides the reader with information about all predefined reports. {Split book approach }**

5.1.2 Set-up and Login

5.1.2.1 GUI Access

Users are directed to an initial page named ESMIG portal that ensures proper routing to the web applications the user has been granted to enter. Refer to the Connectivity Guide specified in the ESMIG UDFS document, current version available, for details on the communication network and services. [21]**{Split book approach}**

5.1.2.2 Technical Requirements

Before entering the GUI, make sure to implement all necessary preparations described below.

Such preparations may be subject to periodical review/update to comply with changing technical/regulatory scenarios.

Supported Web-Browsers

Please refer to ESMIG qualified configurations document annexed to the ESMIG UDFS. [22]

The required minimum screen resolution is 1366 x 768 pixel. Screen resolutions below this requirement are not supported and can lead to a deviating appearance and functionality of the GUI.

Even if the screen resolution fulfils the requirement defined above, it is important to note that scaling options provided by the operating system and the browser (e.g. 125% or 150%) may cause a deviating appearance and functionality of the GUI. If this is the case, the usage of scaling options is not supported. {Split book approach}

5.2 Introduction to the Data Warehouse

5.2.1 Overview

Context of Usage

The aim of the DWH is to store and compile information coming from TARGET2- Securities (T2S) and common components i.e. Common Reference Data Management (CRDM), Billing (BILL) and Business Day Management (BDM) in a homogenous manner at business level.

---

[21] **This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.{Split book approach}**

[22] **This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.**

The DWH provides access to data in U2A mode and permits access to data within the databases. It gives a business-oriented view of the collected data without any detailed technical database terminology. Therefore, no knowledge about the database structure of T2S is required. It provides information through reports as predefined reports.

Parties

The DWH consolidates the content of the sources into a single database for reporting purposes and offers pre-defined reports to the users of the following T2S parties:

☐ Central Banks (CB),

☐ Central Securities Depositories (CSD)

Access Rights

The precondition for a user to obtain access to the DWH is a setup in CRDM by the respective party. Access to the DWH depends on the user's profile, which ensures that the user is allowed to perform the requested action(s). There are two user profiles reflected as privileges in CRDM:

☐ Normal user profile: will be available for CB/CSD users only.

☐ Advanced user profile: will be available for CB/CSD users only.

The data scope in the DWH follows the following rules:

☐ Users have access to their parties' data based on the data scope according to the hierarchical model (for details please refer to CRDM UDFS).

☐ For CBs/CSDs: Each CB/CSD has access to granular data for all parties belonging to its system entity. Moreover, each CB/CSD has access to aggregated data of all system entities.

DWH platform

The DWH uses Cognos as platform. It is an enterprise wide Business Intelligence (BI) solution, mostly used for reporting. Cognos is a web-based solution. Both the development and the end user interface are displayed on the web. It supports Relational Online Analytical Processing (ROLAP) and Multidimensional Online Analytical Processing (MOLAP) data sources.

A2A & U2A mode

The DWH provides reports to users in different formats in user-to-application mode (U2A) or to other applications in application-to-application mode (A2A). The user can run a report directly in the DWH GUI (Cognos) and export the result. The second option is A2A delivery of the report as a file. To achieve this, the report has to be scheduled as described in chapter Scheduling reports.

Note: A CB user with advanced user profile was used in order to show the full scope of all screenshot pictures presented in this document. [23] {Split book approach}

5.2.2 Process of the Data Warehouse

DWH layers   DWH receives data from different services and common components and processes the data in order to make them available via reports and files. The data passes through the following three layers:

1. landing zone,

2. core layer,

3. enterprise layer.

The data are transmitted into the landing zone of the DWH as a copy after the end of each business day (EoD). The landing zone buffers the data before they are selected and loaded into the core layer.

The core layer stores only granular, validated, harmonised and historicised data.

From the core layer the data are loaded into the enterprise layer. In the enterprise layer the data are aggregated, calculated and prepared for reporting and analysis in a dimensional structure.

The stored data cannot be retrieved in the landing zone; instead, detailed structured and aggregated data can be accessed through the reports. The reports are built using the data in the core and the enterprise layer.

After processing (data transformation and pre-calculations) of the transmitted data within the DWH, data from the previous business day are available in the DWH at the start of the new calendar day at the latest.

Diagram   The following diagram provides a high-level overview of the flow from the source through the different DWH layers: [24] {Split book approach}

---

[23]   This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S. {Split book approach}

[24]   This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S. {Split book approach}
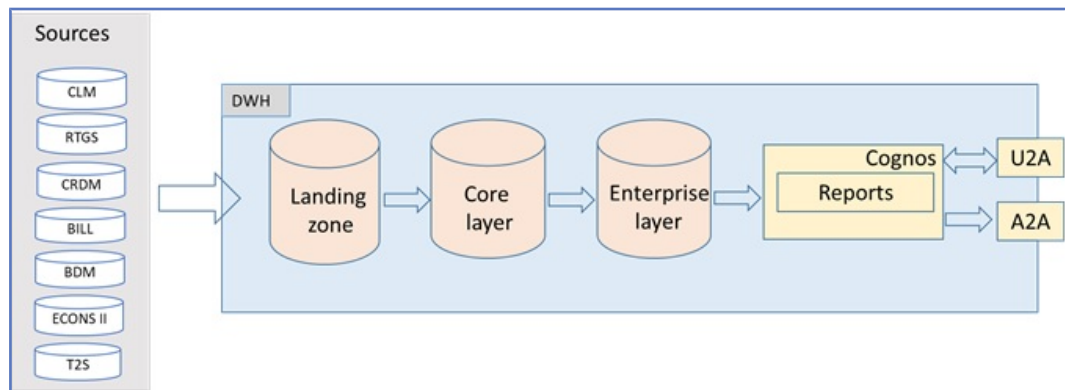

Illustration 134: DWH high level overview [24] **{Split book approach}**

5.3 First steps & basics

5.3.1 Access to the DWH

Access to the DWH is managed through the Eurosystem Single Market Infrastructure Gateway (ESMIG). ESMIG provides to the DWH specific credentials found in CRDM for a specific user-id. This ensures that you have access to the relevant information depending on the party you belong to, the party type and your privilege. [25]

As soon as your login is successful for the first time, you will see the welcome page.

The welcome page provides quick access to the product functionalities and content.

Welcome Page
Illustration 135: Welcome page [26] **{Split book approach}**

The welcome page consists of the following building blocks:
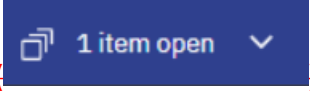

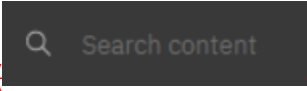

Global application bar

The global application bar (the blue bar at the top of the screen) is a constant element of the user interface.

---

25 For details on the network communication and services, refer to the Connectivity Guide specified in the ESMIG UDFS.**{Split book approach}**

26 This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.**{Split book approach}**
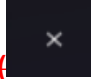

When the welcome page is open, the following, standard options are available:

- ☐ **"Open menu" icon (** **)**

- ☐ **"Data Warehouse" home page link (** Data Warehouse **)**

- ☐ **"View switcher" - only visible if at least one document is open**

1 item open ⌄

(**)**

- ☐ **"Search content" (** Search content **)**

- ☐ **"Notifications" icon (** 🔔 **)**

- ☐ **"Personal menu" icon (** 👤 **)**

Welcome banner
Illustration 136: ~~Welcome banner~~ **{Split book approach}**

You can hide the banner by clicking the "Close" icon (✕ **) or you can go to the personal menu, and under "Profile and settings > Settings", toggle the "Welcome banner" switch on or off. {Split book approach}**

5.3.2 Navigating in the DWH GUI – Global application bar

5.3.2.1 Open Menu

The "Open menu" is the main access point to the Cognos Analytics.

Click the "Open menu" icon (☰ **) you return to the "Welcome" page. {Split book approach}**

5.3.2.2 Data Warehouse icon

By clicking on the "Data Warehouse" icon (Data Warehouse **) you return to the "Welcome" page.** {Split book approach}

5.3.2.3 View Switcher

In the DWH GUI different pages each containing another report can be open at the same time. The "View switcher" in the application bar provides a convenient way to navigate between open views, and closes the views when they are no longer needed. You can navigate between different types of items, such as folders, reports, schedules, and more, from this view.

Illustration 137: Welcome page - navigation view {Split book approach}

In the following example, you open a report and a report view. The "View switcher" provides the ability to view both of the objects:
Illustration 138: Welcome page - navigation view - items {Split book approach}

By clicking on the report or the report view, you can switch between the report and the report view: {Split book approach}
Illustration 139: Welcome page – navigation view – items – report view selection {Split book approach}

5.3.2.4 Search content

Search content is a quick and easy way to find content in Cognos.

You can search for items such as reports, folders etc. You can also search for ta-ble or column labels, XML report specifications, shortcuts, templates, and more.

Search content does not return results for content that is archived, but you can access archived content from any report that is listed in one of your folders.

The search content box is located in the application bar, as shown in the following screen capture:
Illustration 140: Welcome page – Search content {Split book approach}

To find items, type the search terms (keywords, phrases, strings), and click the Enter key. After the search results are listed, you can save your search by clicking the "Save search" button (****). If your search returns too many results, you can click the "filter" icon (**), and select the options that you want. The filter option is only available after you do an initial search. The filters are saved with the search.**
Illustration 141: Welcome page – Search content - Save search {Split book approach}

From the search results page, you can initiate actions on the returned items. If you select multiple items (by clicking their check boxes), the related actions that are available for all or at least one item are shown in the toolbar, above the search results.
Illustration 142: Welcome page – Search content - initiate actions

To view the actions for a specific item, select the checkbox for this item (all other items must be deselected), and click its "Action menu" (**) icon. The actions that are available for the selected item are shown. For example, the following screen capture shows actions for a report.{Split book approach}**
Illustration 143: Welcome page – Search content - Action menu {Split book approach}

Special characters and search in double quotation marks

You can use the following special characters in your search terms:

"~`!@#$%^&*()-+={[}]|\:;'<,>.?/"

When you enclose your search terms in double quotation marks (" "), the search results include only those instances where the terms appear in the exact order as within the double quotation marks. {Split book approach}

5.3.2.5 Notification

Notifications help you stay on top of important data.

If you view a saved output and you want to know when there is a new version of the report, you can click the "Notify me" button. A saved output is either a report view in html format or the html view of the report when the option "Run in back-ground" is selected. If you choose to be notified when a new version is available, you are notified every time t a new version of the report is delivered.
Illustration 144: ~~Welcome page - Notification~~ **{Split book approach}**

The Notify me option is available in view mode of an html output of a report or a report view when it is saved in "My content" folder when you tap the "More" button in the application bar.

Illustration 145: ~~More options – Notify me~~ **{Split book approach}**

If you request notification and then someone runs that report, you get a notification with a link to the updated version.

When you subscribe, if you choose the "Save the report on the system" delivery option, you receive a notification with a link to the new report version.

To see all your notifications, tap the "Notifications" icon **in the application**

bar. When you revive a new notification, a number is added to the icon

. {Split book approach}

5.3.2.5.1 Subscribing to reports

When you subscribe to reports, you pick the time, date, format, and where you want it delivered. When you subscribe to a report, the subscription includes all your prompt and parameter values.

The subscription option is available in the application bar when you run and view a report, but not when you are in editing mode or when you view saved output.
Illustration 146: ~~Welcome page - Notification – subscribe~~ **{Split book approach}**

Note for users with advanced user profile:

To ensure that you are in view mode, and not in edit mode, turn off the "Edit" toggle (**).**

If you edit a report, you must save it before you can subscribe.

After you subscribe, each time your report is delivered, you are notified by a red circle on the

"Notifications" icon (**) in the application bar.**

The number in the red circle indicates the number of notifications that you have not yet viewed. Tap the notifications icon to find a message with a link to view the report output.

After you create your subscriptions, you can view and manage them. For more information, see chapter Scheduling reports. **{Split book approach}**

5.3.2.6 Personal menu

In the "Personal menu" icon you can find settings to customise your DWH experience.

You can view and edit your personal and regional information, monitor the system activities etc. The user can edit the time zone, the product language and view the capabilities granted by the administrator. For further information, please refer to chapter Profile and settings. **{Split book approach}**
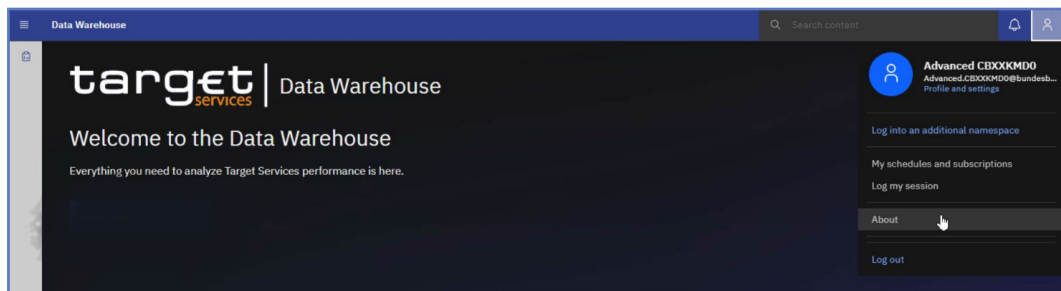

Illustration 147: **Welcome screen – Personal menu (1)** {Split book approach}
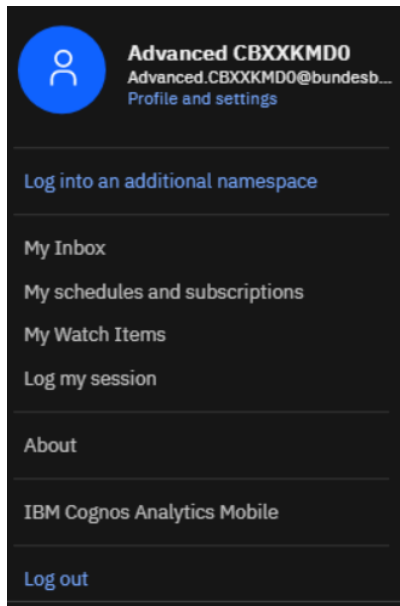

Illustration 148: **Welcome screen – Personal menu (2)** {Split book approach}

5.3.2.6.1 Profile and Settings

In the "Profile and settings" menu you can find more information about your user under "Profile". Please note, that some of the settings displayed have to be changed in CRDM e.g. User information, granted privilege.

For example you will see your email address if available in CRDM.

You can also find information about "Groups and roles" and "My capabilit-ies" described in detail hereafter.
Illustration 149: **Welcome screen – Personal menu – Profile and settings – Profile** **{Split book approach}**

Groups and roles

You can find the groups and roles you are associated to by clicking on "View details" at the right of "Groups and roles". Please refer to Understanding user rights and access rights (advanced users) to find more information about groups and roles.
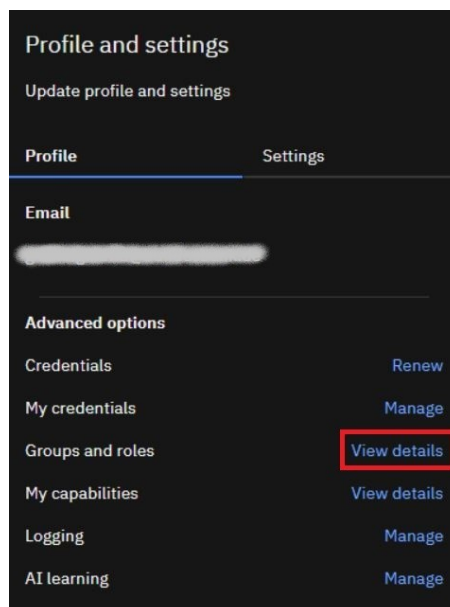

Illustration 150: **Welcome screen – Personal menu – Profile and settings – Personal – Groups and roles** **{Split book approach}**

My capabilities

The capabilities control access to different administration tasks and different functional areas of the user interface in DWH. You can find the capabilities assigned to you by clicking on "View details" on the right of the section. {Split book approach}
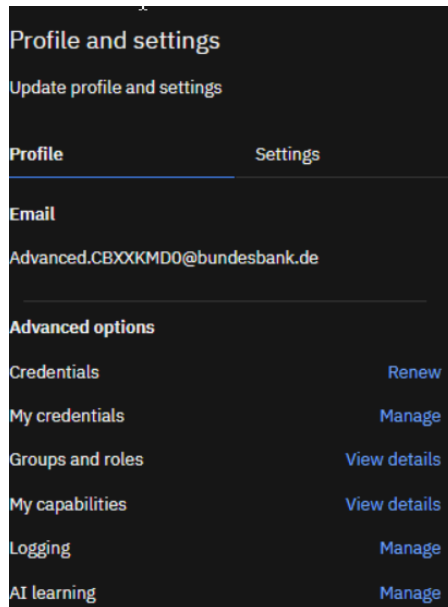

Illustration 151: Welcome screen – Personal menu – Profile and settings – Profile – My capabilities (1) {Split book approach}
Illustration 152: Welcome screen – Personal menu – Profile and settings – Profile – My capabilities (2) {Split book approach}

5.3.2.6.2 Logging

You can use "Logging" to enable detailed, diagnostic logging for your current DWH session. This can be useful to support the analysis of the Operational Teams in case you run into reproducible problems or errors while using the Data Warehouse. In such a case, you can turn logging on and then perform the steps that lead to the problem or error you encountered. Session logging can run for one hour maximum, but can be turned off at any time.

A unique identifier is generated to allow the administrator to identify the session logging data. Record the log identifier before you turn off the logging or close your browser. Please remember to add this identifier to your ticket when requesting help.
Illustration 153: **Welcome screen – Personal menu – Profile and settings - Logging {Split book approach}**
Illustration 154: **Welcome screen – Personal menu – Profile and settings – logging {Split book approach}**

In some circumstances, IBM customer support might direct you to increase the logging level. You can set it to one of the following levels:

Error

Basic level of logging that tracks only major error messages that occur during processing on the client work-station.

Warning

The next level of logging that includes all the information from the Error level of logging and includes warnings about situations that might not affect your system function.

Information

This level of logging aggregates all previous levels of logging and includes more detail about the regular operation of the user interface. You might notice that performance at this level is slower.

Debug

This level of logging contains the most information. Use it if you are testing your own extensions or when you are advised by a member of the software development team or customer support. You can expect that performance at this level is noticeably slower.

Logging levels are stored in the browser cache. If you clear the browser cache, logging levels return to the default setting. {Split book approach}
Illustration 155: **Welcome screen – Personal menu – Profile and settings - logging level** {Split book approach}

5.3.2.6.2.1 Profile and Settings - Settings

You can set up settings for your DWH applications. To set your settings in the personal menu click on "Profile and settings" and then "Settings".
Illustration 156: ~~Welcome screen – Personal menu – Profile and settings – Settings~~ {Split

book approach}

~~Home page~~

~~In case a different page than the default is set, the user can reset to the de-
fault~~

~~Report format~~

~~The default value for the report format is html~~

~~But you can choose also one of the following formats:~~

- ~~Excel (same content as html but as Excel file)~~

- ~~Excel Data (only the report data is exported – Not recommended since it
  does not work properly)~~

- ~~Pdf~~

- ~~Html~~

- ~~Csv~~

- ~~Xml~~

~~Turn on accessibility features~~

~~Accessibility features assist users who have a disability, such as restricted
mobility or limited vision, to use information technology content success-
fully~~

~~Show hidden entries~~

~~When you first sign in to the DWH, you can see hints that help you navigate
through the user interface. If you turn the hints off, but want to show them
again, select the "Show hidden entries" check box.~~

Language settings

The default language is English.
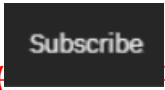

You can select the language that you prefer for the DWH user interface. If your data and reports are available in multiple languages, you can also select the language that you prefer for the content. There is also support for bidirectional languages such as Hebrew, Arabic, Urdu, and Farsi. Report authors can control the display of native digits and the direction of text, crosstabs, and charts. {Split book approach}

5.3.2.6.3 My schedules and subscriptions

This menu item allows you to browse through the list of all report runs scheduled for the day. You can view all your scheduled activities and subscriptions on the "My schedules and subscriptions" panel.

Subscription Option

The subscription option is available when you run and view a report, but not when you are in editing mode or when you view saved output.

1. **In order to subscribe to a report: Run a report.**

2. **In the application bar, tap "More" icon in the application bar ( ) and then tap the "Subscribe" text ( ).**

3. **Select your subscription options, and then tap "Create".**
   The subscriptions have the following characteristics:
   A subscriber requires only Read and Execute permissions for the report.
   There can be up to 32 subscriptions for the same report.

4. **Created by running a report and, in view mode, tapping the "More" icon ( ) in the application bar.**
   Only the subscriber can view their subscription.
   Only the most recent saved report output is available.

The report can be run daily or weekly.

Scheduled Activities

You can view a list of your scheduled activities that are current, past, or upcoming on a specific day.
Illustration 157: **Welcome screen – Personal menu – My schedules and subscriptions** {Split book approach}

You can filter the list to show the entries you want to see by clicking on the down arrow next to the "Schedule".
Illustration 158: **Welcome screen – Personal menu – My schedules and subscriptions - Filter** {Split book approach}

The following screenshots show the upcoming and the past schedules respectively:
Illustration 159: **Welcome screen – Personal menu – My schedules and subscriptions – Upcoming schedules** {Split book approach}
Illustration 160: **Welcome screen – Personal menu – My schedules and subscriptions – Past schedules** {Split book approach}

Subscriptions **In general you can enable, disable, modify, or remove subscriptions, and view their saved outputs or the archived version details panel for information such as the run status and run time.**

All this information are available by clicking on the "More" icon ( ):
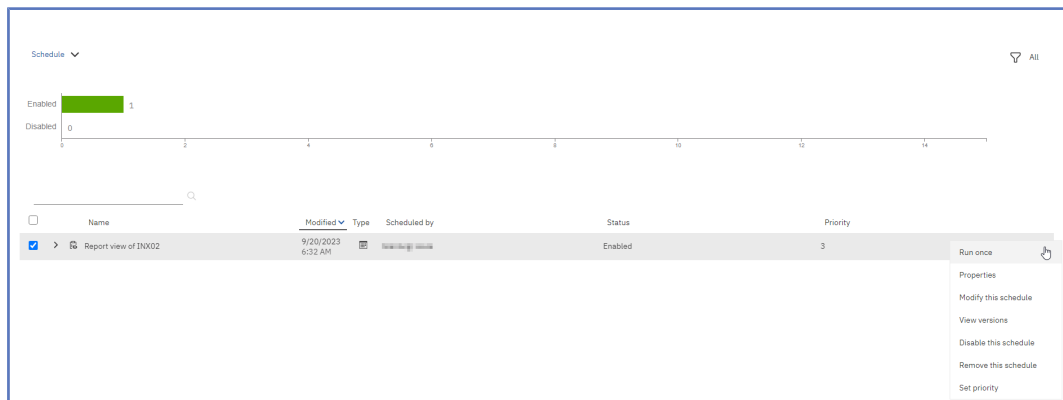

Illustration 161: **Welcome screen – Personal menu – My schedules and subscriptions** {Split book approach}

Enabled: The Status "Enabled" informs the user that the schedule is active.

Run once: By clicking here on "Run once", the user can run the report once:
Illustration 162: **Welcome screen – Personal menu – My schedules and subscriptions** {Split book approach}

You can find further information on how to run a report in the chapter Run a report step-by-step.

Modify this subscription: Change the settings for the scheduled report.

~~5.3.2.6.4 Log out~~

~~In order to log out you can use the "Log out" item from the personal menu in the toolbar.~~ {Split book approach}
Illustration 176: **Personal menu - Sign out** **{Split book approach}**

5.3.3 Navigating in the DWH GUI – menu

On the left side of the screen you can find the "Open" menu icon (☰ **) with different folders and the "System information" (** 📋 **).** {Split book approach}
Illustration 177: ~~Welcome page - menu~~ [27] **{Split book approach}**

5.3.3.1 Target services logo

By clicking on the "Target services" logo, you return to the "Welcome" page. [28]**{Split book approach}**

5.3.3.2 Home icon

The first icon on the left side is the "Home" icon.
Illustration 178: ~~Welcome page - Home~~ {Split book approach}

~~By clicking on this icon it is always possible to return to the "Welcome" page (the standard one or the one you have specified – for further information refer to chapter Access to the DWH) from everywhere in the DWH GUI.~~

[29]{Split book approach}

_____

5.3.3.3 Search function

To find items in your own or in the team content type the search term in the "Search" field. In the search field - you can type in one or multiple keywords and press "Enter". You can search for folders or predefined reports. {Split book approach}
Illustration 179: ~~Welcome page - Search~~ [30] **{Split book approach}**

5.3.3.3.1 Narrow your search with filters

After a successful search, the filter function is available. In case your search returns too many results, you can click on the "Filter" icon and select for example specific search results or dates to modify the result list. {Split book approach}

Filter Icon
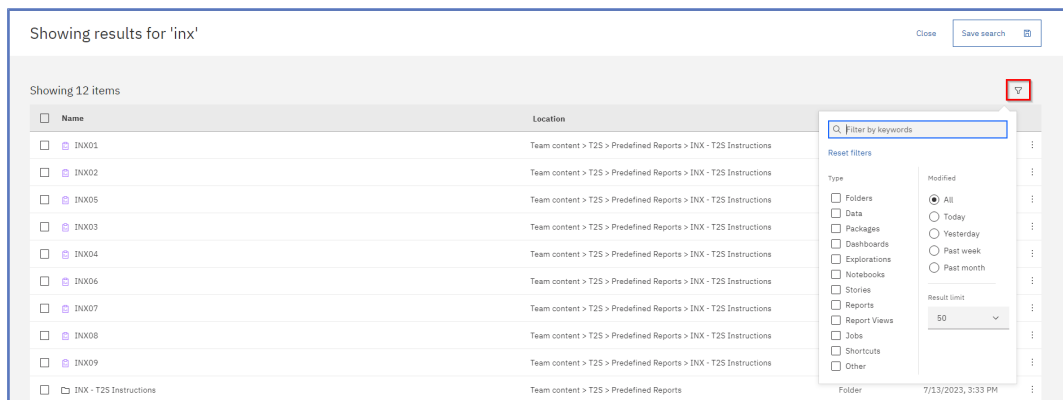

Illustration 180: ~~Welcome page - filter options~~ [31] **{Split book approach}**

5.3.3.3.2 Save search results

After you have performed a search and the results are shown, you can save the results of your search. The "Save" icon is only available after a successful search.

Save Icon
Illustration 181: ~~Welcome page - Search - Save icon~~ **{Split book approach}**

---

[30] ~~This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.~~ **{Split book approach}**

[31] ~~This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.~~ **{Split book approach}**

After clicking on the "Save" icon, a message pops up, that informs you that the search was saved.

The result of the search will be available later, even after the search is closed, or the user signs out.

If you do not save the result, the next search will overwrite the previous:

In order to delete a previously saved search, click on the "Remove" button of the saved search you intend to delete.

Remove Search

Illustration 182: ~~Welcome page – remove search~~ **{Split book approach}**

Save Search **In case you save the search, the search result will be available in the "Saved searches" list, even after you sign out.{Split book approach}**
Illustration 183: ~~Welcome page - Search - Saved searches~~ [32] **{Split book approach}**

5.3.3.4 System information

Behind "System information", you find a menu with a welcome page and user information.
Illustration 184: ~~Welcome page - System information link~~ **{Split book approach}**

Welcome Page **This page serves as an introduction to this menu and informs you about the content of this menu.{Split book approach}**
Illustration 185: ~~Welcome page – System information menu~~ **{Split book approach}**

User Details **Here you can see additional user information, such as user details concerning your User ID, which is needed to identify you in case of support. In addition, you will find your name, the name of your institution, and system information such as the environment (production or test environment) you are working on. The last business day is also mentioned to give you the information, which was the last business day loaded into the DWH completely.{Split book approach}**

---

[32] ~~This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.~~**{Split book approach}**

5.3.3.5 Recent

If you want to see pages, folders or reports that you recently viewed you can find the list under "Recent".{Split book approach}

Recent View
Illustration 186: **Welcome page – Recently viewed** {Split book approach}

5.3.3.6 New

The "New" option is only visible for CB/CSD users granted with the "Data Warehouse advanced user" privilege in CRDM. Only with this privilege it is allowed to create user-defined reports. For more information refer to the DWH UHB chapter Creating reports (just advanced users).{Split book approach}
Illustration 187: Welcome page - New [33] **{Split book approach}**

5.3.4 Personal Folders

5.3.4.1 Team content

After clicking on the "Open menu" icon and then clicking on "Content", you will be presented with a screen having two tabs, "My content" and "Team content". Under "Team content", you can find all reports you are allowed to run and view, depending on the party type you belong to. For information about each predefined report and who is allowed to use it, refer to Pre-defined reports. For CB/CSD users a specific CB/CSD folder can be found, where CB advanced users can store adapted or user-defined reports and share them with normal users within their CB/CSD. This enables also other users of this CB/CSD with the normal user privilege to execute reports previously designed by an advanced user.

CB/CSD Shared Folders

Additionally, the CBs/CSDs shared folder is included in here. With this folder, CBs/CSDs can share reports with other CBs/CSDs.

---

[33]   This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S. {Split book approach}
Illustration 188: Welcome page - Team content {Split book approach}

You can see the following content within "Team content".
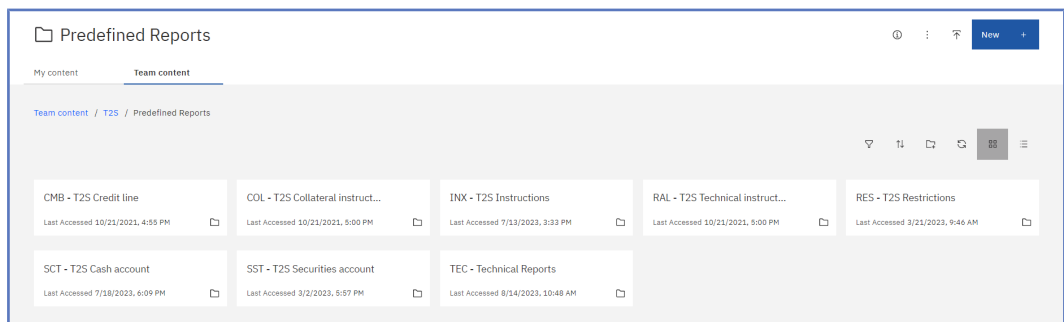

Illustration 189: Welcome page- Team content - folder structure {Split book approach}

In case you are a CB/CSD user, you will see this structure in "Team content":

Illustration 190: **Welcome page - Team content - folder structure (CB user)**

Data Packages **In the "Data Packages" folder, you can find the data model that was used to create the reports. This is an information item only (showing the date and time of the last update of the data model).**
Illustration 191: **Welcome page - Team content - Data Packages** {Split book approach}

Predefined Reports **In the "Predefined Reports" folder you can find the subfolders containing the predefined reports.**
Illustration 192: **Welcome page - Team content - Predefined reports** {Split book approach}

Example **Under "RES01 - T2S Restrictions" you can find the predefined reports "RES01".**
Illustration 193: **Welcome page - Team content - Predefined Reports - RES – T2S Restrictions Reports**

The normal user has the same capabilities, except from the "Create report". [34]**{Split book approach}**

5.3.4.2 My content

This is your private area where only you can see the content that is stored there. At start, the folder is always empty.
Illustration 194: **Welcome page – My content** [35] **{Split book approach}**

5.3.4.3 Add a new folder

Click on the "Open menu" icon (**), click on "Content" and then click on "My content". In order to create a new folder, click on the "Add Folder" icon (** **).**
Illustration 195: **Welcome page – My content – Add folder** **{Split book approach}**

New Folder | **After click on the "Add Folder" icon, you must enter a name for the new folder you want to create.**

---

34 ~~This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.~~**{Split book approach}**

35 ~~This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.~~**{Split book approach}**
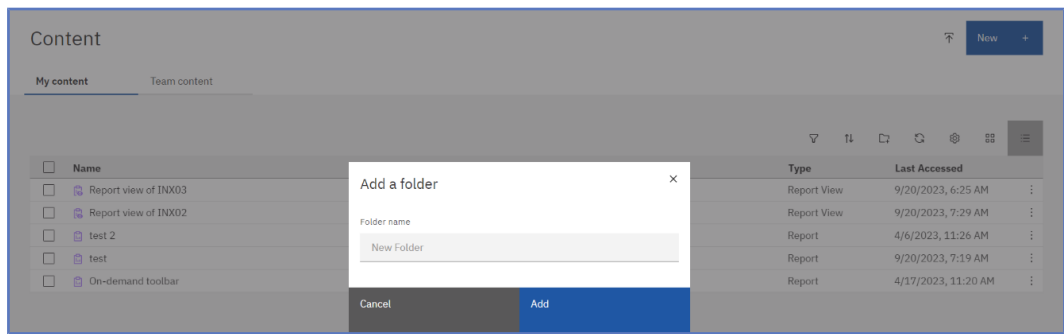

Illustration 196: Welcome page – My content – New Folder {Split book approach}

Press "Enter" and the new folder is created. [36]{Split book approach}

5.3.4.4 Sort the content

Open "My content" or "Team content" by clicking on the "Open menu" icon and then clicking on "Content", and click on the "Sort" icon in the toolbar. You can sort by name, the latest modification date or type of the content. In addition, you can decide if you want to see the ascending or descending order of your items.

Sorting Order In the following screenshot, the folders are sorted by name in ascending order.
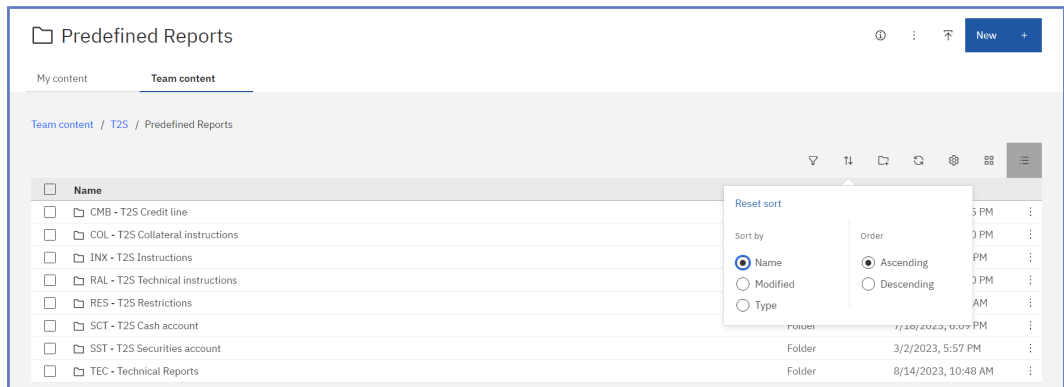

Illustration 197: Welcome page – My content – sort in ascending order {Split book approach}

On the contrary, in this screenshot the folders are sorted by name in descending order.{Split book approach}

---

[36] This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S. {Split book approach}
Illustration 198: Welcome page – My content – sort in descending order [37] **{Split book approach}**

5.3.4.5 Filter the content

Open "My content" or "Team content" by clicking on the "Open menu" icon and then clicking on "Content", and click on the "Filter" icon in the toolbar. You can choose the type, the modified time or provide one ore multiple keywords of the item you are looking for.
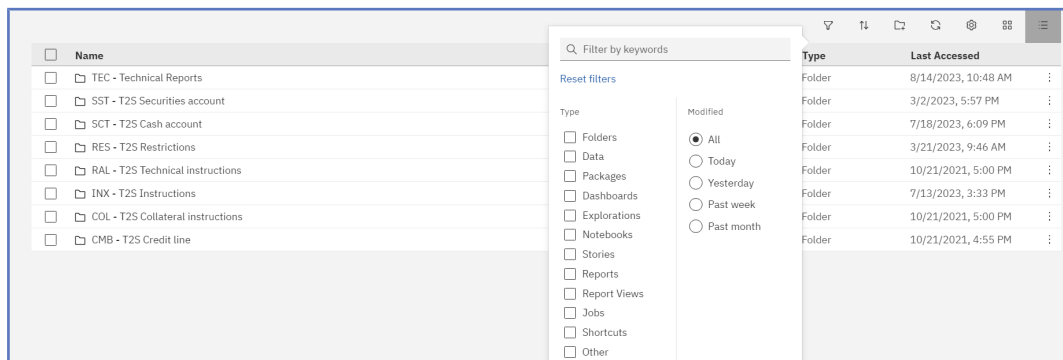

Illustration 199: Welcome page – Team content – T2S - Predefined Reports – filter options **{Split book approach}**

Example | **You want to search for a folder in combination with a keyword "RE". The following result is shown:** **{Split book approach}**

---

37   This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S. **{Split book approach}**
Illustration 200: ~~**Welcome page – My content – filter options – filter by folders**~~ [38] **{Split book approach}**

~~5.4 Working with reports~~

~~5.4.1 Copy, save and export~~

~~**This chapter gives you a step-by-step description on how to copy the report to your own folder or to save or export the data.**~~ [39]**{Split book approach}**

~~5.4.1.1 Copy a report~~

~~**Context of Usage**~~

~~**A copy is an independent version of the original report. Any changes to the implementation due to e.g. CRs in the original report will not affect the report results from the copied version. Deleting the original report will not affect the copy. This is the difference to the report view (see chapter Creating a report view) which remains linked to the original report. You can save a report as a copy in "My content" folder, or if the user is a member of a Central Bank or CSD, in the CB/CSD shared folders as well:**~~

~~**Instructions**~~

1. ~~**Navigate to the "Team content" folder, click on "T2S" and open "Predefined Reports" and select the folder with the desired report.**~~

---

38 ~~**This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.**~~**{Split book approach}**

39 ~~**This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.**~~**{Split book approach}**
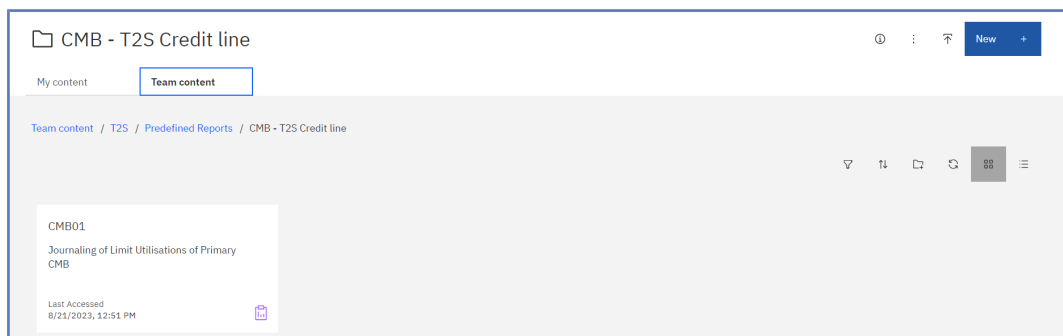

Illustration 201: ~~Team content - T2S - Predefined Reports - CMB - T2S Credit line~~ {Split book approach}

2. ~~Choose the report that should be copied and click on the "Action menu"~~ ~~icon ( ) at the right of the report and select "Copy to".~~
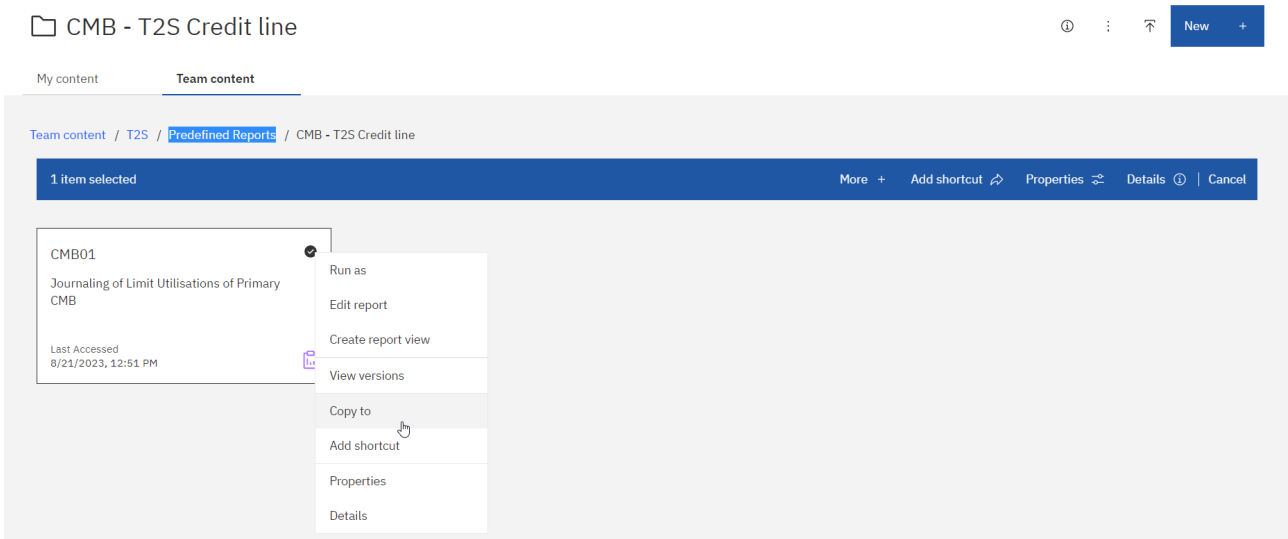

Illustration 202: ~~Team content - T2S - Predefined Reports - CMB - T2S Credit line Copy to~~ {Split book approach }

3. ~~A window pops up to save the report. You can save the reports in the~~ ~~"My content" by clicking on the "Copy to" button you move a copy of~~ ~~the report to your own working space in the DWH.~~

Illustration 203: ~~Team content - Predefined Reports – T2S – Predefined Reports - CMB01 – T2S Credit line – Copy~~ ~~to~~ {Split book approach }

4. **Afterwards you can find the report in the respective folder. In this example in "My Content".** {Split book approach }

5.4.1.2 Creating a report view

Context of usage

The report view is the same report as the predefined report, but has different properties such as prompt values, schedules, delivery methods, run options, languages, and output formats. A report view is an alias of the original report and remains linked to it. If the source report is moved to another location, the report view link is not broken. If the source report is deleted, the report view link is broken and the properties link to the source report is removed. In case the report has been changed (e.g. due to a new software release), the user will be prompted with this information. The "Report view" icon ( ) changes to indicate that the link is broken and is no longer operable. In order to schedule the run of a report (see chapter Scheduling reports), you have to create a report view first.

These steps have to be executed in order to create a report view of the chosen report:

Instructions

1. **Navigate to the "Team content" folder, click on "T2S" and open "Predefined Reports" and select the folder with the desired report.**
Illustration 204: ~~Team content - T2S - Predefined Reports - STF - T2S Credit line~~ {Split book approach}

2. **Choose the report for that a view should be created and click on the "More" icon ( ) at the right of the report and select "Create report view".**
Illustration 205: **Team content - T2S --- Predefined Reports - CMB - T2S Credit line- Create report view** {Split book approach }

3. **A pop up window opens and you can save the report view in "My content" after entering a name and by clicking on the "Save" button.**
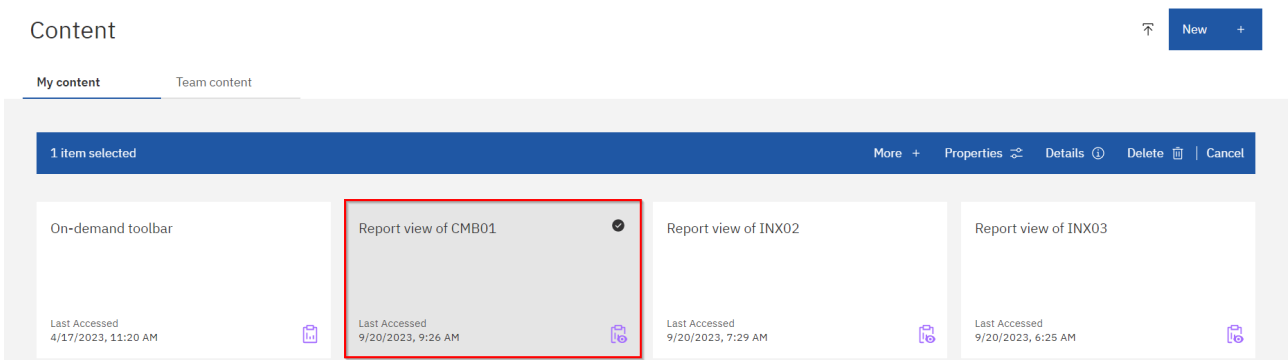

Illustration 206: **My content - report view** {Split book approach }

4. **You can find the report view in the respective folder. In this example in "My content".**

5. **You can determine the source report for a report view by clicking on the properties.**

5.4.1.3 Saving a report output

Context of Usage   **You can save the report output (meaning the result of the run of a report, see chapter Running reports) in DWH for future uses by creating a report view first.**

Instructions
1. **Create a report view as described in chapter Creating a report view.**
2. **Navigate to the folder containing the report view you have created.**
3. **Run the report as described in chapter Run a report step-by-step.**

4. ~~You can view the output by clicking on the "More" icon (   ) next to the report in "My content".~~

5. ~~Select "View versions"~~
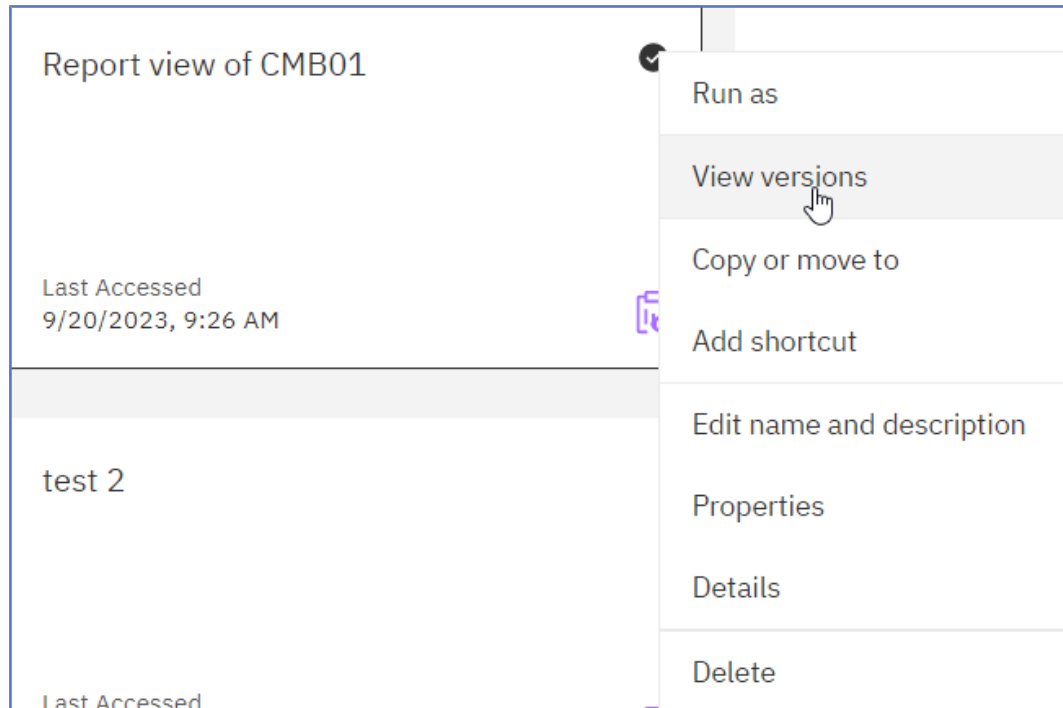

Illustration 209: ~~My content - report view - View versions~~ **{Split book approach}**

⇨ ~~By clicking on the respective version you can either delete this version or view the outcome by clicking on the "Format" icon.~~

6. ~~You can click on the report name and either delete this version or view the outcome by clicking on the "Format" icon (   ) of the report.~~ **{Split book approach}**

~~5.4.1.4 Exporting a report to a local folder~~

Context of Usage Instructions

~~You can export a report in csv, excel, excel data, pdf and xml format. Therefore, you have to navigate to the folder of the desired report.~~

1. ~~Choose the report you want to export and click on the "More" icon (   ) in the right of the report name.~~

2. ~~Select "Run as" from the list.~~
Illustration 210: ~~Welcome page - My content - Properties~~ {Split book approach}

3. ~~Select the desired format and enter the selection criteria of the report (see chapter Run a report step-by-step).~~

4. ~~After clicking on the "Run" button a pop-up window appears to save the report. You can download a report in csv, excel, excel data, pdf and xml format.~~

5. ~~The download option depends on the chosen format and the functionality of the browser you are using. In most browsers you can define, whether certain file types should be opened in the browser, a save dialog is shown or the file is directly downloaded to the default download directory. Please be aware that these settings have to be done in the browser, not in the DWH GUI.~~
~~For example, if you choose to run the report as 'XML', then you cannot view the result, but only download the report in a local folder.~~
Illustration 211: ~~Welcome page - My content – Properties-Run as XML~~ {Split book approach}

6. ~~A pop up window appears to save the report:~~{Split book approach}

5.4.2 Running reports

~~This chapter gives you an overview about how to run a report and organise its delivery.~~ [40]{Split book approach}

5.4.2.1 Run a report step-by-step

~~Instructions~~

1. ~~Navigate to the "Team content" >> folder, click on "T2S" there to folder "Predefined Report" and open the folder with the desired report.~~

Illustration 212: ~~Team content – T2S - Predefined Reports – CMB - T2S Credit line~~ {Split book approach}

2. ~~Select the report you want to run. In order to run the report you can click on the report name. This action will run the report in the default DWH format, which is html.~~

---

40   ~~This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S~~ {Split book approach}.

Illustration 213: Team content – T2S - Predefined reports – CMB – T2S Credit line {Split book approach}

3. In the following screen you have to enter the search criteria in the prompt page.

5.4.2.2 Delivery

Scheduling reports

In case a report should be delivered to you (independent from the output channel (U2A or A2A) you run the report in the background or schedule a report. For this option refer to chapter Scheduling reports for further details. [44] **{Split book approach}**

5.4.2.2.1 Delivery - Save the report for an external file (U2A)

Instructions   1. **Click on the "More" icon at the right of the report and select "Run as".**
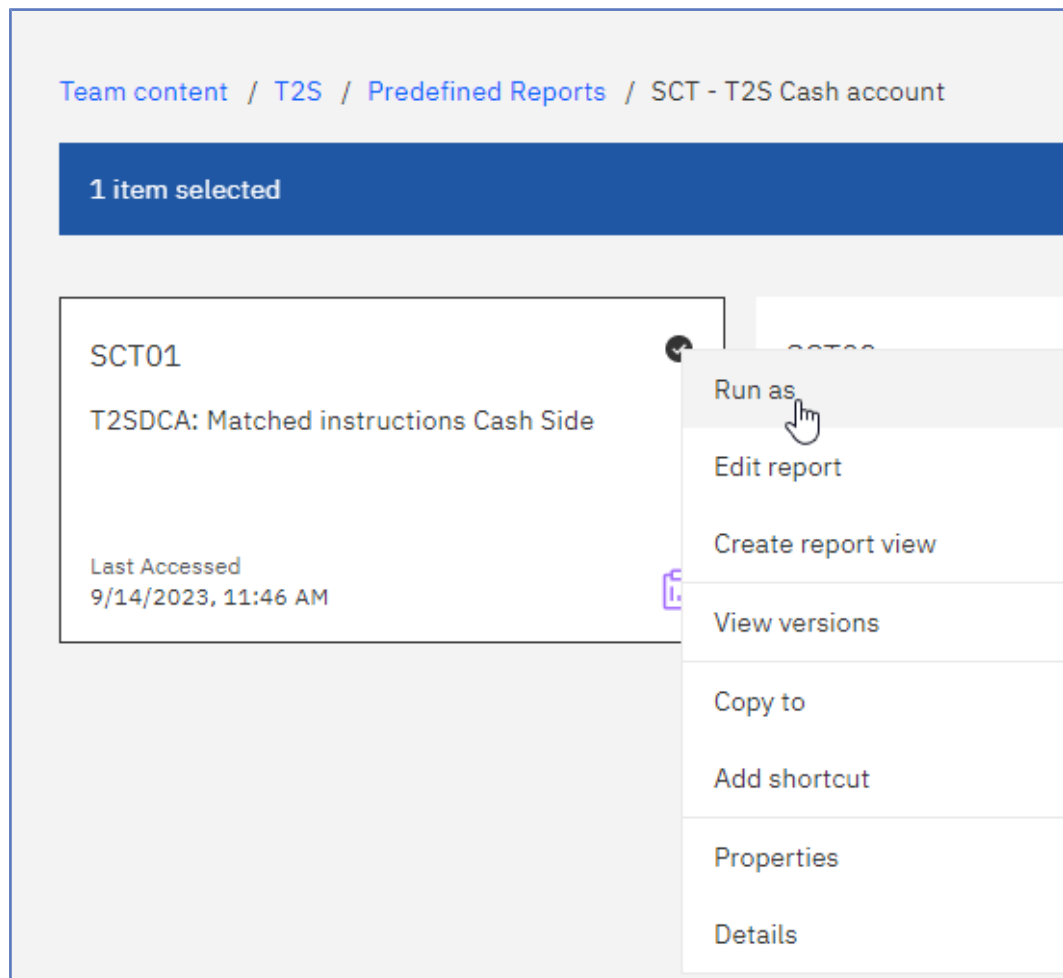

Illustration 223: **Team content – T2S - Predefined Reports – SCT - T2S Cash account – SCT01 – Run as** {Split book approach }

2. **Select "Run in background".**

---

[44]   **This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.** **{Split book approach }**
Run as

Illustration 224: ~~Team content – T2S - Predefined Reports – SCT – T2S Cash account - SCT01 - Run as – Run in background~~ **{Split book approach }**

3. ~~Scroll down to view the delivery section.~~

4. ~~Check the "Save report as an external file". Finally, click on "Run".~~ **{Split book approach }**

Illustration 225: ~~Team content – T2S - SCT - T2S Cash account – SCT01 – Run as – Run in background – Advanced Delivery – Save report as an external file~~ [45] **{Split book approach }**

~~5.4.2.2.2 Delivery - Save the report for an external file (A2A)~~

~~For the A2A delivery please follow the steps described hereafter.~~

Instructions

1. ~~You navigate to the respective report folder as described in chapter~~ Copy a report [▶ 847].
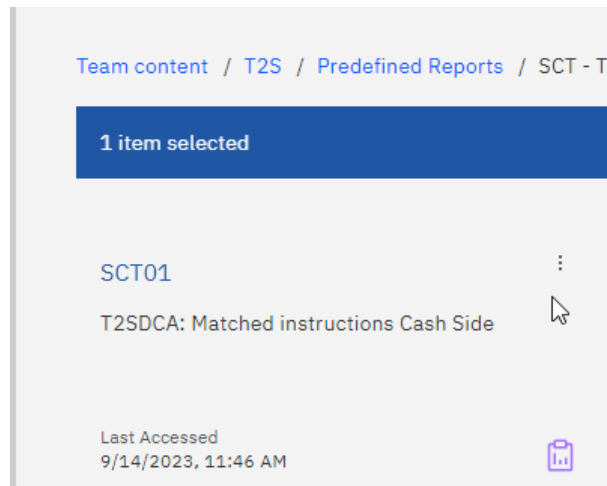

Illustration 226: ~~Team content – T2S - Predefined reports – SCT - T2S Cash account – SCT01~~ **{Split book approach }**

2. ~~Click on the "Action menu" icon (⋮) at the right of the report and select "Copy to" or "Create report view".~~

---

[45] ~~This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.~~ **{Split book approach }**
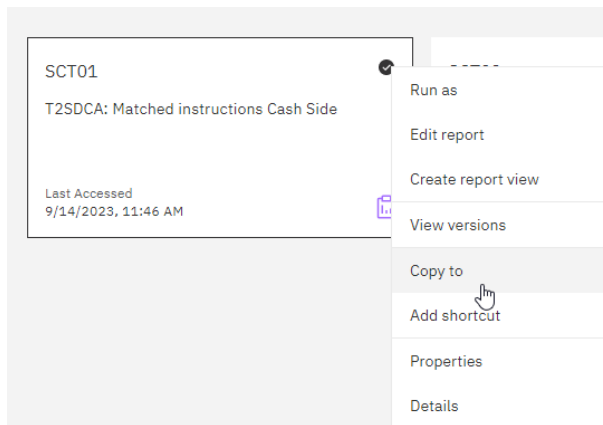

Illustration 227: SCT01 -T2S Cash account - Action menu {Split book approach }

3. **A window pops up where you have to enter a storage location for your copy or report view. In this example, the report is copied to "My content".**
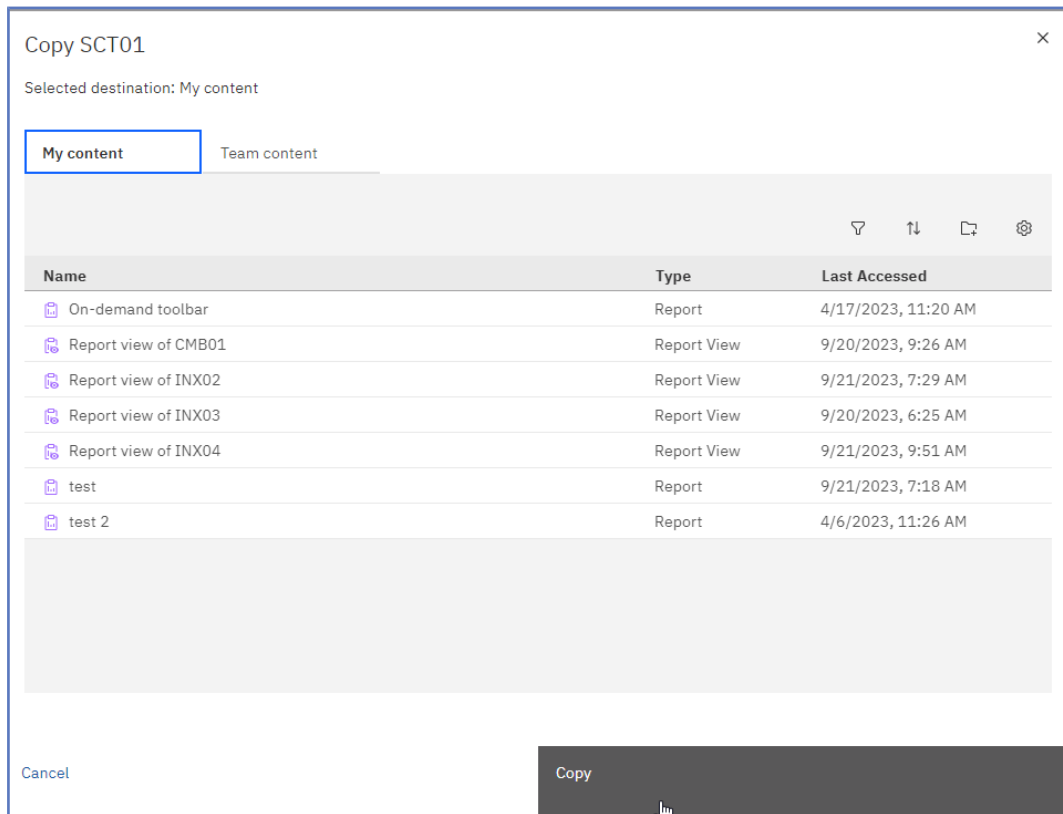

Illustration 228: SCT01 -T2S Cash account - Copy {Split book approach }

4. **Navigate to the folder where you have copied the report. In this example, the folder is "My content".**
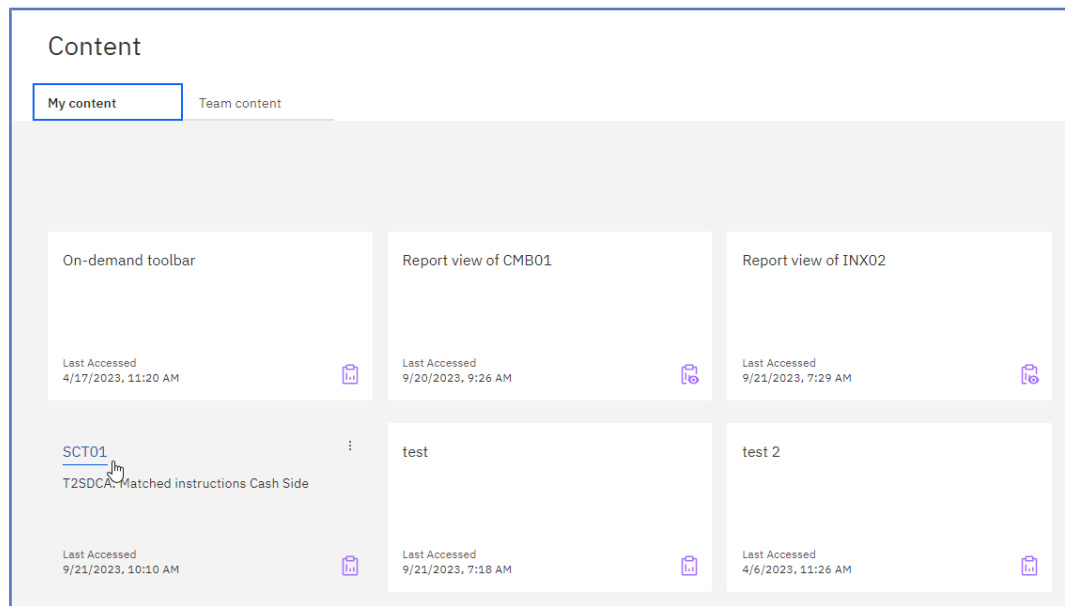

Illustration 229: ~~SCT01 - T2S Cash account – Copy to My content~~ **{Split book approach }**

5. ~~**Find the report and click on the "More" icon at the right of the report and confirm by clicking "Run as".**~~
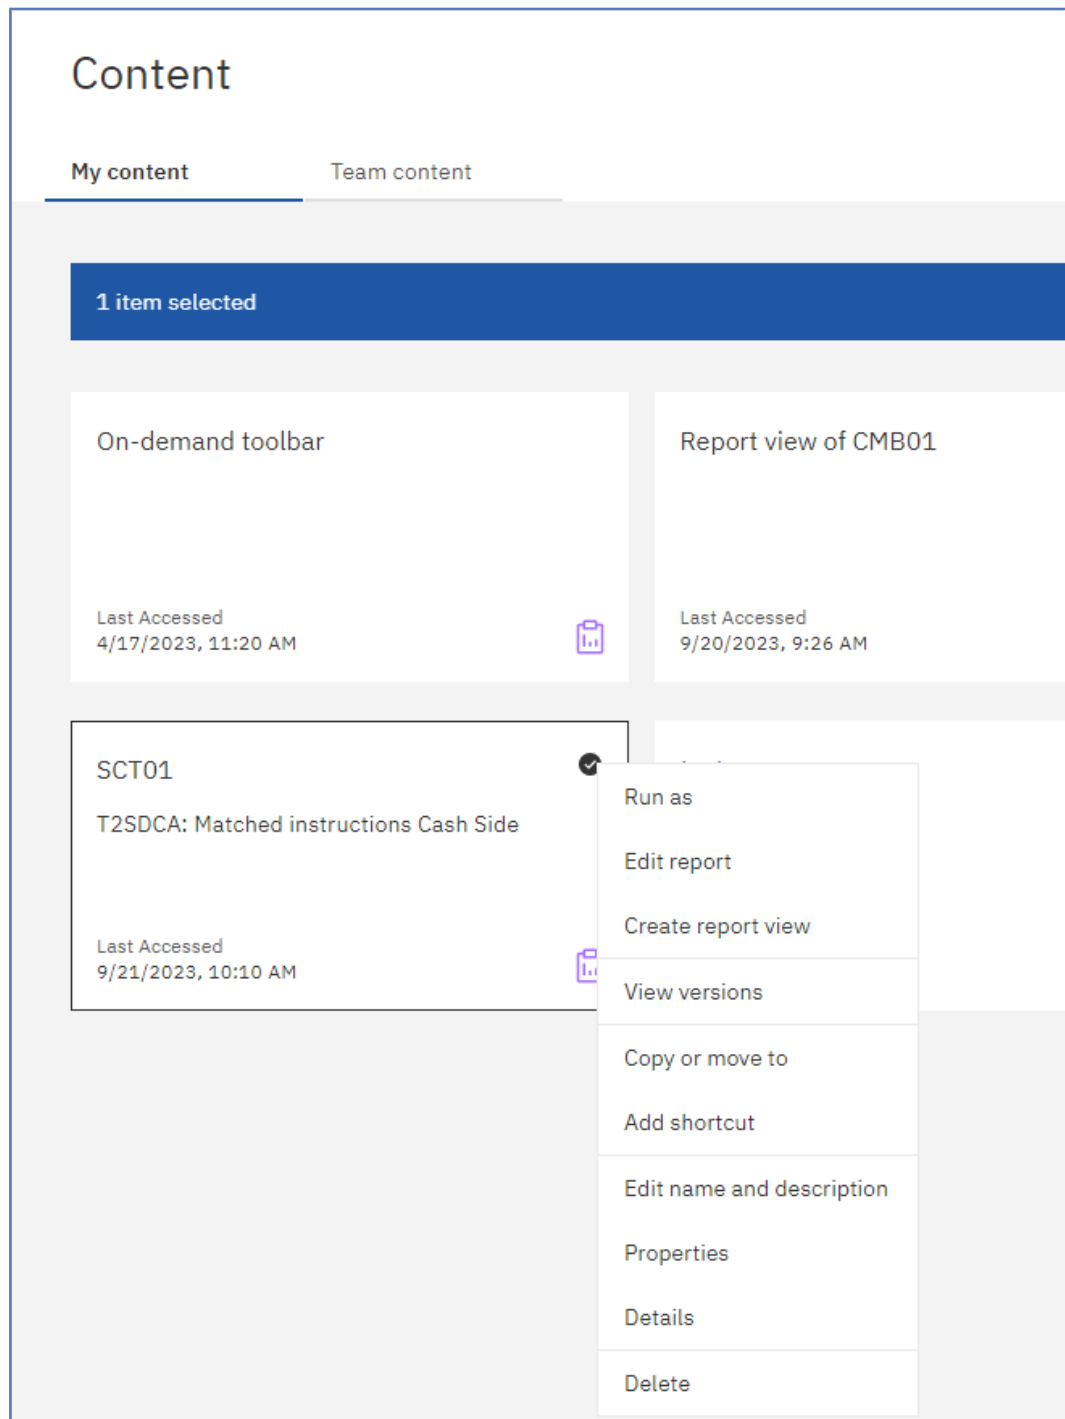

Illustration 230: **SCT01 - T2S Cash account - Run as** {**Split book approach** }

6. **Perform the same action as explained in chapter Run a report step-by-step for "Run in background".**

7. **Check the "Run in background" button:**
Illustration 231: **My content - SCT01 - T2S Cash account - Run as – Run in background** {**Split book approach** }

8. **For delivery in A2A you can choose any of the available formats.**

9. **You are free to select "Now" or "Later" and add a date and time of the execution.**

10. **For "Delivery" you have to select the option "Save report as an external file".**
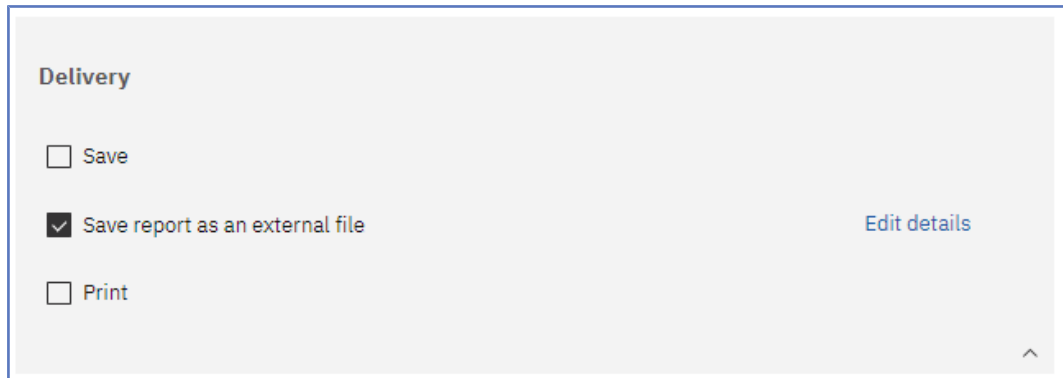

Illustration 232: **My content - STF01 Standing Facility information - Run in background – Options Delivery** {Split book approach }
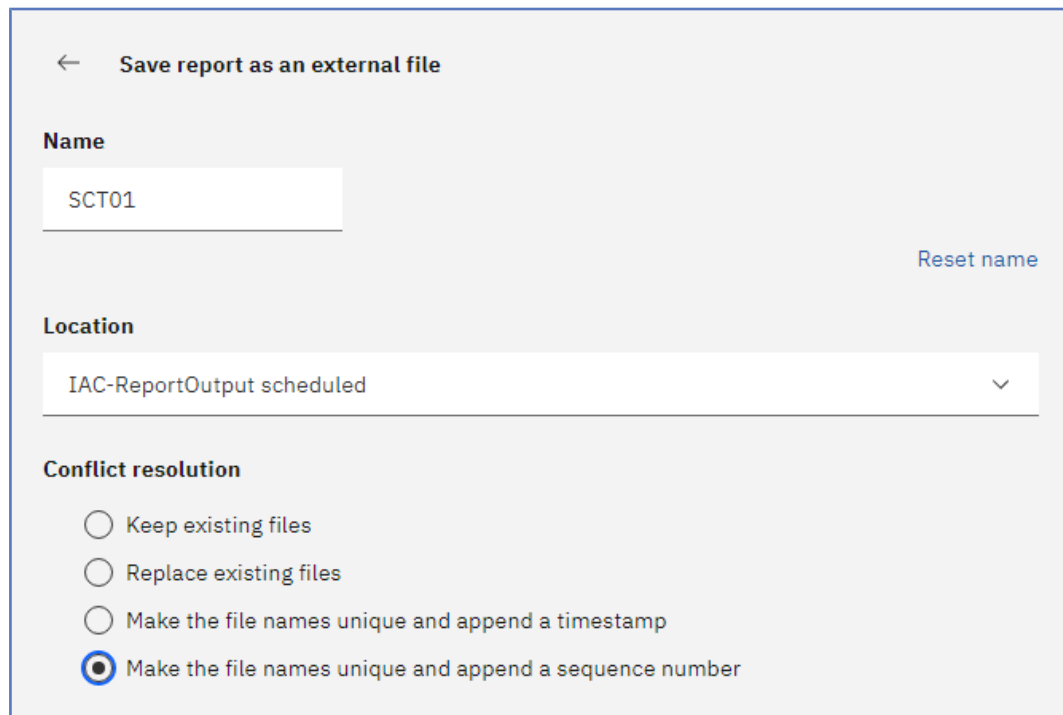

11. **After you activated the "Save report as an external file" checkbox, click on "Edit details".**
Illustration 233: **My content – STC01 - Run in background - Delivery - Save report as an external file** {Split book approach }

The "Name" field presents the name of the report. The default value is the name of the report, as it is known in DWH. Please note, that by leaving the default name in place you need to prevent the generated file from being overwritten by a file with the same name but stemming from other users. For this, please change the value for "Conflict resolution" to one of the two following choices:

☐ **Make the file names unique and append a timestamp**

☐ **Make the file names unique and append a sequence number**

Illustration 234: *My content - SCT01 - Run in background - Delivery - Save report as an external file – Conflict resolution* {Split book approach }

Please do not change the default value in the "Location" field, as this is the place where the report is stored before it is delivered to your party via A2A. Changing the default value in the 'Location' field will result in reports not being sent via A2A. The folder is not accessible via the GUI and only for storing the report before it is delivered via A2A.

12. **Click on the "Run" button (** Run **).**

2. **Enter the search criteria in the prompt page.**

Illustration 235: **My content - SCT01 - Run in background - Delivery – Enter search criteria**

{Split book approach }

3. **Click on the "Finish" button.**

The report will be executed and the result will be sent via A2A in the chosen format to your party.

Or you run your report in the background with the delivery "Save the report as an external file". [46]**{Split book approach }**

5.4.3 Scheduling reports

5.4.3.1 Scheduling the report for a specific time

Context of Usage

The DWH offers a scheduler function, which allows the configuration and delivery of (recurring) reports with individual settings.

This chapter describes the steps that you perform to schedule a report and to check the scheduling afterwards.

After saving the report in "My content" or, for CB/CSD users, under the shared folder of your CB/CSD, you have to choose the report you want to schedule and create a report view of this report (see chapter Saving a report output).

After creating the report view you can start to schedule your report.

Instructions

1. **Choose the report you have saved as a report view, and click on the "Action menu" (⋮) icon at the right of the report.**
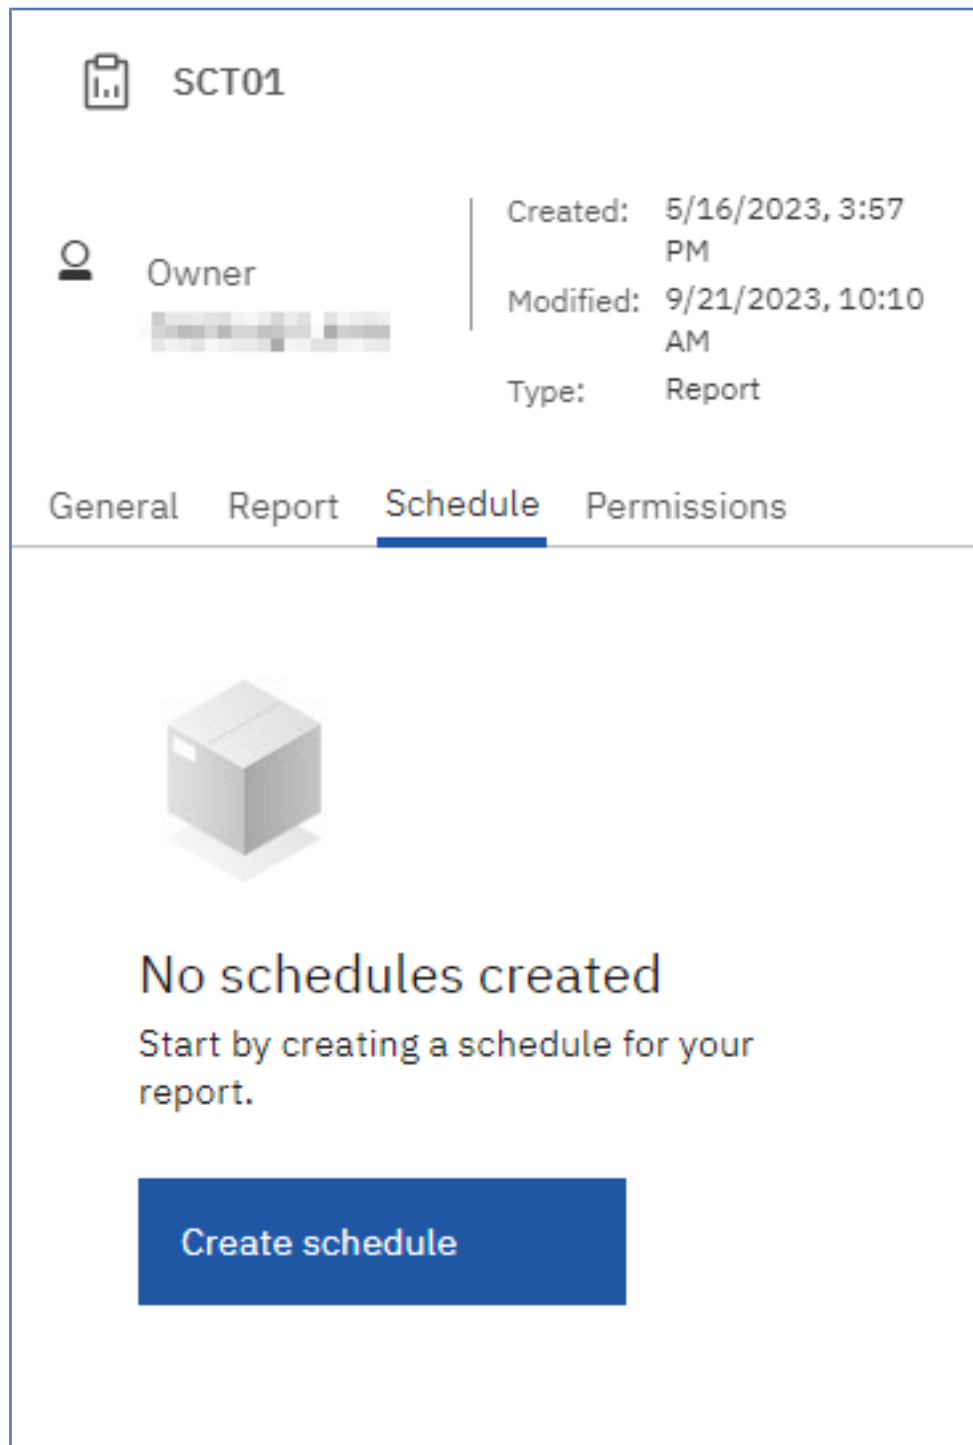

2. **Click on "Properties".**
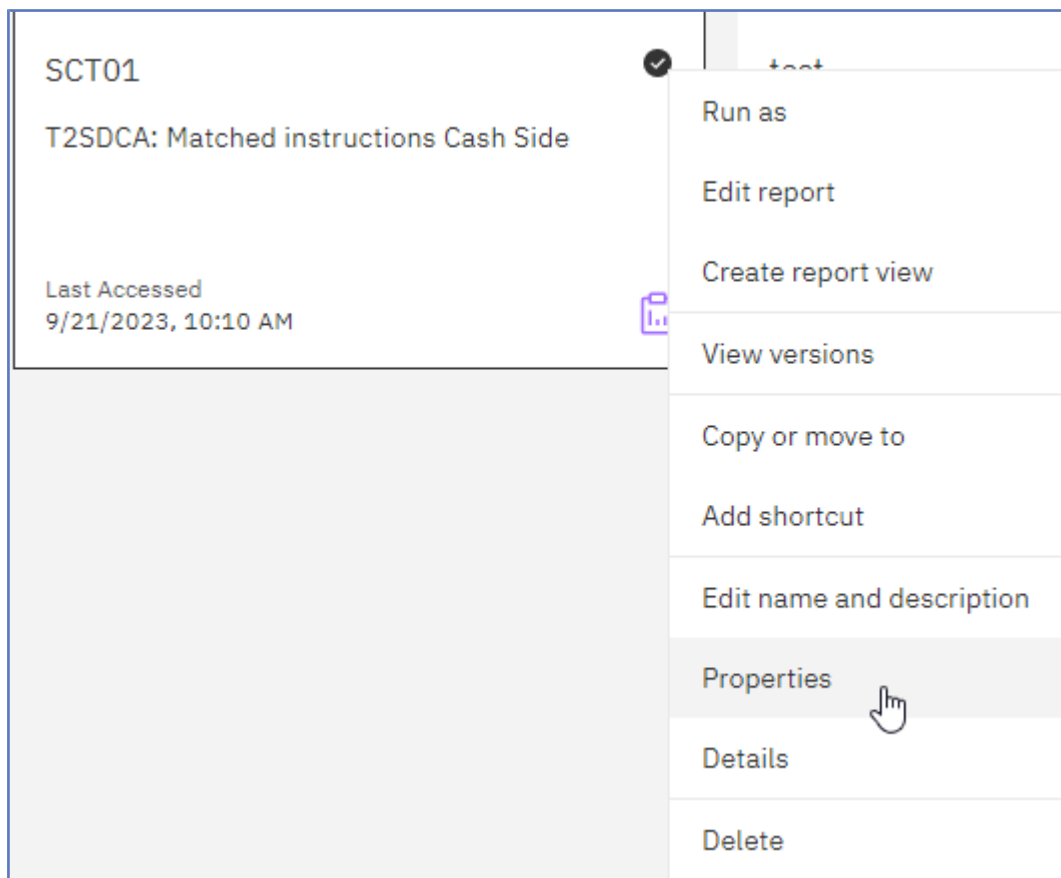

Illustration 236: **My content - report view - Properties** {Split book approach}

3. **A description of your report is shown and you can add a description under "General".**
Illustration 237: **My content - report view - Properties – General - description of your report**

{Split book approach}

4. **In the "Schedule" tab you will find the "Create schedule" icon.**
Illustration 238: ~~Welcome page - My content - report view - Properties - Schedule~~ {Split book approach}

5. ~~By clicking on the "Create schedule" icon, the "Schedule" is opening where you have multiple options to choose for scheduling your report.~~

6. ~~You can set a variety of options when scheduling a report: the frequency the report will be run, the "Period" of the schedule, the format in which the report will be delivered, and the delivery method.~~

Illustration 239: ~~Welcome page - My content - report view - Properties - create schedule~~ {Split book approach}

~~The following options are mandatory for scheduling. Please note, that especially the prompt values have to be set, otherwise the report will not be generated.~~

~~Schedule: The frequency, which the report will be run, daily, weekly, monthly, yearly.~~

~~Period: Choose the start and the end date of the schedule. Alternatively, by clicking on "No end date" the schedule will run indefinitely.~~

~~Format: The type of format the report will be executed to, HTML, csv, excel, excel data and xml. For further information, you may check the chapter Run a report step-by-step.~~

~~Delivery: You may choose if you want to save the report in Cognos or as an external file. For further information go to chapter Delivery - Save the report for an external file (U2A).~~

~~Prompts: By clicking on "Set values", and then "Set" you will be presented with the prompt page of the report, where you have to enter the selection criteria.~~

~~Languages: Since the only language in the database is English, nothing will change in case you define another language.~~

~~PDF: By clicking on "Select" you may choose the orientation or the paper size.~~

~~In this example, you see a daily schedule with no end date, HTML as an output, and save the report in DWH.~~
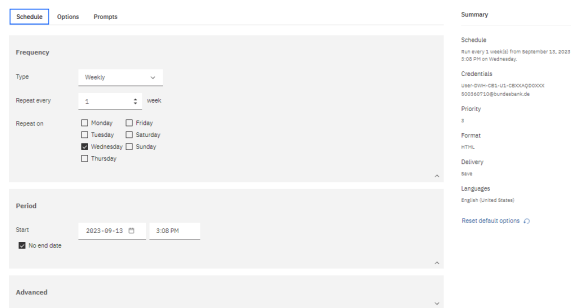

Illustration 240: **Welcome page - My content - report view - Properties - create schedule** {Split book approach}

In case you want to receive the scheduled reports via A2A you have to choose "Delivery - Save report as external file" and follow the information provided in chapter Delivery - Save the report for an external file (U2A).

Instructions

7. **After you have entered all mandatory information, click on the "Save" button and the schedule is created.**

Illustration 241: **Welcome page - My content - Properties -– Schedule** {Split book approach}
Illustration 242: **Welcome page - My content - Properties – Schedule** {Split book approach}

The option "Enable" informs the user that the schedule is active. By un-checking it, the user cancels the schedule. [47]{Split book approach}

---

47   ~~This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.~~{Split book approach}

5.4.3.2 Scheduling the report for a specific DWH event

Context of Usage

You can also schedule a report to be executed shortly after the new data of the last business day was loaded into the DWH. One dedicated DWH internal event will be triggered that starts the execution of the report and either stores it in the "My content" folder or sends it out via A2A.

Instructions

1. **Choose the report you have saved as report view, and click on the "Action menu" (⋮) icon at the right of the report.**

2. **Click on "Properties".**
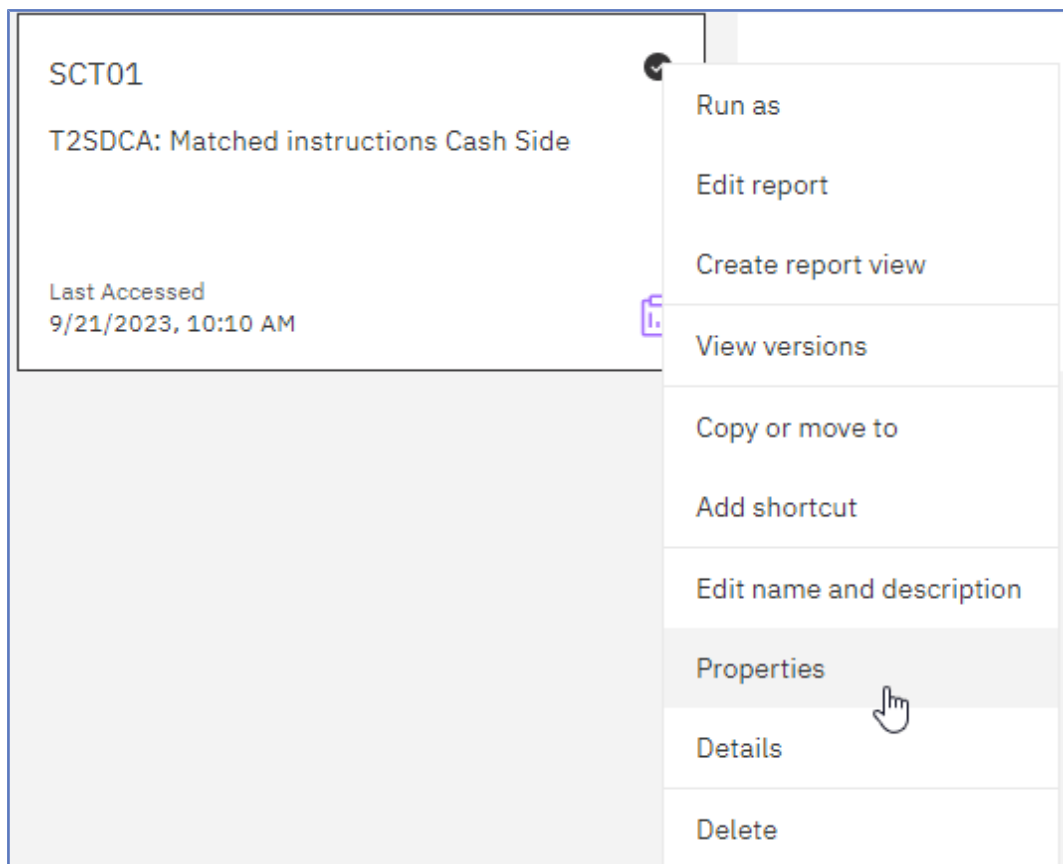

Illustration 243: **My content - report view – Properties** **{Split book approach}**

3. **A description of your report is shown and you can add a description under "General".**
Illustration 244: **My content - report view - Properties – General - description of your report**

{Split book approach}

4. **In the "Schedule" tab you will find the "Create schedule" icon.**

Illustration 245: ~~Welcome page - My content - report view - Properties – Schedule~~ {Split book approach}

5. ~~By clicking on the "Create schedule" icon, the "Schedule" is opening where you have multiple options to choose for scheduling your report.~~

Illustration 246: Welcome page - My content - report view - Properties - create schedule **{Split book approach}**

6. Select "By Trigger" in the pull down list as schedule. In the field "Trigger name" you have to enter the phrase "eodtrigger". Make sure to type this phrase exactly this way, otherwise the report trigger does not work and the scheduled report will not be executed.

Illustration 247: Welcome page - My content - report view - Properties - create schedule **{Split book approach}**

7. In this example you see a trigger schedule with no end date, xml as an output and save the report in DWH

Summary

Schedule

Run schedule on specified trigger from September 13, 2023 at 3:18 PM.

5.5 Predefined reports

5.5.1 T2S Cash account (SCT)

5.5.1.1 SCT01 – Finalised matched instructions

Context of Usage

This report shows the cash activity for all finalised matched settlement instructions (SI) at CB, PB or T2S dedicated cash account level, during a selected period of time. The volume of finalised matched instructions per transaction type / sub-category together with the aggregated matched values and settled values are shown.

This report can be used by CB users.

Report Access

This report can be reached in the following way:

☐ **Content >> Team Content >> T2S >> Predefined Reports >> SCT - T2S Cash account >> SCT01**

---

[49]   **This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S.{Split book approach}**

Field Description

SCT01 – Finalised matched instructions – Output Screen	
Transaction type code	Shows the transaction type code of the settlement transaction. Possible values are: ☐ DVP (delivery versus payment) ☐ DWP (delivery with payment) ☐ PFOD (payment free of delivery)
Transaction sub-category	Shows the transaction sub-category of the settlement transaction.

SCT01 – Finalised matched instructions – Output Screen	
	Possible values are: ☐ CATR (cash transfer) ☐ STND (standard)
Debit	
Volume of settlement instructions	A count of all finalised matched SIs on the debit side during the selected date range, per transaction type code and sub-category.
Matched value	Sum of the matched settlement amounts of all finalised matched SIs on the debit side during the selected date range per transaction type code and sub-category.
Settled value	Sum of the settled settlement amounts of all finalised matched SIs on the debit side during the selected date range per transaction type code and sub-category.
Credit	
Volume of settlement instructions	A count of all finalised matched SIs on the credit side during the selected date range, per transaction type code and sub-category.
Matched value	Sum of the matched settlement amounts of all finalised matched SIs on the credit side during the selected date range per transaction type code and sub-category.
Settled value	Sum of the settled settlement amounts of all finalised matched SIs on the credit side during the selected date range per transaction type code and sub-category.
Total (per transaction type code/settlement transaction sub-category)	
Volume of settlement instructions	Sum of 'Volume of settlement instructions' over debit and credit.
Matched value	Sum of 'Matched value' over debit and credit.
Settled value	Sum of 'Settled value' over debit and credit.
Total	

SCT01 – Finalised matched instructions – Output Screen	
Total	Sum for each column, summed over all transaction type / sub-category combinations. [50]{Split book approach }

5.5.1.2 SCT02 – Detailed matched settlement instructions

Context of Usage

This report shows all finalised settlement instructions (SIs) at CB or PB or T2S dedicated cash account level, during a chosen period of time.

The volume and values of settlement instructions are displayed per transaction type / sub-category / direction (debit or credit) and the settlement status.

This report can be used by CB users.

Report Access

This report can be reached in the following way:

☐ Content >> Team Content >> T2S >> Predefined Reports >> SCT - T2S Cash account >> SCT02

Total (per transaction type code/settlement transaction sub-category)	
Matched value	Sum of 'Matched value' over debit and credit.
Settled value (totally + partially)	Sum of 'Value totally settled' plus 'Value partially settled' over debit and credit.
Total	
Total	Sum for each column, summed over all transaction type / sub-category combinations. [51]{Split book approach }

5.5.1.3 SCT03 – Follow up by time slot of settlement activity

Context of Usage

This report shows all finalised settlement instructions (SIs) per time slots of the settlement date in an array at CB, PB or T2S DCA level, during a chosen period of time.

The settlement instructions (SI) are displayed as aggregated volumes and values according to the transaction type code, the transaction sub-category, the T2S-DCA debit/credit code, the settlement status and T2S time slot

This report can be used by CB users.

Report Access

This report can be reached in the following way:

Settlement status	Shows the status of the settlement instruction. Possible values are: ☐ Totally settled ☐ Partially settled ☐ Totally cancelled ☐ Partially cancelled
Value of instructions - debit	
Time slots (one line per time slot): ☐ 1st NTS cycle ☐ Last NTS cycle ☐ RT1 before intra-day DVP cut-off ☐ RT2 before EOD intraday credit reimbursement ☐ RT3 before EOD intraday FOP cut-off ☐ RT4 after intra-day FOP cut-off	Shows the aggregated amount of the SIs (debit side) for each designated time slot, within the transaction type code / transaction subcategory / settlement status combination.
Value of instructions - credit	

SCT03 – Follow-up by time slot of settlement activity – OUTPUT SCREEN – Tab 2 T2S DCA – Follow-up by time slot of settlement activity - value	
Time slots (one line per time slot): ☐ 1st NTS cycle ☐ Last NTS cycle ☐ RT1 before intra-day DVP cut-off ☐ RT2 before EOD intraday credit reimbursement ☐ RT3 before EOD intraday FOP cut-off ☐ RT4 after intra-day FOP cut-off	Shows the aggregated amount of the SIs (credit side) for each designated time slot, within the transaction type code / transaction subcategory / settlement status combination.
Total	
Total	Sum for each column, summed over all transaction type / sub-category combinations. [52]{Split book approach }

5.5.1.4 SCT04 – Comparison of settlement activity between two time periods

Context of Usage	This report shows the settlement activity for two time periods at CB, PB or T2S dedicated cash account level, to allow its comparison between these two periods of time. The settlement instructions (SI) are displayed as aggregated volumes and values according to the transaction type code, the transaction sub-category, the T2S-DCA debit/credit code and the settlement status. This report can be used by CB users.
Report Access	This report can be reached in the following way: ☐ Content >> Team Content >> T2S >> Predefined Reports >> SCT - T2S Cash account >> SCT04

Illustration 263: SCT04 output screen **{Split book approach }**

Field Description

SCT04 – Comparison of settlement activity between two time periods – Output Screen	
Period 1	
Transaction type code	Shows the transaction type code of the settlement transaction. Possible values are: ☐ DVP (delivery versus payment) ☐ DWP (delivery with payment) ☐ PFOD (payment free of delivery)
Transaction sub-category	Shows the transaction sub-category of the settlement transaction. Possible values are: ☐ CATR (cash transfer) ☐ STND (standard)
Debit	
Volume totally settled	A count of the number of totally settled SIs found on the debit side in the period 1 duration, per transaction type and sub-category.
Volume partially settled/partially cancelled	A count of the number of partially settled/partially cancelled SIs found on the debit side in the period 1 duration, per transaction type and sub-category.
Volume totally cancelled	A count of the number of totally cancelled matched SIs found on the debit side in the period 1 duration, per transaction type and sub-category.
Value totally settled	Sum of the settled settlement amounts of all finalised SIs that were debited and totally settled within the period 1 duration, per transaction type and sub-category.

SCT04 – Comparison of settlement activity between two time periods – Output Screen	
Value partially settled	Sum of all partial settlement amounts of all finalised SIs that were debited and reached final status within the period 1 duration, per transaction type and sub-category.
Value partially cancelled	Sum of all unsettled settlement amounts of all finalised SIs that were debited and reached final status within the period 1 duration, per transaction type and sub-category.
Value totally cancelled	Sum of the settlement amounts of all finalised SIs on the debit side which were totally cancelled within the period 1 duration, per transaction type and sub-category.
Credit	
Volume totally settled	A count of the number of totally settled SIs found on the credit side in the period 1 duration, per transaction type and sub-category.
Volume partially settled/partially cancelled	A count of the number of partially settled/partially cancelled SIs found on the credit side in the period 1 duration, per transaction type and sub-category.
Volume totally cancelled	A count of the number of totally cancelled matched SIs found on the credit side in the period 1 duration, per transaction type and sub-category.
Value totally settled	Sum of the settled settlement amounts of all finalised SIs that were credited and totally settled within the period 1 duration, per transaction type and sub-category.
Value partially settled	Sum of all partial settlement amounts of all finalised SIs that were credited and reached final status within the period 1 duration, per transaction type and sub-category.
Value partially cancelled	Sum of all unsettled settlement amounts of all finalised SIs that were credited and reached final status within the period 1 duration, per transaction type and sub-category.

SCT04 – Comparison of settlement activity between two time periods – Output Screen	
Value totally cancelled	Sum of the settlement amounts of all finalised SIs on the credit side which were totally cancelled within the period 1 duration, per transaction type and sub-category.
Total (Period 1 - final)	
Total	Sum for each column, summed over all transaction type / sub-category combinations.
Period 2	
Transaction type code	Shows the transaction type code of the settlement transaction. Possible values are: ☐ DVP (delivery versus payment) ☐ DWP (delivery with payment) ☐ PFOD (payment free of delivery)
Transaction sub-category	Shows the transaction sub-category of the settlement transaction. Possible values are: ☐ CATR (cash transfer) ☐ STND (standard)
Debit	
Volume totally settled	A count of the number of totally settled SIs found on the debit side in the period 2 duration, per transaction type and sub-category.
Volume partially settled/partially cancelled	A count of the number of partially settled/partially cancelled SIs found on the debit side in the period 2 duration, per transaction type and sub-category.
Volume totally cancelled	A count of the number of totally cancelled matched SIs found on the debit side in the period 2 duration, per transaction type and sub-category.
Value totally settled	Sum of the settled settlement amounts of all finalised SIs that were debited and totally settled within the period 2 duration, per transaction type and sub-category.

SCT04 – Comparison of settlement activity between two time periods – Output Screen	
Value partially settled	Sum of all partial settlement amounts of all finalised SIs that were debited and reached final status within the period 2 duration, per transaction type and sub-category.
Value partially cancelled	Sum of all unsettled settlement amounts of all finalised SIs that were debited and reached final status within the period 2 duration, per transaction type and sub-category.
Value totally cancelled	Sum of the settlement amounts of all finalised SIs on the debit side which were totally cancelled within the period 2 duration, per transaction type and sub-category.
Credit	
Volume totally settled	A count of the number of totally settled SIs found on the credit side in the period 2 duration, per transaction type and sub-category.
Volume partially settled/partially cancelled	A count of the number of partially settled/partially cancelled SIs found on the credit side in the period 2 duration, per transaction type and sub-category.
Volume totally cancelled	A count of the number of totally cancelled matched SIs found on the credit side in the period 2 duration, per transaction type and sub-category.
Value totally settled	Sum of the settled settlement amounts of all finalised SIs that were credited and totally settled within the period 2 duration, per transaction type and sub-category.
Value partially settled	Sum of all partial settlement amounts of all finalised SIs that were credited and reached final status within the period 2 duration, per transaction type and sub-category.
Value partially cancelled	Sum of all unsettled settlement amounts of all finalised SIs that were credited and reached final status within the period 2 duration, per transaction type and sub-category.

SCT04 – Comparison of settlement activity between two time periods – Output Screen	
Value totally cancelled	Sum of the settlement amounts of all finalised SIs on the credit side which were totally cancelled within the period 2 duration, per transaction type and sub-category.
Total (Period 2 - final)	
Total	Sum for each column, summed over all transaction type / sub-category combinations. [53]{Split book approach }

5.5.1.5 SCT05 – Follow-up by time slot of cash postings

Context of Usage

This report shows the cash postings at CB, PB or T2S dedicated cash account level, during a selected period of time. The cash postings activity of the specified T2S accounts are displayed as volume and value for each time slot of the business day with a total per balance type.

This report can be used by CB users.

Report Access

This report can be reached in the following way:

☐ Content >> Team Content >> T2S >> Predefined Reports >> SCT - T2S Cash account >> SCT05

---

[53] This content is not applicable as of R6.2, and will become applicable upon the deployment of the Data Warehouse for T2S. {Split book approach }

Illustration 265: ~~SCT05 output screen~~ **{Split book approach }**

Field Description

SCT05 – Follow-up by time slot of cash postings – Output Screen	
Balance type	Shows the balance type for which the cash postings are displayed from the possible values: ☐ Earmarking ☐ Blocking ☐ CoSD blocking ☐ Deliverable

SCT05 – Follow-up by time slot of cash postings – Output Screen	
	☐ **Reservation**
	For origin = "Liquidity Transfer", only balance type = Deliverable" is possible.
Origin	**Shows the posting origin for which the cash postings are displayed from the possible values:**
	☐ **Settlement instructions**
	☐ **Settlement restrictions**
	☐ **Liquidity transfers (only balance type "Deliverable")**
	☐ **Total for all types**
Debit	**The aggregation within origin of the cash postings on the debited side**
Credit	**The aggregation within origin of the cash postings on the credited side**
Total (per balance type / origin)	**The sums of 'Volume' and 'Value' across 'Debit' and 'Credit' per column, within origin.**
Time slots: ☐ **1st NTS cycle** ☐ **Last NTS cycle** ☐ **RT1 before intra-day DVP cut-off** ☐ **RT2 before EOD intraday credit reimbursement** ☐ **RT3 before EOD intraday FOP cut-off** ☐ **RT4 after intra-day FOP cut-off**	**The aggregation within debit/credit/total of all cash postings found for each designated time-slot.**
Volume	**The aggregated number of cash postings are displayed for each balance type, origin and debit/credit/total within each of the above time slots.**
Value	**The aggregated amount of cash postings are displayed for each balance type, origin and debit/credit/total within each of the above time slots.**

SCT05 – Follow-up by time slot of cash postings – Output Screen	
Total (per balance type): ☐ **Total earmarking** ☐ **Total blocking** ☐ **Total COSD blocking** ☐ **Total deliverable** ☐ **Total reservation**	**The sums of 'Volume' and 'Value' across 'Debit' and 'Credit' per column, over all origins within balance type.**
Total (final)	**The sums of 'Volume' and 'Value' across 'Debit' and 'Credit' per column, over all balance types.** [54] **{Split book approach }**

5.5.2 T2S Securities account (SST)

5.5.2.1 SST01 – Finalised matched instructions

Context of Usage

This report shows volumes, values and quantities for all finalised settlement instructions (SIs), at CSD or CSD participant or securities account level, during a selected period of time. The settlement instructions are filtered according the settlement types of the securities and the currency of the settlements that the user selects.

The report delivers the volume of matched settlement instructions finalised during the selected period whether settled, partially settled or cancelled, the total of original quantity whether settled, partially settled or cancelled, the settled quantity, the matched value and the settled value.

The results are displayed aggregated per transaction type code, transaction sub-category and securities movement type.

This report can be used by CSD users.

Report Access

This report can be reached in the following way:

SST01 – Finalised matched instructions – Prompt Screen	
Securities account number	You can use this drop-down field to select one or several securities account numbers. This field will show all related securities accounts which belong to default data scope of the user's party and which belong to the parties selected in field "Party BIC". If no Party BICs are selected, this field shows all securities account numbers belonging to the default data scope of the user's party. This field is optional.
ISIN	The report output contains only settlement instructions with the selected securities. This field is optional.
Securities movement type	This selection specifies if the movement on a securities account results from a delivery or a receive instruction. Possible values: ☐ DELI ☐ RECE This field is optional.

Screenshot

Illustration 267: SST01 output screen {Split book approach}

Field Description

SST01 – Finalised matched instructions – Output Screen	
DELI (only filled if movement type filter selected 'DELI' or all)	
Transaction type code	Shows the settlement transaction type code set during the selected period duration of time from the possible values: ☐ DVP (delivery versus payment) ☐ DWP (delivery with payment)

SST01 – Finalised matched instructions – Output Screen	
	☐ FOP (free of payment)
	☐ PFOD (payment free of delivery)
Transaction sub-category	Shows the subcategory of the settlement transaction from the possible values:
	☐ ALOP, BPDF, BPIN, BPSU, COBS, COBR, COCP, CORT, CORU, EPDE, EPIS, REAL, RERV, REPO, RPDE, RPIN, RPSU, STND
Volume of settlement instructions	Count of the number of finalised DELI settlement instructions within the given search criteria, per transaction type code and settlement transaction sub-category.
Instructed quantity	Sum of instructed settlement quantities of the DELI settlement instructions, per transaction type code and sub-category
Settled quantity	Sum of settled quantities of the DELI settlement instructions, per transaction type code and sub-category
Matched value	Sum of matched settlement amounts of the DELI settlement instructions, per transaction type code and sub-category
Settled value	Sum of settled settlement amounts of the DELI settlement instructions, per transaction type code and sub-category
Total	Sum for each column in 'DELI' body, summed over all transaction type / sub-category combinations.
RECE (only filled if movement type filter selected 'RECE' or all)	
Transaction type code	Shows the settlement transaction type code set during the selected period duration of time from the possible values:
	☐ DVP (Delivery versus payment)
	☐ DWP (Delivery with payment)
	☐ FOP (free of payment)
	☐ PFOD (payment free of delivery)
Transaction sub-category	Shows the subcategory of the settlement transaction from the possible values:

SST01 – Finalised matched instructions – Output Screen	
	☐ ALOP, BPDF, BPIN, BPSU, COBS, COBR, COCP, CORT, CORU, EPDE, EPIS, REAL, RERV, REPO, RPDE, RPIN, RPSU, STND
Volume of settlement instructions	Count of the number of finalised RECE settlement instructions within the given search criteria, per transaction type code and settlement transaction sub-category.
Instructed quantity	Sum of instructed settlement quantities of the RECE settlement instructions, per transaction type code and sub-category
Settled quantity	Sum of settled quantities of the RECE settlement instructions, per transaction type code and sub-category
Matched value	Sum of matched settlement amounts of the RECE settlement instructions, per transaction type code and sub-category
Settled value	Sum of settled settlement amounts of the RECE settlement instructions, per transaction type code and sub-category
Total	Sum for each column in 'RECE' body, summed over all transaction type / sub-category combinations.
Total (always filled and sums across all movement types selected in the filter)	
Transaction type code	Shows the settlement transaction type code set during the selected period duration of time from the possible values: ☐ DVP (delivery versus payment) ☐ DWP (delivery with payment) ☐ FOP (free of payment) ☐ PFOD (payment free of delivery)
Transaction sub-category	Shows the subcategory of the settlement transaction from the possible values: ☐ ALOP, BPDF, BPIN, BPSU, COBS, COBR, COCP, CORT, CORU, EPDE, EPIS, REAL, RERV, REPO, RPDE, RPIN, RPSU, STND

SST01 – Finalised matched instructions – Output Screen	
Volume of settlement instructions	The sum of 'Volume of settlement instructions' over DELI and RECE, per transaction type code and settlement transaction sub-category.
Instructed quantity	The sum of 'Instructed quantity' over DELI and RECE, per transaction type code and settlement transaction sub-category.
Settled quantity	The sum of 'Settled quantity' over DELI and RECE, per transaction type code and settlement transaction sub-category.
Matched value	The sum of 'Matched value' over DELI and RECE, per transaction type code and settlement transaction sub-category.
Settled value	The sum of 'Settled value' over DELI and RECE, per transaction type code and settlement transaction sub-category.
Total	Sum for each column in 'Total' body, summed over all transaction type / sub-category combinations. [55]{Split book approach}

5.5.2.2 SST02 – Detailed finalised matched instructions

Context of Usage

This report shows detailed information on volume and quantities for all finalised settlement instructions (SIs), at CSD or CSD participant or securities account level, during a selected period of time. The settlement instructions are filtered according the settlement types of the securities that the user selects.

The volume, the instructed quantities and the settled quantities of settlement instructions are displayed per settlement status.

The results are displayed aggregated per transaction type code, transaction sub-category and securities movement type and as totals.

This report can be used by CSD users.

5.5.3 T2S Instructions (INX)

5.5.3.1 INX01 – Individual settlement detailed report

Context of Usage

This report shows all finalised business settlement instructions (SI) corresponding to the selected T2S references.

The attributes shown in the output provide business details related to each of the selected settlement instructions and are displayed in a manner which allows easy comparison between these instructions.

This report can be used by CSD users.

Report Access

This report can be reached in the following way:

☐ Content >> Team Content >> T2S >> Predefined Reports >> INX - T2S Instructions >> INX01

Illustration 274: INX01 output screen

Field Description

INX01 – Individual settlement detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
Reference information	
T2S actor instruction reference	Shows the reference provided by the T2S actor

INX01 – Individual settlement detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
Account servicer reference	Shows the reference provided by the T2S actor when the instruction is sent by an account servicer.
Account owner reference	Shows the reference provided by the T2S actor when the instruction is sent by an account owner.
Third party reference	Shows the reference provided by the T2S actor when the instruction is sent by a third party.
Common reference	Reference provided by the instructing party when the settlement instruction is already –matched or in order to facilitate the matching within T2S.
Repo reference	Shows the repo reference.
Status information	
Instruction overall final status	Shows the final status. Possible values: ☐ "Totally settled" ☐ "Partially settled" ☐ "Totally cancelled"
Match status	Shows if the settlement instruction is matched with a counterpart settlement instruction. Possible values: ☐ NMAT (unmatched) ☐ MACH (matched)
Settlement status	Shows the settlement status Possible values: ☐ USET (unsettled) ☐ PSET (partially settled) ☐ SETT (fully settled)
Cancellation status	Shows the cancellation status Possible values: ☐ NCAN (not cancelled) ☐ CANC (cancelled)
CoSD hold status	Shows the CoSD hold status if the settlement instruction fulfils at least one CoSD rule.

INX01 – Individual settlement detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
	Possible values: ☐ Released ☐ On hold
CSD hold status	Shows the CSD hold status Possible values: ☐ Released ☐ On hold
Party hold status	Shows the party hold status Possible values: ☐ Released ☐ On hold
CSD validation hold status	Shows the CSD validation hold status Possible values: ☐ Released ☐ On hold
Timeline information	
Entry date time	Shows the date when the settlement instruction entered the T2S system. Display format is: YYYY-MM-DD hh:mm: ss,sssss
Intended settlement date	Shows the intended settlement date. Display format is: YYYY-MM-DD
Actual settlement date	Shows the actual settlement date, if applicable. Display format is: YYYY-MM-DD
Cancellation date	Shows the date when the settlement instruction was cancelled, if applicable. Display format is: YYYY-MM-DD
Categorisation information	
Securities movement type code	Shows the direction of movement required by the settlement instruction. Possible values: ☐ DELI (deliver) ☐ RECE (receive)

INX01 – Individual settlement detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
Payment type code	Shows if cash settlement is also involved. Possible values: ☐ APMT (against payment) ☐ FREE (free of payment)
Transaction type code	Shows the transaction type code. Possible values: ☐ DVP (delivery versus payment) ☐ DWP (delivery with payment) ☐ FOP (free of payment) ☐ PFOD (payment freed of delivery)
Settlement transaction category	Shows the transaction category. Possible values: ☐ COLA (collateral) ☐ CORE (collateral relocation) ☐ LQTR (liquidity transfer) ☐ REAL (realignment) ☐ RSMG (restriction management) ☐ RESU (restriction use) ☐ RCOL (reverse collateral) ☐ STND (standard) ☐ TCAT (technical cash transfer) ☐ COTF (conditional technical FOP)
Settlement transaction sub-category	Shows the transaction sub-category. Possible values: ☐ CATR (cash transfer) ☐ COBS (CoSD blocking position – setup) ☐ PLED (pledge) ☐ REAL (realignment) ☐ REPO (repo) ☐ STND (standard)

INX01 – Individual settlement detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
	☐ SPLE (sub-pledge)
ISO transaction code	Shows the ISO transaction code. Possible values: ☐ AUTO (auto-collateralisation) ☐ BSBK (buy sell back) ☐ CLAI (market claim) ☐ CNCB (cenrl bank collateral operation) ☐ COLI (collateral in) ☐ COLO (collateral out) ☐ CONV (depository receipt conversion) ☐ CORP (corporate action) ☐ FCTA (factor update) ☐ INSP (movement of stock) ☐ ISSU (depository receipt issue) ☐ MKDW (markdown) ☐ MKUP (markup) ☐ NETT (netting) ☐ NSYN (non-syndicated) ☐ OWNE (external account transfer) ☐ OWNI (internal account transfer) ☐ PAIR (pair-off) ☐ PLAC (placement) ☐ PORT (portfolio move) ☐ REAL (realignment) ☐ REDI (withdrawal) ☐ REDM (redemption) ☐ RELE (depository receipt release cancellation) ☐ REPU (repo) ☐ RODE (return delivery without matching) ☐ RPTO (reporting)

INX01 – Individual settlement detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
	☐ RVPO (reverse repo)
	☐ SBBK (sell buyback)
	☐ SBRE (borrowing reallocation)
	☐ SECB (securities borrowing)
	☐ SECL (securities lending)
	☐ SLRE (lending reallocation)
	☐ SUBS (subscription)
	☐ SYND (syndicate underwriters)
	☐ TBAC (TBA closing)
	☐ TRAD (trade)
	☐ TRPO (tri-party repo)
	☐ TRVO (tri-party reverse repo)
	☐ TURN (turnaround)
Collateral instruction type	Shows the collateral instruction type, if applicable. Possible values: ☐ CRDT (credit instruction) ☐ RMBT (reimbursement collateral instruction)
Collateral type	Shows the collateral type, if applicable. Possible values: ☐ CLNT (client collateralisation) ☐ NCBC (NCB collateralisation)
Securities information	
ISIN code	Shows the ISIN.
Account owner BIC	Shows the BIC of the securities account owner as per the SI.
Securities account number	Shows the impacted securities account number as per the SI,
T2S delivering party securities account number	Shows the securities account number of the T2S delivering party.

INX01 – Individual settlement detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
T2S receiving party securities account number	Shows the securities account number of the T2S receiving party.
Securities sub balance type	Shows the securities sub balance type.
Settlement type	Shows the settlement type. Possible values: ☐ NOMI (nominal) ☐ UNIT (units)
Original settlement quantity	Shows the original settlement quantity.
Settled settlement quantity	Shows the settled settlement quantity.
Totally settled settlement quantity	Shows the settled quantity if the SI is fully settled.
Partially settled settlement quantity	Shows the settled quantity if the SI is only partially settled.
Partially cancelled settlement quantity	Shows the remaining unsettled quantity if the SI is only partially settled
Totally cancelled settlement quantity	Shows the unsettled quantity if the SI is completely cancelled.
Securities party information	
Delivering depository BIC	Shows the BIC of the delivering CSD
T2S delivering party BIC	Shows the BIC of the T2S delivering party.
Delivering settlement party processing reference	Shows the processing reference provided in the delivering settlement party information.
Client of delivering CSD participant BIC	Shows the BIC of the delivering CSD participant's client.
Client of delivering CSD participant Id	Shows the local identifier of the delivering CSD participant's client.

INX01 – Individual settlement detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
Client of delivering CSD participant issuer	Shows the issuer of the local identifier of the delivering CSD participant's client.
Client of delivering CSD participant schema name	Shows the schema name of the local identifier of the delivering CSD participant's client.
Receiving depository BIC	Shows the BIC of the receiving CSD.
T2S receiving party BIC	Shows the BIC of the T2S receiving party.
Receiving settlement party processing reference	Shows the processing reference provided in the receiving settlement party information.
Client of receiving CSD participant BIC	Shows the BIC of the receiving CSD participant's client.
Client of receiving CSD participant Id	Shows the local identifier of the receiving CSD participant's client.
Client of receiving CSD participant issuer	Shows the issuer of the local identifier of the receiving CSD participant's client.
Client of receiving CSD participant schema name	Shows the schema name of the local identifier of the receiving CSD participant's client.
Cash information (Please note, that this part will be empty for Settlement Instructions with transaction code = FOP)	
Currency code	Shows the currency code.
Credit/debit code	Shows if the settlement instruction involves a debit or credit of cash. Possible values: ☐ CRDT (credit) ☐ DBIT (debit)
Debtor party BIC	Shows the BIC of the debtor party.
Creditor party BIC	Shows the BIC of the creditor party.

INX01 – Individual settlement detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
T2S dedicated cash account number	Shows the impacted T2S dedicated cash account number.
Debtor T2S dedicated cash account number	Shows T2S dedicated cash account number being debited.
Creditor T2S dedicated cash account number	Shows T2S dedicated cash account number being credited.
Instructed settlement amount	Shows the instructed settlement amount.
Transaction instructed amount	Shows the instructed amount as per the transaction.
Matched settlement amount	This is the matched settlement amount for the matched transactions.
Settled amount	Shows the settled amount.
Totally settled settlement amount	Shows the settled amount if the SI is fully settled.
Partially settled settlement amount	Shows the settled amount if the SI is only partially settled
Partially cancelled settlement amount	Shows the unsettled amount if the SI is only partially settled.
Totally cancelled settlement amount	Shows the unsettled amount if the SI is fully cancelled.
Process information	
Cancellation requested	Shows if a cancellation has been requested on the settlement instruction. Possible values: ☐ False ☐ True
Externally matched	Shows if the settlement instruction was matched outside T2S. Possible values: ☐ False

INX01 – Individual settlement detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
	☐ True
CoSD flag	Shows the CoSD flag if the settlement instruction belongs to a CoSD group. Possible values: ☐ False ☐ True
Partial settlement indicator	Shows the partial settlement indicator. Possible values: ☐ NPAR (partial not allowed) ☐ PART (partial settlement cash threshold allowed) ☐ PARC (partial settlement quantity threshold allowed) ☐ PARQ (partial allowed)
Priority	Shows the priority. Possible values: ☐ 0001 (reserved) ☐ 0002 (top) ☐ 0003 (high) ☐ 0004 (normal)
Allowed modification flag	Shows the allowed modification flag Possible values: ☐ False ☐ True
Corporate action event identification	Shows the corporate action event identification if the SI relates to a corporate action.
Opt-out settlement transaction condition indicator	Shows the opt-out settlement transaction condition indicator. Possible values: ☐ False ☐ True

INX01 – Individual settlement detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
External CSD flag	Shows whether the relevant depository is an external CSD. Possible values: False True
Original/counterpart instruction	Shows whether it is the original instruction or the identifier of the counterpart's instructions.
Link instruction counter	Shows the number of instructions linked to this settlement instruction.
Trade information	
Trade date	Shows the trade date of the settlement instruction. Display format is: YYYY-MM-DD
Original ordered amount	Shows the original ordered amount in the original currency when a conversion from/into another currency has occurred.
Original ordered currency	Shows the original ordered currency when a conversion from/into another currency has occurred.
Number of days accrued	Shows the number of days for which interest has accrued.
CUM/EX indicator	Shows whether the contract was traded cum or ex coupon Possible values: ☐ CUM (cum coupon) ☐ EX (ex coupon)
Deal price value type	Shows the type of value in which the price of the traded financial instrument is expressed. Possible values: ☐ DISC (discount) ☐ PREM (premium) ☐ PARV (par or face amount)
Deal price yielded	Shows whether the price is expressed as a yield. Possible values: ☐ False

INX01 – Individual settlement detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
☐ True	
Deal price value rate	Shows the deal price value expressed as a rate or percentage when not expressed as an amount.
Deal price value amount	Shows the deal price value expressed as an amount when not expressed as a rate.
Deal price value currency	Shows the deal price value currency when not expressed as a rate.
Foreign exchange unit currrency	Shows the currency in which the rate of exchange is expressed in a currency exchange.
Foreign exchange quoted currrency	Shows the currency into which the base currency is converted in a currency exchange.
Foreign exchange exchange rate	Shows the factor for the currency exchange.
Foreign exchange resulting amount	Shows the amount resulting from the currency exchange.
Foreign exchange resulting amount currency	Shows the currency of the amount resulting from the currency exchange.
Place of trade MIC identifier	Shows the market identifier code of the place of trade.
Place of trade description	Shows the description of the place of trade.
Market type code	Shows the market type code.
Market type proprietary Id	Shows the proprietary id of the market type when not using the ISO market type code.
Market type schema name	Shows the schema name associated with the proprietary id of the market type when not using the ISO market type code.
Market type issuer name	Shows the issuer name associated with the proprietary id of the market type when not using the ISO market type code.
Market client side code	Shows the market side code. Possible values: ☐ CLNT (client side transaction)

INX01 – Individual settlement detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
	☐ **MAKT (market side transaction)**
	LCMM information
LCMM approval status	Shows the LCMM approval status. Possible values: ☐ APPR (approved (default value)) ☐ AWAP (awaiting approval) ☐ REJT (rejected) ☐ RVKD (revoked)
LCMM sending party short name	Shows the sending party short name
LCMM instructing party short name	Shows the instructing party short name
LCMM execution/final settlement date	Shows the business date when the SI is totally settled. Displayed format is : YYYY-MM-DD.
LCMM user login name	Shows the login name of the LCMM user.
LCMM inbound LCMM message Id	Shows the foreign key of the LCMM inbound message id.
LCMM inbound LCMM message ref	Shows the reference of the LCMM inbound message.
LCMM validation starting timestamp	Shows the LCMM validation starting timestamp. Display format is: YYYY-MM-DD hh:mm:ss,sssss
LCMM validation ending timestamp	Shows the LCMM validation ending timestamp. Displayed format is: YYYY-MM-DD hh:mm:ss,sssss
LCMM entry business date	Shows the LCMM entry business date. Displayed format is: YYYY-MM-DD
POOL instruction counter	Shows the number of instructions that make up a pool as identified on the settlement instruction.

INX01 – Individual settlement detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
POOL settlement date	Shows the pool settlement date. Displayed format is: YYYY-MM-DD
POOL identification	Shows the reference identifying a pool as found on the settlement instruction. [58]{Split book approach}

5.5.3.2 INX02 – Multi-criteria search of a set of settlement instructions

Context of Usage

This report shows a list of details for selected finalised business settlement instructions (SI), which it performs in two levels. In the first level, the report produces a list of SIs corresponding to user-supplied filter criteria. In the second level, the user may select one SI from the list and the detailed report provides a full list of attributes of the selected SI.

The attributes shown in the detailed report output provide business details related to the selected SI.

This report can be used by CSD users.

Report Access

This report can be reached in the following way:

☐ Content >> Team Content >> T2S >> Predefined Reports >> INX - T2S Instructions >> INX02

Illustration 276: INX02 prompt screen

Field Description	INX02 – Multi-criteria search of a set of settlement instructions – Prompt Screen	
Securities party BIC	Filter to select which securities party BIC (CSDs, CSD participants or ECSDs) value/s should be included in the output.	
Cash party BIC	Filter to select which cash party BIC (NCB or payment bank) value/s should be included in the output.	

INX02 – Multi-criteria search of a set of settlement instructions – Prompt Screen	
Securities account number	Filter to select which securities account number value/s should be included in the output.
T2S DCA number	Multiple selection text field to enter T2S DCA number value/s that should be included in the output.
ISIN	Filter to select which ISIN value/s should be included in the output.
Settlement type	Filter to select which settlement type value/s should be included in the output. Possible values: ☐ NOMI ☐ UNIT
Settlement currency code	The report output contains only settlement instructions with the selected settlement currency codes.
Securities movement type code	Filter to select which securities movement type code value/s should be included in the output. Possible values: ☐ DELI ☐ RECE
Transaction type code	Filter to select which transaction type code value/s should be included in the output. Possible values: ☐ DVP ☐ DWP ☐ FOP ☐ PFOD
Settlement transaction category	Filter to select which settlement transaction category value/s should be included in the output. Possible values: ☐ COLA ☐ CORE ☐ LQTR ☐ REAL ☐ RSMG ☐ RESU ☐ RCOL

INX02 – Multi-criteria search of a set of settlement instructions – Prompt Screen	
	☐ STND
	☐ TCAT
	☐ COTF
Settlement transaction sub-category	Filter to select which settlement transaction sub-category value/s should be included in the output. Possible values: ☐ CATR ☐ COBS ☐ PLED ☐ REAL ☐ REPO ☐ STND ☐ SPLE
LCMM approval status	Filter to select which LCMM approval status value/s should be included in the output. Possible values: ☐ APPR ☐ AWAP ☐ REJT ☐ RVKD
Settlement status	Filter to select which settlement status value/s should be included in the output. Possible values: ☐ USET ☐ PSET ☐ SETT
Cancellation status	Filter to select which cancellation status value/s should be included in the output. Possible values: ☐ NCAN ☐ CANC

INX02 – Multi-criteria search of a set of settlement instructions – Prompt Screen	
Entry date from	Filter to select the inclusive date from which entry date value/s should be included in the output. Must be used in conjunction with: ☐ entry date to
Entry date to	Filter to select the inclusive date up to which entry date value/s should be included in the output. Must be used in conjunction with: ☐ entry date from
Intended settlement date from	Filter to select the inclusive date from which intended settlement date value/s should be included in the output. Must be used in conjunction with: ☐ intended settlement date to
Intended settlement date to	Filter to select the inclusive date up to which intended settlement date value/s should be included in the output. Must be used in conjunction with: ☐ intended settlement date from
The following criteria are only shown in case that "Quantity of securities" was chosen as additional search criteria	
Original quantity from	Filter to select the inclusive quantity from which original quantity value/s should be included in the output. Must be used in conjunction with: ☐ original quantity to
Original quantity to	Filter to select the inclusive quantity up to which original quantity value/s should be included in the output.

INX02 – Multi-criteria search of a set of settlement instructions – Prompt Screen	
	Must be used in conjunction with: ☐ original quantity from
Settled quantity from	Filter to select the inclusive quantity from which settled quantity value/s should be included in the output. Must be used in conjunction with: ☐ settled quantity to
Settled quantity to	Filter to select the inclusive quantity up to which settled quantity value/s should be included in the output. Must be used in conjunction with: ☐ settled quantity from
Cancelled quantity from	Filter to select the inclusive quantity from which cancelled quantity value/s should be included in the output. Must be used in conjunction with: ☐ cancelled quantity to
Cancelled quantity to	Filter to select the inclusive quantity up to which cancelled quantity value/s should be included in the output. Must be used in conjunction with: ☐ cancelled quantity from
The following criteria are only shown in case that "Amounts" was chosen as additional search criteria	
Original amount from	Filter to select the inclusive amount from which original amount value/s should be included in the output. Must be used in conjunction with: ☐ original amount to

INX02 – Multi-criteria search of a set of settlement instructions – Prompt Screen	
Original amount to	Filter to select the inclusive amount up to which original amount value/s should be included in the output. Must be used in conjunction with: ☐ original amount from
Settled amount from	Filter to select the inclusive amount from which settled amount value/s should be included in the output. Must be used in conjunction with: ☐ settled amount to
Settled amount to	Filter to select the inclusive amount up to which settled amount value/s should be included in the output. Must be used in conjunction with: ☐ settled amount from
Cancelled amount from	Filter to select the inclusive amount from which cancelled amount value/s should be included in the output. Must be used in conjunction with: ☐ cancelled amount to
Cancelled amount to	Filter to select the inclusive amount up to which cancelled amount value/s should be included in the output. Must be used in conjunction with: ☐ cancelled amount from

Illustration 277: ~~INX02 list screen~~ **{Split book approach}**

**Field
Description**

INX02 – Multi-criteria search of a set of settlement instructions – List Screen	
Number of settlement instructions	Shows the number of settlement instructions found matching the criteria
(For each instruction matching the selection criteria, one line will be displayed)	
T2S actor instruction reference	Shows the reference provided by the T2S actor The reference is built as a hyperlink which leads to the output details screen when clicked.
Securities movement type code	Shows the direction of movement required by the settlement instruction. Possible values: ☐ DELI (deliver) ☐ RECE (receive)
Payment type code	Shows if cash settlement is also involved. Possible values: ☐ APMT (against payment) ☐ FREE (free of payment)
Intended settlement date	Shows the intended settlement date.
Actual settlement date	Shows the actual settlement date.
Cancellation date	Shows the date when the settlement instruction was cancelled. Display format is: YYYY-MM-DD

INX02 – Multi-criteria search of a set of settlement instructions – List Screen	
Match status	**Shows if the settlement instruction is matched with a counterpart settlement instruction.** **Possible values:** ☐ **NMAT (unmatched)** ☐ **MACH (matched)**
Settlement status	**Shows the settlement status** **Possible values:** ☐ **USET (unsettled)** ☐ **PSET (partially settled)** ☐ **SETT (fully settled)**
Cancellation status	**Shows the cancellation status** **Possible values:** ☐ **NCAN (not cancelled)** ☐ **CANC (cancelled)**
ISIN code	**Shows the ISIN.**
Settlement type	**Shows the settlement type.** **Possible values:** ☐ **NOMI (nominal)** ☐ **UNIT (units)**
Original settlement quantity	**Shows the original settlement quantity.**
Settled settlement quantity	**Shows the settled settlement quantity.**
Currency code	**Shows the currency code.**
Credit/debit code	**Shows if the settlement instruction involves a debit or credit of cash.** **Possible values:** ☐ **CRDT (credit)** ☐ **DBIT (debit)**
Instructed settle-ment amount	**Shows the instructed settlement amount.**
Matched settlement amount	**Shows the matched amount as per the matching pro-cess..**

INX02 – Multi-criteria search of a set of settlement instructions – List Screen	
Settled settlement amount	Shows the settled settlement amount.
Transaction type code	Shows the transaction type code. Possible values: ☐ DVP (delivery versus payment) ☐ DWP (delivery with payment) ☐ FOP (free of payment) ☐ PFOD (payment freed of delivery)
Settlement transaction category	Shows the transaction category. Possible values: ☐ COLA (collateral) ☐ CORE (collateral relocation) ☐ LQTR (liquidity transfer) ☐ REAL (realignment) ☐ RSMG (restriction management) ☐ RESU (restriction use) ☐ RCOL (reverse collateral) ☐ STND (standard) ☐ TCAT (technical cash transfer) ☐ COTF (conditional technical FOP)
Settlement transaction sub-category	Shows the transaction sub-category. Possible values: ☐ CATR (cash transfer) ☐ COBS (CoSD blocking position – setup) ☐ PLED (pledge) ☐ REAL (realignment) ☐ REPO (repo) ☐ STND (standard) ☐ SPLE (sub-pledge)
ISO transaction code	Shows the ISO transaction code. Possible values: ☐ AUTO (auto-collateralisation)

INX02 – Multi-criteria search of a set of settlement instructions – List Screen
☐ BSBK (buy sell back)
☐ CLAI (market claim)
☐ CNCB (cenrl bank collateral operation)
☐ COLI (collateral in)
☐ COLO (collateral out)
☐ CONV (depository receipt conversion)
☐ CORP (corporate action)
☐ FCTA (factor update)
☐ INSP (movement of stock)
☐ ISSU (depository receipt issue)
☐ MKDW (markdown)
☐ MKUP (markup)
☐ NETT (netting)
☐ NSYN (non-syndicated)
☐ OWNE (external account transfer)
☐ OWNI (internal account transfer)
☐ PAIR (pair-off)
☐ PLAC (placement)
☐ PORT (portfolio move)
☐ REAL (realignment)
☐ REDI (withdrawal)
☐ REDM (redemption)
☐ RELE (depository receipt release cancellation)
☐ REPU (repo)
☐ RODE (return delivery without matching)
☐ RPTO (reporting)
☐ RVPO (reverse repo)
☐ SBBK (sell buyback)
☐ SBRE (borrowing reallocation)
☐ SECB (securities borrowing)
☐ SECL (securities lending)

Illustration 278: INX02 details screen {Split book approach}

Field Description

INX02 – Multi-criteria search of a set of settlement instructions – Details Screen	
Reference information	
T2S actor instruction reference	Shows the reference provided by the T2S actor
Status information	
Match status	Shows if the settlement instruction is matched with a counterpart settlement instruction. Possible values:
	☐ NMAT (unmatched)
	☐ MACH (matched)
Settlement status	Shows the settlement status Possible values:
	☐ USET (unsettled)
	☐ PSET (partially settled)
	☐ SETT (fully settled)
Cancellation status	Shows the cancellation status

INX02 – Multi-criteria search of a set of settlement instructions – Details Screen	
	Possible values: NCAN (not cancelled) CANC (cancelled)
CoSD hold status	Shows the CoSD hold status if the settlement instruction fulfils at least one CoSD rule. Possible values: ☐ Released ☐ On hold
CSD hold status	Shows the CSD hold status Possible values: ☐ Released ☐ On hold
CSD validation hold status	Shows the CSD validation hold status Possible values: ☐ Released ☐ On hold
Party hold status	Shows the party hold status Possible values: ☐ Released ☐ On hold
Timeline information	
Entry date	Shows the date when the settlement instruction entered the T2S system. Display format is: YYYY-MM-DD
Intended settlement date	Shows the intended settlement date. Display format is: YYYY-MM-DD
Actual settlement date	Shows the actual settlement date, if applicable. Display format is: YYYY-MM-DD
Cancellation date	Shows the date when the settlement instruction was cancelled, if applicable. Display format is: YYYY-MM-DD
Categorisation information	

INX02 – Multi-criteria search of a set of settlement instructions – Details Screen	
Securities movement type code	Shows the direction of movement required by the settlement instruction. Possible values: ☐ DELI (deliver) ☐ RECE (receive)
Payment type code	Shows if cash settlement is also involved. Possible values: ☐ APMT (against payment) ☐ FREE (free of payment)
Transaction type code	Shows the transaction type code. Possible values: ☐ DVP (delivery versus payment) ☐ DWP (delivery with payment) ☐ FOP (free of payment) ☐ PFOD (payment freed of delivery)
Settlement transaction category	Shows the transaction category. Possible values: ☐ COLA (collateral) ☐ CORE (collateral relocation) ☐ LQTR (liquidity transfer) ☐ REAL (realignment) ☐ RSMG (restriction management) ☐ RESU (restriction use) ☐ RCOL (reverse collateral) ☐ STND (standard) ☐ TCAT (technical cash transfer) ☐ COTF (conditional technical FOP)
Settlement transaction sub-category	Shows the transaction sub-category. Possible values: ☐ CATR (cash transfer) ☐ COBS (CoSD blocking position – setup) ☐ PLED (pledge)

INX02 – Multi-criteria search of a set of settlement instructions – Details Screen	
	☐ REAL (realignment)
	☐ REPO (repo)
	☐ STND (standard)
	☐ SPLE (sub-pledge)
ISO transaction code	Shows the ISO transaction code.
	Possible values:
	☐ AUTO (auto-collateralisation)
	☐ BSBK (buy sell back)
	☐ CLAI (market claim)
	☐ CNCB (cenrl bank collateral operation)
	☐ COLI (collateral in)
	☐ COLO (collateral out)
	☐ CONV (depository receipt conversion)
	☐ CORP (corporate action)
	☐ FCTA (factor update)
	☐ INSP (movement of stock)
	☐ ISSU (depository receipt issue)
	☐ MKDW (markdown)
	☐ MKUP (markup)
	☐ NETT (netting)
	☐ NSYN (non-syndicated)
	☐ OWNE (external account transfer)

Securities information	
ISIN code	Shows the ISIN.
Securities account number	Shows the impacted securities account number as per the SI,
Settlement type	Shows the settlement type. Possible values: ☐ NOMI (nominal) ☐ UNIT (units)
Original settlement quantity	Shows the original settlement quantity.
Settled settlement quantity	Shows the settled settlement quantity.
Cancelled settlement quantity	Shows the unsettled quantity if the SI is not completely settled.
Securities party information	
CSD BIC	Shows the BIC of the CSD
CSD participant BIC	Shows the BIC of the CSD participant.

INX02 – Multi-criteria search of a set of settlement instructions – Details Screen	
External CSD BIC	Shows the BIC of the external CSD (ECSD)
Cash information (Please note, that this part will be empty for Settlement Instructions with transaction code = FOP)	
Currency code	Shows the currency code.
Credit/debit code	Shows if the settlement instruction involves a debit or credit of cash. Possible values: ☐ CRDT (credit) ☐ DBIT (debit)
T2S dedicated cash account number	Shows the impacted T2S dedicated cash account number.
Instructed settlement amount	Shows the instructed settlement amount.
Transaction original amount	Shows the original amount as per the transaction.
Matched amount	Shows the matched amount as per the matching process..
Settled settlement amount	Shows the settled settlement amount.
Cancelled settlement amount	Shows the cancelled amount if the SI is not completely settled.
Process information	
Priority	Shows the priority. Possible values: ☐ 0001 (reserved) ☐ 0002 (top) ☐ 0003 (high) ☐ 0004 (normal)
Externally matched	Shows if the settlement instruction was matched outside T2S. Possible values: ☐ False

INX02 – Multi-criteria search of a set of settlement instructions – Details Screen	
☐ True	
Trade information	
Trade date	Shows the trade date of the settlement instruction. Display format is: YYYY-MM-DD
LCMM information	
LCMM approval status	Shows the LCMM approval status. Possible values: ☐ APPR (approved (default value)) ☐ AWAP (awaiting approval) ☐ REJT (rejected) ☐ RVKD (revoked) [59]{Split book approach}

5.5.3.3 INX03 – Individual restriction detailed report

Context of Usage

This report shows all finalised business settlement restrictions (SR) corresponding to the selected T2S references.

The attributes shown in the output provide business details related to each of the selected settlement restrictions and are displayed in a manner which allows easy comparison between these instructions.

This report can be used by CSD and CB users.

Report Access

This report can be reached in the following way:

☐ Content >> Team Content >> T2S >> Predefined Reports >> INX - T2S Instructions >> INX03

	~~T2S actor instruction reference~~	~~You can use this drop-down field to select one or several T2S actor instruction references. This field will show all related references, which belong to the default data scope of the user's party. This field is mandatory.~~

Screenshot

Illustration 280: ~~INX03 output screen~~ **{Split book approach}**

Field Description

INX03 – Individual restriction detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
Reference information	
T2S actor instruction reference	Shows the reference provided by the T2S actor
Account servicer reference	Shows the reference provided by the T2S actor when the restriction is sent by an account servicer.
Account owner reference	Shows the reference provided by the T2S actor when the restriction is sent by an account owner.
Third party reference	Shows the reference provided by the T2S actor when the restriction is sent by a third party.
Status information	
Restriction overall final status	Shows the final status. Possible values: ☐ "Totally settled" ☐ "Partially settled" ☐ "Totally cancelled"
Settlement status	Shows the settlement status Possible values: ☐ USET (unsettled) ☐ PSET (partially settled) ☐ SETT (fully settled)
Cancellation status	Shows the cancellation status Possible values: ☐ NCAN (not cancelled) ☐ CANC (cancelled)
Timeline information	
Creation date	Shows the date when the settlement restriction was created. Display format is: YYYY-MM-DD
Entry date time	Shows the date when the settlement restriction entered T2S. Display format is: YYYY-MM-DD hh:mm:ss,sssss
Intended settlement date	Shows the intended settlement date. Display format is: YYYY-MM-DD

INX03 – Individual restriction detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
Actual settlement date	Shows the actual settlement date. Display format is: YYYY-MM-DD
Cancellation date	Shows the date when the settlement restriction was cancelled. Display format is: YYYY-MM-DD
Categorisation information	
Movement type	Shows the movement type of the settlement restriction. Possible values: □ CASH (restriction of cash) □ SCTY (restriction of securities)
Collateral instruction type	Shows the collateral instruction type. Possible values: □ CRDT (credit instruction) □ RMBT (reimbursement collateral instruction)
Balance from	Shows the balance type from which securities or cas are moved
Balance to	Shows the balance type to which securities or cash are moved
Restriction processing type from	Shows the restriction processing type from which the cash/securities are debited/delivered. Possible values: □ Rejection □ CSD Validation Hold □ Reservation □ Blocking □ Balance Type/Earmarking □ Earmarking for Auto-collateralisation □ Deliverable □ Collateralised □ CoSD Blocking
Restriction processing type to	Shows the restriction processing type to which the cash/securities are credited/received.

INX03 – Individual restriction detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
	Possible values: ☐ Rejection ☐ CSD Validation Hold ☐ Reservation ☐ Blocking ☐ Balance Type/Earmarking ☐ Earmarking for Auto-collateralisation ☐ Deliverable ☐ Collateralised ☐ CoSD blocking
Securities information (This part will only be filled in case of settlement restrictions on securities)	
ISIN code	Shows the ISIN.
Account owner BIC	Shows the BIC of the securities account owner as per the SR.
Securities account number	Shows the impacted securities account number as per the SR.
Settlement type	Shows the settlement type. **Possible values:** ☐ NOMI (nominal) ☐ UNIT (units)
Settlement quantity	Shows the entered settlement quantity.
Settled settlement quantity	Shows the settled settlement quantity.
Totally settled settlement quantity	Shows the settled quantity if the SR is fully settled.
Partially settled settlement quantity	Shows the settled quantity if the SR is only partially settled.
Partially cancelled settlement quantity	Shows the remaining unsettled quantity if the SR is only partially settled
Totally cancelled settlement quantity	Shows the unsettled quantity if the SR is completely cancelled.

INX03 – Individual restriction detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
Cash information **(This part will only be filled in case of settlement restrictions on cash)**	
Currency code	Shows the currency code.
T2S dedicated cash account number	Shows the impacted T2S dedicated cash account number.
Settlement amount	Shows the settlement amount.
Settled settlement amount	Shows the settled settlement amount.
Totally settled settlement amount	Shows the settled amount if the SR is fully settled.
Partially settled settlement amount	Shows the settled amount if the SR is only partially settled.
Partially cancelled settlement amount	Shows the remaining unsettled amount if the SR is only partially settled
Totally cancelled settlement amount	Shows the unsettled amount if the SR is completely cancelled.
Process information	
CoSD blocking	Shows whether the restriction relates to a CoSD blocking. Possible values: □ False □ True
Priority	Shows the priority. Possible values: □ 0001 (reserved) □ 0002 (top) □ 0003 (high) □ 0004 (normal)
Corporate action event identification	Shows the corporate action event identification if the SR relates to a corporate action.
Collateral flag	Shows whether the restriction relates to collateral. Possible values:

INX03 – Individual restriction detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
	☐ False
	☐ True
End of day restriction release	Shows whether the restriction relates to an end of day restriction release.
	Possible values:
	☐ False
	☐ True
Linked instructions counter	Shows the number of instructions linked to this settlement restriction.
LCMM information	
LCMM approval status	Shows the LCMM approval status.
	Possible values:
	☐ APPR (approved (default value))
	☐ AWAP (awaiting approval)
	☐ REJT (rejected)
	☐ RVKD (revoked)
LCMM sending party short name	Shows the sending party short name
LCMM instructing party short name	Shows the instructing party short name
LCMM execution/final settlement date	Shows the business date when the SR is totally settled. Displayed format is : YYYY-MM-DD.
LCMM user login name	Shows the login name of the LCMM user.
LCMM inbound LCMM message Id	Shows the foreign key of the LCMM inbound message id.
LCMM inbound LCMM message ref	Shows the reference of the LCMM inbound message.
LCMM validation starting timestamp	Shows the LCMM validation starting timestamp. Display format is: YYYY-MM-DD hh:mm:ss,sssss
LCMM validation ending timestamp	Shows the LCMM validation ending timestamp.

INX03 – Individual restriction detailed report – Output Screen (These columns will be shown for every instruction selected in the prompt screen)	
	Displayed format is: YYYY-MM-DD hh:mm:ss,sssss
LCMM entry business date	Shows the LCMM entry business date. Displayed format is: YYYY-MM-DD
POOL party short name	Shows the short name of the party
POOL instruction counter	Shows the number of instructions that make up a pool as identified on the settlement restriction.
POOL settlement date	Shows the pool settlement date. Displayed format is: YYYY-MM-DD
POOL identification	Shows the reference identifying a pool as found on the settlement instruction. [60]{Split book approach}

5.5.3.4 INX04 – Multi-criteria search of a set of settlement restrictions

Context of Usage   This report shows a list of details for selected finalised business settlement restrictions (SR), which it performs on two levels. In the first level, the report produces a list of SRs corresponding to user-supplied filter criteria. In the second level, the user may select one SR from the list and the detailed report provides a full list of attributes for the selected SR.

The attributes shown in the detailed report output provide business details related to the selected SR.

This report can be used by CB and CSD users.

Report Access   This report can be reached in the following way:

☐   Content >> Team Content >> T2S >> Predefined Reports >> INX - T2S Instructions >> INX04

Illustration 286: INX05 output screen **{Split book approach}**

Field Description

INX05 – Liquidity transfers – Output Screen	
Inbound liquidity transfers	
Transaction category	Shows the transaction category of the liquidity transfer. Possible values are: ☐ LQTR ☐ TCAT
Transaction sub-category	Shows the transaction sub-category of the liquidity transfer. Possible values are: ☐ EDLT ☐ LQTR ☐ LTAC ☐ ALOP ☐ CARL ☐ MPOR

INX05 – Liquidity transfers – Output Screen	
Underlying transfer type	Shows the underlying transfer type of the liquidity transfer. Possible values are: ☐ Standing ☐ Predefined ☐ Immediate
Totally settled	A count of all finalised inbound LTs which have been totally settled, per transaction category / transaction sub-category / underlying transaction type.
Partially settled	A count of all finalised inbound LTs which have been only partially settled, per transaction category / transaction sub-category / underlying transaction type.
Totally cancelled	A count of all finalised inbound LTs which have been totally cancelled (ie. no settlement at all), per transaction category / transaction sub-category / underlying transaction type.
Rejected	A count of all finalised inbound LTs which were rejected before settlement, per transaction category / transaction sub-category / underlying transaction type.
Revoked	A count of all finalised inbound LTs which were revoked after settlement, per transaction category / transaction sub-category / underlying transaction type.
Value of transfers	Sum of the original instructed transfer amounts of all finalised inbound LTs, per transaction category / transaction sub-category / underlying transaction type.
Value actually transferred	Sum of the actual settled amounts of all finalised inbound LTs, per transaction category / transaction sub-category / underlying transaction type.
Outbound liquidity transfers	
Transaction category	Shows the transaction category of the liquidity transfer. Possible values are: ☐ LQTR

INX05 – Liquidity transfers – Output Screen	
	☐ TCAT
	☐ STND
Transaction sub-category	Shows the transaction sub-category of the liquidity transfer.
	Possible values are:

	☐ CARL
	☐ MPOR
	☐ STND
Underlying transfer type	Shows the underlying transfer type of the liquidity transfer.
	Possible values are:
	☐ Standing
	☐ Predefined
	☐ Immediate
Totally settled	A count of all finalised inbound LTs which have been totally settled, per transaction category / transaction sub-category / underlying transaction type.
Partially settled	A count of all finalised inbound LTs which have been only partially settled, per transaction category / transaction sub-category / underlying transaction type.
Totally cancelled	A count of all finalised inbound LTs which have been totally cancelled (ie. no settlement at all), per transaction category / transaction sub-category / underlying transaction type.
Rejected	A count of all finalised inbound LTs which were rejected before settlement, per transaction category / transaction sub-category / underlying transaction type.

INX05 – Liquidity transfers – Output Screen	
Revoked	A count of all finalised inbound LTs which were revoked after settlement, per transaction category / transaction sub-category / underlying transaction type.
Value of transfers	Sum of the original instructed transfer amounts of all finalised inbound LTs, per transaction category / transaction sub-category / underlying transaction type.
Value actually transferred	Sum of the actual settled amounts of all finalised inbound LTs, per transaction category / transaction sub-category / underlying transaction type.
Internal liquidity transfers	
Transaction category	Shows the transaction category of the liquidity transfer. Possible values are: ☐ LQTR ☐ TCAT
Transaction sub-category	Shows the transaction sub-category of the liquidity transfer. Possible values are: ☐ EDLT ☐ LQTR ☐ LTAC ☐ ALOP ☐ CARL ☐ MPOR
Underlying transfer type	Shows the underlying transfer type of the liquidity transfer. Possible values are: ☐ Standing ☐ Predefined ☐ Immediate
Totally settled	A count of all finalised inbound LTs which have been totally settled, per transaction category / transaction sub-category / underlying transaction type.

INX05 – Liquidity transfers – Output Screen	
Partially settled	A count of all finalised inbound LTs which have been only partially settled, per transaction category / transaction sub-category / underlying transaction type.
Totally cancelled	A count of all finalised inbound LTs which have been totally cancelled (ie. no settlement at all), per transaction category / transaction sub-category / underlying transaction type.
Rejected	A count of all finalised inbound LTs which were rejected before settlement, per transaction category / transaction sub-category / underlying transaction type.

5.5.3.6 INX06 – Multi-criteria search of a set of business cancellations

Context of Usage

This report shows a list of details for selected business cancellation instructions (CI), which it performs on two levels. In the first level, the report produces a list of CIs corresponding to user-supplied filter criteria. In the second level, the user may select one CI from the list and the detailed report provides a full list of attributes for the selected CI.

The attributes shown in the detailed report output provide business details related to the selected CI.

This report can be used by CB and CSD users.

Report Access

This report can be reached in the following way:

☐ Content >> Team Content >> T2S >> Predefined Reports >> INX - T2S Instructions >> INX06

Field Description

INX06 – Multi-criteria search of a set of business cancellations – Details Screen
Reference information

INX06 – Multi-criteria search of a set of business cancellations – Details Screen	
Underlying T2S instruction reference	Shows the T2S reference of the settlement instruction or the settlement restriction.
Status information	
Execution status	Shows the execution status of the cancellation instruction. Possible values: - EXCD (executed) - NEXD (not executed)
Match status	Shows the matching status of the cancellation instruction. Possible values: - MACH (matched) - NMAT (unmatched)
Cancellation status	Shows the cancellation status of the cancellation instruction. Possible values: - DEND (denied) - NDEN (not denied)
Timeline information	
Entry date time	Shows the date and time the cancellation instruction entered T2S. Displayed format is: YYYY-MM-DD hh:mm:ss
Execution date	Shows the execution date of the cancellation instruction. Displayed format is: YYYY-MM-DD
Categorisation information	
Cancellation instruction type	Shows the type of cancellation. Possible values: - PTYC (party cancellation) - CSDC (CSD cancellation) - COSD (CoSD cancellation)
Referenced instruction type	Shows the type of the referenced instruction: Possible values:

INX06 – Multi-criteria search of a set of business cancellations – Details Screen	
	☐ STIN (settlement instruction)
	☐ STRN (settlement restriction)
Securities information (Please note, that this part will not be filled for cancellations for settlement restrictions on cash)	
ISIN code	Shows the ISIN.
Securities account number	Shows the securities account number of the underlying instruction.
Securities settlement type	Shows the settlement type. Possible values: ☐ NOMI (nominal) ☐ UNIT (units)
Instructed settlement quantity	Shows the instructed quantity of the securities of the underlying instruction in units or face amount.
CSD BIC	Shows the BIC of the CSD
CSD participant BIC	Shows the BIC of the CSD participant
External CSD BIC	Shows the BIC of the external CSD
Cash information (Please note, that this part will not be filled for cancellations for restrictions on securities or for cancellations for settlement instructions "FOP")	
Currency code	Shows the currency code.
T2S dedicated cash account number	Shows the T2S dedicated cash account number of the underlying instruction.
Instructed settlement amount	Shows the instructed amount of the underlying instruction in the instruction's currency.
NCB BIC	Shows the BIC of the NCB
Payment bank BIC	Shows the BIC of the payment bank
Process information	
Reason code reference	Shows the reason code reference of the cancellation instruction.
Externally matched	Shows if the instruction is already matched or not when it enters T2S. Possible values:

INX06 – Multi-criteria search of a set of business cancellations – Details Screen	
☐ True (already matched outside T2S)	
☐ False (unmatched)	
LCMM information	
LCMM approval status	Shows the LCMM approval status.
	Possible values:
	☐ APPR (approved (default value))
	☐ AWAP (awaiting approval)
	☐ REJT (rejected)
	☐ RVKD (revoked) [63]{Split book approach}

5.5.3.7 INX07 – Multi-criteria search of a set of amendment instructions

Context of Usage	This report shows a list of details for selected amendment instructions (AI), which it performs on two levels. In the first level, the report produces a list of AIs corresponding to user-supplied filter criteria. In the second level, the user may select one AI from the list and the detailed report provides a full list of attributes for the selected AI
	The attributes shown in the detailed report output provide business details related to the selected AI.
	This report can be used by CB and CSD users.

	Must be used in conjunction with:
	☐ Settled amount from
	☐ Currency code

Screenshot

Illustration 299: INX09 list screen **{Split book approach}**

Field Description

INX09 – Multi-criteria search of a set of liquidity transfers – List Screen	
Number of liquidity transfers	Count of the number of settlement instructions resulting from the filter screen.
(For each liquidity transfer matching the selection criteria, one line will be displayed)	
Liquidity transfer instructor reference	Shows the instructor reference of the liquidity transfer.

INX09 – Multi-criteria search of a set of liquidity transfers – List Screen	
End-to-End ID	Shows the End-to-End ID provided by the originator of the liquidity transfer order.
Entry timestamp	Shows the date and the time the liquidity transfer entered or was generated in T2S. Displayed format: YYYY-MM-DD hh:mm:ss,sssss
Settlement timestamp	Shows the date and the time of the attempted settlement in T2S. Displayed format: YYYY-MM-DD hh:mm:ss,sssss
Approval status	Shows approval status of the liquidity transfer. Possible values: ☐ AWAP (Awaiting approval) ☐ APPR (Approved) ☐ REJE (Rejected) ☐ RVKD (Revoked)
Settlement status	Shows the settlement status of the liquidity transfer. Possible values: ☐ SNXE (Not executed) ☐ SUNS (=Unsettled) ☐ SPAS (=Partially settled) ☐ SSET (=Settled)
Currency code	Shows the settlement currency of the liquidity transfer.
Transfer amount	Shows the amount to be credited or debited by the liquidity transfer.
Settled amount	Shows the amount actually settled by the liquidity transfer.
Transfer type	Shows the direction of the transferred liquidity. Possible values: ☐ IBLT (inbound liquidity transfer) ☐ OTLT (outbound liquidity transfer) ☐ INLT (internal liquidity transfer order)
Underlying transfer type	Shows the type of the transferred liquidity. Possible values: ☐ SLTO (standing liquidity transfer order)

INX09 – Multi-criteria search of a set of liquidity transfers – List Screen	
	☐ PLTO (predefined liquidity transfer order)
	☐ ILTO (immediate liquidity transfer order)
Settlement transaction category	Shows the settlement transaction category of the liquidity transfer. Possible values:
	☐ LQTR (liquidity transfer)
	☐ TCAT (technical cash transfer)
Settlement transaction sub-category	Shows the settlement transaction sub-category of the liquidity transfer. Possible values:
	☐ LQTR (liquidity transfer)
	☐ LTAC (Liquidity transfer all cash)
	☐ EDLT (EoD liquidity transfer)
	☐ MPOR (monetary policy operation cash rebalancing)
	☐ CARL (corporate action cash rebalancing)
	☐ ALOP (auto-collateralisation liquidity optimization)
Debited party BIC	Shows the BIC of the payment bank which owns the debited account.
Debited account number	Shows the account number from which the liquidity is sent.
Credited party BIC	Shows the BIC of the payment bank which owns the credited account.
Credited account number	Shows the account identification or number to where the liquidity is sent.

5.5.4 T2S Restrictions (RES)

5.5.4.1 RES01 – Detailed cash restrictions

Context of Usage

This report shows volumes and values for all finalised cash restrictions at CB, PB or T2S DCA level, during a selected period of time. The restrictions are filtered according the currency that the user selects.

The report delivers the volume and value of cash restrictions finalised during the selected period whether settled or partially settled. The results are displayed aggregated per transaction sub-category, within origin, restriction type and function. Totals are presented at origin level, but also cross-totalled by function.

This report can be used by CB users.

Report Access

This report can be reached in the following way:

☐ Content >> Team Content >> T2S >> Predefined Reports >> RES - T2S Restrictions >> RES01

Illustration 302: RES01 output screen

Field Description

RES01 – Detailed cash restrictions – Output Screen	
Origin	Describes a group of transaction sub-categories. Groups are:
	☐ Business
	☐ Technical
	☐ Usage

RES01 – Detailed cash restrictions – Output Screen	
Restriction type	Describes a restriction type within an origin. Restriction types are: ☐ Business ☐ Blocking ☐ Reservation ☐ Technical ☐ COSD blocking ☐ End of day ☐ Usage ☐ Use
Function	Describes a function within a restriction type. Functions are: ☐ Setup / increase ☐ Decrease ☐ Use (for Use restriction type only)
Transaction sub-category	The transaction sub-category of the restrictions for which the aggregations are performed. Values used, as per their origin and restriction type: ☐ Business ☐ Blocking ☐ BPIN, BPSU, BPDE ☐ Reservation ☐ RPIN, RPSU, RPDE ☐ Technical ☐ COSD blocking ☐ COBR, COBS, COCP ☐ End of day ☐ CORU, EDRR, RERV ☐ Usage ☐ Use ☐ CORT, RESU
Volume of restrictions	Count of the number of cash restrictions found per sub-category.

RES01 – Detailed cash restrictions – Output Screen	
Instructed value	Sum over instructed values of the cash restrictions per sub-category
Settled value	Sum over settled values (totally or partially settled) per and sub-category
Revoked	A count of all finalised inbound LTs which were re-voked after settlement, per transaction category / transaction sub-category / underlying transaction type.
Value of transfers	Sum of the original instructed transfer amounts of all finalised inbound LTs, per transaction category / transaction sub-category / underlying transaction type.
Value actually transferred	Sum of the actual settled amounts of all finalised in-bound LTs, per transaction category / transaction sub-category / underlying transaction type.
Totals (per origin)	
Total business cash restrictions	Sums for 'Volume of restrictions', 'Instructed value' and 'Settled value' columns, within the origin 'Busi-ness'.
Total technical cash restrictions	Sums for 'Volume of restrictions', 'Instructed value' and 'Settled value' columns, within the origin 'Tech-nical'.
Total usage cash restrictions	Sums for 'Volume of restrictions', 'Instructed value' and 'Settled value' columns, within the origin 'Usage'.
Totals (per function)	
Total setup / in-crease	Sums for 'Volume of restrictions', 'Instructed value' and 'Settled value' columns, to include all lines with the function 'Setup / increase'.
Total decrease	Sums for 'Volume of restrictions', 'Instructed value' and 'Settled value' columns, to include all lines with the function 'Decrease'.
Total use	Sums for 'Volume of restrictions', 'Instructed value' and 'Settled value' columns, to include all lines with the function 'Use'.
Total (overall)	

RES01 – Detailed cash restrictions – Output Screen	
Total	Sums for 'Volume of restrictions', 'Instructed value' and 'Settled value' columns, over all 'Totals (per function)'. [67] {Split book approach}

5.5.4.2 RES02 – Detailed securities restrictions

Context of Usage

This report shows volumes and quantities for all finalised securities restrictions at CSD, CSDP, ECSD or securities account level, during a selected period of time. The restrictions are filtered according the settlement types of the securities that the user selects.

The report delivers the volume of securities restrictions finalised during the selected period whether settled or partially settled. The results are displayed aggregated per transaction sub-category, within origin, restriction type and function. Totals are presented at origin level, but also cross-totalled by function.

This report can be used by CSD users.

Total decrease	Sums for 'Volume of restrictions', 'Instructed quantity' and 'Settled quantity' columns, to include all lines with the function 'Decrease'.
Total use	Sums for 'Volume of restrictions', 'Instructed quantity' and 'Settled quantity' columns, to include all lines with the function 'Use'.
Total (overall)	
Total	Sums for 'Volume of restrictions', 'Instructed quantity' and 'Settled quantity' columns, over all 'Totals (per function)'. [68] {Split book approach }

5.5.5 T2S Credit line (CMB)

5.5.5.1 CMB01 – Journaling of limit utilisations of primary CMB

Context of Usage

This report shows primary CMB limit utilisation journal activity at CB, T2S CB-DCA or primary CMB level during a selected period of time. The accounts are filtered according the currency that the user selects. Primary CMBs are those set by a CB for a payment bank.

The journal activity is displayed as a table of volumes and utilisation values according to the credit/debit indicator.

This report can be used by CB users.

Report Access

This report can be reached in the following way:

Field Description

CMB01 – Journaling of limit utilisations of primary CMB – Output Screen
The following information is repeated for every CMB matching the selection criteria

CMB01 – Journaling of limit utilisations of primary CMB – Output Screen	
CMB technical identifier	The T2S internal identifier of a CMB
Autocollateralisation limit utilisation : Credit	
Volume of utilisations	Count of the number of credit side utilisations found per CMB technical identifier
Value used of utilisation	Sum over utilised values of credit side utilisations found per CMB technical identifier
Autocollateralisation limit utilisation : Debit	
Volume of utilisations	Count of the number of debit side utilisations found per CMB technical identifier
Value used of utilisation	Sum over utilised values of debit side utilisations found per CMB technical identifier
Total (per CMB technical identifier)	
Volume of utilisations	Sum of 'Volume of utilisations' over credit and debit per CMB technical identifier
Value used of utilisation	Sum of 'Value used of utilisations' over credit and debit per CMB technical identifier
Total (overall)	
Total	Sums of all volumes and values for each column, over all CMB technical identifiers. [69]{Split book approach}

5.5.6 T2S Collateral instructions (COL)

5.5.6.1 COL01 – Follow-up by time slot of settled collateralisation instructions

Context of Usage

This report shows the finalised settled collateralisation instructions at CSD, CSDP, external CSD or securities account level, during a selected period of time. The volume and value of the collateralisation instructions are shown for each time slot of the business day with a total per transaction category (Collateral, Reverse collateral, Relocation) and transaction sub-category (Repo, Pledge, Sub-pledge).

This report can be used by CSD users.

Report Access

This report can be reached in the following way:

5.5.7 Technical instructions (RAL)

5.5.7.1 RAL01 – Detailed realignment and other technical instructions

Context of Usage

This report shows detailed information on volume and quantities for all realignment and other technical settlement instructions (SIs) at CSD, CSDP/ ECSD or securities account level, during a selected period of time. The settlement instructions are filtered according the settlement types of the securities that the user selects.

The volumes and quantities (original and the settled) are aggregated per transaction type code, transaction category and transaction sub-category; and displayed by securities movement type and settlement status.

This report can be used by CSD users.

Report Access

This report can be reached in the following way:

Illustration 311: ~~RAL01 output screen, tab 2~~ {Split book approach}

Field Description

~~RAL01 – Detailed realignment and other technical instructions – OUTPUT SCREEN Tab 1 - volume~~	
~~Transaction type code~~	~~Shows the settlement transaction type code set during the selected period duration of time from the possible values:~~ ☐ ~~DVP (delivery versus payment)~~ ☐ ~~DWP (delivery with payment)~~ ☐ ~~FOP (free of payment)~~ ☐ ~~PFOD (payment free of delivery)~~
~~Settlement transaction category~~	~~Shows the category of the settlement transaction from the possible values:~~ ☐ ~~REAL (realignment)~~ ☐ ~~COTF (conditional technical FOP)~~
~~Settlement transaction sub-category~~	~~Shows the subcategory of the settlement transaction from the possible values:~~ ☐ ~~REAL (realignment)~~ ☐ ~~PLED (pledge)~~ ☐ ~~REPO (repurchase order)~~ ☐ ~~COBS (CoSD blocking position setup)~~ ☐ ~~STND (standard)~~
~~DELI~~	
~~Volume totally settled~~	~~A count of the number of totally settled SIs with security movement type DELI, per transaction type / transaction category and sub-category.~~

RAL01 – Detailed realignment and other technical instructions – OUTPUT SCREEN Tab 1 - volume	
Volume partially settled / partially cancelled	A count of the number of partially settled/partially cancelled SIs with security movement type DELI, per transaction type / transaction category and sub-category.
Volume totally cancelled	A count of the number of totally cancelled matched SIs with security movement type DELI, per transaction type / transaction category and sub-category.
Total	Sum of 'Volume totally settled', 'Volume partially settled / partially cancelled' and 'Volume totally cancelled' with security movement type DELI, per transaction type / transaction category and sub-category.
RECE	
Volume totally settled	A count of the number of totally settled SIs with security movement type RECE, per transaction type / transaction category and sub-category.
Volume partially settled / partially cancelled	A count of the number of partially settled/partially cancelled SIs with security movement type RECE, per transaction type / transaction category and sub-category.
Volume totally cancelled	A count of the number of totally cancelled matched SIs with security movement type RECE, per transaction type / transaction category and sub-category.
Total	Sum of 'Volume totally settled', 'Volume partially settled / partially cancelled' and 'Volume totally cancelled' with security movement type RECE, per transaction type / transaction category and sub-category.
Total across movement types (per transaction type / transaction category / transaction sub-category)	
Volume totally settled	Sum of 'Volume totally settled' over all DELI and RECE security movement types, per transaction type / transaction category and sub-category.
Volume partially settled / partially cancelled	Sum of 'Volume partially settled / partially cancelled' over all DELI and RECE security movement types, per transaction type / transaction category and sub-category.

RAL01 – Detailed realignment and other technical instructions – OUTPUT SCREEN Tab 1 - volume	
Volume totally cancelled	Sum of 'Volume totally cancelled' over all DELI and RECE security movement types, per transaction type / transaction category and sub-category.
Total	Sum of the 'Total' over all DELI and RECE security movement types, per transaction type / transaction category and sub-category.
Total	
Total	Sum of the volumes over all transaction type codes, for each column of the report as above.

RAL01 – Detailed realignment and other technical instructions – OUTPUT SCREEN Tab 2 - quantity	
Transaction type code	Shows the settlement transaction type code set during the selected period duration of time from the possible values: ☐ DVP (delivery versus payment) ☐ DWP (delivery with payment) ☐ FOP (free of payment) ☐ PFOD (payment free of delivery)
Settlement transaction category	Shows the category of the settlement transaction from the possible values: ☐ REAL (realignment) ☐ COTF (conditional technical FOP)
Settlement transaction sub-category	Shows the subcategory of the settlement transaction from the possible values: ☐ REAL (realignment) ☐ PLED (pledge) ☐ REPO (repurchase order) ☐ COBS (CoSD blocking position setup) ☐ STND (standard)
DELI	

RAL01 – Detailed realignment and other technical instructions – OUTPUT SCREEN Tab 2 - quantity	
Instructed quantity	Sum of instructed settlement quantity of all totally and partially settled SIs with securities movement type DELI, per transaction type / transaction category and sub-category.
Quantity totally settled	Sum of settled settlement quantity of all totally settled SIs with securities movement type DELI, per transaction type / transaction category and sub-category.
Quantity partially settled	Sum of settled settlement quantity of all partially settled SIs with securities movement type DELI, per transaction type / transaction category and sub-category.
Quantity partially cancelled	Sum of unsettled amount of all partially settled SIs with securities movement type DELI, per transaction type / transaction category and sub-category.
Quantity totally cancelled	Sum of unsettled amount of all totally cancelled SIs with securities movement type DELI, per transaction type / transaction category and sub-category.
RECE	
Instructed quantity	Sum of instructed settlement quantity of all totally and partially settled SIs with securities movement type RECE, per transaction type / transaction category and sub-category.
Quantity totally settled	Sum of settled settlement quantity of all totally settled SIs with securities movement type RECE, per transaction type / transaction category and sub-category.
Quantity partially settled	Sum of settled settlement quantity of all partially settled SIs with securities movement type RECE, per transaction type / transaction category and sub-category.
Quantity partially cancelled	Sum of unsettled amount of all partially settled SIs with securities movement type RECE, per transaction type / transaction category and sub-category.
Quantity totally cancelled	Sum of unsettled amount of all totally cancelled SIs with securities movement type RECE, per transaction type / transaction category and sub-category.
Total across movement types (per transaction type / transaction category / transaction sub-category)	

RAL01 – Detailed realignment and other technical instructions – OUTPUT SCREEN Tab 2 - quantity	
Original quantity	Sum of 'Original quantity' for 'DELI' and 'RECE' per transaction type / transaction category and sub-category.
Quantity settled (totally settled + partially settled)	Sum of 'Quantity totally settled' plus 'Quantity Partially settled'' for 'DELI' and 'RECE' per transaction type / transaction category and sub-category.
Total	
Total	Sum of the quantities over all transaction type codes, for each column of the report as above. [71]{Split book approach}

6 Annex

6.1 Indication of Usage

6.1.1 Reader's Guide

Reader`s Guide

This part of the annex is divided into screens and business scenarios, both in alphabetical order. For each screen description and business scenario, you can find an indication of the primary user (CB / CSD). This indication is not binding.

6.1.2 Usage Indication

Screens

Screen	Usage Indication (CSD/ CB)
Allegement Instruction - Details Screen [▶ 93]	CSD
Allegement Instructions - Search/List Screen [▶ 89]	CSD
Amendment Cash Instruction - Details Screen [▶ 404]	CB
Amendment Cash Instruction - New Screen [▶ 409]	CB
Amendment Securities Instruction - Details Screen [▶ 97]	CSD
Amendment Securities Instruction - New Screen [▶ 102]	CSD
Attribute Domain - Details Screen	CSD/CB
Attribute Domain - New/Edit Screen	CSD/CB
Attribute Domain Reference - Details Screen	CSD/CB
Attribute Domain Reference - New/Edit Screen	CSD/CB
Attribute Domain References - List Screen	CSD/CB
Attribute Domains - Search/List Screen	CSD/CB
Auto-Collateralisation Eligibility Link - New Screen	CB
Auto-Collateralisation Eligibility Links - Search/List Screen	CB
Available Report - Current Settlement Day Cash Information (Following Settlement Day Cash Forecast) Report - Details Screen [▶ 458]	CB
Available Report – Daily Penalty List – Details Screen [▶ 573]	CSD
Available Report - Details Screen [▶ 456]	CSD/CB

Screen	Usage Indication (CSD/ CB)
Available Report – List of Modified Penalties - Details Screen [▶ 587]	CSD
Available Report – Monthly Aggregated Amounts – Details Screen [▶ 602]	CSD
Available Report - Statement of Accounts - Details Screen [▶ 463]	CB
Available Report - Statement of Executed Amendment Instructions for Intra-Balance Movements - Details Screen [▶ 466]	CB
Available Report - Statement of Executed Amendment Instructions for Intra-Position Movements and Settlement Instructions - Details Screen [▶ 471]	CSD
Available Report - Statement of Executed Cancellation Instructions for Intra-Balance Movements - Details Screen [▶ 480]	CB
Available Report - Statement of Executed Cancellation Instructions for Intra-Position Movements and Settlement Instructions - Details Screen [▶ 484]	CSD
Available Report - Statement of Holdings - Details Screen [▶ 492]	CSD
Available Report - Statement of Pending Amendment Instructions for Intra-Balance Movements - Details Screen [▶ 497]	CB
Available Report - Statement of Pending Amendment Instructions for Intra-Position Movements and Settlement Instructions - Details Screen [▶ 502]	CSD
Available Report - Statement of Pending Cancellation Instructions for Intra-Balance Movements - Details Screen [▶ 511]	CB
Available Report - Statement of Pending Cancellation Instructions for Intra-Position Movements and Settlement Instructions - Details Screen [▶ 515]	CSD
Available Report - Statement of Pending Instructions - Details Screen [▶ 523]	CSD
Available Report - Statement of Pending Intra-Balance Movements - Details Screen [▶ 532]	CB

Screen	Usage Indication (CSD/CB)
Available Report - Statement of Pending Intra-Position Movements - Details Screen [▶ 537]	CSD
Available Report - Statement of Settled Intra-Balance Movements - Details Screen [▶ 542]	CB
Available Report - Statement of Settled Intra-Position Movements - Details Screen [▶ 547]	CSD
Available Report - Statement of Settlement Allegements - Details Screen [▶ 550]	CSD
Available Report - Statement of Transactions - Details Screen [▶ 563]	CSD
Available Reports - Statement of Common Reference Data details Screen	CSD/CB
Available Reports – Details Screen	CSD/CB
Available Reports - Search/List Screen [▶ 451]	CSD/CB
BIC Directory Items - Search/List Screen	CSD/CB
Broadcast - Details Screen [▶ 619]	CSD/CB
Broadcast - New Screen [▶ 621]	CSD/CB

Business Scenarios

Business Scenario	Usage Indication (CSD/CB)
Add a Link for a Settlement Instruction [▸ 703]	CSD
Add a Link for a Settlement Restriction on Cash [▸ 766]	CB

Business Scenario	Usage Indication (CSD/CB)
Add a Link for a Settlement Restriction on Securities [▶ 757]	CSD
Add a new Technical Address to a Party	CSD/CB
Amend the Partial Settlement Indicator for a Settlement Instruction [▶ 706]	CSD
Amend the Priority for a Settlement Instruction [▶ 707]	CSD
Amend the Priority for a Settlement Restriction on Cash [▶ 768]	CB
Amend the Priority for a Settlement Restriction on Securities [▶ 760]	CSD
Approve an Action in 4-Eyes Mode	CSD/CB
Assign a Role to a Party	CSD/CB
Assign a Role to a User	CSD/CB
Assign a Secured Object to a Secured Group	CSD/CB
Cancel a Settlement Instruction [▶ 727]	CSD
Cancel a Settlement Restriction on Cash [▶ 777]	CB
Cancel a Settlement Restriction on Securities [▶ 773]	CSD
Change the Limit of a Payment Bank	CB
Configure CSD Account Links	CSD
Configure Security CSD Links	CSD
Copy a Settlement Instruction [▶ 690]	CSD
Copy a Settlement Restriction on Cash [▶ 753]	CB
Copy a Settlement Restriction on Securities [▶ 747]	CSD
Copy an Immediate Liquidity Transfer [▶ 671]	CB/CSD
Create a new Broadcast	CSD/CB
Create a new Credit Memorandum Balance	CB
Create a new external RTGS Account	CB
Create a new Immediate Liquidity Transfer	CSD/CB
Create a new Liquidity Transfer Order Link Set	CB
Create a new Participant	CSD/CB
Create a new Report Configuration	CSD/CB

Business Scenario	Usage Indication (CSD/CB)
Create a new Role	CSD/CB
Create a new Secured Group	CSD/CB
Create a new Securities Account	CSD
Create a new Securities Valuation	CB
Create a new Security	CSD
Create a new Standing/Predefined Liquidity Transfer Order	CB
Create a new T2S Dedicated Cash Account	CB
Create a new Technical Address Service Link	CSD/CB
Create a new User	CSD/CB
Create a new User Certificate Distinguished Name	CSD/CB
Create a new User Certificate Distinguished Name Link	CSD/CB
Delete an existing Participant	CSD/CB
Delete an existing Securities Account	CSD
Delete an existing T2S Dedicated Cash Account	CB
Edit an existing Participant	CSD/CB
Edit an existing Securities Account	CSD
Edit an existing T2S Dedicated Cash Account	CB
Enter a Settlement Instruction [▶ 686]	CSD
Enter a Settlement Restriction on Cash [▶ 751]	CB
Enter a Settlement Restriction on Securities [▶ 745]	CSD
Grant a Privilege to a Party	CSD/CB
Grant a Privilege to a User	CSD/CB
Grant System and Object Privileges to a Role	CSD/CB
Initiate an Action in 4-Eyes Mode	CSD/CB
Link a Securities Account to a T2S Dedicated Cash Account for Cash Settlement Purpose	CSD
Put a Settlement Instruction on CSD Hold [▶ 715]	CSD
Put a Settlement Instruction on Party Hold [▶ 713]	CSD
Reimburse an Outstanding Intraday Credit [▶ 679]	CSD
Release a Settlement Instruction from CoSD Hold [▶ 722]	CSD

Business Scenario	Usage Indication (CSD/CB)
Release a Settlement Instruction from CSD Hold [▶ 720]	CSD
Release a Settlement Instruction from CSD Validation Hold [▶ 724]	CSD
Release a Settlement Instruction from Party Hold [▶ 717]	CSD
Remove a Link for a Settlement Instruction [▶ 709]	CSD
Remove a Link for a Settlement Restriction on Cash [▶ 770]	CB
Remove a Link for a Settlement Restriction on Securities [▶ 762]	CSD
Resend Communication [▶ 667]	CSD/CB
Respond to an Allegement Instruction [▶ 696]	CSD

View Standing/Predefined Liquidity Transfer Order Details	CSD/CB

6.2 Sitemap for T2S GUI

6.2.1 Reader's Guide

The sitemap annex is structured along the first and the second GUI menu level. It provides you with a formalised illustration of all screens (pictured as rectangles) and their related buttons (pictured as arrows). The illustration helps you to get an overview of all GUI screens and their interrelation, indicated by the arrows.

General layout of a sitemap

In general, each sitemap has the same layout. The header of the sitemap always indicates the GUI menu item pictured by the sitemap. The first 3 lines represent the 3 main menu levels.

Illustration 312: Sitemap menu levels – GUI path

In lines 4 to 6, the single GUI screens are pictured following their business logic, i.e. starting with *search/list* screens in line 4, *details* or *enter* screens in line 5 and finishing with *revisions/audit trail – list* screens in line 6.

Illustration 313: Sitemap menu levels - screens

Within these lines, regular rectangles represent a menu item, rounded rectangles represent a screen.

Illustration 314: Menu item and sitemap screen illustration

Interrelation between screens

Arrows between the rectangles represent an interrelation, while the button that has to be clicked on to jump from one screen to another is written across the corresponding arrow.
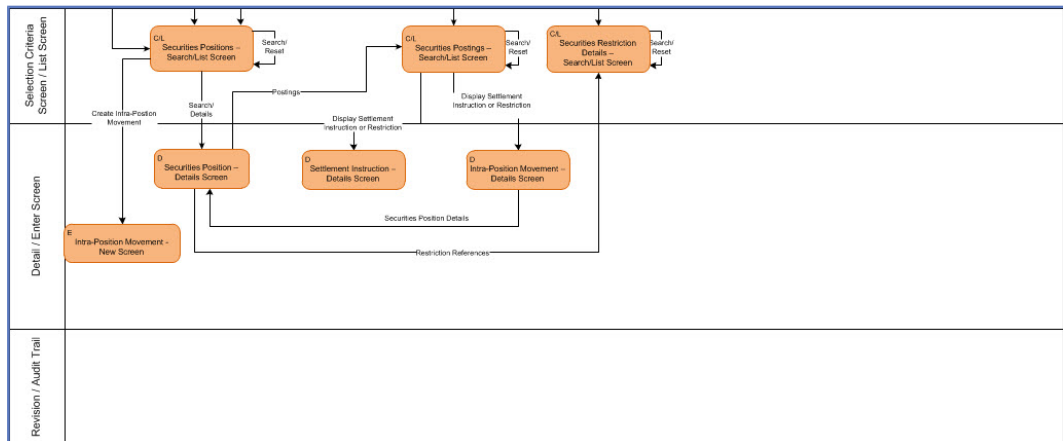

Illustration 315: Screen interrelation

Menu item and screen rectangles

The screen rectangles follow the same colour-coding as the GUI (see menu structure [▷ 31]). The classification found in the top left corner of each rectangle provides the following detailed information:

☐ Capital M for menu followed by max. 3 digits indicating the main menu item (1 for securities, 2 for cash, 3 for services, 4 for static data, 5 for monitoring) and following menu levels.

☐ Screen classification (C/L for *search/list* screen, C for *search* screen, L for *list* screen, D for *details* screen, E for *enter* screen).
Illustration 316: Sitemap screen with classification and with button

Screens with a different colour

On some sitemaps you will also find screens illustrated in a different colour than it is foreseen for the respective T2S menu. These particular screens represent an alternative navigation to the same respective screen. These specific screens appear on the same menu level than the regular screens.
Illustration 317: Screens with a different colour

Interrelation between sitemap parts

Because of the size of the sitemap it has been split into several parts. You can recognise the use of several sitemap parts by an arrow leading to the next sitemap part.
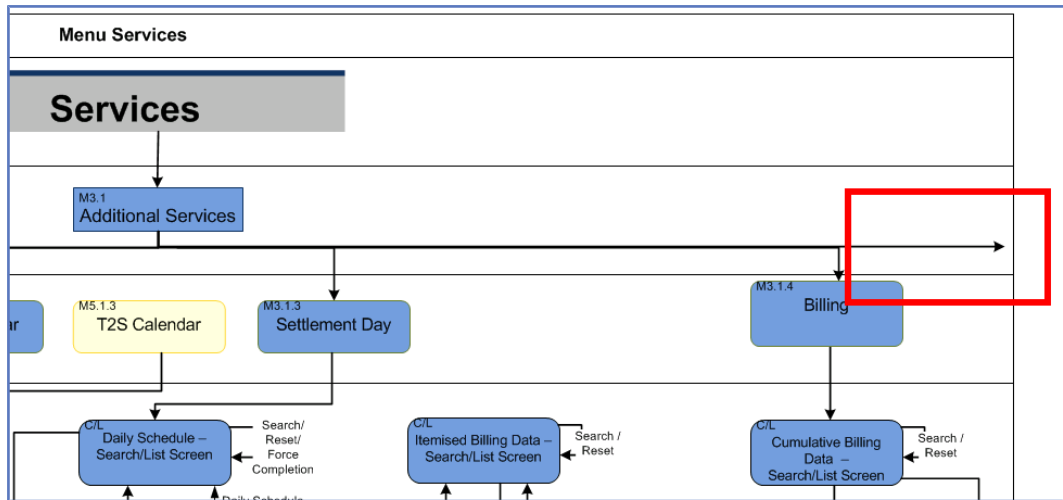

Illustration 318: Sitemap part interrelation

The static data sitemap for example is divided into 14 different sitemaps because of the wealth of information. Therefore it is recommended to read the sitemap from the top to the bottom and then from the left hand-side to the right hand-side.
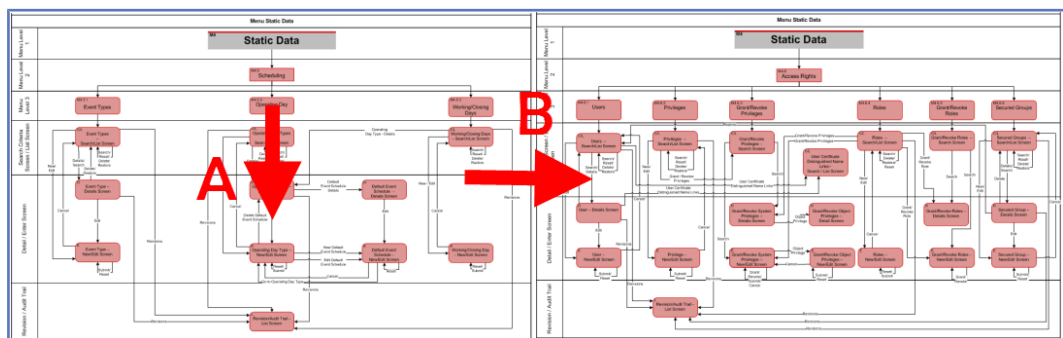

Illustration 319: How to read a sitemap

6.2.2 Securities

6.2.2.1 Securities Account
6.2.2.2 Settlement
6.2.2.3 Settlement II

```
6.3 List of Privileges

6.3.1 Reader's Guide

Reader`s Guide

The list of privileges is divided for GUI screens. For GUI screens a list of privileges classes is included. Respectively, the list of privileges is structured in accordance with the alphabetical screen order and provides detailed information on privilege code, privilege type, object type and screen criteria related to each privilege.

6.3.2 Privilege Classes for GUI Screens

Class of Privileges	Privilege Name	Privilege Short Name
Access Rights Management	Create Privilege	ARM_CreatePrivilege
Access Rights Management	Update Privilege	ARM_UpdatePrivilege
Access Rights Management	Delete Privilege	ARM_DeletePrivilege
Access Rights Management	Grant Privilege	ARM_GrantPrivilege
Access Rights Management	Revoke Privilege	ARM_RevokePrivilege
Access Rights Management	Create Role	ARM_CreateRole
Access Rights Management	Update Role	ARM_UpdateRole
Access Rights Management	Delete Role	ARM_DeleteRole
Access Rights Management	Grant/Revoke Role	ARM_GrantRole
Access Rights Management	Create User	ARM_CreateUser
Access Rights Management	Update User	ARM_UpdateUser
Access Rights	Delete User	ARM_DeleteUser

Class of Privileges	Privilege Name	Privilege Short Name
Management

6.3.3 Privileges for T2S GUI Screens

6.3.3.1 Allegement Instruction - Details Screen

⌂ [▶ 93]

No privileges.

6.3.3.2 Allegement Instructions - Search/List Screen

⌂ [▶ 89]

Privilege	Privilege Code	Privilege Type	Object Types	Screen Criteria
Allegement Query	DDQ_ Allegment Query	Object	Party	n/a

6.3.3.3 Amendment Cash Instruction - Details Screen

⌂ [▶ 404]

Privilege	Privilege Code	Privilege Type	Object Types	Screen Criteria
Amendment Instruction for Intra-Balance Movement Audit Trail List Query	DDQ_AmdInstrForIntraBalMovAudTrLisQ	Object	T2S Dedicated Cash Account (analog Amendment Instruction Query for Intra Balance Movements)	n/a

6.3.3.4 Amendment Cash Instruction - New Screen

⌂ [▶ 409]

Privilege	Privilege Code	Privilege Type	Object Types	Screen Criteria
Link to an Instruction / Pool Reference belonging to a specific Party	SIG_LIPRP	Object	Party	Actor Reference or T2S Reference in Linkages block
Amend Process Indicator Settlement Restriction on Cash on a Dedicated Cash Account	CAM_ASRCA	Object	T2S Dedicated Cash Account	T2S Dedicated Cash Account Number
Send new instruction using a specific Instructing Party	SIG_SIUIP	Object	Party	n/a

6.3.3.5 Amendment Securities Instruction - Details Screen

⌂ [▶ 97]

Privilege	Privilege Code	Privilege Type	Object Types	Screen Criteria
Amendment Instruction for Intra-Position Movement or Settlement Instruction Audit Trail List Query	DDQ_AmdInsIntrPosMovSetInsAudTrLisQ	Object	Securities Account	n/a

6.3.3.6 Amendment Securities Instruction - New Screen

⌂ [▶ 102]

Privilege	Privilege Code	Privilege Type	Object Types	Screen Criteria
Send new instruction using a specific Instructing Party	SIG_SIU IP	Object	Party	n/a
Link to an Instruction / Pool Reference belonging to a specific Party	SIG_LIP RP	Object	Party	Actor Reference or T2S Reference in Linkages block
Amend Process Indicator of a Settlement Instruction/Settlement Restriction on Securities either on a Securities Accountor or on Behalf of the CSD in T2S or on Behalf of an external CSD	SIG_AM NPI	Object	Party Securities Account	n/a
Amend Process Indicator of a non-modifiable Settlement Instruction on behalf of the Instructing Party of the underlying instruction	SIC_AN MBI	Object	Party	n/a

6.3.3.7 Available Report - Current Settlement Day Cash Information (Following Settlement Day Cash Forecast) Report - Details Screen

⌂ [▶ 458]

Privilege	Privilege Code	Privilege Type	Object Types	Screen Criteria
Report Details Query	RCO_ Report Details Query	System	n/a	n/a

6.3.3.8 Available Report - Details Screen

⌂ [▶ 456]

Privilege	Privilege Code	Privilege Type	Object Types	Screen Criteria
Report Details Query	RCO_ Report Details Query	System	n/a	n/a
Report List Query	RCO_ Report ListQuery	System	n/a	n/a

6.3.3.9 Available Report - Statement of Accounts - Details Screen

⌂ [▶ 463]

Privilege	Privilege Code	Privilege Type	Object Types	Screen Criteria
Report Details Query	RCO_ Report Details Query	System	n/a	n/a

6.3.3.10 Available Report - Statement of Executed Amendment Instructions for Intra-Balance Movements - Details Screen

⌂ [▶ 466]

Privilege	Privilege Code	Privilege Type	Object Types	Screen Criteria

6.3.4 Privilege Classes for LTSI Screens

Class of Priv-ileges	Privilege Name	Privilege Short Name
Other	Long Term Statistical Information – Advanced User	ARM_GrantPrivilege
Other	Long Term Statistical Information Access	LTSI Access

6.3.5 Privileges for LTSI Screens

LTSI user profiles are created based on the Static data Privileges and also on the Party identifiers, stored in Static Data Users, and their party types associated. LTSI can also provide access to internal users, not sent by Static Data.

Possible LTSI privileges can be:

☐ NCB end user: Static Data Party type= NCB, Static Data privilege= GFS user profile: Basic Statistical User

☐ CSD end user: Static Data Party type= CSD, Static Data privilege= GFS user profile: Basic Statistical User

☐ CSD participant end user: Static Data Party type= CSD, Static Data privilege= GFS user profile: Basic Statistical User

☐ External CSD end user: Static Data Party type= External CSD, Static Data privilege= GFS user profile: Basic Statistical User

☐ NCB analyst: Static Data Party type=NCB, Static Data privilege= and eventually also, GFS user profile: Basic Statistical User and Advanced Statistical User

☐ CSD analyst: Static Data Party type=CSD, Static Data privilege= and eventually also , GFS user profile: Basic Statistical User and Advanced Statistical User

☐ LTSI super user: Not sent by Static Data, Internal user, GFS user profile: Basic Statistical User and Advanced Statistical User

☐ Administrator: Not sent by Static Data, Internal user, GFS user profile: Statistical Workspace administrator

The party type has an impact on the final LTSI privilege: for instance, a CSD Participant or external CSD can only be an end user, but not an analyst, and can have access only to business reports, but not to technical reports. Only NCB analysts and NCB end users can have access to reports on Liquidity Transfers, but not CSDs or CSD Participants or External CSD.

Each predefined report and query can be accessible only to a specific restricted list of LTSI privileges.

6.3.6 Privileges for DWH Screens

Privilege Name	Privilege Short Name	Authorised to
Normal user	NORU	☐ Access to predefined DWH reports ☐ Use available parameters and filter criteria on predefined DWH reports ☐ Execute predefined DWH reports ☐ Execute user-defined reports (only CB users) ☐ Download DWH report results
Advanced user	ADVU	☐ Same as normal user ☐ Create user defined DWH ☐ Reports ☐ Configure the scheduling of DWH reports

Privilege Name	Privilege Short Name	Authorised to
		☐ Store adaptable/user defined DWH reports in an individual dedicated folder
		☐ Share (user defined) DWH reports with all other users within their CB or with other CBs in a dedicated folder

6.4 List of References for Error Messages

6.4.1 Reader's Guide

Reader`s Guide

This section includes a list of references for error messages for all screens, structured along GUI screens, TMS screens. For GUI screens, the list of references for error messages consists of a general section, which lists overall error codes that apply to all GUI screens, and a section listing all error codes relevant for using the 4-eyes mode in GUI screens. For all sections, these are followed by specific sections for individual screens, which are organised in alphabetical screen order and specify the respective error codes applicable for each screen. Each error code table entry includes the error text and the description.

6.4.2 References for Error Messages for T2S GUI Screens

6.4.2.1 All

Reference for error message	Field or Button	Error Text	Description
DXAA007		Only one instance may become effective in the future	Each historical entity may have no more than one future instance.

Reference for error message	Field or Button	Error Text	Description
ICAC001		Online access to the T2S system is not available	Users accessing T2S in U2A mode must be alerted when U2A access to T2S is unavailable.
ICUR002		Required Certificate Authentication failed.	Authentication in U2A mode is possible by using simple authentication, advanced certificate authentication or smartcard authentication. Strong authentication mechanisms are ensured via two-factor authentication.
ICUR003		Your password has expired. Please change.	The password has to be changed as defined in the security requirements.
ICUR004		Request is only allowed during valid session. Please log in.	Requests except login request are only possible, if the user is logged in with a valid session.
ICUR005		The T2S system user is blocked due to lockout	The T2S system user should be able to login. Therefore the lockout status has to be 'False'.
ICUR007		The Party Technical Address is not known for the used Network Service.	The technical sending user (Party Technical Address) has to be known for the used network service.
ICUR008			Authentication remains active for the entire session.

Reference for error message	Field or Button	Error Text	Description
ICUR009		Password is invalid for T2S.	The correct password has to be entered while starting a new session.
ICUR010		The Technical Sending User is not known for T2S.	The Technical Sending User (Party Technical Address) which was used for sending the in-bound U2A communic-ation has to be known in T2S.
ICUR011		The Business Sending User is not known in T2S.	The Business Sending User has to be known in T2S.
ICUR012		The T2S System User sending the inbound U2A com-munication is not known in T2S.	The T2S System User sending the inbound U2A communication has to be known in T2S.
ICUR013		The Party Tech-nical Address is not known for the Business Sending Party.	Technical Sending User is allowed to send for the Business Sending Party.
ICUR014		Business Sending User is not allowed to send for the T2S Internal System User.	Business sending user is allowed to send for the T2S internal system user.
IICF001		Your request is re-jected because it is not allowed during this business day phase. Please try again later.	The availability of some U2A requests is restric-ted on the basis of phases of the business day. The request can only be forwarded, if the functionality is currently available (not restric-ted).

Reference for error message	Field or Button	Error Text	Description
IICP001		The system user is not authorised to initiate such request due to missing privilege.	A system user must have the appropriate privilege to be authorised for an intended request. The check only includes generic authorisation for the requested action at system level. The check for the data scope including object level is processed in the backend modules.
IIUR001		The request could not be processed due to a failed validation of syntax and structure <//Dynamic error message(s) is/are mentioned including the respective screen attribute//>	A request is compliant to the syntax and structure of requests required by T2S in the U2A mode.

6.4.2.2 All Screens which allow the initiation of a query

Reference for error message	Field or Button	Error Text	Description
QMPQ001		The System User has not the privilege to initiate such a request for the specified object.	A system user must have the appropriate privilege for the specified object to be permitted to query the requested information.

Annex
List of References for Error Messages
All Screens which allow the initiation of a second user action (4-eyes mode)

Reference for error message	Field or Button	Error Text	Description
QMPQ002		The System User has not the privilege to initiate such a request.	A system user must have the appropriate privilege for at least one object to be permitted to query the requested information.

6.4.2.3 All Screens which allow the initiation of a second user action (4-eyes mode)

Reference for error message	Field or Button	Error Text	Description
DXAA002		Data awaiting for approval cannot be modified	It is not allowed to perform a maintenance request, neither in 2-eyes nor in 4-eyes first step mode, that refers to an instance already awaiting for approval.
DXAA011		Invalid approval requestor (must be different from the first requestor)	In case of approval request (4-eyes second step), the requestor must be different from the requestor of the first step. It can be equal only in case of revocation (confirmation = 'NO')
DXAA035		Request to be approved not found	In case of approval request (4-eyes second step), the request must refer to an existing instruction and the related entity(ies) must be in status 'Awaiting approval'.

Reference for error message	Field or Button	Error Text	Description
IICP003		The T2S System User is not authorised to confirm the own initial request.	The T2S System User has to be different for the initial request (4-eyes first step) and the confirmation (4-eyes second step) initiated via approval request. In case of revocation the T2S System User can be the same.
IICP004		The initial request is already completed with status approved, queued, rejected or revoked.	A successful approval request (second user action; confirmation or revocation) is only possible, if the status of the 4-eyes principle entry is different from 'Approved', 'Queued', 'Rejected' or 'Revoked'.
IICP005		An approval request (second user action; confirmation or revocation) is already in processing.	A successful approval request (second user action; confirmation or revocation) is only possible, if there is no approval request in processing.
IICP006		The T2S System Users for the initial request and the confirmation have to be linked to the same party.	The T2S System Users for the initial request (4-eyes first step) and the confirmation (4-eyes second step) initiated via approval request have to be linked to the same party.

Reference for error message	Field or Button	Error Text	Description
LLCI002	☐ T2S Dedicated Cash Account Number field (Debit) ☐ Submit button	Source (Debit) Account of internal or outbound LT is neither an existing nor an active T2S DCA.	The Source Account (debit account) of an immediate internal or outbound Liquidity Transfer should be an existing and active T2S Dedicated Cash Account (neither blocked nor logically deleted and for an Outbound Liquidity Transfer no RTGS Dedicated Transit Account) otherwise the incoming internal or outbound Liquidity Transfer will be rejected.
LLCI003	☐ External RTGS Account Number field ☐ T2S Dedicated Cash Account Number field (Credit) ☐ Submit button	Target (Credit) Account of internal or outbound LT is neither an existing nor an active T2S DCA or RTGS Account.	The Target Account (credit account) of an internal or outbound Liquidity Transfer should be an existing and active T2S Dedicated Cash Account (neither blocked nor logically deleted) or an active RTGS account known within T2S, otherwise the incoming Liquidity Transfer will be rejected.

Reference for error message	Field or Button	Error Text	Description
LLCI005	☐ Amount field ☐ Submit button	No eligible T2S settlement currency.	The currency of an inbound, outbound or internal Liquidity Transfer should be eligible as T2S settlement currency; otherwise the Liquidity Transfer will be rejected.
LLCI006	☐ T2S Dedicated Cash Account Number field (Debit) ☐ Amount field ☐ External RTGS Account Number field ☐ T2S Dedicated Cash Account Number field (Credit) ☐ Submit button	Currency of incoming flow differs from Target Account currency.	The currency of the incoming flow should be the same as the currency of the target account; otherwise the incoming internal, outbound or inbound liquidity transfer will be rejected.
LLCI007	☐ T2S Dedicated Cash Account Number field (Debit) ☐ T2S Dedicated Cash Account Number field (Credit) ☐ User Reference field ☐ Amount field ☐ External RTGS Account Number field ☐ Submit button	Incoming Internal, Outbound or Inbound LT is a duplicate submission.	If the incoming Internal, outbound or Inbound Liquidity Transfer from a T2S Actor has the same Order Reference, refers to the same Debit and Credit Account and has the same instructed Amount as another Internal, Outbound or Inbound Liquidity Transfer from the same T2S Actor, then it is a duplicate submission. The

Reference for error message	Field or Button	Error Text	Description
			second and any further submission will be rejected.
LLCI008	☐ External RTGS Account Number field ☐ T2S Dedicated Cash Account Number field (Credit) ☐ T2S Dedicated Cash Account Number field (Debit) ☐ Submit button	Source and Target Account of Internal LT not linked to same RTGS Account or do not belong to same payment bank.	Internal Liquidity Transfers are possible between T2S Dedicated Cash Accounts ☐ linked to the same RTGS account or ☐ belonging to the same payment bank or ☐ if both accounts are T2S Central Bank accounts or ☐ if one of the accounts is a T2S Central Bank account If this is not the case the Internal Liquidity Transfer will be rejected. This rule is not applicable if one of the involved accounts is a Dedicated Transit Account.
LLCI009	☐ Submit button	LT sent between Liquidity Transfer cut off and Business Date Change.	Any Liquidity Transfer arriving in T2S after the Business date change and prior to the Liquidity Transfer cut-off is processed; otherwise the incoming Liquidity Transfer will be rejec-

Reference for error message	Field or Button	Error Text	Description
			ted. This business rule is not applicable for internal Liquidity Transfers between a RTGS Dedicated Transit Account and a Dedicated Cash Account. In case of delays in the Start of Day incoming Inbound Liquidity Transfers will be parked until the new business date is reached.
LLCI010	☐ T2S Dedicated Cash Account Number field (Credit) ☐ Submit button	Instructing Party of an Internal LT crediting an RTGS DTA is not identical with the Account holder in case of rebooking.	If the Target Account of an Internal Liquidity Transfer is an RTGS Dedicated Transit Account in case of rebooking, the Instructing Party should be identical with the Account holder.
LLCI012	☐ Amount field ☐ Submit button	More digits after the decimal point than maximally foreseen for the currency.	The amount of the incoming flow should only contain the maximum number of digits after the decimal point as foreseen for the respective currency; otherwise the incoming Liquidity Transfer will be rejected.
LLCI014	☐ Amount field ☐ Submit button	The amount is lower or equal to zero.	The amount must be greater than zero.

Reference for error message	Field or Button	Error Text	Description
LLCI015	☐ Amount field ☐ External RTGS Account Number field ☐ T2S Dedicated Cash Account Number field (Credit) ☐ T2S Dedicated Cash Account Number field (Debit) ☐ Submit button	Currency of Source Account differs from Target Account currency.	The currency of the Source Account should be the same as the currency of the Target Account; otherwise the incoming Internal or Outbound Liquidity Transfer will be rejected.
LLCI016	☐ User Reference field ☐ Submit button	Missing code word for processing during weekend	The incoming Liquidity Transfer entered the system during the weekend and does not contain the required code word.
LLCI017	☐ User Reference field ☐ Submit button	Reference can only contain up to 16 characters.	When performing a Liquidity Transfer for a non-Euro currency references may only contain up to 16 characters.
LLCP001	☐ T2S Dedicated Cash Account Number field (Debit)	Missing privilege to debit the T2S dedicated cash account.	The T2S system User must be allowed to act for the account to be debited with a Liquidity Transfer.

			rent Business Date if the Intended Settlement Date is in the past.
MVRR992	☐ Restriction Type – Balance To field ☐ Submit button	The Balance To specified in the Settlement Restriction on cash does not exist in T2S.	The Balance To specified in a Settlement Restriction on cash must exist as a Restriction Type in T2S.
MVRR993	☐ Restriction Type – Balance From field ☐ Restriction Type – Balance To field ☐ Submit button	The Balance From and Balance To in the Settlement Restriction on cash have the same processing type.	The Restriction Type specified in the Balance From and the Restriction Type specified in the Balance To in a Settlement Restriction on cash cannot belong to the same processing type (i.e. if the Balance From is deliverable the Balance to as deliverable type is not allowed).
MVRR994	☐ Restriction Type – Balance From field ☐ Restriction Type – Balance To field ☐ Restriction Reference field ☐ Submit button	The Settlement Restriction on cash tries to increase or decrease a blocked, CoSD blocked or reserved cash balance without Restriction reference.	A Settlement Restriction on cash that aims to increase or decrease a blocked, CoSD blocked or reserved cash balance must include a Restriction Reference related to cash. (I.e. If the Restriction Type specified in the Balance From in a Settlement Restriction on cash is 'Blocking', 'CoSD Blocking' or 'Reservation' a Restriction Reference must be specified).

Reference for error message	Field or Button	Error Text	Description
MVSD404	☐ Intended Settlement Date field ☐ Submit button ☐ Amount field ☐ Currency field	The Intended Settlement Date of the Settlement Restriction on cash is not a T2S Settlement Date for the Settlement Currency.	The Intended Settlement Date of a Settlement Restriction on cash must be a T2S Settlement Date for the Settlement Currency of the Settlement Restriction.
MVSP212	☐ Priority field ☐ Submit button	'Reserved priority' not allowed for the Instructing Party Type (only NCBs can use it)	'Reserved priority' is allowed in a Settlement Restriction on Cash only if the Instructing Party is a NCB
MVSR705	☐ Actor Reference field ☐ Submit button	Settlement Restriction rejected due to a Restriction Type	A new Settlement Restriction that fulfills a specific restriction configured by its System Entity with positive Restriction Processing Type 'Rejection' is rejected.
MVSR706	☐ Submit button		A Settlement Restriction that fulfils a specific restriction configured by its System Entity with negative Restriction Processing Type 'Rejection' is not rejected nor cancelled.
MVSR708	☐ Actor Reference field ☐ Submit button	Settlement Restriction cancelled due to a Restriction Type.	An already existing Settlement Restriction that fulfills a specific restriction configured by its System Entity with positive Restriction Processing Type 'Rejection' is cancelled.
