

# Long time series

On economic development in Germany

September 2023

## Notes

The "long time series" have limited comparability over time and geographical areas, as they are compiled by linking short time series that use different methodologies and territorial definitions. The breaks are normally indicated for the German data; for foreign data they are indicated only if the breaks are known.

Current data may be provisional. Data revisions are not indicated.

Totals may not add up due to rounding.

Reproduction permitted only if the source is stated.

## Legend

...	Figure available at a later date
.	Data unknown, not to be published or not meaningful
-	Not available

## Glossary

BIS	Bank for International Settlements
CDAX	Composite DAX
cif	cost, insurance and freight
ECB	European Central Bank
EER	Effective Exchange Rate
EMS	European Monetary System
EONIA	Euro Overnight Index Average
ESA	European System of Accounts
EU	European Union
Euribor®	Euro Interbank Offered Rate <sup>1)</sup>
Euro area	Economic and Monetary Union (EMU)
FIBOR	Frankfurt Interbank Offered Rate
fob	free on board
GDP	Gross Domestic Product
ILO	International Labour Organization
IMF	International Monetary Fund
KWG	German Banking Act (Kreditwesengesetz)
MFI	Monetary financial institution
OECD	Organization for Economic Co-operation and Development
SGB	Social Security Code (Sozialgesetzbuch)
VAT	Value added tax

<sup>1</sup> Publication in this document does not establish an entitlement to provision of the rates by the Deutsche Bundesbank. The Deutsche Bundesbank reserves the right to cease publishing the information on its website in future. No explicit or implicit assurances or guarantees are made as to the up-to-dateness, accuracy, timeliness, completeness, marketability or suitability of the data as interest rates or reference interest rates. The European Money Markets Institute (EMMI), Euribor EBF, Euribor ACI, the Euribor Panel Banks, the Euribor Steering Committee, the European Central Bank, Reuters and the Deutsche Bundesbank shall not be liable in the event of discrepancies, incompleteness or late provision of the money market rates in question. Information on Euribor® daily rates administered by the EMMI is available here: <https://www.emmi-benchmarks.eu/benchmarks/euribor/>.

<b>Content</b>	<b>Page</b>
<b>I. Overview of key economic data compared internationally</b>	
1. Real gross domestic product in selected countries	4
2. Real gross domestic product per capita in selected countries	5
3. Unemployment rate in selected countries	6
4. Consumer price index in selected countries	7
5. Harmonised Index of Consumer Prices in selected countries	8
6. Current account balance in selected countries	9
<b>II. Monetary and banking statistics data</b>	
1. Money stock and credit volume in Germany until 1998	10
2. German contribution to money stock and credit volume in the euro area	11
3. Number of credit institutions and their branches	12
4. Key figures in payment transactions	13
<b>III. Money and capital market</b>	
1. Central bank interest rates	14
2. Money market rates	15
3. Deposit and lending rates of German banks	16
4. Capital market developments	17
<b>IV. Domestic economy</b>	
1. Key economic indicators	18
2. Gross value added by economic sector	19
3. Aggregate profitability	20
4. Gross capital formation and saving	21
5. Budget balance by sector	22
6. Gross fixed capital formation	23
7. Housing investment in selected countries	24
8. Private saving ratio in selected countries	25
9. Household income and expenditure	26
10. Research and development in selected countries	27
11. Patents in selected countries	28
<b>V. Labour market and wages</b>	
1. Population and labour market	29
2. Labour income	30
3. Labour productivity and wage costs	31
<b>VI. Prices</b>	
1. Selected price indicators for Germany	32
2. House prices in selected countries	33
<b>VII. Enterprises</b>	
1. Balance sheet structure and profitability of non-financial corporations	34
<b>VIII. Public finances</b>	
1. General government sector finances	35
2. General government sector debt	36
<b>IX. External sector</b>	
1. Current account and capital account	37
2. Financial account	38
3. International investment position	39
4. External position of the Deutsche Bundesbank	40
5. Shares of selected country groups and countries in the foreign trade of the Federal Republic of Germany – exports (fob)	41
6. Shares of selected country groups and countries in the foreign trade of the Federal Republic of Germany – imports (cif)	42
7. Export and import ratios of selected countries	43
<b>X. Exchange rates</b>	
1. Bilateral exchange rates	44
2. Effective exchange rates of the euro	45
3. Price competitiveness	46
<b>XI. Loss of purchasing power of money</b>	
1. Loss of purchasing power depending on the inflation rate	47

Sources: Federal Statistical Office, Eurostat, S&P Global, OECD and Bundesbank calculations. 1 Data up to 1959 contain supplementary estimates for Saarland and West Berlin. Before 1970 in constant prices, from 1970 in prior-year prices. From 1960 to 1969 pursuant to ESA 1979, from 1970 to 1990 pursuant to ESA 1995, and from 1991 pursuant to ESA 2010. From 1991 Germany, prior to that West Germany. 2 From 1970 38 OECD countries, prior to that estimate based on rate of change of 25 OECD countries.

Sources: Federal Statistical Office, Eurostat, S&P Global, IMF, OECD, World Bank and Bundesbank calculations. 1 Data up to 1959 contain supplementary estimates for Saarland and West Berlin. Before 1970 in constant prices, from 1970 in prior-year prices. From 1960 to 1969 pursuant to ESA 1979, from 1970 to 1990 pursuant to ESA 1995, and from 1991 pursuant to ESA 2010. From 1991 Germany, prior to that West Germany. 2 From 1970 38 OECD countries, prior to that estimate based on rate of change of 25 OECD countries.

\* Up to and including 1989 West Germany, from 1991 Germany. Data for 1990 were subsequently adjusted to smooth the associated break. Up to and including 1955 excluding Saarland. **1** Based on month-end data. **2** 1985 statistically adjusted for Bundesbank balances temporarily transferred to credit institutions (pursuant to Section 17 of the Bundesbank Act (Bundesbankgesetz) in the version valid until 15 July 1994). **3** From 1985 the figures contain data for all credit cooperatives (previously partial survey). **4** Based on the mean of two consecutive month-end figures. **5** Daily average in December. Seasonally adjusted. **6** Excluding Deutsche Bundesbank credit.

\* Credit institutions pursuant to Section 1(1) of the German Banking Act (Kreditwesengesetz). Until 1994 excluding postal giro and postal savings bank offices, until 1971 excluding building and loan associations, and until 1989 excluding housing enterprises with a saving facility. Until 1991 only branches within the meaning of Section 24(1) number 7 of the Banking Act with lodgements and withdrawals, i.e. excluding deposit-receiving offices, purely foreign exchange bureaus, commission agencies, sub-offices and representative offices; from 1992 without this restriction. Registered offices, registered secondary offices and other offices of credit institutions are recorded as branches provided they engage in banking business. The first branch of a foreign bank in Germany is recorded as a credit institution pursuant to Section 53(1) of the Banking Act, and all others as branches. Up to 1990 West Germany, from 1991 Germany. From 1995 including Deutsche Postbank AG. From 2008, investment companies are no longer classified as credit institutions and are therefore no longer included in these statistics. <sup>1</sup> Including sub-branches (e.g. city branches), if reported. <sup>2</sup> Minimum 50% equity interests in credit institutions (until 31 December 1998, including factoring and leasing companies), excluding their branches.

Source: Deutsches Geld- und Bankwesen in Zahlen 1876 – 1975, Verlag Fritz Knapp GmbH, Frankfurt am Main, 1976, pp. 274 ff., and Bundesbank calculations. 1 Not officially set or quoted. The rates given here are unweighted monthly averages based on data reported by Frankfurt banks. Beginning in March 1970 the series were based on a new, broader survey group. Up to June 1990, calculated using the German 360/360 days method; from July 1990, using the actual/360 method. Data no longer collected as from 1 June 2012. 2 Up to December 1996 annual averages of daily money market rates reported by Frankfurt banks; for 1997 and 1998 annual averages of the daily FIBOR rates for overnight money (O/N); from 4 January 1999 to 30 September 2019 weighted EONIA average for overnight money in the interbank market calculated by the European Central Bank on the basis of effective transactions. Since 1 October 2019 calculated as the Euro Short-Term Rate (€STR). Please take note of the disclaimer issued by the European Central Bank in its capacity as the administrator of the Euro Short-Term Rate: [https://www.ecb.europa.eu/stats/financial\\_markets\\_and\\_interest\\_rates/euro\\_short-term\\_rate/html/index.en.html](https://www.ecb.europa.eu/stats/financial_markets_and_interest_rates/euro_short-term_rate/html/index.en.html). This disclaimer also applies to publications by the Deutsche Bundesbank. 3 Up to December 1990 money market rates reported by Frankfurt banks; from January 1991 FIBOR rates; from January 1999 Euribor® rates. Euribor® average rates are Bundesbank calculations based on Euribor® daily rates calculated by the European Money Markets Institute (EMMI). These are unweighted averages. All data are correct to the best of our knowledge. For information on the provision of Euribor® rates, see Section 0. Contents and explanatory notes, p. 2.

1 Up to 1966 government-regulated interest rates. Limited comparability with the averages of the freely agreed interest rates from 1967. 2 From 1949 to 1966 costs of agreed current account credit. No interest rate fixation period for loans with a maturity of 4 years or more. As a rule, the nominal rates for agreed loans were 4.5% higher than the discount rate. Until 28 February 1965 the loan fee for agreed loans was included in the rates. From 1967 to October 1996 loans of less than DEM 1 million; from November 1996 to December 2001 loans of DEM 200,000 up to but not exceeding DEM 1 million; from January 2002 to December 2002 loans of € 100,000 up to but not exceeding € 500,000. From January 2003 revolving loans and overdrafts. 3 From 1949 to 1966 with an agreed maturity of 90 to 179 days. For deposits of more than DEM 50,000 or DEM 1 million, higher rates applied from 1 September 1949 to 19 November 1958. From 1967 to May 1986 maturity of 3 months; from June 1986 to October 1996 maturity of 1 month to 3 months; thereafter 1 month. From July 1966 to May 1986 the rates refer to time deposits of less than DEM 1 million; from June 1986 to December 2001 of DEM 100,000 up to but not exceeding DEM 1 million; from January 2002 of € 50,000 up to but not exceeding € 500,000. From January 2003 interest rates on households' deposits with an agreed maturity of up to 1 year. 4 Up to December 2002 computed as unweighted arithmetic mean of reported interest rates. From January 1991, the interest rates of banks in the former GDR were also included in the survey. Up to June 1993 savings deposits at statutory notice. Only minimum rates of return, but no premium or bonus. From January 2003 the interest rates are computed as volume-weighted averages from the monthly data (volume-weighted average rate of holdings at month-end), including loyalty incentives and growth premiums. 5 Effective interest rate; until May 1982 loans with any kind of interest rate agreement; from June 1982 mortgage loans at fixed 5-year rates. From January 2003 lending rates for households for house purchase.

Sources: Federal Employment Agency, Federal Statistical Office and Bundesbank calculations. \* Up to 1991 West Germany, from 1992 Germany. 1 1961, 1970 and 1987 result of the census. 2 Domestic concept, 1950 to 1967 Bundesbank estimate. 3 Until 1958 excluding Saarland. 4 Up to and including December 2004 month-end figures, as of January 2005 mid-month figures. 5 As of January 2004, unemployed persons excluding participants in aptitude testing and training measures. Early 2005: rise influenced by inclusion of recipients of social assistance who are able to work. From May 2009, unemployed excluding persons newly registered on the books of private employment agencies. 6 Unemployed as a percentage of the civilian labour force; up to and including 1968 as a percentage of employed labour force. See also Table I.3 Unemployment rate according to ILO definition. 7 Until 1952 excluding Berlin. From 1992 to 2006 excluding short-time working in construction and agriculture. From 2007, in accordance with Section 96 of the Social Security Code III (SGB III) excluding recipients of seasonal short-time working benefits and restructuring short-time working benefits (short-time workers in rescue companies). From 2009, values revised following change in data recording methodology. 8 From January 2000, excluding government-assisted forms of employment and seasonal jobs, including jobs located abroad.

<sup>1</sup> Direct investment comprises financial relations with domestic and foreign enterprises where 10% or more of the shares or voting rights are directly attributable to the capital provider, or directly and indirectly more than 50% are attributable to this investor; including branches and permanent establishments. Short-term financial and trade credits, construction sites that have existed for more than one year and all investments in real estate are also deemed to be direct investment. <sup>2</sup> Including employee stock options.

IX. External sector

4. External position of the Deutsche Bundesbank\*

Until end of 1998 in DEM billion, from 1999 in € billion – year-end data

\* From 1999 assets and liabilities vis-à-vis all euro area countries and non-euro area countries. Until December 2000, due to revaluation the stocks are recorded at market prices at the end of every quarter; within a quarter, however, the stocks are calculated on the basis of cumulated transaction values. From January 2001, all month-end figures are valued at market prices. <sup>1</sup> From 1956 to 1971, deviations occur in the data on the international investment position as a number of the Bundesbank's securitised exposures to the World Bank are not included here. <sup>2</sup> Primarily exposures to the European Monetary Institute EMI (former EMCF).
